CPR and First Aid Certification

CPR and First Aid certification is being offered on Thursday, November 15, 2001, from 1:30 p.m. - 5:30 p.m. in the Body Shop, Studio B. Cost is \$10 for employees and EDS; \$40 for contractors. To register or for more information contact mailto:wellness@tcpolice.org. Registration deadline is Monday, November 12.

Mammogram Screening

The M. D. Anderson Mobile Mammography van will be at Enron November 12-16, 2001, from 8 a.m. - 4 p.m. Cost is \$25 for Enron employees, spouses, retirees and EDS; \$85 for Contractors. Payment must be made by check or money order ONLY, payable to Enron Corp., and is due at time of service. NO CASH WILL BE ACCEPTED. Appointments can be made by calling 713-745-4000. For more information about M. D. Anderson's mobile mammography program: <http://www.mdanderson.org/Department/s/MobileMamm/dIndex.cfm?pn=29C87A2E-B66A-11D4-80FB00508B603A14>.

Please consider adding an extra \$1 to the mammogram cost for The Rose. The Rose is a non-profit organization that provides mammograms to women without access to medical insurance. <http://www.the-rose.org/>. Other inquiries can be directed to: mailto:wellness@tcpolice.org.

Bill, you will be migrated to our LAN Tuesday night and be able to access the ETS Lan & Microsoft Outlook on Wednesday morning. They told me you should be able to access Outlook on the EES LAN Monday and Tuesday until then, so hopefully you won't miss any messages. I'm taking a vacation day tomorrow but will be back Monday, so if you have any questions or problems tomorrow, please call Denise LaGesse at 3-6704 or Ruth Mann at 3-3595 and they can help you....See you Monday!!

Hi Lupita,
I would be happy to migrate Bill on Monday, Oct. 22nd but we are already well above our maximum number of migrations. I can, however migrate the following day. Please confirm if this will work for you or if you wish to migrate at a later time.

Thanks,
E.

Emmanuel,

Please schedule the Outlook migration for Bill Rapp for 10/22. He is transferring from EES to ETS.

This is his info:

LoginID= brapp
FirstName=Bill
LastName= Rapp
Business Unit= ETS
Date of Move=10/22

Thanks!
Lupita Cantu

Subject: E-Request 68478 - Bill Rapp

Bill Rapp's mail will be migrated from Lotus Notes to Outlook by the Outlook Migration Team. Please send an email to Emmanuel Mangin and provide the following information: LoginID, FirstName LastName, Company or Business Unit, and date of move. Also, please tell Emmanuel that Drew is moving from EES to ETS.

Many Thanks!

Lisa Scully

Subject: Requested Information - Cost for Flat Panels

Jean -

As requested, here is the breakdown of the costs of purchasing the TFT flat panels from Corp. GSS is still working on the cost of the plasma, and I will get to you as soon as possible.

First Request for Gas Logistics:

50 15" flat panels @ \$200.00/unit - \$10,000.00
5 18" flat panels @ \$450.00/unit - 2,250.00

Total: \$12,250.00

2nd Request (Mary Kay Miller):

12 15" flat panels @ \$200.00/unit - \$ 2,400.00
4 18" flat panels @ \$450.00/unit - 1,800.00

Total: \$ 4,200.00

3rd Request (Verbal for Dan McCarty):

10 18" flat panels @ \$450.00/unit - \$ 4,500.00

As we have discussed, we still do not have approval from the Bankruptcy court to officially sell them to you, but we can "loan" them to you and once approval is gained, we can square away the cost.

Please call me at X58416 if you have any questions.

Have a great New Year!

Regards,

Mike

PGS is pleased to announce its new winter/spring seminar schedule for Houston and Philadelphia. (See seminar list below).

For more information, call 412-279-9298 or visit
<http://www.pgsenergy.com/schedule.html>

Please forward this information to anyone who might benefit from a better understanding of energy derivatives, risk management, gas-to-electricity arbitrage, statistics or electric power trading.

Available seminars include:

- 1) Fundamentals of Energy Futures, Options & Derivatives
- 2) Fundamentals of the Electric Power Industry
- 3) Gas-to-Electricity Arbitrage & How to Maximize the Profitability of Electric Generation Assets
- 4) Developing Effective Risk Management Policies

- & Procedures (John Wengler)
- 5) Fundamentals of Statistical Analysis (Dr. Ken Skinner)
- 6) How to Value Electric Generation Assets as Real Options
- 7) Fundamentals of Value-at-Risk (Soli Forouzan)

Save money by bringing a group of 4 or more. With a group rate, your cost for our \$1,295 seminars is reduced to \$895 per attendee-- a savings of \$1,600 from our regular prices. The group price for the \$695 programs is \$495.

Thank you.

John Adamiak

Barry and Kim,

Attached is my first go at our European option model. It is capable of valuing monthly physical or financial calls/puts. I've tried to make it user friendly by using a similar format as we are using for our swap/spread models. Please let me know if you like its functionality, and provide me some input on how you might want to fiddle with it when doing real time pricing.

Phil

Subject: RE: Crestone Imbalance

I'm sending the invoice/statement via e-mail. Let me know if you can't open it. The Crestone OBA Imbalance is the summary we started on showing the discrepancies on the receipt side. A lot of it is rounding from the Crestone spreadsheets to our "whole" numbers we put into the Unify system. The other Imbalance report is on the 3rd tab of the Enron Statement report. Let me know if you have any questions.

Gloria,
Thanks for the heads up on 9/01. I'm printing the report right now and I'll get with Amy tomorrow (she's out today). If you would like to look at August that would be fine - I would just like to stress that changing any receipts will affect our purchases and likewise with our deliveries. If you could define the differences first then maybe I can lead you to where the issues are. How does that sound?

I also think by doing this it will get you familiar with this pipeline and maybe in the future you could take this part over. It's just very confusing at first.

Let me know ,
Theresa

Your Date of Migration is: October 23rd

YOU WILL BE UNABLE TO SEND E-MAIL unless you take the following action:

Please go through your Notes email and clean out as many old/un-needed email items as possible BEFORE your date of migration. After you are migrated to Outlook you will only be allocated 100MB of total Mailbox space. If more than this amount of data is migrated to Outlook YOU WILL NOT BE ABLE TO SEND E-MAIL until it is below the 100MB limit. Cleaning up your Notes email now will prevent this from happening to YOU.

Enron's messaging platform is migrating from Lotus Notes to Microsoft Outlook 2000 worldwide. You will be accessing Outlook for all of your email functions.

WHY IS ENRON MIGRATING TO OUTLOOK 2000?

Many factors contributed to the decision to migrate from Lotus Notes to Microsoft Exchange/Outlook. The most prominent factors were:

- ? Significant advantages to moving to a product that is more integrated with current Enron apps (Windows 2000, Office and Internet Explorer)
- ? More efficient Shared PC and Roaming User features
- ? Improved support and integration for Palm/CE devices
- ? Instant Messaging capabilities

WHAT IS BEING MIGRATED TO OUTLOOK 2000?

- ? Email Messages. From the date of your scheduled migration, the last (30) thirty days of your Email will be converted for use in Outlook.
- ? All your folders in Notes you use to store email messages in.
- ? To Do Items
- ? Journal Items
- ? Calendar Entries dating from (1) one year in the past to (10) ten years in the future will be converted.
- ? Address Books, but NOT your Distribution Lists that you created. You will need to re-create these in Outlook.

Thank you,

Outlook 2000 Migration Team

Please find attached file. Transportation & Storage Revenue is right off the Earning Model Income Statement. Carlton data can be found in the Commercial Function detail within the "Database" worksheet of the Earning Model. The Cash Flow verbiage is very general related to the subject matter, but does provide a business reason on a Direct Cash Flow basis for an item buried within the Indirect Cash Flow format. Call me if you have any further questions.

Can you help explain how the data in the attached file matches the detailed budgets and current estimates you have provided to me? It may simply, I just haven't had time to look.

Rod,

Thanks for the email. Can you help me match the information in this email to your operating plan or cash flow analysis?

Kyle

Louise,

Cancellation charges have been the focus because the cash is provided by e-Next banks (turbopark). The cash paid to date is less than the actual contractual obligation to date. We do not need balance sheet cash to continue, but we need to come up with B/S cash if we terminate. Hopefully the following clarifies:

Cash Payments to Date:
GE7FA 13,328
ST 909
HRSG 1480
Interest 350
Total: 16,067

Next Payments:
GE7FA 1,566 Nov 21
ST 2,849 Dec 1
HRSG 2,960 Dec 1

These are estimates - the timing of the actual payments depends upon when the vendor completes some of the work - payment based on milestones

Cancellation Charges:
10/31: \$23MM
11/1: \$24MM
11/30: \$28.3MM

Each day from 11/1 to 11/30 the cancellation charge increases by approx \$150K

DASH is based on contractual exposure, not cash out the door, hence the request at this time. In addition to looking for opportunities to sell the equipment and the project, we are looking into the ST and HRSG contracts to make sure the vendors are not in any sort of breach.

Subject: RE: Longview DASH Request

sorry missing the message

When are the payments and how much are they if we keep moving forward as I am not prepared to write down a 23mm loss.

Payments and payment dates please.

Thanks

Louise

Please say not soon too.

-----Original Message-----

Subject: Longview DASH Request

Louise:

A termination of equipment associated with the Longview project on or before 10/31/01 will require Enron to write-off approximately \$23 million, not inclusive of approximately \$3 million in development costs to date.

To extend orders for equipment to 11/30/01 will cost an additional \$5.3 million in cancellation charges.

To extend orders for equipment to 12/31/01 will cost an additional \$8.7 million (inclusive of the \$5.3 million above, therefore, net \$3.4 million) in cancellation charges.

Termination at any time between now and year-end 2001 provides no material recovery potential for money spent.

Regards,

Chip Schneider

As you know, Enron has signed a merger agreement by which Dynegy will acquire Enron. We expect the transaction to close following shareholder and regulatory approvals and various conditions to closing.

Even though Enron has entered into this agreement, U.S. and foreign antitrust laws require that Enron and Dynegy continue to operate independently of each other. In particular, to the extent that Enron and Dynegy are competitors in various businesses or markets, their respective activities must be undertaken at arm's length until the transaction has closed. Therefore, for antitrust purposes you should treat Dynegy as you would any other unaffiliated company notwithstanding the merger agreement.

In addition, all information, documents and communications related to the merger between Enron and Dynegy should be coordinated through and approved by Mark Muller, Lance Schuler, Robert Eickenroht, Mark Haedicke, Rob Walls or Greg Whalley of Enron. It is absolutely critical that this procedure be maintained. To the extent that information is required to be disclosed to Dynegy under the merger agreement, then such disclosure should be approved by one of the foregoing individuals.

If you have any questions concerning this notice, please contact Lance Schuler (

713/853-5419), Robert Eickenroht (713/853-3155), Mark Haedicke (713/853-6544) or Rob Walls (713/646-6017). Thank you for your help in this matter.

Steve,

John Griffith, a financial trader has approached me asking for some support of some risk/trade worksheets that he had been receiving help from Greg Couch on. Franky Sulistio is currently working with John to learn these applications so that he can help, but John is really looking for a more risk knowledgeable resources, one that can support him from front to back office. Greg Couch was apparently developing a good bit of stuff for him and risk.

Do you know who I could point him to for this support?

Thanks,

Dave

Dear Chris

PRIVACY POLICY NOTICE TO INDIVIDUAL CLIENTS ABOUT CONSUMER FINANCIAL INFORMATION

Our Privacy Policy has been sent to you in accordance with the rules of the Federal Trade Commission as provided by the Gramm-Leach-Bliley Act.

PricewaterhouseCoopers LLP respects your right to keep your personal information confidential and to avoid unwanted solicitations. We trust that our Privacy Policy will provide you with a better understanding of our commitment to keep your personal information confidential and secure while serving you.

INFORMATION WE HAVE ABOUT YOU

We receive information about you that is not available publicly. This information is received from a variety of sources, including:

* Information you provide directly to us, such as: your name, address, social security number, assets, liabilities and income.

* Information we receive with your authorization from third parties, such as: financial institutions, companies, and other individuals.

* Information from consumer reporting agencies.

PROTECTION AND USE OF INFORMATION

We use the information acquired solely for the purpose of providing tax consulting, compliance and other professional advisory services to you. We take reasonable steps to keep confidential the information acquired. Our right to disclose the information is limited by our Code of Conduct, applicable law, the Code of Professional Conduct of the American Institute of Certified Public Accountants (AICPA) and accounting authorities of foreign countries. Where appropriate, information provided by us to employees, affiliates and nonaffiliated third parties who perform services for us, is subject to contractual agreements which prohibit these parties from disclosing or using the information other than for the purposes for which the information was disclosed. We also maintain reasonable physical, electronic, and procedural safeguards in compliance with applicable laws and regulations to protect your nonpublic personal information.

GENERAL RESTRICTIONS ON DISCLOSURE OF NONPUBLIC PERSONAL INFORMATION TO AFFILIATES AND NONAFFILIATED THIRD PARTIES

As tax preparers, we are prohibited by Internal Revenue Code Section 7216 from disclosing your income tax return information without your consent, other than for the specific purpose of preparing, assisting in preparing or obtaining and providing services in connection with the preparation of an income tax return for you. Furthermore, as members of the AICPA engaged in income tax preparation or financial planning, we are generally prohibited from disclosing confidential client information about you to affiliates and nonaffiliated third parties without your specific consent.

PARTIES TO WHOM WE DISCLOSE INFORMATION

We do not disclose any nonpublic personal information about our clients or former clients to our affiliates or to nonaffiliated third parties except as permitted by law and the AICPA Code of Professional Conduct. Nonpublic personal information about current and former clients may be disclosed to both our affiliates and nonaffiliated third parties as permitted by law and the AICPA Code of Professional Conduct, as follows:

1. Complying with a validly issued and enforceable summons or subpoena.
2. In the course of a review of our firm's practices under the peer review rules of the AICPA or a similar professional board.
3. Initiating a complaint or responding to an inquiry made by the professional ethics division or trial board of the AICPA or duly constituted investigative or disciplinary body of another State CPA Society or Board of Accountancy.
4. A review of a professional practice of our firm in conjunction with a prospective purchase, sale, or merger of all or part of our practice, provided that we take appropriate precautions (for example, through a written confidentiality agreement) so the prospective purchaser does not disclose information obtained in the course of the review.
5. Participating in actual or threatened legal proceedings or alternative dispute resolution proceedings either initiated by or against us, provided we disclose only the information necessary to file, pursue, or defend against the lawsuit, and take reasonable precautions to ensure that the

information disclosed does not become a matter of public record.

6. Providing information to affiliates and nonaffiliated third parties who perform services or functions for us pursuant to a contractual agreement which prohibits the third party or affiliate from disclosing or using the information other than for the purposes for which the information was disclosed.

PRIVACY POLICY UPDATES

We will provide notice of our Privacy Policy annually, as long as you maintain an ongoing relationship with us. The policy may change from time to time.

With the cancellation of a number of Surety Bonds by our providers, we are faced with a potential credit crunch in NEPOOL.

Also, it is my understanding (although I haven't seen anything) that our Nov 2001 bills are due in all of the markets on Dec 20, 2001.

Christi and I are trying to work out our payment plans (if any) and other requirements to keep our books afloat.

We need to have support on understanding any payment obligations (and bills if we have them) and issues (e.g., Annual Fees). Who can we talk with for each mark

et?

Thanks,

Jim

Hello Paul and Mark. FYI: CIG proposes to construct and operate facilities necessary to transport additional volumes of approximately 55 MDth per day of natural gas out of the Raton Basin Area in Colorado and New Mexico.

The total cost of the project is \$26,896,800 with a proposed rolled-in treatment for the expansion out of the Raton Basin Area.

Question - Do you all have any issues that you want us to address in regards to the expansion or will a plain vanilla intervention be fine? The intervention is due Nov. 5th.

If you could get to me between now and the early part of next week, that would be great.

Melinda

this is an old one but a great one.
If you dont like this email, then you just don't understand.

A chronology of events for Saturday, December 4, 1999,
and the early morning hours of Sunday,
December 5, 1999:

6:00 Arise, play the Eyes of Texas and
Texas Fight at
full-freaking blast
6:20 Get in car, drive to New Braunfels

7:30 Tee off (me and a buddy were the
FIRST tee-time
of the morning)

8:50 Turn 9 (crack open first beer)

8:53 Crack open second beer

8:58 Crack open...(you get the idea)

10:30 Finish 18 (holes, as well as
beers), sign

scorecard for smoooooth 95

10:35 Headed for San Antonio

10:50 Buy three 18-packs for pre- and
post-game
festivities

11:10 We decide we don't have enough
booze, so we
double-back to a liquor store and buy
the good ol' 750

ml plastic bottle "Traveler" Jim Beam

11:50 Arrive at the tailgate spot.

Awesome day. Not

a single cloud in the sky. About 70
degrees.

11:55 I decide that we're going to kick
the shit out
of Nebraska.

11:56 I tell my first Nebraska fan to
go fuck
himself.

12:15 The UT band walks by on the way
to the

Alamodome. We're on the second floor of
a two-story
parking garage on the corner (a couple
hundred of us).

We're hooting and hollering like

wildmen. The band

doubles back to the street right below
us and

serenades us with Texas Fight and The
Eyes of Texas.

AWESOME MOMENT.

12:25 In the post-serenade serendipity,
50-100 grown
men are bumping chests with one
another, each and
every one of them now secure and
certain of the fact
that we are going to kick the
shit out of Nebraska.

1:00 The Nebraska band walks by on the
way to the
Alamodome. Again, we hoot and holler
like wildmen.
Again, the band doubles back and stops
right below us
to serenade us, this time, however,
with the Nebraska
fight songs. Although somewhat
impressed by their
spirit and verve, we remain convinced
that we are
going to kick the shit out of
Nebraska.

1:30 I begin the walk to the Alamodome,
somehow
managing to stuff the "Traveler" and 11
cans of beer
into my pants.

1:47 I am in line surrounded by
Nebraska fans. They
are taunting me. I am taunting back,
still certain
that we are going to kick the
shit out of Nebraska. I
decide to challenge a particularly
vocal Nebraska fan
to play what I now call and will
forever be remembered
as "Cell-Phone Flop Out." Remember flop
out for a
dollar? The rules are similar. I tell
this Nebraska
jackass that if he's so confident in
his team, he
should "flop out" his cell phone RIGHT
NOW and make
plane reservations to Phoenix for the
Fiesta Bowl.

And then I spoke these memorable words:

"And not
those
damn refundable tickets, either! You
request those
non-refundable, non-transferrable
sons-of-bitches!"
He backs down. He is unworthy. I call
Southwest
Airlines and buy two tickets to
Phoenix,
non-refundable
and non-transferrable. Price: \$712. He
is humbled.
He lowers his head in shame. I raise my

cell phone in
triumph to the cheers of hundreds of
Texas fans. I am
KING and these are my subjects. I
distribute the 11
beers in my pants to the cheering
masses. I RULE the
pre-game kingdom.
2:34 Kickoff. Brimming with confidence,
I open the
Traveler and pour my first stiffy.
2:45 I notice something troubling:
Nebraska is big.
Nebraska is fast. Nebraska is very
pissed off at
Texas.
3:01 The first quarter mercifully ends.
9 yards
total offense for Texas. Zero first
downs for Texas.
I'm still talking shit. I pour
another stiffy from
the Traveler.
3:36 Four minutes to go in the first
half: the
Traveler is a dead soldier. I buy my
first \$5 beer
from the Alamodome merchants. While I
am standing in
line, a center snap nearly decapitates
Major
Applewhite
and rolls out of the end zone. Safety.
3:56 Halftime score: Nebraska 15, Texas
0. I wish I
had another Traveler.
4:11 While urinating next to a Nebraska
fan in the
bathroom at halftime, I attempt to
revive the classic
Brice-ism from the South Bend bathroom:
"Hey, buddy,
iiiiiiiiice cock." He is
unamused.
4:21 I buy my 2nd and 3rd \$5 beer from
the Alamodome
merchants. I share my beer with two
high school girls
sitting behind me. Surprisingly, they
are equipped
with a flask full of vodka. I send them
off to
purchase \$5 Sprites, so that we may
consume their
vodka. I have not lost faith. Nebraska
is a bunch of
pussies.
4:51 No more vodka. The girls sitting
behind me have
fled for their lives. I purchase two
more \$5 beers
from the Alamodome merchants.

5:18 Score is Nebraska 22, Texas 0. I am beginning to lose faith. This normally would trouble me, but I am too drunk to see the football field.

5:27 I call Southwest Airlines: "I'm sorry, sir. Those tickets have been confirmed and are non-refundable and non-transferrable."

5:37 I try to start a fight with every person behind the concession counter. As it turns out, the Alamodome has a policy that no beer can be sold when there is less than 10 minutes on the game clock. I am enraged by this policy. I ask loudly: "Why the fuck didn't you announce last call over the fucking PA system??!!"

5:49 Back in my seats, I am slumped in my chair in defeat. All of a sudden, the Texas crowd goes absolutely nuts. "Whazzis?," I mutter, awaking from my coma, "Iz we winnig? Did wez scort?" Alas, the answer is no, we were not winning and we did not score.

The largest (by far) cheer of the day from the Texas faithful occurred when the handlers were walking back to the tunnel and Bevo stopped to take a gargantuan shit all over the letters "S", "K", and "A" in the "Nebraska" spelled out in their end zone. I cheer wildly. I pick up the empty Traveler bottle and stick my tongue in it. I am thirsty.

6:16 Nebraska fans are going berserk as I walk back to the truck. I would taunt them with some off-color remarks about their parentage, but I am too drunk to form complete sentences. With my last cognitive thought of the evening, I take solace in the fact that if we had not beaten them in October, they would be playing Florida State for the national championship.

6:30 Back in the car. On the way back to Austin for the 8:00 Texas-Arizona tip off. We can still salvage the day! I crack open a beer. It is warm. I don't care.

7:12 We have stopped for gas. I am hungry. I go inside the store. I walk past the beer frig. I notice a Zima. I've never had a Zima. I wonder if it's any good. I pull a Zima from the frig. I twist the top off and drink the Zima in three swallows.

Zima sucks. I replace the empty bottle in the frig.
7:17 There is a Blimpie Subs in the store. I walk to where the ingredients are, where the person usually makes the sub. There is no one there. I lean over the counter and scoop out half a bucket of black olives. I eat them. I am still hungry. I lean further over the counter and grab approximately two pounds of Pastrami. I walk out of the store grunting and eating Pastrami. The patrons in the store fear me. I don't care.

8:01 We are in South Austin. I have been drinking warm beer and singing Brooks and Dunn tunes for over an hour. My truck-mate is tired of my singing. He suggests that perhaps Brooks and Dunn have written other good songs besides "You're Going to Miss Me When I'm Gone" and "Neon Moon" and that maybe listening to only those two songs, ten times each was a bit excessive. Perhaps, he suggests, I could just let the CD play on its own. I tell him to fuck off and restart "Neon Moon."

8:30 We arrive at the Erwin Center. My truckmate, against my loud and profane protestations, parks on the top floor of a nearby parking garage. I tell him

he's an idiot. I tell him we will never get out. I tell him we may as well pitch a fucking tent here. He ignores me. I think he's still pissed about the Brooks and Dunn tunes. I whistle "Neon Moon" loudly.

8:47 I am rallying. I have 4 warm beers stuffed in my pants. We're going to kick the shit out of Arizona.

9:11 Halftime score: Texas 31, Arizona 29. I am pleased. I go to the bathroom to pee for the 67th time today. I giggle to myself because of the new opportunity to do "the bathroom Brice." There are no Arizona fans in the bathroom. I am disappointed. I tell myself (out loud) that I have a "Niiiiiice cock." No one is amused but me.

9:41 I walk to the bathroom while drinking Bud Light out of a can. Needless to say, they do not sell beer at the Erwin Center, much less Bud Light out of a can. I am stopped by an usher: "Where did you get that, sir?" I tell him (no shit): "Oh, the cheerleaders were throwing them up with those little plastic footballs. Would you mind throwing this away for me?" I take the last swig and hand it to him. He is confused. I pretend I'm going to the bathroom, but I run away giggling instead. I duck into some entrance to avoid the usher, who is now pursuing me. I sneak into a large group of people and sit down. The usher walks by harmlessly. I am giggling like a little girl. I crack open another can of Bud Light.

9:52 I am lost. In my haste to avoid the usher, I have lost my bearings. I have no ticket stub. I cannot find my seats. Texas is losing.

10:09 Texas is being screwed by the refs. I am

enraged. I have cleared out the seats around me because I keep removing my hat and beating the surrounding chairs with it. A concerned fan asks if I'm OK and perhaps I shouldn't take it so seriously.

I tell him to fuck off.

10:15 After the fourth consecutive "worst fucking call I have EVER seen," I attempt to remove my hat again to begin beating inanimate objects. However, on this occasion I miscalculate and I thumbnail myself in my left eyelid, leaving a one-quarter inch gash over my eye. I am now bleeding into my left eye and all over my shirt. "Perhaps," I think to myself, "I'm taking this a bit seriously."

10:22 I am standing in the bathroom peeing. I'm so drunk I am swaying and grunting. I have a bloody napkin pressed on my left eye. My pants are bloody.

I have my (formerly) white shirt wrapped around my waist. I look like I should be in an episode of Cops.

10:43 Texas has lost. I put my bloody white shirt back on my body and make my way for the exits. I am stopped every 20 seconds by a good samaritan/cop/security guard to ask me why I am covered in blood, but I merely grunt incoherently and keep moving.

10:59 With my one good eye, I have located the parking garage. I walk up six flights of stairs, promise that when I see my friend I will punch him in the face for making me walk up six flights of stairs, find the truck, and collapse in a heap in the bed of the truck. I look around and notice that traffic is lined up all the way around the garage, six whole flights, and no one is moving. I take a nap.

11:17 I awake from my nap. I see my friend in the

driver's seat. I lift my head to look out the bed of the truck and notice that traffic is lined up all the way around the garage, six whole flights, and no one

is moving. I am too tired to punch my friend. I call my friend a "Stupid fuck."

11:31 I lift my head to look out the bed of the truck and notice that traffic is lined up all the way around the garage, six whole flights, and no one is moving. I call my friend a "Stupid fuck."

11:38 I lift my head to look out the bed of the truck and notice that traffic is lined up all the way around the garage, six whole flights, and no one is moving. I call my friend a "Stupid fuck."

11:47 I lift my head to look out the bed of the truck and notice that traffic is lined up all the way around the garage, six whole flights, and no one is moving. I call my friend a "Stupid fuck."

11:58 I am jostled. The truck is moving. I lift my head to look out the bed of the truck and notice that traffic is beginning to move on the second floor. I jump out of the truck, walk to the edge of the parking facility, and pee off the sixth floor onto the street below. My friend looks at me like I just anally violated his minor sister. I turn around and pee on the front of his truck while singing the lyrics to "Neon Moon."

12:11 We are moving. We are out of beer. I jump from the truck and go from vehicle to vehicle until someone gives me two beers. I am happy. I return to my vehicle.

12:26 We have emerged from the parking facility. We make our way to my apartment and find Ed sitting on

the couch with a freshly opened bottle
of Glenlivet on
the coffee table in front of him. We
are all going to
die tonight.
12:59 We have finished three-quarters
of the bottle
of Glenlivet. We decide it would be a
wonderful idea
to go dancing at PollyEsther's. Ed has
to pee. He
walks down the hall to our apartment
and directly into
the full length mirror at the end of
the hall,
smashing it into hundreds of pieces. We
giggle
uncontrollably and leave for
PollyEsther's.
1:17 The PollyEsther's doorman laughs
uncontrollably
at our efforts to enter his club.
"Fellas," he says
in between his fits of spastic
laughter, "I've been
working this door for almost a year.
I've been
working
doors in this town for almost 5 years.
And I can
honestly say that I ain't never seen
three drunker
mother fuckers than you three.
Sorry, can't let you
in." We attempt to reason with him. He
laughs
harder.
1:44 We find a bar that lets us in. We
take two
steps in the door and hear "Last call
for alcohol!" I
turn to the group and mutter: "See, dat
wasn't that
fuckin' hard. Day don't fuckin' do that
at the
Awamo...the awaom...the
alab...fuck it, that stadium
we
was at today..." We order 6 shots of
tequila and
three beers.
2:15 Back on the street. We need food.
We hail a
cab to take us the two and one half
blocks to Katz's.
The cab fare is \$1.60. We give him \$10
and tell him
to keep it.
2:17 There is a 20 minute wait. We give
the hostess
\$50. We are seated immediately.
2:25 We order two orders of fried

pickles, a Cobb
salad, a bowl of soup, two orders of
Blueberry
blintzes, two Reuben sandwiches, a
hamburger, two
cheese stuffed potatoes, an order of
fries, and an
order of onion rings.
2:39 The food arrives. We are all
asleep with our
heads on the table. The waiter wakes us
up. We eat
every fucking bit of our food. Most
of the restaurant
patrons around us are disgusted. We
don't give a
shit.
The tab is \$112 with tip.
2:46 I'm sleepy.
9:12 I wake up next to a strange woman.
She is the
bartender at Katz's. She is not pretty.

Thanks Dan, Each of my VP's conduct teleconference calls with their field employees every Monday starting after Stan's staff meeting. Your guys are more than welcome to join them and I'll copy my guys with your memo to let them know.

I am conducting a two day trip to the field after Thanksgiving, traveling to Oklahoma/Texas Panhandle and Central Oklahoma. I will be meeting with Beaver assets employees. If someone familiar with the status of Duke can go along that would be helpful. I have the company plane to get us around and will be spending the night in Oklahoma City. Contact Amelia and she can get you an itinerary.

Phil,

Due to the increasing demands on Stan, I'd like to offer our help in meeting and communicating with the field (Hayes, Harris, Neubauer, Miller, Kilmer, and myself). Stan's already taken, and I'm sure that you have taken, more than your share of unwarranted heat and criticism, so we'll help tow the line. Would there be an opportunity for field visits in the near future? Let me know.

Dan

All,

The Cube is being processed now. I'll alert Adam and Justin when it's completed.

At this moment the exact cause is unknown. However the error appears to have been an authentication error of the cube getting to the FDYPIPELINEPROD database.

Changing the authentication from that provided by CORP domain to the database admin account and password solved the problem.

I'll notify you all of the solution as soon as we determine what caused the failure. In the meantime any reports rerun after the cube finishes processing should have the most recent data.

Thanks,
Kim

Your friends at Match.com

Wall of Champs Is Up! Some sites attempt to impress you with titles won by the guys running the site. I've found most people are just slightly more interested in winning THEIR own league. Footballguys.com is built on the concept of giving YOU information to win YOUR league and tons of you have done just that.

If you've made your playoffs or won your league, let the world know about it. We've got our Wall of Champs up and running and waiting for you. Check it out here <http://footballguys.com/wall2001.cfm> You can add your team here <http://footballguys.com/addwall.cfm> There's not much better than flaunting your success in front of your league members...

Enjoy.

/**

Hi Folks,

Here's how I see the Passing Game Matchups this week.

PLEASE NOTE: See the cheatsheets online at www.footballguys.com for exactly where I rank players and to determine who to start. I always receive emails asking me how I can have a guy ranked highly on the cheatsheet but listed under a matchup that favors the Defense. Just because one matchup may be more favorable than another, that doesn't necessarily mean I'd start the player with the best matchup. Jeff Garcia may have a horrible matchup one week but unless you're sitting on Kurt Warner or Brett Favre, Garcia's your guy no matter who he's lining up against. The matchup info is meant to be just one more tool in your box when it comes to deciding between players.

Note: I've used the player stats sorted by performance over the last four weeks extensively in developing these write-ups. Stats are provided by Mike Hall's excellent FLM League Management Software. <http://www.fflm.com/> for more info. The points scored by position data is from ESPN.com. Let's get to it.

Joe

/**

Passing Game Matchups to Avoid and Exploit

/ ** / ** / ** / ** / ** / ** / ** / ** / ** / ** / ** / ** / ** /

Locks: These games feature Defenses that have struggled lately.

Cincinnati Passing Game vs Tennessee Defense

What a fitting way to wind down the season Sunday as Jon Kitna and Kordell Stewart combined for 662 passing yards and 5 TDs. Kitna had 411 of those yards. Wow. When you throw it 68 times, most every receiver will be involved and that's what happened Sunday. Peter Warrick was very active - maybe the benching helped in week 15. The Titans rank # 31 in Passing Yards Allowed Per Game over the last 4 weeks so this is enticing although you have to wonder if Kitna can do it again. For the year, Tennessee ranks # 29 Fantasy Points Allowed to QBs and # 31 Fantasy Points Allowed to WRs. Check the cheatsheets to see where we rank these guys but clearly, it's a good matchup.

Denver Passing Game vs Indianapolis Defense

Griese only put up 142 yards passing Sunday but it was enough. Expect him to do better this week. Rod Smith is of course, the man here and he'll do well too. The Colts rank # 30 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 27 Fantasy Points Allowed to QBs and # 27 Fantasy Points Allowed to WRs.

Indianapolis Passing Game vs Denver Defense

Manning came up small in the yardage department with under 200 yards Sunday but he did run in one score. Marvin Harrison is of course the clear cut go to guy. Manning's a competitor and you'd have to think he'll give a great effort in the final week with nothing but pride to play for. The Broncos rank # 27 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 9 Fantasy Points Allowed to QBs and # 25 Fantasy Points Allowed to WRs.

St. Louis Passing Game vs Atlanta Defense

Mike Martz showed last week he'll let his guys play. Regardless of the playoff situation, I think you'll see Warner in for at least a half and maybe much more. And like Marshall Faulk, a half of Warner is better than a full game from most other players. Picking the WR is a lottery shot as Holt, Bruce, Proehl, or Hakim are all liable to go off. The Falcons rank # 26 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 30 Fantasy Points Allowed to QBs and # 30 Fantasy Points Allowed to WRs.

/**

Prime Matchups: These games feature Defenses that haven't been strong lately.

Carolina Passing Game vs New England Defense

Can't imagine you're in week 17 with many Carolina guys on the roster. Weinke did ok last week. It's tough when you're upset about Isaac Byrd possibly missing time but that's where they are. Both he and Muhsin Muhammad could miss the last game. The Patriots rank # 28 in Passing Yards Allowed Per Game over the last 4 weeks so they're definitely vulnerable. For the year, they rank # 22 Fantasy Points Allowed to QBs and # 20 Fantasy Points Allowed to WRs. It's a good matchup simply because New England hasn't been much on defense. I have little faith in the Carolina players to take advantage of the matchup though.

Chicago's Passing Game vs Jacksonville Defense

When you think it's going to be all Anthony Thomas, Jim Miller and the passing game decided to show off. Miller put up 252 yards and 2 TDs as the Bears continued to roll. Marty Booker continues to see lots more passes than any other Bear although David Terrell seems to make the most of what he's thrown. The Jaguars rank # 10 in Passing Yards Allowed Per Game over

the last 4 weeks. For the year, they rank # 19 Fantasy Points Allowed to QBs and # 6 Fantasy Points Allowed to WRs.

Dallas Passing Game vs Detroit Defense

Quincy Morgan showed some very nice flashes Sunday hitting Joey Galloway deep. Galloway seems to be the WR of choice. He's worth a gamble for sure. The Lions rank # 25 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 31 in Fantasy Points Allowed to QBs and # 29 Fantasy Points Allowed to WRs so it's a nice matchup. It all depends on whether these guys have the talent to take advantage of it. One more thing, the Cowboys will be doing all they can to get Emmitt Smith his 1,000 yard season so that may be a factor.

Kansas City Passing Game vs Seattle Defense

Trent Green quietly carried some FF teams Sunday with 2 TDs and 294 yards. Tony Gonzalez finally put together a game like we've been expecting. He saw 3 times as many passes as the WRs. Maybe that'll continue this week. The Seahawks rank # 24 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 23 Fantasy Points Allowed to QBs and # 16 Fantasy Points Allowed to WRs.

Miami Passing Game vs Buffalo Defense

Jay Fiedler posted a couple of TDs with his 191 yards which isn't bad. Chris Chambers, Jed Weaver and Oronde Gadsden all saw time but RB Travis Minor seemed to be the primary receiver with 7 catches. Look for him to be used more as Lamar Smith struggles. The Bills rank # 29 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 24 Fantasy Points Allowed to QBs and # 19 Fantasy Points Allowed to WRs.

New England Passing Game vs Carolina Defense

Tom Brady's had a week to get ready for the Carolina defense. Two teams going drastically different directions here. Terry Glenn could continue to make an impact and you know Troy Brown's ready. The Panthers rank # 20 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 28 Fantasy Points Allowed to QBs and # 22 Fantasy Points Allowed to WRs.

Seattle Passing Game vs Kansas City Defense

Hindsight is 20/20 but if Trent Dilfer isn't the most under appreciated player in the NFL, I dunno who is. He's won a jillion games including a Superbowl lately and all he did Sunday was throw 3 TDs and save the Seahawks season (at least for another week). The big question is will he get another shot? Hasselbeck is saying he wants to play. Stay tuned. Darrell Jackson went nuts last week and if Dilfer gets the nod, you have to look hard at him. The Chiefs rank # 18 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 15 Fantasy Points Allowed to QBs and # 12 Fantasy Points Allowed to WRs.

San Francisco Passing Game vs New Orleans Defense

Jeff Garcia threw for 229 and 2 TDs against a tough Cowboy pass Defense last week. Plus he rushed for another TD. Terrell Owens is a must start. J.J. Stokes is seeing lots of action and TE Eric Johnson is very involved. The Saints defense ranks # 13 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 26 Fantasy Points Allowed to QBs and # 23 Fantasy Points Allowed to WRs.

/***/**/***/**/***/**/***/**/***/**/***/**/***/**/***/

Even Matchups: These games feature no real advantage either way

Baltimore Passing Game vs Minnesota Defense

Elvis Grbac had Raven fans wondering about Trent Dilfer again last week with 205 yards and 2 Interceptions to go with his TD. The usual suspects of Qadry Ismail, Shannon Sharpe and Travis Taylor will all be active. The Vikings rank # 19 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 20 Fantasy Points Allowed to QBs and # 24 Fantasy Points Allowed to WRs.

Green Bay Passing Game vs New York Giants Defense

Favre came up small last week with just 169 yards and 0 TDs. Granted, it was really cold, but that hasn't seemed to bother him much in the past. Freeman and Schroeder got most of the looks as usual. TE Bubba Franks saw a handful thrown his way. They'll face the banged Giant secondary this week ranked # 14 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 18 Fantasy Points Allowed to QBs and # 28 Fantasy Points Allowed to WRs.

New Orleans Passing Game vs San Francisco Defense

Aaron Brooks took a step back this week with 3 Interceptions vs 1 TD and just 127 yards. It's not good when Deuce McAllister is the leading receiver but that's what happened Sunday. Joe Horn and Willie Jackson came up small. This week, they'll face a 49er defense that's ranked # 16 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 13 Fantasy Points Allowed to QBs and # 17 Fantasy Points Allowed to WRs.

Pittsburgh Passing Game vs Cleveland Defense

Stewart threw for 251 yards and 3 TDs Sunday although he did have 4 Interceptions. Plaxico Burress is clearly the big play threat and is showing shades of becoming a dominant WR. Hines Ward is solid as well. The Browns rank # 9 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 3 Fantasy Points Allowed to QBs and # 14 Fantasy Points Allowed to WRs.

Tennessee Passing Game vs Cincinnati Defense

Steve McNair continues to play well with 274 yards and 2 TDs. He's a totally different QB when he throws the deep ball. Although Eddie George's re-emergence may quiet that a bit. Dyson and Mason both saw an equal

number of passes and both scored. This week, they'll face a Bengal defense ranked # 12 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 16 Fantasy Points Allowed to QBs and # 21 Fantasy Points Allowed to WRs.

Washington Passing Game vs Arizona Defense

Tony Banks put up a whopping 94 yards passing last week. But part of it was the big lead Washington was able to post. Westbrook left with an ankle injury so Gardner and TE Zeron Flemister caught what was thrown. This week, they'll face a Cardinal defense that's been pretty good lately ranking # 7 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 25 Fantasy Points Allowed to QBs and # 26 Fantasy Points Allowed to WRs.

/***/

Downside Matchups: These games feature a Defense that's been pretty strong lately.

Atlanta Passing Game vs St. Louis Defense

Mike Vick could see the start even if Chandler is ok. The team is clearly looking at 2002. He's a dice roll if he starts but it's not like Chandler was consistent. Vick will likely spread the ball around to Terance Mathis, Shawn Jefferson and Brian Finneran but it's tough to count on this team. The Rams rank # 22 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 14 Fantasy Points Allowed to QBs and # 8 Fantasy Points Allowed to WRs.

Cleveland Passing Game vs Pittsburgh Defense

For the 2nd week in a row, Couch exploited a great matchup and lit up Tennessee for 336 yards and 3 TDs. Kevin Johnson was clearly the WR of choice again. This week, they'll face a Steeler defense that ranks # 15 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 7 Fantasy Points Allowed to QBs and # 7 Fantasy Points Allowed to WRs.

Jacksonville Passing Game vs Chicago Defense

Mark Brunell put together another gritty day with 283 yards and a TD Sunday. Keenan McCardell and Jimmy Smith continue to be one of the toughest WR duos in the league. They'll face a Bear defense this week ranked # 17 in Passing Yards Allowed Per Game over the last 4 weeks. Clearly, the stats don't quite back up their rep lately. For the year, they rank # 8 Fantasy Points Allowed to QBs and # 2 Fantasy Points Allowed to WRs so they've been stingy allowing FF points.

Minnesota Passing Game vs Baltimore Defense

Sperguson Wynn could well be an NFL QB someday but today isn't that day. Really puts the Cris Carter / Randy Moss owners in a bind. Normally, they're sure starts but now I'm not so certain. He really looked bad at times. Both these receivers are guys who can make up for deficiencies at QB so I still think you'll have to look hard there. Plus, it's on Monday night so even though the Vikes have pretty much packed it in, they'll probably put forth a good effort. The Ravens rank # 5 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 17 Fantasy Points Allowed to QBs and # 18 Fantasy Points Allowed to WRs.

New York Giants Passing Game vs Green Bay Defense

Kerry Collins went over 300 yards last week and that was something. Tiki Barber is still the most frequent target with Toomer and Hilliard seeing pretty much equal attention. The Packers rank # 3 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 12 Fantasy Points Allowed to QBs and # 5 Fantasy Points Allowed to WRs.

New York Jets Passing Game vs Oakland Defense

Vinny Testaverde looked pretty old in the loss to Buffalo with 0 TDs and 2 Interceptions. Chrebet and Coles are decent options but this team is all about Curtis Martin. Especially with the Oakland Corners. The Raiders rank # 8 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 10 Fantasy Points Allowed to QBs and # 13 Fantasy Points Allowed to WRs.

Oakland Passing Game vs New York Jets Defense

Rich Gannon had an excellent day with 313 yards and 2 TDs although he did have the 2 Interceptions. Jerry Rice and Tim Brown continue to play well and Charlie Garner does a nice job catching the ball. The Jets are in a must win situation and rank # 11 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 1 Fantasy Points Allowed to QBs and # 4 Fantasy Points Allowed to WRs so they've been tough.

Philadelphia Passing Game vs Tampa Bay Defense

Donovan McNabb started looking for receivers not named Duce Staley last week and better things seemed to happen. He threw for 3 TDs and nearly 300 yards. James Thrash saw most of the passes while TE Chad Lewis burst back onto the scene. They'll face a Buc defense this week ranked # 6 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 11 Fantasy Points Allowed to QBs and # 9 Fantasy Points Allowed to WRs

Tampa Bay Passing Game vs Philadelphia Defense

Brad Johnson is trying to set a dink and dunk record I think. He had 90 yards passing on 29 attempts for an amazing 3.10 yards per attempt. Keyshawn Johnson is still probably a starter but that's pathetic. This week, they'll face an Eagle defense that's ranked # 23 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 2 Fantasy Points Allowed to QBs and # 1 Fantasy Points Allowed to WRs.

/***/**/***/**/***/**/***/**/***/**/***/**/***/**/***/

Defensive Slam Dunks: These games feature a Defense that's been very strong lately.

Arizona Passing Game vs Washington Defense

Start David Boston. You already know that. I'd say Plummer merits consideration in lots of leagues too. Boston again went nuts last week. The Redskins rank # 4 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 5 Fantasy Points Allowed to QBs and # 11 Fantasy Points Allowed to WRs. Even with this tough matchup, Boston is a sure starter unless you're comically loaded at WR.

Buffalo Passing Game vs Miami Defense

Van Pelt threw for under 200 yards but the Bills did get the win. It looks to me like Jay Riemersma is the primary target now. Eric Moulds and Peerless Price are good gambles but far from sure things. The Dolphins rank # 2 in Passing Yards Allowed Per Game over the last 4 weeks. For the year, they rank # 6 Fantasy Points Allowed to QBs and # 10 Fantasy Points Allowed to WRs.

Detroit Passing Game vs Dallas Defense

Mike McMahon could miss another game which means Ty Detmer could start. Sounds funny, but he put together one of the bigger days among QBs Sunday. He threw the ball all over the field. Johnnie Morton and Cory Schlesinger were especially involved. The Cowboys rank # 1 in Passing Yards Allowed Per Game over the last 4 weeks so it'll be tough. For the year, they rank # 4 Fantasy Points Allowed to QBs and # 3 Fantasy Points Allowed to WRs.

This is a presentation I put together for Derek, but it was some general info that may be of interest to you.

Let me know if and when you guys would like to sit down and go over Ontario in a bit more detail at some point over the next week. You can also get a good fundies overview from the IMO forecasts at:

<http://www.iemo.com/imoweb/monthsYears/monthsAhead.asp>

Dear OnePass Elite Member,

Continental Airlines is pleased to advise you that you have been upgraded to First Class on your upcoming flight due to your OnePass Elite Membership.

Confirmation: UC9SCQ
Flight Number: 740
Date: October 28, 2001
Origination: IAH
Destination: SLC
Seat: 04E*

This e-mail notice does not replace the need to check-in for the flight. Recommended check-in time is 2 hours prior to departure for domestic flights. If you do not check in at least 20 minutes prior to departure your seat can be given away.

PLEASE DO NOT REPLY TO THIS E-MAIL. UNFORTUNATELY E-MAIL SENT TO THIS ADDRESS CANNOT BE ANSWERED. PLEASE DIRECT ALL INQUIRIES TO THE ELITE PRIORITY LINE, WHICH CAN BE FOUND ON YOUR ELITE CARD.

To make changes to your e-mail address, access the Your Account area of the OnePass site (<http://www.onepass.com/asp/youraccount.asp>) or contact the OnePass Service Center as (713) 952-1630.

For changes to your itinerary, contact your Travel Agent or Continental Reservations at 1-800-525-0280 (Domestic) or 1-800-231-0856 (International).

To unsubscribe from OnePass Elite upgrade e-mail notification, please visit <http://onepass.continental.com/emailupgrades>

Thank you for choosing Continental Airlines.

In anticipation of the imminent closing of the UBSW Energy transaction, please have all outstanding employee expenses in your possession filed through Enron's XMS system as soon as possible. Note to approvers - please approve these expense reports quickly. Enron will process and pay all pre-closing expenses. After transaction closing, payments for expenses submitted before closing (and put into Enron's XMS system) will be sent to your last known address or direct deposited into your account.

Enron has committed to processing and paying any expenses incurred prior to transaction closing. If not completed this week, pre-closing expenses should be submitted on a hard copy expense report form which will be available at www.enron.com.

There will be a series of e-mails coming out over the next few days highlighting the Travel & Entertainment policies of UBSW Energy and the procedures for processing and payment.

If you have any questions, please contact Hope Vargas (3-5280) or Georgianne Hodges (3-0430).

Dear Michael, Solar and wind power have long been used as renewable sources of energy. On Wednesday, we'll have a report on an interesting alternative to these renewables. ENL's Gale Smith will tell us about a Louisiana company that is using rice hulls to produce electricity. Catch Gale's report from Houston tomorrow. The Enron/Dynegy negotiations continue and Gale tells me the Houston bureau is keeping close tabs on all developments. Standard & Poor's Ratings Services' David Hitchcock will talk to ENL's Kym McNicholas Wednesday about California's current credit rating. The state is set to issue a proposed \$12.5 billion in revenue bonds and Hitchcock will discuss whether renegotiating California's long-term power contracts could delay the process. Kym will also speak with the Executive Director of the California Natural Gas Producers Association John Martini. He'll address the unspecified threats to U.S. pipelines. Watch for those details from the West Coast bureau on Wednesday. We'll have an interview from the Chicago Mercantile Exchange on Wednesday. Alaron Trading Vice President Phil Flynn will join us to discuss the API and DOE numbers and tell us what's going on with the brewing OPEC price war. We'll hear from Flynn during the noon ET newscast tomorrow. Closing Prices for Tuesday, Nov. 27, 2001 Crude: \$19.48 +\$0.79 Unleaded: \$0.5381 +\$0.0164 Heating Oil: \$0.5394 +\$0.0177 Natural Gas: \$2.606 -\$0.09 We'll have live coverage from Anchorage, Alaska on Thursday. Houston Correspondent Kim Benestante is covering "Alaska Resources 2002: Can Alaska Compete?" Catch reports from Anchorage on Thursday. Also on Thursday, ENL's Gale Smith will attend the Arctic Gas Symposium in Houston. The symposium will address supplying the North American market and bring us a pipeline route update, among other topics. Keep in mind things are subject to change at a moment's notice. Occasionally guests have to cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour.

When: Tuesday, October 30, 2001 8:00 AM-8:30 AM (GMT-06:00) Central Time (US & C
anada).
Where: Bubble Meeting Room

~~*~*~*~*~*~*~*~*

Finalize the presentation, review itinerary and who will be speaking to their re
spective areas--Asset Management, QSE Scheduling, Pricing of QSE Services, etc.

FYI: I'm trying to set up a tour of the new building at 3pm--I don't feel that
the presentation will take that long but this will allow us enough time (2-3pm)
to present the information, get a tour & return for Q&A. I suspect that on retu
rn from the tour we can discuss with ANP what we can do to close this QSE Servic
es deal.

Jeff

Mark,

Can you get this to open? Is it funny?

Sarah

This would be even more funny if the overlay of the tu logo wasn't so obvious!

Roman,

I talked to Richard and he would be very interested in talking with Dale Osburn.
Can you send him the number?

Hope all is well....

Bill

We are continuing work to ensure our new online trading system, UBSWenergy, is ready for launch on the week of Feb. 11, which is the week following the anticipated Enron/UBS Closing Date of Friday, Feb. 8.

To assist in this process, we are planning an online trading simulation for Thur

sday, February 7 from 0900 to 1100 (CST). It is planned to include all traders, originators, mid/back-office staff and IT teams who would normally be involved with electronic trading.

Purpose of the simulation - The simulation will test our "live" trading environment (restricted to internal access only) and will:

Test the integrity and functionality of the system and related processes (including credit, risk, legal, operations, etc.)

Provide an opportunity for traders to verify their products and product setup

Demonstrate how the trading system and processes work to UBS staff visiting next week

Nature of the simulation - The simulation will include testing of all processes related to trading and mid/back-office functions:

Credit, Legal, Risk, Operations, and other groups:

Profile tests for "external" customers (role-played by Originators)

Profile tests for internal users (traders, back-office, etc.)

Data and Process checking as completed transactions flow through Mid/back-Office systems

Traders and Originators:

Traders will be managing their individual books and associated products. Although we may be restricted to certain financial products on launch day, both physical and financial will be available during the simulation. Each trader will be asked to manage their individual position and profitability goals for the simulation.

Originators and others will be asked to play the roles of counterparties. Credit limits, etc. will be tested during the simulation.

Information Technology:

Will assist in preparing data on the system for the simulation.

After the simulation is over, will work with the relevant groups to test the trade-data in various systems and risk books

Will ensure all simulation data is removed from the system after the simulation is complete.

Next steps

Traders and Originators will be contacted prior to simulation day to ensure they have appropriate access to the system.

Originators will be assigned specific roles. You should expect to receive an email and/or handout on or before Wednesday, Feb. 6.

UBSWenergy personnel will be meeting with back office personnel over the next several days to ensure everything is in place for the simulation.

Summary

This simulation is an important step towards re-launching our trading business. We appreciate the participation of everyone involved as we prepare for the public launch of UBS Warburg Energy and the UBSWenergy trading platform.

If you have any questions, comments, suggestions, or ideas regarding this simulation, please feel free to contact Bob Shults (30397) or myself (31861).

Regards,
Dave Forster

Subject: Seams Intro

Tom/Mark,

Thanks for taking the time to review the introduction. The purpose of the document will be for all parties in the west (T0's and participants) to discuss and address commercial seams which, if left unchecked, could develop with the implementation of RT0 West and DSTAR. The introduction is intended to be a summary of the needs of the market and discuss the development of good base-business practices west region-wide that the RT0's can use to implement common methodologies.

Kind Regards,

Dave

Subject: FW: FBI information regarding possible terrorist threat on West Coast

This just came to me today. This information is widely available to corporations and law enforcement around the country. It will likely hit the media in the next day or so. This is all the information that is available.

Enron Corp. Business Controls/Corporate Security received the following information via the National Threat Warning system. While we do not wish to unduly alarm employees, the specificity of the information dictated immediate dissemination to our West Coast offices.

THE FBI IS IN POSSESSION OF UNCORROBORATED INFORMATION INDICATING THE POSSIBILITY OF ADDITIONAL TERRORIST ATTACKS AGAINST THE UNITED STATES, SPECIFICALLY THE WEST COAST. REPORTEDLY, UNSPECIFIED GROUPS ARE TARGETING SUSPENSION BRIDGES ON THE WEST COAST. SIX INCIDENTS ARE TO TAKE PLACE DURING RUSH HOUR BEGINNING FRIDAY, NOVEMBER 2 AND CONTINUING THROUGH NOVEMBER 7, 2001.

NO FURTHER INFORMATION ABOUT THIS ALLEGED ATTACK IS KNOWN AT THIS TIME. THE FBI IS ATTEMPTING TO VERIFY THE VALIDITY OF THIS REPORT. RECIPIENTS WILL BE UPDATED AS EVENTS WARRANT.

RECIPIENTS WHO RECEIVE OR DEVELOP INFORMATION RELATED TO THIS MATTER SHOULD IMMEDIATELY CONTACT THEIR LOCAL FBI OFFICE.

We will keep you apprised if we receive any further information.

Thank you.

We can now calc the price book and we will cross reference the list with a fwd detail of the price book to verify there are no deals with terminated counter parties. Because of the translation to the bankruptcy book, we can not calc the bankruptcy book for a while, so we will cross reference those in the morning. I will keep you posted.
PL

Subject: RE: termination list for deals to be moved to bankruptcy book

The deals associated with the counterparties below have been moved to the bankruptcy book. The deals are currently being retranslated. There are more than 10,000 deals and it's going to take a while to complete the retranslation.

Cecilia,

Here is the list of Counterparties that have been requested:

CP ID	Counterparty
8	Amerada Hess Corporation
64516	Avista Corporation
55265	Avista Energy, Inc.
65291	BP Corporation North America Inc.
23848	Cabot Oil & Gas Marketing Corporation
79689	Calpine Energy Services, L.P.
5264	Cargill, Incorporated
65599	CMS Field Services Inc.
56630	Consolidated Edison Solutions, Inc.
52577	Cornerstone Propane, L.P.
64141	NJR Energy Services Company
151	Northern Illinois Gas Company
69121	NRG Power Marketing Inc.

63665 Occidental Energy Marketing, Inc. *****
54438 PG&E Energy Trading, Canada Corporation
58402 PG&E Energy Trading-Gas Corporation
46709 Phibro Inc.
55776 Pioneer Natural Resources USA, Inc.
33367 PMI Trading, LTD
49262 Questar Energy Trading Company
65268 Reliant Energy Services, Inc.
103469 Sequent Energy Management, L.P.
3996 Sithe Energies, Inc.
26146 Societe Generale
11134 St. Mary Land & Exploration Company
81385 The New Power Company
37810 Venoco, Inc.
96651 Vitol Capital Management Ltd.
46924 Vitol S.A.
232 Western Gas Resources, Inc.
237 Wisconsin Power And Light Company

***** Risk Management CP ID 53447

Kimberly, I was laid off on Monday and have not had my latest expense report electronically deposited into the credit union. I was assured by management that I would be paid. The amount is 642.10. I would think that this is the least amount that could be done for me since I have only worked for EES for 2 months.

Please ensure that my funds are deposited as soon as possible due to my current financial crisis.

Thank You,

Alan Timme

Attached is a summary of my notes at the SoCal meeting regarding revised window procedures. No hand-outs were provided.

Calculation of Receipt Point Capacity

Topock 540 mmcf/d
Ehrenberg 1250 mmcf/d
Needles 800 mmcf/d
Wheeler 800 mmcf/d

New Receipt Points

Kramer Junction 200 mmcf/d
Hector Rd 50 mmcf/d
Both will be available around Feb 1

Basis of Pro-Ration-Current Windows Calculation

Currently, Gas Control provides total receipt point capacity comprised of demand forecast and injection capability and compares to maximum amount of gas that can enter system. Gas Select prorates interstate's receipt capacity based on prior day's nominations.

New Calculation, Changes and Display

Based on operational maximum with adjustments for maintenance. SoCal is taking and applying the current formula for Wheeler Ridge to all the points. Any changes to operational maximum will probably be due to maintenance and posted on Gas Select. Customer will choose which points it wants to reduce receipts. Operating maximums will equal demand forecast plus injections. Demand forecast will rely on Gas Control weather forecast. They use Weather Bank as one of their tools.

OF0 Declaration

Name changes from overnomination
Can declare before any Cycle
Provide 2 hour notice
Post on Gas Select
Show OF0 Calculation on Gas Select

Windows

Reason to set windows was to set limits to prevent too much gas from coming into system
Calculation based on noms which does not work well. Lots of complaints. People

e were complaining that it restricted access to the system. Eliminating point specific calculation. Open system to Max Oper. Limits or Contractual Limits. Will continue to operate Wheeler Ridge under Aug 1 procedures. No changes to Wheeler Ridge.

Due to the need to maintain operational control, an OFO will be declared when scheduled volumes are greater than the max operating capacity on any cycle.

Replace windows with operational maximum volumes. If CPUC approves comprehensive settlement, will post 5 days of information to anticipate OFO's

Now customers will elect which point they will back off instead of using windows

Scheduling Changes-Nov 1

Gas Select is being rebuilt and will be an internet system in mid-2002. No direct dial-up.

Rollover noms-noms will be copied from cycle to cycle

Copy confirmed noms

All noms will be rolled over-will not be at discretion of 3rd party. However, can still make changes. Can still upload new files.

2 Hour Notice

Socal will provide 2 hour notice on Gas Select of OFO. Other methods include leaving message on Socal Hotline (213-244-3900) and list of e-mail messages that can go directly to pagers. Gas Select is official notification. Courtesy notification is hot line and e mail. Gas Select is a subscriber-based system mandated by CPUC and must get regulatory change to make free.

OFO's are going to be system wide and not customer specific. OFO's can be declared intraday. Once OFO declared, it will be kept for entire day. Concerned that if call off, will have to put back on. Don't want to go back and forth. This decision may be reconsidered once they see how it works. Many times Socal see an increase of 200 mmcf/day between Cycle 3 and 4 so they are concerned.

Scheduled vs. Capacity-Declare OFO

Nominations may not exceed 110% of expected usage.

Expected Usage is defined as usage for the same day for the prior week. Can revise expected usage.

No interruptible storage injections allowed during OFO.

Use Elapsed Pro-Rata Rules

Expected Usage-cut nominations to 110% of expected usage so will use same day of the prior week as proxy. Generators need to revise expected usage. Acceptance of changes are at the discretion of SoCal.

Flow Day Diversions don't go into effect until after Cycle 4. Gas Control will determine if flow day diversion will be allowed.

If call OFO after cycle 3 or 4 and have interruptible storage injections, such storage will be prorated back under the elapsed prorata rules.

Many people were concerned that interruptible storage will be severely compromised.

If OFO called, Interruptible Storage could be cut under the elapsed prorata rules as follows:

Cycle 1 Nom 1000 ; 0 cut

Cycle 2 Nom 1000; 666 cut

Cycle 3 Nom 1000; 500 cut

Windows will only be implemented during cycle 4 if OFO called after cycle 3 and no improvement is realized. Will allocate prorata. Will use latest scheduled volume and will pro rate by receipt point. In other words, if OFO declared during Cycle 1 and no relief after 3 cycles, Socal will window Cycle 4 and prorata cut. Parties will determine what gets cut on all the other cycles. For penalty purposes, actual burn from 12 o'clock to 12 o'clock will be used to calculate penalties or MAXDQ if not metered.

For OFO, assume supply delivered day before and burn is the same day for the prior week. Declare OFO on prior day's scheduled volume.

For an evening declaration-will use most recent available scheduled volumes. For example:

Flow Day 10/4	10/3 Scheduled Volumes
Cycle 1	Cycle 2
Cycle 2	Intraday 1
Cycle 3	evening cycle 2 on 10/4
Cycle 4	Intraday 1 on 10/4

In other words, will look at evening cycle 2 scheduled volumes on the 3rd for declaring OFO on cycle 1 for the 4th.; look at intra day 1 for the 3rd in declaring OFO for cycle 2 on the 4th; look at evening cycle 2 on 10/4 in declaring OFO for Cycle 3 on the 4th; look at intraday 1 on the 4th in declaring OFO on cycle 4 for the 4th.

Winter Balancing Rules

Effective Nov 1-March 31

No changes.

All customers must comply.

Minimum delivery requirements

50% of daily usage over 5 day period; (Nov 1-5;6-10;)

70% of daily usage depending on storage level

70% daily usage implemented when storage levels equal 20 bcf above peak day min

90% of daily usage depending on storage level

90% rule implemented when storage levels equal 5 bcf plus peak day min.

Look at storage graph on Gas Select. Posted 24 hours in advance if the minimum daily is changed. If go to 70% , current 5 day cycle must end completely, before new % goes into effect.

Must increase storage inventory by 1 bcf above the 70% before going back to 50% rule.

Once 90% rule implemented, will return to 70% as soon as operationally feasible,

Contracted Marketer's customer usage and deliveries are aggregated in one balancing account.

Core Aggregation-subject to 50% daily throughout entire winter period based on D CQ.

Core-50% of daily throughput for the entire period;; (Patrick Brown group)

Not subject to 70% and 90% rules.

2 types of gas count toward daily obligation- firm storage withdrawal and flowing gas. As-available storage and imbalance trading do not count.

Burn=measured daily usage thru electronic measurement,

Min DQ-used if customer does not have electronic measurement.

Customer assessed GIMB charge if total deliveries is less than 50% of total burn over 5 day period. Customer purchases gas at daily balancing stand-by rate under GIMB Rate Schedule which is 150% of highest Social Border price per NGI Gas Daily plus franchise fees and other charges. Rate is posted at end of every month.

OFO can be declared during undernom season (winter season)

Enron in Action can be accessed through the new Community Relations web site at <http://cr.enron.com/eia.html> . In this week's issue you will find out information regarding:

Enron Happenings

BEAR Holiday Fundraiser
2001 Holiday Shopping Card benefiting the American Cancer Society
Enron Kids 2001 Holiday Program
Support the Museum of Natural Science at the Crate & Barrel Opening Night Preview Party
Enron Night with the Houston Aeros
Free Carwashes for Enron Employees
American Heart Association "Heart Walk"

Enron Volunteer Opportunities

Volunteer for the 2001 Nutcracker Market "A World of Holiday Shopping"

Enron Wellness

CPR/First Aid Training
Mammogram Screening
November is Lung Cancer Awareness Month

Involved Employees

Par "Fore" Pets Golf Tournament

In addition, Enron in Action is available through a channel on my.home.enron.com . To add this channel to your set-up click on the channels link at the top of the screen and under announcements check the Enron in Action box.

If you wish to add an announcement to Enron in Action, please fill out the attached form below and submit it to <mailto:eia@tcpolice.org> no later than 12 PM Thursday each week.

Shelley, this room change is Steve's old office. Is this correct?

Thank you, Ricki

Latest NFL Player News

Martin Gramatica, K TB - Free Agent Updated 12/28/01
Gramatica has still not been ruled out for Saturday's game, although the Buccaneers have signed veteran kicker Doug Brien as insurance. Even if Gramatica can play, he will be a very risky Fantasy starter.

Warrick Dunn, RB TB - Martin Updated 12/28/01
Dunn's status is day to day with a toe injury. He is expected to play this week, but Mile Alstott has been the most productive back on the team in recent weeks.

Michael Westbrook, WR WAS - Free Agent Updated 12/28/01
Westbrook's status is day to day with a knee injury. He is expected to play this week.

MarTay Jenkins, WR ARI - Martin Updated 12/28/01
Jenkins may miss his second consecutive game with an ankle injury this week. Arnold Jackson would replace him as Arizona's third receiver.

Brian Finneran, WR ATL - Free Agent Updated 12/28/01
Finneran is listed as probable with a knee injury. He is expected to play this week.

Tyrone Davis, TE GB - Free Agent Updated 12/28/01
Davis has been elevated to the No. 2 tight end slot over rookie David Martin. He will see a considerable amount of playing time now that he is healthy, because Green Bay employs many double tight end sets in the red zone.

Oronde Gadsden, WR MIA - Matty Updated 12/28/01
Gadsden has been practicing this week and may be able to play. But his hamstring injury may limit his productivity.

Steve McNair, QB TEN - Free Agent Updated 12/28/01
McNair was limited in practice on Thursday. He is still expected to play this week, but he is a risky Fantasy starter because he will be less than 100 percent healthy.

Jimmy Smith, WR JAC - Frank Updated 12/28/01
Smith (flu) has missed practice time this week. He is still expected to play.

Joe Horn, WR NO - Matty Updated 12/28/01
Horn suffered a minor shoulder injur

y in practice on Thursday. He is expected to start this week.

Aaron Shea, TE CL E - Free Agent Updated 12/28/01
Shea (shoulder) has been placed on injured reserve. O.J. Santiago will continue to be Cleveland's No. 1 tight end while he is out.

Jason Brookins, RB BAL - Tori Updated 12/28/01
Brookins has returned to practice and is listed as probable. But he still may not see any game action until Week 17.

Emmitt Smith, RB DAL - Bass/Hull Updated 12/28/01
Micahel Wiley may miss this week's game with a hip injury. Smith is expected to appear on third downs this week as well as assuming his normal workload.

James Thrash

, WR PHI - Frank Updated 12/28/01
Thrash (ankle) returned to practice on Thursday. he is expected to play this week.

Wesley Walls, TE CAR - Free Agent Updated 12/28/01
Walls missed practice on Thursday with a knee injury. He may be a gametime decision this week.

Maurice Smith, RB ATL - Frank Updated 12/28/01

A banged-up Smith Toe/knee) will continue to start for the Falcons. But Dan Reeves has indicated Rodney Thomas will continue to get some work at halfback.

Bob Christian, RB ATL - Free Agent Updated 12/28/01
Christian is day to day with a calf injury. He is expected to play this week.

Stephen Davis, RB WAS - Bass/Hull Updated 12/28/01
Davis (knee) has returned to practice. He is expected to start this week.

Todd Bouman, QB MIN - Free Agent Updated 12/28/01
Bouman took a few snaps Thursday but didn't appear to meet coach Dennis Green's "full strength" criteria for starting against Green Bay. Spergon Wynn is likely to start Sunday, though coaches didn't discuss the issue after Thursday's practice. Bouman didn't participate in the team's morning walk-through, when players work on plays without fully suiting up. And during the portion of the regular practice that reporters were allowed to watch, Wynn took more snaps than Bouman. A trainer said Wynn continued to take more snaps later in the closed portion of practice.

Jerome Bettis, RB PIT - Giggles Updated 12/28/01
Bettis, sidelined by a groin injury, returned to the practice field Thursday for the first time in a month. "Still questionable," coach Bill Cowher said. "He did more today. We'll see how he feels (Friday) and go from there. We'll take it day to day."

<A HREF="http://football299.fantasy.sportsline.com/mp/elink?script=players&league=b

ige01&owner=67142.8&random=4024&key=1393">Doug Brien, K IND - Free Agent Updated 12/28/01
Brien signed a one-year contract Thursday night with the Tampa Bay Buccaneers, who will use him against Baltimore if Martin Gramatica can't kick this week. Gramatica strained his right hamstring during a 48-21 victory over the Saints last week. Coach Tony Dungy hasn't ruled him out for Saturday night's game against Baltimore, however the club!

b wanted to have a backup plan in case the Pro Bowl kicker isn't ready.

Ahman Green, RB GB - Hunter Updated 12/28/01
According to the <i>Pro Football News and Injury Report</i>, Green has asthma, but he has practiced fully this week and will start against the Vikings.

James Thrash, WR PHI - Frank Updated 12/27/01
Thrash is listed as questionable with an ankle injury, but he is expected to play against the Giants.

Patrick Jeffers

, WR CAR - Free Agent Updated 12/27/01
Jeffers may see some increased playing time this week because of Muhsin Muhammad's persistent toe problems. Isaac Byrd, however, still should start in Muhammad's place.

Sebastian Janikowski, K OAK - Matty Updated 12/27/01
Janikowski (groin) has been kicking in practice. He is expected to play this week.

Terrence Wilkins, WR IND - Free Agent Updated 12/27/01

Wilkins (hamstring) has returned to practice. He may be able to play this week.

Stephen Alexander, TE WAS - Free Agent Updated 12/27/01
Alexander (leg) was placed on injured reserve, officially ending his season. Walter Rasby will continue to start in his place, but Zeron Flemister has emerged as the team's best receiving tight end with Alexander out.

Matt Hasselbeck, QB SEA - Bass/Hull Updated 12/27/01
The <i>Seattle Times</i>

says Hasselbeck's season might be over. Mike Holmgren said he would only use him in an emergency this week, and the Seahawks coach may elect to have Hasselbeck use the season's final two games to rest his injured shoulder. Trent Dilfer will start at San Diego this week.

Amos Zereoue, RB PIT - Free Agent Updated 12/27/01
Zereoue missed practice on Wednesday with a shoulder injury. He is listed as probable for this week.

Todd Bouman, QB MIN - Free Agent Updated 12/27/01

Bouman practiced without pads on Wednesday. If he cannot practice fully on Thursday, Spergon Wynn will get the start this week.

Answers to questions about tech indexes, preferred stock, AT&T and Diebold.

By Michael Sivy

I've received a lot of questions and comments lately about the volatile tech sector. So let me begin by explaining what I think is going on and outlining my best guess about the outlook for the rest of the year. In recent columns, I've been generally upbeat about the long-term prospects for tech stocks, but I've also warned about the likelihood of a June pullback, as companies begin to project weak results for the current quarter.

The bad news has already begun, with Sun Microsystem's warning on Tuesday that its quarterly earnings would be well below expectations. The stock plummeted nearly 13 percent on Wednesday and helped depress the Nasdaq composite index by more than 4 percent. And the market is likely to remain

shaky until second-quarter reports are mostly out around mid-July.

I expect that business conditions will be starting to recover by the end of the third quarter. The Federal Reserve's interest-rate cuts take six to nine months to work, and since the first cut was in January, we certainly should be feeling the effect by Oct. 1. In the meantime, there will probably be a lull, but that doesn't change the long-term case for big, top-quality tech stocks. It just foreshadows a dismal summer.

Now here are answers to some specific questions:

Q. You've written about the Nasdaq-100 Trust and the SPDR technology portfolio. What are they and where can I find them?

A. They are unmanaged index funds that trade on the American Stock Exchange. You can buy them through any broker just as though they were common stocks. The Nasdaq-100 (QQQ) [QQQ], which holds 100 Nasdaq stocks, is the more aggressive of the two. The tech SPDR (XLK) [XLK] holds more than 80 tech issues, but includes mature businesses like IBM that trade on the New York Stock Exchange. Both, however, are a good way to buy a broad cross section of big tech stocks to hold for several years.

Q. In "The Bull is Back!," you recommend a Merrill Lynch preferred stock. Where can I find it?

[<http://www.money.com/money/depts/investing/sivy/archive/010518a.html>]

A. I think preferred shares are a worthwhile alternative to bonds for investors looking for fixed income. Many good-quality preferreds yield more than 7 percent and they often can be bought in round lots costing less than \$2,500 (compared with at least \$10,000 for a bond).

The biggest problem with preferreds is that they often can be called, or redeemed, before maturity. Most preferreds are protected against calls for four years or so, but some Merrill Lynch issues have longer call protection. In the past, I've recommended Merrill Lynch preferred F (mer-f), which appears in the Wall Street Journal preferred stock table and currently yields 7.2 percent. (Preferred ticker symbols vary from one financial website to the next. For the most recent quote on Money.com, click here [MER-F].)

[<http://quote.money.com/money/quote/qc?symbols=MER-F>]

For more information on how preferreds work, see "Preferred shares: Uncommon values."

[<http://www.money.com/money/depts/investing/sivy/archive/001020.html>]

Q. What do you think about AT&T?

A. Frankly, I don't know what to think at this point. Chairman C. Michael Armstrong was right that the company couldn't stick with its traditional strategy. But the so-called broadband company he tried to build through expensive acquisitions of cable companies hasn't solved the problem.

Now AT&T [T] is backtracking by splitting up again with planned spinoffs of its wireless and cable TV operations. I figure that the share price is cheap relative to the total value of AT&T's assets, but the company isn't earning much money right now. To my mind that makes the shares a hold, on the theory that sooner or later the asset value will show through.

Q. You've recommended Diebold before. What do you think of it now?

A. I basically like Diebold [DBD], a midsize tech stock that is a leading maker of automated teller machines. Diebold's stock dropped more than 60 percent in 1998 as bank mergers and branch closings slowed demand for new

ATMs. And currently, demand is suffering from the capital spending slump caused by the economic slowdown. Even so, the stock is up 50 percent to \$30.25 a share over the past 18 months -- and it has gained a couple of bucks since I last recommended it in November.

Capital spending should improve over the next couple of years. Diebold's earnings look to be flat this year, but should be up more than 10 percent in 2002 and could grow at nearly a 15 percent compound rate over the next five years. Best of all, the stock is cheap at only about 16 times estimated earnings for the current year.

Dave,
Just a heads-up - it sounds like the Tammy structure may get highlighted to the Creditors Committee soon because of the expected sale of the Indian E&P assets.

I believe this will bring focus on the value of assets held in Tammy. To the extent that there are any assets within Tammy that you believe may be candidates for the Newco you are considering, it would be good to identify them early - before everyone starts focusing on how much they might bring in liquidation.

In addition to the Indian E&P assets, I am aware of the following assets within the two Tammy structures:

* Option to acquire EREC (This option will probably be rejected)

* A portion of the East Coast Power investment (may be a note)

* Stock of EOG Resources (subject to a FAS 125 Transaction- no economic interest)

* Stock of LNG Power (Atlantic) Ltd. that I am told includes Ecoelectrica

* Option to acquire Portland General Stock
Other assets may be included. Please contact me if you have any questions. I plan to be out this week, but will be checking voicemail (858-704-3302).

Happy Holidays,

Joel

Attached please find Gas Daily daily prices for April/Oct 2001 for the Permian and Waha areas. The differential looks good for a support of our \$.04 offer.

Please let me know if you want me to pull more pricing information.

Category: MAINTENANCE

Subcategory: NWP MONTHLY MAINTENANCE

Subject: December 2001 Monthly Maintenance

Notice Text:

All Shippers Letter #01-317

Date: 11/15/01

Time: 16:30 MST

TO: ALL SHIPPERS

SUBJECT: DECEMBER 2001 MAINTENANCE SCHEDULE

The following maintenance work is scheduled on Northwest Pipeline for the month of December. Potential system impacts are identified below. Volume impact and scheduled maintenance out of service date estimates are stated as accurately as possible, but are subject to change based on factors such as ambient temperatures, actual market demand, etc. Any variance from this notice will be communicated to customers as quickly as possible before commencing work. All capacities listed in this maintenance schedule are in Dekatherms.

**** Denotes capacity impacts that are in addition to those posted on the Annual Maintenance Letter.

DECEMBER 2001 MAINTENANCE:

Replace Engine Chocks at the Snohomish Compressor station

Date: October 22, 2001 to December 8, 2001

Design Cap: 720,000 Dth

Available Cap: 614,000 Dth

Replace the Chocks on the units at the Snohomish compressor station. Only one unit will be unavailable at a time during this work. Based on current nominations, which are below available capacity, there is no anticipated impact to customers.

Semi-Annual unit inspections at Sumas Compressor station

Date: December 4, 2001 to December 5, 2001

Design Cap: 724,000 Dth

Available Cap: 607,000 Dth

Perform annual inspections on C Plant units #7 and #8 at the Sumas compressor station. Inspection of unit #7 is scheduled for December 4, and unit #8 is scheduled for December 5. A and B Plants will accommodate any lost capacity. Based on current nominations, there is no anticipated impact to customers.

Semi-Annual unit inspection at Mount Vernon Compressor station

Date: December 6, 2001
Design Cap: 722,000 Dth
Available Cap: 696,000 Dth

Perform annual inspections on unit #3 at the Mount Vernon compressor station. Based on current nominations, which are below available capacity, there is no anticipated impact to customers.

Please contact your Marketing Services Representative or the Northwest Pipeline Hotline at (801) 584-7301, for further information.

Jeff, did Mark H. sign off on us removing triangular set-off between affiliated entities. We have removed the concept as instructed by Barry, but do not want to send to PG&E unless we have Mark's OK.

Also, Eric/Barry you were going to canvass Bill in terms of what he would require for Credit.

Peter.

RTO Week

<?xml:namespace prefix =3D o ns =3D "urn:schemas-microsoft-com:office:offi=
ce" />

Day 4 - October 18, 2001

Afternoon Session

=20

Standardizing Markets, Business, and Other Practices=20

Panelists for this discussion were: Sarah Barpoulis, PG&E National Energy =
Group; William P. Boswell, GISB; Bill Burkes (substituting for David J. Chr=
istiano), City Utilities of Springfield, Missouri; David N. Cook, NERC Gene=
ral Counsel; Michael Kormos PJM Interconnection; LeRoy Koppendrayner, Minnes=
ota Public Utilities Commission; and Marty Mennes, Florida Power & Light Co=
mpany.

=20

General Observations

=20

The Commissioners were all present the majority of the time (Massey left la=
te in the afternoon). FERC Staff was active in the discussion; however, t=
he commissioners were very active as well, asking perhaps as much as 70% of=
all questions. There was a general consensus that standards were needed; =
much discussion focused simply on how much and by who. The Commission seeme=
d very interested in learning what they needed to do to move the industry fo=
rward and how far they needed to go. Panelists urged the need to mover for=
ward as quickly as possible, but both they and FERC seemed to recognize tha=
t some of the issues regarding standardized market design and such needed t=
o be addressed before RTOs could really begin to move forward. There was d=
iscussion on identifying which industry group (NERC or GISB) would take the=
reins in the future. On an interesting tangential note, there was noticea=
ble conflict between NERC and GISB, with veiled insults between the two org=
anizations somewhat common during the discussions.=20

=20

FERC Deliverables

A great deal of the discussions focused on identifying what the industry needed from the Commission. Staffers probed all panelists to find what they felt was critical. =20

The first major topic was "How many RTOs? What is their scope?" All panelists seemed to agree that this question needed to be answered immediately by FERC, in strong definitive language. No one offered any specific language, but seemed to be urging FERC to issue a formal statement.

The next topic was, "What will be standard market design?" Panelists varied on this, but most felt strong guidance from FERC is urgent. Some urged for one mandatory design for North America, one supported a set of rigid standard designs, one supported a single design with requests for exceptions (followed by an in-depth review process), and one seemed to prefer the current situation.

The commission in general seemed to be very interested in understanding what the industry needed to move forward. They continually visited this topic throughout their discussions, asking questions like, "Do we need to issue a Mega-Order that addresses all these issues?" and, "How much detail do you need us to provide?" General feel from the panelists seemed to be they wanted strong leadership in this areas. Kormos and Burkes went so far as to say FERC should "Mandate as much as they felt comfortable - and then go a little further." Others seemed to be a little worried about this idea, but in general did not oppose the concept, citing only general warnings and the need for cautious investigation. =20

One item of interest: Wood referred to the filing made by the Electronic Scheduling Collaborative and specifically asked if the items identified in the "RTO Design and RTO Implementation" section would address many of the questions and uncertainty facing the industry with regard to RTO design. Kormos indicated that clear and specific answers to these questions specifying a course of action would go a long way toward guiding the industry. The section to which Wood referred was one that I wrote, and asked the following questions:

? Congestion Management - When Operational Security Violations occur, how is the system to be stabilized in a fair and equitable manner that is nonetheless efficient? Will LMP based systems be standard, or will there be others that must be accommodated?

? Transmission Service - Are transmission services required to schedule ("covered" schedules only), or are they risk management tools protecting from congestion charges (both "covered" and "uncovered" schedules are allowed)?=20

? Loop Flows - Are contract-path based or flow-based transmission services appropriate? If contract-path based, how are parallel path issues to be addressed?

? Grandfathered Transmission Service - Should contracts existing prior to RTO development be transferred, or is there an equitable way to retire those contracts? Are there other solutions?

? Energy Imbalance Markets - How are imbalance markets to function? Will they serve as real-time energy markets (support unbalanced schedules)?

, be limited to supplying needs of imbalance service (require balanced schedules), or will they be required at all?

? Ancillary Services - Will ancillary service markets be developed in standard ways? Will entities be required to actually schedule ancillary services (required to schedule), or will they be treated primarily as financial instruments (protecting against real-time POLR charges)?

? Losses - Can we utilize the imbalance markets to support losses? Can we create specific loss standards that facilitate the scheduling process, or must we support methods that are currently in tariffs, but technically unwieldy?

? Non-Jurisdictionals - How are non-jurisdictionals to be integrated into the new world? Should systems be designed with the assumption that non-jurisdictional will be part of an RTO? Or should they be designed to treat each NJE as a separate entity?

Hopefully, FERC will use this section as a template to answer these critical questions in an assertive manner, and give some solid direction in which to move. Kormos emphasized the need for concrete answers to these questions, pointing out that vague answers (i.e., "do congestion management") will take a year or two to resolve, but specific answers (i.e., "LMP with financial hedging instruments") will take only months. The Commission asked Mike about moving forward, and he told them that effectively, it was impossible to move forward with implementation without getting these issues addressed.

Now for a funny point - One of the commissioners (I think Breathitt) referred to some concerns expressed in the Northwest that their high concentration of hydro power makes LMP inefficient for the Northwest. Kormos flat out said, "My profession is understanding how power systems work, and I don't believe that that statement is true." He then backpedaled a bit and said that it would need more study, but he stood by his statement that the assertion by the Northwest interests was false.

NERC and GISB

A great deal of discussion focused around the need for a single standard-setting organization. Massey went so far as to ask, "Are we looking at a beauty contest between NERC and GISB?" Cook and Boswell then went into several short polite jabs at each other's organizations. Other participants continually reiterated the need for ONE, INDEPENDENT organization. Interestingly, Boswell was very emphatic about the established trust and respect in GISB, while Cook preferred to only talk about the "new" structure of NERC and did not focus on its history.

Brownell offered some not-too-subtle passive support of GISB by pointedly asking both Cook and Boswell if they lobbied political positions (i.e., were they not only an organization but also a stakeholder?). GISB was easily able to say they were not, but NERC of course had to admit to their romancing of Congress and the Bush administration for reliability legislation. Point, Brownell.

Mennes acted as somewhat of a supporter for NERC, playing Dave Cook's yes-man. He probably did them a little bit of harm by pointing to NERC's supposed "successes," such as TLR and E-Tag. If staffers have tenure, they will =

likely remember that these "successes" have not been so successful, resulting in several filings and interventions. We may also wish to file comments in specific objection to these claims, to refresh their memory and to show the pretty picture Marty painted was in fact a fiction.

There was a little discussion about splitting reliability and market issues, but general consensus was that I could not be done. There was also some talk of folding NERC under GISB/EISB.

The arguments began winding down after a some time, and Boswell strongly urged the Commission to speak to industry executives and advocacy group leadership to see whether NERC or GISB should lead the industry forward. NERC somewhat less enthusiastically supported this position. In general, I would say it was a close fight but GISB came out more on top.

Let me know if you have any questions.

This week each business unit across Enron has been asked to identify the optimal structure and resources on a going forward basis. While the review is not complete, we are close to finalizing decisions surrounding each individual business. We ask for your continued patience and we know that may be asking a lot. Please take the opportunity to enjoy the time with your family at Thanksgiving and know that we are working hard on finalizing all details. No significant organizational announcements will take place next week.
Mike and Jeff

Setting up oil n products options book. Nice people...alot of ex enron. It feels very much like enron used to be b4 we grew out of control. But there is a guy here with equally bad shirt taste as Marcello!!

Seems a shame mark wright and a few others went to williams and that isn't lookin too rosie. I actually found out about enron's demise when i was away in honeymoon, (great wedding present!!) but still sounds like the best place to be considering everyone else was in the pub!!

Will the UBS job b in Houston back in london?

Well keep in touch and if ur in london and fancy a beer let me know.

take care

Jonesy

One of the print servers was taken down last night. Please let me know if you're experiencing any printer problems this morning, I can do a quick fix.

I have created a very simple spreadsheet for us to track the status of conversations, payback plans, etc. for the volumetric OBAs we are cancelling. It is located on the share drive under lindberg/obastatusrpt. Please update as necessary.

Lorraine

Subject: Contract Review

Please plan to attend a gas contract review kick-off meeting this morning (12/12
/01) at 10:00 AM (location TBA). You have been selected to review one or more p
hysical gas contracts in an effort to expedite preservation of value in these ag
reements for ENA.

Dear Ken

I sent you a letter earlier this week that you should receive soon. It invites you to deliver keynote address at the UH Scholarship and Community Conference this fall. I just wanted to alert you that this has been a stimulating event in the past and the type of scholarly exchange I suspect you would enjoy.

Sincerely,

Ed

Hi Dave,

The slides for today's options session may be found on the following drive:
m:power2\options\power options course notes\Introduction to Power Options Lecture Notes (11-19-01).ppt

Will you please forward this information to the attendees.

As per your request, I made it fairly introductory - since you stated that at the participants may be on different levels wrt to their options knowledge.

However, they stated that they would like the next section to be more advanced - for example to jump right into the crack spread module that I gave to you guys a few weeks ago, along with a few cases studies discussions from origins, generation investments, etc.

Thanks,
Iris

Johnnie Nelson repaired our flow direction controls today.

-----Original Message-----

From: Ellington, Michael
Sent: Monday, November 26, 2001 3:56 PM
To: DL-ETS Gas Controllers
Subject: PNM Rio Puerco

Had some problems getting this interconnect on rate today. Steve Richards went out and got the flow control valves to where they will operate, however, we cannot change flow direction from Gas Control. If the direction needs to be changed, someone will have to go out and do the valve changing manually.

Thanks,

Mike E.

Subject: Re: VNG

Frank,
Sequent is extremely interested in an early termination of the Enron/AGLES contract covering the asset management of the VNG. We are in the process of evaluating a proposal to Enron and hope to have something to you shortly. I will keep in touch. Thanks

Dana Grams
Sequent Energy

>>> "Vickers, Frank" <Frank.Vickers@tcpolice.org> 11/05/01 01:41PM >>>
Dana, I wanted to follow up on our conversation of last week relative to my proposal e-mailed to you on 10/22/01. We are in the process of considering several term transactions that could be supported by the VNG assets. Given your previous interest in terminating the Gas Supply Assignment and Agency Agreement early I wanted to ask if you still have that interest. If we complete any of the transactions being considered it will become more difficult to cleanly terminate the Agreement and return the assets to you without you taking on the obligations within such agreement. It sounded to me last week as if you were no longer focused on the early termination for the reasons that you outlined. We understood your request to look at this opportunity and we responded with our 10/22/01 proposal. Can you tell me if your interest has changed? I want to remain focused on this if you are interested, if things have changed I want to move on in another direction.

Frank

Subject: Results of TW Conference Call

The following times have been identified to make repairs on the 30" Mainlines sections 8-7; 7-6; 5-4 and 30" Loop Line 5-4

1. 19 excavations on Mainline Section 7-6: April 13-20
2. 2-3 excavations (verification digs) on Mainline 8-7: 1-2 days virtually any time; most likely April 2-5
3. 1 excavation on Mainline 5-4: April 8-10
4. 1 excavation on Loopline 5-4: April 8-10

Maximum operating pressure from Sta 8 to Sta 6 will be restricted to 939 psi until excavations and possible repairs have been made.
Cost estimates are being prepared.

If I have misstated, plz advise.

Max

Reyna and Michele,

What do you think of the idea that We place the NNG and Procedures for Offsystem Transactions in a header to the document with Michele's as Part A - Initiation & Regulatory; Reyna's Part B - Deal making and Mine Part C Nominations & Scheduling. From that the procedures could be subdivide for 3rd Party storage or transportation.

Reyna... also in your Part B & C Specific Deal & Fuel....It is Gas Logistics' recommendation that Marketing e-mail the Deal/Purchase sheet to Chris and Debbie with copies going to Lynn and Myself. That way in Chris' absence, someone can follow up on the nom/scheduling.

Thank you for your interest in the True Quote Energy Trading System. The platform can be accessed by using your Internet Explorer (version 5.00.39 or higher) and going to www.truequote.com <<http://www.truequote.com>> on the internet. While on the True Quote Homepage please take a few minutes to familiarize yourself with the action tabs that can provide excellent information for anyone in the energy trading industry such as:

- News - Including daily updates in our Nymex and Gas Storage reports and forecasts by our staff Meteorologist.
- Tutorial - An informative Flash demonstration on the use of True Quote.
- Contact Us - Email any questions you may have directly to our Client Service Department.
- System Overview - Learn about features that set True Quote apart from other systems.

We have also attached an updated Users Guide that will walk you through truequote.com's functionality.

We have generated and assigned you a specific User ID and Password listed below:

USER ID jeffking
PASSWORD bailey

For security purposes we suggest you utilize the option we provide to change your password once you successfully access the system. If you have any questions regarding the system please feel free to call our Client Service Department at 800.327.1499.

Subject: Outstanding EOL PA's

Hi Tana,

I was just wondering if you could assist with the status of the following PA's.
I understand these are awaiting approval by Legal and Contracts, Houston, having already been approved by Credit, Sydney:

| Company | Name | Date Submitted |
|--------------------------------|-----------------|----------------|
| NTT Communications | Taka Maeda | 7 June 01 |
| Yuen Foong Yu Paper | Yileng Tseng | 10 Aug 01 |
| Beijing Zhengcheung Technology | Mr. Hwzhao | 17 Aug 01 |
| Moraka Pte | Venkatesh Raman | 13 Sept 01 |
| Terragate Pty Ltd | Charlie Bell | 12 Sep 01 |
| Mitsui Mining Australia | Akihiro Imazawa | 9 Oct 01 |
| Coal & Allied Operations | Matthew Wall | 6 Nov 01 |
| Nipponkoa Insurance | Kenji Terauchi | 6 Nov 01 |

As I am sure you can appreciate, I have had several inquiries regarding these applications. With the exception of the last 2 which have only recently been entered, these PA's for the most part seem to be taking quite a long time. Any information you can provide regarding the status of any of the above would be greatly appreciated

Thank you and regards,

Alison Keogh

Rod and crew,

In speaking with Jayshree, I think Mitch and Jeff would like to divide the information into categories i.e legal information (environmental disclosures, etc.) regulatory information, financial/accounting (I think we have a lot of this and I will try to get it organized), any relevant tax information, etc. I know this is a lot but let me know what you think, who I should coordinated with, etc.

Thanks
Sarah

Since our OpCo proposal became public, some in the media and others have assumed Enron's new name will be OpCo. That's a mistake -- OpCo is only a temporary name. As I've said before, employees should have an opportunity to participate in naming a new company. And now, here's your chance.

We are just beginning the process to name a corporation that would essentially be an energy asset holding company. The individual assets within this proposed holding company would not adopt the new name, but continue to use their existing names -- Transwestern Pipeline, Northern Border Partners, Portland General Electric, Elektro, and others. These names are familiar and reputable within their respective markets.

To submit a name or names for consideration, send an email with your ideas to me at Office of the Chief Executive anytime between now and the end of June. Over the next few months, we'll be narrowing a list and making a selection. We will announce the chosen name later in the year once we know the outcome of the OpCo auction process.

I hope you have fun with this and I look forward to seeing your ideas,
Steve Cooper

FYI if you haven't already heard.....A quick update on PJM:

1) GPU: The PA PUC ruled in favor of the First Energy merger, but deferred a rate increase. Collaborative meetings are supposed to be taking place over the next month, but Enron's regulatory view is that a settlement will not be able to be reached. The question is if First Energy is still interested in pursuing the merger if a rate increase does not occur. If the merger does not occur, I think this increases our chances of a deal to mitigate GPU's risk, if we can work out the credit issues. GPU will probably be stalling most activity until a definitive answer is announced. The NJ BPU will determine its verdict on the merger Jun 29.

2) PPL's (regulated) RFP is due tomorrow. Enron will not be quoting, given the fact that the size is HUGE.....46,260,000 PV'd MWH, ancillary and ICAP requirements. I believe PPL (unreg) will be quoting on this, and are talking about taking them out of some of the energy risk, leaving them more merchant MW.

Also, the quotes are due tomorrow, but must be held open until July 16 (what a deal!).

3) NJ Board of Public Utilities (BPU) is looking to hold a joint competitive bid of energy and capacity to all default suppliers. This is expected to be 18,000 MW, which includes the load of PSEG, GPU NJ, and Connectiv NJ. The BPU will be reviewing the proposals Aug 1.

I will be out of the office Wed- Fri, seeing Exelon, GPU, PPL, and UGI.
Janelle

Subject: printer

If you or your group have trouble printing, it may be that they moved a bunch a printers to \\nahou-psecn01v server. If you are on the the old server, you have to delete that printer from your printer set up and reinstall it by going through Start/run and typing in \\nahou-psecn01v, then select your printer. Thanks.

Today we released additional information about our related party and off-balance sheet transactions. We have made this information available both on our website and in a Form 8-K filing with the Securities and Exchange Commission (SEC).

The information provides further details about:

- the \$1.2 billion charge to shareholders' equity announced in the third quarter and the transactions related to that charge;
- a restatement of prior years' financial statements to reflect this reduction in shareholders' equity, the consolidation of three entities and prior year proposed audit adjustments and reclassifications;
- the Special Committee appointed by the Enron Board of Directors to review transactions between Enron and related parties;
- the LJM limited partnerships, including a discussion of transactions between Enron and LJM entities; and
- transactions between Enron and other Enron employees.

This information addresses a number of concerns that have been raised by our shareholders and the SEC. As our Board's new Special Committee continues its review of various matters, we will continue to cooperate fully with the SEC in its investigation, and we will continue to respond to investor requests so that they can evaluate, appreciate and appropriately value the strength of our core businesses.

Restatement of Earnings

Based on information that we have recently obtained, Enron and its auditors determined that certain off-balance sheet entities should have been included in Enron's consolidated financial statements pursuant to generally accepted accounting principles. As a result, Enron will restate its financial statements from 1997 to 2000 and for the first and second quarters of 2001. These restatements have no material effect on Enron's current financial position. Here are some details included in the filing:

Net income for each period will be impacted by the retroactive consolidation of Joint Energy Development Investments (JEDI) and Chewco beginning in November 1997, the consolidation of an LJM1 subsidiary for 1999 and 2000 and prior year proposed audit adjustments. Enron's current assessment indicates that the restatement will include:

- a reduction of approximately \$96 million in 1997
- a reduction of approximately \$113 million in 1998
- a reduction of approximately \$250 million in 1999
- a reduction of approximately \$132 million in 2000
- an increase of approximately \$17 million for the first quarter of 2001
- an increase of approximately \$5 million for the second quarter of 2001
- a reduction of \$17 million for the third quarter of 2001.

The consolidation of JEDI and Chewco also will increase Enron's debt by approximately \$711 million in 1997, \$561 million in 1998, \$685 million in 1999 and \$628 million in 2000.

The restatement will have no material impact on Enron's reported earnings for the nine-month period ending September 2001.

You can obtain more detailed information on the items described above by accessing the Form 8-K filing at <http://www.enron.com/corp/sec/>.

We will continue to review our strategic, operational and financial position, and we will continue to keep you updated on any developments.

I met with Rod this morning and he reviewed and revised the category of the capital projects. Please see attached spreadsheet for the new information. Once a

gain I will let you determine how you want to present the number on the capital form so you can account for rounding for the different projects. Sorry this is even later but I am working as fast as I am able.

I am preparing booklets with the capital project write ups for each functional area and will have them to you today.

Steve I will work with you on how you want to handle.

Kim,

Thanks for your quick response. I hope to bring closure to the other gas deal next week. Have a good weekend.

Jeff

Jeff,

A 10 year fixed price indication at the PG&E City Gate out of Jan. 02 is approximately \$3.32. I hope this is helpful. Let me know how I can help facilitate the blend with Merced.

Let me know if there is anything else that you need.

thanks,

Kim

Kim, can you help Merced out with a 10-year PG&E city-gate price assuming a 1/1/2002 start (see message below). I'll get them the electricity price. Indicative price is fine. We are not going to transact.

Got your message too about gas prices moving up. We are still looking at the blend/extend versus an outright swap of the last almost 3 years. I'll be in touch.

Thanks for your help.

Jeff

Jeff:

Do you have on hand data on natural gas futures for 10 years and Electric Prices projected for 10 years. If Available we can use them this morning. I know the lead time is short but would appreciate any help you can provide.

Thanks

Roy

Scott,

I emailed you the attached profile a month or so ago. At that time, you were at NYMEX + \$0.68 with a trigger. The customer is finally ready to do something and I was wondering if you could update the price for me this afternoon. You can just email back your quote if it is easier.

Thanks,

Thomas E. Spencer

It appears that the following email may not have been clear. You have to copy all documents yourself.

This is my cheat sheet if it helps:

H Drives:

1. Each person will have to move any data over personally from the old H drive (which is now Z:) drive to their new H drive.
2. The Z: drive (old H:) will be removed from UBS employees on Thursday night.

O Drives:

1. For the old O or M drives go to O:\ESTATE\ O (or M ? pending location of data) and copy to the new common O. The Estate O and M will be removed from UBS employees on Thursday night.

Do not delete anything and only copy information which complies with the policy. Please make sure that those people who are not in the office are contacted and comply.

Louise

To: All Enron Employees Transferring to UBS Warburg Energy (or its affiliates)

Under the terms of the various agreements among certain Enron entities and UBS AG, certain Enron data and documents may be provided to UBS. To ensure compliance with those agreements, Enron's document retention policy, as well as directives of various investigative agencies, the attached protocol regarding the process for migration of any information or data to UBS has been developed.

Please review the protocol carefully. Then, complete the attached Certification and return it, with attachments, to Linda Guinn at EB 3829a no later than February 11, 2002.

Questions about this matter may be directed to Michelle Cash at (713) 853-6401 or Francisco Pinto-Leite at (713) 345-7942.

The CPUC published the SoCalGas unbundling order yesterday however due to Outlook problems I was unable to distribute it until today. Attached is a direct link to the order for your review. Since I'm using the website link to Outlook to send this e-mail, please let me know if you can't open the attachment and I will send it again when Outlook is back up in Omaha. The order is about 163 pages in length so if you don't have a good copier and want a hardcopy please give either myself or Blair a call and we will provide it for you.

Significantly for Transwestern is the section on Intrastate Transmission Capacity and the Open Season process. This can be found on pages 41-58 with the Open Season discussion on pages 44 and 45. On pages 126 and 140, the commission directs SoCal to include an additional 375mm/d of backbone (including receipt point) capacity in the open season process. This is important because it includes the 50mm/d at Needles (per SoCal's exhibits in the system adequacy docket). In the Comprehensive Settlement, Appendix B, North Needles is listed as having capacity of 750mm/d of Primary Access Rights from Transwestern. It would be my recommendation that we need to encourage SoCal to revise this Appendix B as directed by the Commission to include the 50mm/d as capacity with Primary Access Rights from Transwestern as they had previously indicated in the Systems Adequacy Proceedings.

SoCalGas was directed to file an Advice Letter to establish tariff revision to implement this order within 15 business days of the effective date (December 11, 2001). Assuming two holidays for Christmas and New Years Day, this would make their filing date January 3, 2002. If we all agree that we need to encourage SoCal to add the 50mm/d as part of the open season process, then this needs to be done prior to their Jan. 3rd filing. Steve/Lorraine, please let me know if I can be of assistance. Following their filing, interested parties have 20 days to file a protest and/or comments on an Advice Letter filing (January 23, 2002).

Please review the order or pertinent portions and advise of any comments you may have for our response. I'll be in the office this week and on vacation between Christmas and New Years Day however I can be reached at home anytime. My home number is (402) 330-3860. gh

Today's mail brought the following news:

1. Metropolitan Water District: MWD has terminated Deal Nos. 790056.01 and 807275.01, effective December 12, 2001. There are two other one-month deals, one beginning in February and one in March. I am confirming with MWD that they intend to terminate those as well, as is required under the WSPP agreement.

2. City of Vernon: City of Vernon has terminated all deals effective December 27, 2001.

3. WAPA is retaining monies due Enron for post-November 30 deliveries while WAPA "assess[es its] set-off rights under the Bankruptcy Code and other applicable law."

4. City of Luzenac has suspended deliveries until January 15, 2002.

5. City of Burbank has terminated all transactions immediately.

Mark,
Susan said to go ahead and expense the cell phones. I called AT&T and it was 176.92 so I put it on my credit card and I'll turn it in. The phones should be on now.

I fear death is making a strong push down the backstretch. Right now its a pissing match between Watson and the banks. We are somewhat emasculated bystanders.
Mitch

15 days prior to scheduling, the QSE must have the registration form submitted to ERCOT.

The real critical path is the QSE testing.
QSE testing which is dependent on the test flights. It is unclear to me from the website where that resides. Smith may already know. I will follow up with the testers.

We can start trading as soon as we can get trading contracts in place with other marketers. But we cannot schedule. However, we can use another QSE of course.

I can get this moving as soon as we have the company identity and bank info in hand. Bill Rust has all the forms in a file and a list of the items we will need to complete the forms. Smith will work with ERCOT to get the testing started. We also need a check for \$500 to start.

There are files that back up the revenue projections that Steve Kleb gave me hard copies of for 2001 and 2002. Can I get electronic copies of these, they have volumes and margins and appear to back up the revenue projections.

2002 File looks like s\marketing\twfinmkt_only\Tw\twfin\2001\misc\[plan_forecast_design.xls]\summary.

2001 file looks like s\marketing\twfinmkt_only\Tw\twfin\2001\forecast-CE\[ce 3-2001.xls]model_source_data.

If the same exists for 2000 can we get it as well. I would like as soon as possible and you can email to the cc addresses as well.

Subject: Request for Migration of Sitara EOLBridge into Production

Hello Zhiyong,

I have implemented an enhancement to avoid the problem of restarting the
Sitara EOLBridge when there are missing startdate and enddate. This fix will t
ake care of this morning's problem.

EOL will be sent a Failed status similar to the following:

message={EolTransactionId=2101638 TransactionSysDealId="" BridgeEntityNa

me="EOLBridge" Message="Missing StartDate or EndDate" Status="F" BridgeDate="20011025170945CDT"}
}

I throughly tested the change by sending over 400 sample deals from this morning . Due to the "Bid Week" window, please approve this bridge enhancement for tonight's migration. Thank you.

-Dat Truong x63015

Cc: Husain, Karima; Lim, Francis S.; Saluja, Gurdip; Sweitzer, Tara
Subject: Sitara EOL Bridge Problem Today

The problem we faced today was due to 2 eol deal packets (2098073, 2099764) not having startdate and enddate. Missing these 2 tibco message fields caused the bridge to bounce and resulted in the queue to build up while the bridge is starting up. (The bridge takes 2 minute for startup). Each time these deals are sent/resent, it continuously cause the Sitarar EOLBridge to restart, thus magnifying the buildup of the queue.

The corrective action we are taking at our end is to build a rejection logic when eol packets do not have start and/or enddate.

-Dat Truong

In order for UBS Warburg to timely process your paycheck, I am requesting that all employee's accepting offers return any outstanding forms to my new desk location at 05852 on the 5th floor of ECS (Look for the Hamburg Flag) by noon this Friday 2/01/02. This will prevent any benefit deductions from having to be "Double Deducted" on future checks. Please attach a deposit slip or voided check stub to your direct deposit form. Attached below are the forms needed for payroll/benefits, in case you did not turn these in at Orientation. Lastly, please verify that your EHRonline home address is showing your current home address because all live checks will be mailed to your home residence.

Thanks, Tony Jarrett
Benefits

To: =09Whalley, Greg; Lavorato, John
Subject: =09FW: =20

Greg,

After making an election in October to receive a full distribution of my deferral account under Section 6.3 of the plan, a disagreement has arisen regarding the Phantom Stock Account. =20

Section 6.3 states that a participant may elect to receive a single sum distribution of all of the participant's deferral accounts subject to a 10% penalty. This provision is stated to be notwithstanding any other provision of the plan. It also states that the account balance shall be determined as of the last day of the month preceding the date on which the committee receives the written request of the participant. In my case this would be as of September 30th. I read this paragraph to indicate a cash payout of 90% of the value of all deferrals as on September 30, 2001. The plan administrators, however, interpret this paragraph differently. Their reading yields a cash payout of 90% of the value for deferrals other than the Phantom Stock Account, which they believe should be paid with 90% of Enron Corp. shares in the account as of September 30, 2001. Their justification is that in several places throughout the plan document and brochures it is stated that the distributions of the Phantom Stock Account shall be made in shares of Enron Corp. common stock.

There are two reasons that I do not agree with their interpretation. First, section 6.3 begins with "notwithstanding any other provision of the Plan." This indicates that any other payout methodologies described in other sections of the plan which deal with normal distribution at termination do not apply. Second, the language in section 6.3 stating "a single sum distribution of all of the Participant's deferral accounts" indicates that one payment will be made not a cash payment separate from a share distribution.

The interpretation of the administrators goes beyond section 6.3. If that is the case then section 7.1 should apply. This section does provide for the Phantom Stock Account to be paid in shares. However, it states "The value of the shares, and resulting payment amount, will be based on the closing price of Enron Corp. common stock on the January 1 before the date of payment, and such payment shall be made in shares of Enron Corp common stock". This would result in approximately 8.3 shares to be distributed for every share in the account on January 1, 2001. Although this would be the most beneficial to the participants due to the decline of the value of Enron Corp. common stock from \$83 to \$10 per share, this methodology goes beyond section 6.3.

The calculations below illustrate the difference in the value and method of distribution under each of the three interpretations:

Section 6.3=09=09Plan Administrators=09=09Section 7.1

Number of shares=09=096,600=09shares=09=096,600=09shares=09=09=096,600 shares
Relative share price=09=09\$27.23=09=09=09=09=09=09=09\$83.13
Phantom Stock Value=09=09\$179,718=09=09=09=09=09=09=09\$548,658
10% Penalty=09=09=09-17,972=09=09=09-600=09=09=09=09-54,866
Value to be distributed=09=09\$161,746=09=096,000 shares=09=09=09\$493,792
Current stock price=09=09=09=09=09=09=09=09\$10
Distribution=09=09=09\$161,746=09=096,000 shares=09=09=0949,379 shares

I believe my interpretation under section 6.3 is correct and fair. If the =
administrators insist on distributing shares instead of cash then section 7=
.1 should apply. The current interpretation of the plan administrators is =
a hybrid between the two sections resulting in the lowest possible payout. =
=20

In addition to myself, Tom Martin, Scott Neal, and Don Black are facing the=
same issue. I would appreciate your review and consideration of this matt=
er.

Sincerely,

Phillip Allen =20

Today we announced the appointment of Jeff McMahon as Enron's chief financial of
ficer. In my continued discussions with the financial community yesterday and t
oday, it became clear that this move was required to restore investor confidence
. Jeff has unparalleled qualifications and a deep and thorough understanding of
Enron. He is already on the job and hard at work on the issues before us. And
y Fastow will be on a leave of absence from the company.

Jeff had been serving as chairman and CEO of Enron Industrial Markets. He joined
Enron in 1994 and spent three years in the London office as chief financial off
icer for Enron's European operations. Upon returning to the U.S., Jeff was exec
utive vice president of finance and treasurer for Enron Corp. In 2000, he was n
amed president and chief operating officer of Enron Net Works.

I know all of you are concerned about the continuing decline in our share price.
I am too, and we are working very hard to turn it around. Appointing Jeff as
CFO is one important step in that process. But most of the solution involves ju
st continuing to do our jobs with excellence. The fundamentals of our business
are strong, and I think the market will begin to see that as we continue to perf

orm.

Please join me in giving Jeff your full support, and thank you for all of your continued hard work.

Subject: Spread the word...

After a very heartwreching week, I think it is time everyone had the opportunity to relax a little bit from all the madness. Therefore, I am suggesting we meet up on Saturday around 8pm at Cabos downtown. Please feel free to spread the word. This way, it can be a networking party of exchanging information and business cards.

Place: Cabos Downtown (419 Travis St)
Time: 8 pm

Thanks,

Come by EB1644B to get your Open Enrollment 2002 packet. If you are not located in the Houston HQ office, please send me a good address to send your information.

Your packet was mailed back to Enron Corp due to an incorrect address.

The first window closes on November 12, 2001. Act now if you want your enrollment packet!!

Thank you.

Subject: Retention Bonuses

Reading all of the media reports on the \$58 million of payments . All of the reports I have read refer to "executives" receiving payments. I think we need to be very clear that NO executives received payments (at least this is how I understand it). I am referring to executives as 16b officers. This will not only clarify the situation for the media, but will help with severed employees as well.

Hello, Everyone -

RT0 West will hold two days of meetings Monday, February 11, and Tuesday, February 12, 2002 to review, discuss and seek consensus on the draft filing that RT0 West is preparing to submit to FERC by March 1. These sessions are part of a broader consensus seeking activity with stakeholders, the Congressional delegation, and all parties interested in RT0 West. The meetings will afford an opportunity to Regional Representatives to prioritize and explain their key issues to the RT0 West principals.

The meetings will be Monday, February 11, from 8:30 a.m. until 5:00 p.m. and Tuesday, February 12, from 8:30 a.m. until 4:00 p.m. at the Shilo Inn located at 11707 NE Airport Way. The Shilo Inn is about 2-3 miles east of the Portland Airport and east of I-205. From I-205 take exit 24 from the north or exit 24B from the south. If you need overnight accommodations, the Shilo Inn phone number is 503-252-7500.

The draft filing will be posted by February 6. We will notify you when it is on the RT0 West website. We will also be sending you an agenda for the sessions with structured time slots for input on specific elements of the draft filing. During the afternoon session on February 12, preliminary Benefit Cost Study results will be presented for discussion.

The working agenda is as follows:

On February 11

- draft preliminary Filing Letter,
- current draft of Transmission Operation Agreement (TOA), and
- revised draft of Congestion Management proposal.

On February 12

- revised draft of Pricing proposal,
- draft Ancillary Services proposal,
- revised draft of Planning and Expansion proposal,
- revised draft of Market Monitoring proposal,
- proposed draft of Insurance, Indemnity and Limitation of Liability Agreement,
- revised drafts of Scheduling Coordination and Paying Agent Agreement, and
- preliminary results of the Benefit Cost Study.

Again, you can expect a more detailed agenda for the meetings and a notice that the draft filing is posted by February 6.

Thank you,
Christine Elliott,
RT0 West Coordinating Team

All the cap does is keep the bolt clean so if you need to jump start you can get a good connection on the bolt. It also keeps someone from accidentally shorting the battery by grounding a wrench or screwdriver, etc. See ya.

Thanks. My battery cap looked a little different. I will try to take it off tonight and will take a picture.
It wasn't obvious to me at the time how the cap worked (it wasn't nearly as clean around the battery as grandmas). Hopefully no more problems.

Jason

Jay,
Here's 3 pictures as I see Grandma's car.
One with the hot battery terminal cap on.
One with the hot battery terminal cap off.
One showing where the hot cable from your battery connects to your starter.
Hope they help.
Love Dad
PS: Let me know if you get these. I made the files as small as possible,
but don't know if they are too big to get to you.

Spoke with Delainey this morning he suggested I draft below and send to him and Greg. Can you help critique (in particular I think this is too detailed);

To: All ENE employees (bar EEL)
From : ENE OTC
Re: Year-end Performance Evaluations, Promotion Nominations, PRC Meetings and Annual Bonus process.

Many employees have been asking questions related to the above and some have asked for further clarification of the changes announced in the Lay it on the line survey results memo relating to the PRC. In this regard and particularly in mind of the significant business matters we must attend to over the next couple of months, we hope the following summary of the above related processes will provide everyone with a clearer picture of how each of these processes will be handled, why, when and by whom.

Performance Evaluations

The ENE OTC believe strongly that all employees should receive a written evaluation summarizing their achievements over the last 6 months, illustrating successes and constructive areas for development and opportunity. It is our intent that this should not replace day to day communication, coaching and feedback to all employees by supervisors, it is an important formal appointment we expect all Enron business units and functional areas to meet.

Summary of Process Applicable to

Timeframe Notable changes from the past

PEP the 360 degree, intranet ALL full, part/reduced time enabled feedback system will employees, who joined drive the process as follows:
Enron prior to October 1,
1. EE's will select up to 7
2001.

None

1. System opens November 9
2. System closes November 30
3. Final evaluations are due no later than January 31, 2002

Reviewers they have work with over last 6 months. These should be a reasonable selection of direct reports, peers and managers.
2. Their Supervisor will discuss and

possible edit the above list with them before approving on-line for distribution.

3. Recipients of f/b requests are notified electronically and may decline if they feel they have insufficient data.
4. Managers collate the feedback and prepare a summarized final performance evaluation form balancing their views with those received on-line and setting any appropriate objectives for next 6 months.

Training for the on-line PEP 360 degree tool will be available from
..... contact to register. A helpdesk is also available for employees to call with any questions ext.....

PRC Meetings and Promotion nominations

The lay-it-on-the-line survey response outlined our desire to make some changes to the PRC process. As a management team, we believe strongly in the value of regular discussions surrounding what performance and skills are currently valuable, on a relative basis where are they being demonstrated most, who is ready to assume a greater role in the organization and where are they currently deployed. Equally, regularly questioning areas where overall performance may have been disappointing is also critical. Continuing this process is core to our desire to maintain a meritocratic culture and identify new opportunities for employees. In this regard, the ENE OTC has directed Business Units and Functional areas to undertake a very limited number of discussions to focus on the following:

| Summary of Process | Timeframe | Applicable to |
|--|--|--|
| 1. Each BU/Functional area will conduct a single discussion to identify its top 10% and bottom titles employed prior to 2001. All other Leadership potential required to go Teamwork forum, promotion Enron Intrinsic skills and qualities nominations by BU/Functional area specific measures OTC | 1. Meetings held between Analyst, Associates
December 1 and 15th
2. Process not linked to employees feedback
2. VP/MD promotion
(ie no label attached to evaluation document)
discussion mid Dec.
3. No longer prime driver of bonus process
4. Primary purpose; to identify and agree candidates, leadership candidates, deployment of talent within BU's/Functions.
5. No prescribed outcome to either top 10% or bottom 10%.
6. No cross calibration of employees outside BU/Functional area.
7. Discussions held by each Management team | all Managers
July 1, 2001
employee's not thru this recommendation
supervisor to BU or Functional area |
| 2. Promotion nominations up to Senior Director or below to be decided by each BU/Functional area. | | |
| 3. Attendee's of meetings to be each BU/Functional area management team. | | |
| 4. Results of meetings reviewed with ENE OTC. | not "committee". | |
| 5. Management committee meeting to discuss and agree VP and MD promotion | | |

candidates submitted from each area.

Additional information will follow from each of your BU OTC's or Functional leads regarding the details. Initial plans discussed with the senior management team indicated no more than 22 meetings in total, which compares with over 200 at the mid year.

Annual Incentive Plan and Equity Award process

The Executive Compensation Committee of the Board will review and agree an appropriate Bonus and Equity pool for eligible employee's in January 2002, based on recurring earnings and in line with the plan. The ENE OTC will allocate this appropriately to each BU and Functional area based on unit performance against plan and competitive market data obtained from our external consulting partners. Given our strong pay for performance culture, these annual awards are a key element of the Enron compensation arrangements, with a clear correlation to the Company's overall performance against plan, each individual area's performance against plan and each individual's contribution. We and the board are committed to ensure our key employees are paid appropriately:

Summary of Process and Timeframe

Applicable to

1. Each area allocated initial bonus pools Jan 4, 2002.
2. Human Resources provides guidelines for individual targets based on market data.
3. Each area recommends payments to ENE OTC by Jan 11, 2002.
4. ENE OTC reviews numbers and recommends pool to Board Jan 24, 2002.
5. Employees receive notification of any awards Jan 28 thru Feb 8, 2002.
6. Cash bonuses scheduled for payment week of February 8, 2002.
7. Equity awards scheduled for approval by board week of Jan 18, 2002.

All full part/reduced time employees as of November 1, 2001.

It is our design to reduce significantly the burden of these processes on our personnel, ensure that all understand

HIGHLIGHTS

PAST DISCIPLINE CAN BE CONSIDERED IN REVIEW OF POSTAL
FIRING, JUSTICES SAY

In reviewing the reasonableness of a U.S. Postal Service worker's termination for cumulative misconduct, the Merit Systems Protection Board may consider past discipline of the employee even if those actions are being grieved, the U.S. Supreme Court rules, reversing a Federal Circuit decision ("USPS v. Gregory," U.S., No. 00-758, 11/13/01).

Writing for the court, Justice O'Connor acknowledges that a federal employee may be faced with a board decision that reaches a different result than the grievance arbitrator ultimately might reach, or never have his or her grievance resolved because a collective bargaining agreement requires union withdrawal of a grievance when the board issues a final decision. There is nothing unfair in those results, however, the court says, because a union-represented federal employee who elects to pursue a board appeal does in fact receive an independent review of the reasonableness of the agency's discipline.

Nevertheless, the court remands the case involving Postal

Service employee Maria A. Gregory--who was accused in September 1997 of deliberately inflating an overtime request--because one of the three minor disciplinary actions relied on by MSPB in its ruling was decided in Gregory's favor by an arbitrator prior to the its decision. . . . SUPREME COURT LETS STAND RULING THAT UNION'S TORT CLAIMS NOT PREEMPTED

The U.S. Supreme Court lets stand an appeals court ruling that the National Labor Relations Act does not preempt state law tort claims by union representatives who were detained by a nonunion contractor for trespassing on its jobsite ("Rainbow Constr. Co. v. Radcliffe, "U.S., No. 01-424, "cert. denied" 11/13/01). Rainbow Construction Co. sought review of a June decision by the Ninth Circuit that allowed four representatives of the Bay Counties District Council of Carpenters to proceed with claims of false arrest, false imprisonment, and malicious prosecution.

The union representatives inspected various publicly financed construction projects in Mendocino County, Calif., to investigate allegations that contractors were not complying with prevailing wage and health and safety rules. On three occasions, Rainbow made citizen's arrests of three of the union representatives, who were then taken into police custody. The county district attorney prosecuted all four officials for criminal trespass. California trespass law does not allow property owners to exclude persons engaged in lawful union activity. The Ninth Circuit decided California's interests in protecting its citizens were sufficient to avoid preemption. . . . Page AA-2, Text E-1

IOWA MAYTAG WORKERS END STRIKE AFTER ACCEPTING THREE-YEAR CONTRACT

Workers return to Maytag's Middle Amana, Iowa, manufacturing plant after voting to accept a new contract, effective immediately and running until September 2004. The vote ends a seven-week strike by some 1,800 employees represented by the Machinists at the refrigerator and microwave oven manufacturing plant.

The new contract addresses three issues that prompted the strike: mandatory overtime; a two-tiered wage system; and health insurance premium increases. Ed Miller, business representative for IAM Local 1526, says although union members are not entirely satisfied with the changes, they approved the contract in the belief it was the best that could be achieved this year. The union recommended approval of the pact. According to Miller, the contract calls for an

hourly pay increase of \$1.47 over term, with a 60-cent raise this year, 46 cents next year, and 41 cents in late 2003. Average pay at the plant is currently \$14.40 per hour. New hires will receive 80 percent of the previous minimum pay and will not reach the top of the pay scale as quickly as under the previous contract.

Maytag proposed increasing mandatory overtime to 12 hours per week per worker, but the union was able to keep it to eight hours per week per employee, Miller says. Union negotiators were less successful in addressing their concerns with health insurance, and the new contract includes both higher premiums in the last year of the contract and reduced benefits. A Maytag spokesman says the company is pleased with the contract agreement. . . . Page A-2

HIGH COURT REFUSES TO CONSIDER VICARIOUS LIABILITY FOR SEXUAL HARASSMENT

The U.S. Supreme Court refuses to review an appeals court's decision upholding a jury's verdict that a mine owner was vicariously liable for sexual harassment because the company failed to exercise reasonable care to prevent the harassment of a female miner by her male boss ("Eddy Potash Inc. v. Harrison, "U.S., No. 01-383, "cert. denied," 11/13/01).

Eddy Potash Inc., which operated an underground potash mine near Carlsbad, N.M., asked the justices to overturn the Tenth Circuit's decision to affirm a jury's finding for Jeanne Harrison. In this case's second trip to the Supreme Court, Eddy Potash urged the court to revisit its decisions in "'Faragher v. Boca Raton'" and "Burlington Indus. Inc. v. Ellerth" because, it argued, those decisions did not address whether an employer should be held vicariously liable for sexual harassment by a supervisor where both the employer and the employee have acted reasonably. . . . WORK CHANGES AFTER HARASSMENT CHARGE JUSTIFY TRIAL ON RETALIATION CLAIM

A Philadelphia Housing Authority worker can proceed to trial with her claim of illegal retaliation under Title VII of the 1964 Civil Rights Act, based on her allegations that she was given additional work and shift changes after participating in the sexual harassment complaint of a co-worker ("Jenkins v. Philadelphia Housing Authority, "E.D. Pa., No. 00-CV-609, 10/24/01).

Monique Jenkins established "sufficient evidence of a possible causal link" between her claim of the job changes and her protected activity under the federal civil rights law to warrant a trial, Judge Buckwalter of the U.S.

District Court for the Eastern District of Pennsylvania holds.

Although dismissing Jenkins' other claims against her employer, the court finds that comments from some of her supervisors, who referred to her as a "snitch" and "not a team player," support her allegation of retaliation. . . .

To Seconds/Leads:

Attached is an update of the Priority Settlements matrix with changes identified in bold.

One of the sheets in the attached excel file is a listing of certain contracts deemed Terminated by ECC. Counsel is seeking MTM calculations on these Terminated contracts/counteparties as soon as possible. Accordingly, while on-going settlement discussions should continue, the focus for seconds/analysts should shift to calculating the MTM's (some of which are already underway per the Priority Settlements list) from the Terminated Contracts list. We are currently seeking input from Counsel as to whether we should shift even more resources to the Terminated Contracts list MTM calculations. We'll let you know on that.

In any case, I'm going to be collecting MTMs on the Priority Settlements when I do my daily rounds - I've been getting this from most of you but there's been some exceptions, so if you have the models done I'll be asking for:

- Your calculated MTM number
- The TAGG / NPower MTM number

Thanks in advance.

Any questions or problems, let me know.

Regards,
Mike

Special Offer from Renovation Style Magazine =09=09
Don't wait till it's time to renovate - add beauty and function to your home now! Subscribe today and get style and inspiration all year long. =09=09
Dear scott, Greetings from the editors at Better Homes and Gardens! Each recipe has been tested in the Better Homes and Gardens Test Kitchen. [IMAGE] All-American Burgers These burgers are great to serve for 4th of July celebrations or for other summer cookouts. Accompany with buttered corn on the cob if you like. For a printable version of this recipe, click here. For more recipes, click here. New this week: Hot Off the Grill: Marinades, Menus and More =09=09
[IMAGE] 1 clove garlic, minced, or 2 tablespoons finely chopped onion =

2 tablespoons catsup 1 tablespoon steak sauce 1 tablespoon Worcestershire sauce 1 teaspoon sugar 1 teaspoon cooking oil 1 teaspoon vinegar Few dashes bottled hot pepper sauce 1 pound lean ground beef 1/4 teaspoon salt 1/4 teaspoon pepper 4 hamburger buns American cheese slices (optional) Lettuce leaves (optional) Tomato slices (optional) Red onion slices (optional) Pickle slices (optional)

1. For sauce, in a small saucepan combine garlic or onion, catsup, steak sauce, Worcestershire sauce, sugar, cooking oil, vinegar, and hot pepper sauce. Bring to boiling; reduce heat. Simmer, uncovered, for 5 minutes. Remove from heat; set aside. 2. In a medium mixing bowl combine ground beef, salt, and pepper; mix well. Shape meat mixture into four 3/4-inch-thick patties. 3. To Cook by Indirect Grill Method: In a covered grill arrange preheated coals around a drip pan. Test for medium heat above the pan. Place meat on the grill rack over the drip pan. Cover and grill for 20 to 24 minutes or until no pink remains, turning once halfway through grilling time and brushing frequently with sauce during the last 5 minutes of grilling. 4. To Cook by Direct Grill Method: Grill meat on the grill rack of an uncovered grill directly over medium coals for 14 to 18 minutes or until no pink remains, turning once halfway through grilling time and brushing frequently with sauce. 5. To serve, split and toast the buns on the grill. Serve patties in buns with cheese, lettuce, tomato, red onion, and pickle, if desired. Makes 4 servings. Make-Ahead Tip: Prepare sauce; cover and chill up to 24 hours. Prepare and shape burgers. Cover with plastic wrap and chill up to 2 hours before grilling. Attached is the final report for November, 2001, which includes a name overlay completed in GCP today.

Encal Energy Limited to Calpine Canada Resources Ltd.

Click below, then click FETCH to view. Refer to the bottom tab "Nov 2001" for details.

<http://nahou-dmagn01p/ena/livmlink.exe?func=ll.login&username=GCPGuest&password=&nextURL=%2fena%2flivmlink.exe?func=ll%26objId=11965334objAction=browse&sort=nam>

e

Shortname changes will be coordinated with ERMS IT, Friday November 30.

Records will be inactivated on Monday, December 3.

Please Note: I was unable to include the supporting documents due to an error message in Livelink. Please check the link tomorrow.

Also, I will be out of the office this week, please contact Ruby Kyser @ x58136 or Bernice Rodriguez @ x37972 with any questions or concerns.

Thanks,

Cheryl Johnson

The Resolution Center will be decommissioning one of its 888 numbers (888-877-7757) as of January 7, 2002.

You can continue to contact the Resolution Center, Toll Free, by using the following steps:

To contact the ENW IT Resolution Center:

? Call 1-800-973-6766 (1-800-97-ENRON)

? Select 1 to transfer to an extension within the Enron Building

? Select 31411 and you will be transferred to the helpdesk.

The following options are also available through the toll-free number:

0: Connect to voice directory

1: Transfer to an extension in the Enron building

2: Access voicemail in the Enron building

3: Transfer to 3 Allen Center

4: Transfer to Omaha

5: Transfer modem or fax with 646 prefix

6: Speak to an Enron operator

7: Transfer to a fax machine in the message center

8: Transfer to Aviation

9: Leave a confidential message for Enron Chairman

Please contact the Resolution Center at 3-1411 for assistance

ETS customers should continue to contact the ETS Solution Center-Houston at 713-345-4745 or 888-465-4745, and the ETS Solution Center-Omaha at 402-398-7454.

Hello all.

I just spoke with Dan Wayland at TFS. He said that a college education fund has been established in Robby's son's name.

I am sending this message out to all of those people who knew Rob or who have mentioned wanting to contribute to such a fund if it should come about. I recognize that all of you may not have known Rob as well as I did. Also, some of you have been impacted by the loss of many friends in this tragedy and may not be able to contribute to every fund. Still, I wanted you to be aware of this one.

Checks should be made payable to:

The Charles A. Noonan Educational Foundation

...and be sent to:

The Charles A. Noonan Educational Foundation
c/o Craig Polar
89 Lower Cross Road
Greenwich, CT 06830

If you have questions, please call Craig Polar at 917-691-5153.

Thank you,

Kurt

Dear Ken,

First, let me thank you again for your continued support of Scenic Missouri and Scenic Texas through your family foundation. We are very grateful that you have embraced our efforts to save "America the Beautiful."

Second, I wanted to make sure you were aware of what I think may be a great public relations opportunity for Enron. I think you may have already heard from Kathy Whitmire about it. While at a Scenic America board meeting at Harlan Crow's Camp Topridge (you may have been there), I learned about Scenic America's upcoming program on PBS. This will consist of a series of six airings of a 30 minute documentary on Scenic America, its mission and the issues with which it is involved. Kathy Whitmire was at the meeting as was Carroll Shaddock, founder and chairman of Scenic Texas. A substantial advertising discount is being made available to the corporation that sponsors this documentary. This might be a perfect match for Enron, especially in light of your demonstrated commitment to the missions of Scenic America and its affiliates.

At any rate, I hope you will give this your consideration. Thanks so much for your ongoing help and support.

Sincerely,

Karl Kruse
Executive Director
Scenic Missouri

TXU Sells Two Texas Power
Plants to Exelon; Sale Supports
Strategies of Both Companies=20

By Will McNamara
Director, Electric Industry Analysis

[News item from PRNewswire] TXU Corp. (NYSE: TXU) and Exelon Generation announced an agreement to sell two large TXU gas-fired electric generating plants to Exelon Generation, a subsidiary of Exelon Corp. (NYSE: EXC) for \$433 million. The transaction, involving two Dallas/Fort Worth plants with a combined capacity of 2,334 MW will allow Exelon Generation to expand its presence in the Texas region, enhancing its geographic and market diversity, while providing TXU with the opportunity to expand beyond Texas.=20

Analysis: Perhaps the key factor about this deal is that it supports the strategies of both companies particularly well. TXU, one of the largest generation companies in the world, has been attempting to expand out of its home state of Texas for some time, following competitive opportunities as they are presented by electric deregulation. The company, which will maintain a presence in the Texas market, has already expanded internationally into countries such as Australia and Europe, and will mostly likely use the proceeds from the divestiture of its two Texas plants to expand further in the United States. For Exelon, the deal provides a foothold into the expanding Texas market, which becomes fully competitive next week, and provides a particularly valuable inroad into the high-demand region of Dallas/Fort Worth.

Let's first establish some important data about the two plants that TXU is =

selling to Exelon. As noted, the combined capacity of the two plants is about 2,334 MW. One of the plants is the 1,441-MW Handley Steam Electric Station, which is located southeast of Fort Worth. According to TXU, 412,000 barrels of oil can be stored on site to fuel five oil/gas units at the plant. Handley is cooled by water from Lake Arlington. The first unit was put into operation in 1948, with the additional units coming on line in 1950, 1963, 1976, and 1977. The other plant being sold is the 893-MW Mountain Creek Steam Electric Station, which is located about two miles west of Loop 12 in Dallas. With the first oil/gas unit established in 1945, four more units were added in 1949, 1956, 1958, and 1967. Both sales include the generating units of the plants, along with all of the other assets that are necessary for them to operate (land, water rights, transmission interconnections, gas pipeline interconnections, production facilities, and emission allowances).

The strategies of both companies that are driving these transactions are pretty straightforward. From TXU's perspective, the sales will reduce the company's generation concentration in a single U.S. market, which up to this point has been primarily in its home state of Texas. Proceeds from the sale apparently will be used to help TXU to expand in other North American markets outside of Texas. In addition, proceeds from the sale will be used to strengthen TXU's balance sheet by reducing debt, something that has become increasingly important to all companies operating in the competitive energy space since the bankruptcy of market-leader Enron. It is important to note that TXU has no plans to exit the Texas market, and still intends to operate in the state as a generation company and retailer. Note that according to Texas restructuring law, there must be a wall between the two operating units, which must function as separate companies. In essence, the divestiture is merely being used as a strategy for TXU to free up necessary cash that will support growth into other markets, and reduce the amount of potential market power that the company may have in Texas.20

The issue of market power is another new factor that has developed in the latter half of this year, considering that recent rulings by the Federal Energy Regulatory Commission (FERC) have forced several other companies to charge cost-based prices for some wholesale transactions if they are deemed to hold market power in their particular service territories. Texas law allows a company to own and control no more than 20 percent of capacity within the Electric Reliability Council of Texas (ERCOT), and TXU claims that it is within this cap. However, TXU acknowledges that it had an over-concentration of generating capacity in one market and wanted to expand into other markets. Excluding the sold facilities, TXU will now own 18,651 MW of net capacity, which are still located primarily in Texas. However, it is becoming clear that TXU intends to reduce its role in the Texas generation market.

From Exelon's perspective, the sale expands the company's generating capacity by about 10 percent, which is an important increase considering that Exelon is attempting to maintain its position as one of the industry's largest asset-based traders. Exelon, which was created as a result of the merger between PECO Energy and Commonwealth Edison, is known mostly for its strong nuclear capabilities. In fact, Exelon has the largest nuclear fleet in the nation and still outpaces most of the competition in the nuclear industry, owning a total of 17 reactors that produce about 17,000 MW of power. Exelon may be attempting to create a more diversified generation portfolio. Exelon Power, which will manage the output of the two plants bought from TXU, oversees Exelon's portfolio of coal, natural gas, oil, landfill gas, and hydro generating assets, which include 72 intermediate and peaking units in Pennsylvania and Maryland (capable of producing 4,800 MW of net generating capacity). Thus, Exelon's purchase of the two TXU plants could be seen as an effort to diversify, both regionally and from a power-source perspective, from the company's previous focus on nuclear power in the Northeast.20

Perhaps equally important, the sale provides a valuable inroad to the Texas

market, which represents the second-largest energy market (behind California), offering a market value of about \$20 billion. Now that California is no longer a competitive energy market, there are high hopes that Texas will prove to be a flourishing market once full competition begins in the state next week. On Jan.1, 2002, most customers of investor-owned utilities in Texas will have the opportunity to choose a Retail Electric Provider (REP)-the company that provides their electricity. As a whole, the Texas energy market represents 70,000 MW of generation operating on a 37,000-mile transmission network.=20

One of Exelon's main objectives is to expand its portfolio of generation assets and position itself as one of the nation's top-tier energy suppliers. Penetrating a state like Texas seems like a natural step for Exelon, which up to this point has been developing generating assets that stretch from Chicago to Pennsylvania. This is not the first expansion that Exelon has made into the Texas market. In the summer of 2001, Exelon began operating a new 165-MW combustion turbine known as the ExTex LaPorte plant near Houston. Prior to that, Exelon had already become involved in marketing power output from two other plants in Texas (830 MW from the Tenaska Frontier plant and 350 MW from the Wolf Hollow plant).

It is important to note that Exelon and TXU are competitors in the Texas market, especially on the wholesale side of the business, and thus there are fine lines drawn between the companies in light of the sales contract. Under the sales agreement, Exelon Power, Exelon Generation's power plant operation arm, will assume operation of the plants. The transaction includes a tolling agreement under which TXU Energy will have the right to purchase power during summer months for the next five years at market-based rates. Considering the standard definition of a tolling agreement, it is presumed that TXU will be providing the natural gas to operate the two plants during the summer months of the five-year contract, and then purchasing the electric output of the plants during that time. Interestingly, TXU is able to abide by Texas' requirement that it not own and control more than 20 percent within ERCOT by selling off its ownership of these two plants. However, realistically, TXU still has a hand in the operational control of these two plants, at least in the summer months during its five-year contract with Exelon. This raises a philosophical question of whether or not the sales contract between TXU and Exelon truly accomplishes the goals of Texas' deregulation plan.=20

Great thanksgiving. I went to Dallas and Santa Fe, NM. We saw some snow in Santa Fe. Did the resorts open this weekend for skiing?

Subject: Direct Access Application for Rehearing
Importance: High

Attached for your review and comment is a third draft of the application for rehearing. The main changes are (1) the addition of several more parties (and will those who arranged for these parties to sign on PLEASE forward a copy of this draft to your contacts so that they get to see it and know how to contact me with any comments or suggestions); and (2) a legislative history section which summarizes the various pertinent bills and resolutions.

Please reply with any comments or suggested changes as soon as possible. Thanks!

On Wednesday, October 31, I sent an email to all Enron employees worldwide in order to ensure that Enron employees retained documents that might be relevant to ongoing litigation. New lawsuits have been filed that enlarge the scope of the information that Enron will need to retain. The following list includes both the topics in the earlier email and the topics related to the new lawsuits.

Effective immediately, please do the following:

1. If you have any voice mails that relate in any way to the LJM Deal or Chewco Investments L.P. including any accounting issues related to these transactions, please forward the voice mails to x3-6800.

2. If you have any voice mails that relate in any way to the proposed Dynegy merger or the Enron Corp. Savings Plan, including any accounting issues related to these transactions, please forward the voice mails to x3-6802.

3. If you have any voice mails that relate in any way to Enron's public statements regarding EBS, Azurix, New Power Co., or any voice mail regarding financial transactions involving these matters, including accounting issues related to these matters, please forward the voice mails to x3-6801.

4. If you have any voice mails that relate in any way to Enron's public statements regarding the proposed merger with Dynegy or the Enron Corp. Savings Plan or any voice mail regarding financial transactions involving these matters, including accounting issues related to these matters, please forward the voice mails to x3-6802.

5. If you have any e-mails that relate in any way to the LJM Deal, Chewco Investments L.P., including any accounting issues related to these transactions, please forward the e-mails to LJM.litigation@tcpolice.org.

6. If you have any e-mails that relate in any way to the proposed Dynegy merger, including any accounting issues related to these transactions, please forward the e-mails to dynegy.merger@tcpolice.org.

7. If you have any e-mails that relate in any way to the Enron Corp. Savings Plan, including any accounting issues related to these transactions, please forward the e-mails to enron.savingsplan@tcpolice.org.

8. If you have any e-mails that relate in any way to Enron's public statements regarding EBS, Azurix, New Power Co. or any e-mail regarding financial transactions involving these matters, including accounting issues related to these matters, please forward the e-mails to classaction.litigation@tcpolice.org.

9. If you have any e-mails that relate in any way to Enron's public statements regarding the proposed Dynegy merger or any e-mail regarding financial transactions involving these matters, including accounting issues related to these matters, please forward the e-mails to dynegy.merger@tcpolice.org.

10. If you have any e-mails that relate in any way to Enron's public statements regarding the Enron Corp. Savings Plan or any e-mail regarding financial transactions involving these matters, including accounting issues related to these matters, please forward the e-mails to enron.savingsplan@tcpolice.org.

"LJM Deal" includes LJM Cayman L.P., LJM Co-Investment L.P., TNPC1, Margaux1, Cortez (TNPC), Osprey1, Avici, Catalytica, Fishtail (Pulp & Paper), Backbone, ENA CLO (Merlin), Nowa Sarzyna (Poland), Bob West, MEGS, Yosemite, EEC Turbines (Blue Dog), Raptor 1, Raptor 1a, Raptor 2, Raptor 2a, Raptor 3, Raptor 4, R

awhide, LJM2/WW Loan Agrmt, Osprey 2 LLC1, Rythms, Osprey, Cuiaba, and LJM Cayco Investments.

Also, please forward all future e-mails and voice mails that relate to the above-referenced subjects to the appropriate e-mail address or voice mail box. These procedures will ensure that our electronic documents and voice mails are properly preserved.

Shortly, our lawyers will be collecting our traditional files, i.e., written documents, for possible production in litigation. Until further notice, please retain all of your hard-copy files now in your possession or that come into your possession that in any way relate to:

1. The LJM Deal
2. Azurix
3. New Power Co.
4. EBS
5. Chewco Investments L.P.
6. Accounting for any Enron investments
7. Any Enron public statement made to the investment public
8. Any Enron public filing with the SEC or other regulatory bodies
9. The proposed merger with Dynegy
10. The Enron Corp. Savings Plan. It is not necessary to send documents related to your personal participation in the Plan such as Plan communications to you regarding the status of your account.

Please err on the side of retention of documents.

If you have any questions, please call Andrew Edison at x5-7105.

Lindy,

Just wanted to let you know that we have started working on the TW contract and capacity release system. I believe there will be a kick-off meeting sometime next week which you will be invited to attend. We are due to implement on January 14th which gives us very little time to get everything we need to get accomplished so I will be calling and asking you a lot of questions in the next month or two. I'd like to try and get together with you soon on two items, inside/outside the path and flow direction. I will be out on vacation next week. If you have time on Friday that would be great, otherwise could we talk by phone next week? Please let me know. Thanks

Linda

Hi Chris!

I followed up with the same IRS representative I spoke with in November regarding your missing cheque. I wish I had better news for the holiday season.

Three traces were placed on your missing refund cheque and three times the trace has been rejected. The IRS doesn't know why. They are placing a formal inquiry into the matter. The representative I spoke with has admitted that somebody on the IRS' end isn't doing what they are supposed to be doing and he promised me they'd get down to the matter. I can only tell you that I will follow up again in January of the new year.

In the meantime, have a very Merry Holiday Season and a Wonderful New Year!

Best regards,

Tamara L. Utsch

FYI - I am forwarding the attached file (matrix200111), which provides a matrix of TW's max tariff rates as well as a table of the base res. and comm. rates and reservation surcharges for the Global Settlement contracts. If you have any questions, please feel free to contact me or Rita.

Thanks,
Elizabeth

Subject: 11/2001 TW Rate Matrix for posting

Please post the attached TW rate matrix, MATRIX200111.doc, effective 11/1/2001.

Only the rates for the "Current Shippers" as defined in TW's Global Settlement changed,
including Reservation, Commodity and TCR surcharges.

It should not be difficult to implement 10 days VaR whichever method we will use . But currently we can not do anything until database and hardware are separated for NetCo and Estate. After that we can start the implementation.

Regards,

Winston

I agree. It should be simulation and NOT $\sqrt{10}$. When I said 10 is OK, I was referring to delta-gamma. Naveen

I'm not in love with square root of 10, I prefer a simulation. If the best idea is the square root multiplication, please let it be so. I suggest using the up 99 field to saved the result in. This way we can start tracking it in database

Thanks,
Frank

All, The majority of instruments are swaps so that should not be a problem. Delta-Gamma is a problem mainly for OTM options.
10-days is OK and standard for Delta-Gamma. It is problematic for times greater than a month or more.
Naveen

Everyone,

If we do 10 days VaR, then people may challenge our delta-gamma methodology. With the high volatility of energy market and the long time horizon, delta-gamma method may not be appropriate anymore.

As I said before, if we don't have too many option deals, just multiply square root of 10 (for 10-days VaR) to one day VaR. If we do have lot option deals, then our current delta-gamma approach may not be good either.

Regards,

Winston

NETCO, if partnered with an ibank will require VaR over a ten day holding period so this is a change we would need to make anyway

Subject: RE: Bankruptcy and Old Co.

Frank,
We are going through a very difficult task of splitting hardware, software, licenses across NETCO and estate. There are massive database transitions in progress and testing scheduled on the new environments on both sides. Database or program changes at this point are very difficult.

If Nilay can come up with the changes and the impact on existing programs, we can see how we can fit these in. But right now our priorities are to cleanup data for NETCO, carry out testing for such a condition and make sure all systems function appropriately on Estate.

Regards,
Ramesh

It appears that we may start developing a pattern of assuring that our positions /curves are correct to the best of knowledge/ability, either weekly or twice monthly. This being the case (Jeff and Stacey, please let me if weekly is a correct statement, say Friday?) we will need to enhance our daily VAR calculations with a longer holding period reflecting our "best calc" time frame.

In English, this means that we need to start measuring VAR for a 5 day or 10 day holding period, pending Jeff and Stacey feedback. What Risktrac needs to do regarding this business practice is report VAR for the longer holding period. Due to the portfolio having gamma exposures, we cannot simply multiply everything by the square-root of time. I suggest that in the RiskTrac system, we offer another box, in addition to the historical VAR box, a box for longer tenor. I recognize this requires some alterations, but with scaled back business perhaps it would

n't be extremely difficult.

Additionally, this doesn't mean that we stop the daily/nightly functions we've been doing since the dawn of time, but it does mean that once a week we have a very high confidence that our books reflect our "reality" the way we understand it.

Bad idea? Feedback?

Thanks,
Frank

E-NEWS FROM JEFF BLAYLOCK
January 24, 2002

Please do not respond to this e-mail unless you have questions or need additional information. If you need to reply, be sure to reply to sender only.

ELECTRIC OVERSIGHT HEARING SET

The Electric Utility Restructuring Legislative Oversight Committee will meet on Tuesday, February 5, 2002, in Capitol Extension E1.036, the Senate Finance Committee hearing room, beginning at 9 a.m. The committee will hear invited testimony related to the progress of the transition to a competitive retail electric market. An agenda will be released as soon as it is available.

The oversight committee is comprised of Rep. Wolens and Sen. Fraser, co-chairmen; Representatives Brimer, Counts, Danburg, S. Turner and Senators Bivins, Madla, Nelson, and Whitmire, members. Additional members of the House State Affairs and Senate Business and Commerce committees may be in attendance.

E-News from Jeff Blaylock is provided as a courtesy to keep interested parties informed of House State Affairs Committee activities. It is an informal method of notification and should not be construed as an official announcement from the House of Representatives, the Committee on State Affairs, or its Chairman. Formal announcements made pursuant to House rules can be found on the House Web site, the committee's Web page, on posting boards throughout the Capitol, at the hearing room on the date of the hearing, and at the committee office just before and after a hearing date.

You have received this message because you asked to be placed on the E-News from Jeff Blaylock distribution list or your e-mail address was referred by another recipient. If you received this message in error or would like to be removed from the distribution list, please reply to this e-mail.

Further to our conversation please find attached the curves on the JM Huber transaction that we have agreed to work off of. The 30,000/day of capacity will sit on the books until next week but the deal with HUBER is effectively completed. In the event that this deal does not close, then the West desk will resume with the same MTM risks that you presently have.

Any curve shift positive from now until the transaction is actually unwound will be credited back to the orig desk and any negative curve shift from here on in will be credited to the trading desk... plus ENA Orig and trading will work on a sharing calculation payable for any future deals.

In addition to the transportation income being generated, additional orig will be generated by entering into wellhead and market based transactions with the desks. I believe that all of the risks and discussions associated with the structures have been well communicated with each book (by Mark Whitt) and we will be meeting with each of you early next week to get the structures and booking set up properly.

I trust that this note covers the general areas related to this deal and I am very pleased with the high level of cooperation shown by everyone..

Pls review file and if there are any questions give me a call.

BT

A NOTE ABOUT PRICES

Prices are subject to availability and subject to change without notice. Prices shown may not include applicable taxes, fees and fuel surcharges. The airlines'

lowest published fares are the lowest roundtrip fares published by the airlines for your routes. These fares may not be available on the days you wish to travel . Our Fare Calendar shows you when these fares are available. The fares shown as found by Expedia.com customers are listed to help you determine the ideal price for your route.

Carol --

I have reviewed the attached and have only the following minor comments :

Two way form :

1. Page 3, definition of Threshold near bottom of page, change Credit Rating to "Credit Ratings".
2. Page 6, toward bottom of page in Paragraph 13(g)(ii), use defined term "Credit Rating" with respect to prospective Custodian.
3. Page 7, instruction for additional representation regarding US bank counterparty, delete "DELETE NONE AND" and insert "ALSO". Query, is this necessary at all, i.e., are US banks among the counterparties for who this template may be used? See one way form where it is deleted.
4. Schedule 1 (Letter of Credit form), add the word "hereof" after the word "beneficiary" in the last line of the third to last paragraph and the the next to last line in the last paragraph. (See one way form.)

One Way form :

1. Page 3, Independent Amounts. Should be "N/A" for Party A and "\$0" for Party B.
2. Definition of Threshold, page 3-4. Is the MAC concept relevant if it is defined as a ratings trigger and the Thrshold itself is ratings driven? See

two way form.

3. Page 4, Minimum Transfer Amount will also apply to Party A because of return obligation under Paragraph 3(b).

4. Paragraph 13 (g), pp.5-7. I thought we were going to revert to the UBS one-way form and not use the formula as to what happens in 13(g)(ii) with a downgraded custodian because only UBS will have a custodian in the one-way agreement. If so please make conforming changes. If not, let's discuss. In either event, used the defined term "Credit Rating" to describe potential custodians as in two way form. See comment above.

I will be in the NY office around 11am NY time. Phone 212.713.9776. Fax 212.713.1303. I will have access to UBS e-mail there.

Best regards.

The most famous Vassigh quote is
"Say Ahhhhhhhhhhhhhhhhhhhhhhhhhhhhhhh my Colorado Coonass ho"

Just like a weasel to not acknowledge that your proud statements about LSU and smack at Texas has now blown up in your face, instead you point out the obvious that I am a Fat dude.

I did not smack at the obvious about you - living in Montrose - the way you tan year round.

I am sure glad I am not an LSU fan - it must be depressing.

We need to bet more often - I am not doing so good betting ON LSU on WSEX.COM.

Your are my little Colorado Coonass Pulse Machine.

Your Texas Idol

Subject: Lousyanna State vs. Texas - Pretenders vs. Contenders

Well, Well, Well,

I am writing this note to all the smack talking coonass LSU fans who enjoy

banging on The University of Texas Longhorns with smug smack like

"Overrated, Overrated".

I usually use the BCC field when sending smack notes like this so everybody

won't get barraged with weak Reply All's from recipients who think they can

go toe to toe with me in e-mail smack (i.e. Val and his weak shit he likes

to send).

This time is different because I think y'all should know who your fellow pathetic smack talking LSU fans are.

Y'all can start a new support group - called "Vassigh's College Football

Smacked down Bitches - that got their cakeholes shut by Chris Simms,

Cedric

Benson, and Roy Williams et al"

Y'all have dished it all out, so I do not feel bad for rubbing salt into the fatal wound that Ole Miss delivered you and your team Saturday night.

Here a couple of smack statements made by some if not all of the cajun's included in this e-mail header.

"Simms sucks, how could he be a preseason heisman candidate?" - Over his

last three games, Simms is 59-of-88 (67.0 percent) for 698 yards and 12

touchdowns passing 2 touchdowns rushing with just one interception

(176.41 rating). He has just started about ONE full seasons worth of games recently and is coming into his own. Simms will be a top NFL pick as will Roy Williams and Cedric Benson. I can't think of any College Football team in history with the high caliber triple threat that UT has with Simms, Benson, and Williams.

"The SEC is the best conference in football, the Big XII Sucks" - What a joke that statement is.

"LSU would whip UT" - Yeah right - LSU Could not beat Rice.

"UT is the most overrated team in college football" - interesting since they are higher ranked now in November than they were in the preseason polls.

"Mack Brown can only recruit - he can't coach worth a damn - Nick Saban is better" - Mack Brown has one loss - he hasn't lost in Austin since he has been coach - while Saban has led LSU to three losses - 2 in the Red Stick - just THIS SEASON.

Every college football analyst would agree no conference compares to the Big XII.

The BIG XII have 3 TEAMS RANKED IN THE TOP 5 early November - unbelievable!

Two of the top ranked BIG XII team's only losses were to the other top ranked BIG XII school. UT loss to OU and OU loss to Nebraska.

The only way the best teams in the Big XII lose is when they have to play against each other.

The highest ranked SEC team (Florida) lost to Auburn which lost to pathetic Arkansas.

All football players worth a damn have left y'all's God Forsaken state. Peyton to Tennessee, Marshall Faulk to SDSU, the newest Manning to Ole Miss that just whipped up on y'all's 3rd world state university in the Red Stick on national television on a cool October Saturday night.

Cajuns like Jake Delhomme and Bobby Bouchieaux stay in Lousyanna to play college ball though - that's some encouraging news for y'all.

I can't think of one LSU player that has ever done shit in the NFL.

NFL teams have gotten screwed every time they drafted a Lousyanna State football player.

David Lafleur, Kevin Faulk, Harvey Williams, Eddie Kennison - the list goes on and on. It is really pathetic.

Texas has just RECENTLY produced dominating hausses like Ricky, Tony Brackens, Dan Neil, Shaun Rogers, Leonard Davis, Priest Holmes, Blake Brockermeyer, Bryant Westbrook, and many others. Look at Eric Metcalf in his first game back to the NFL for the Redskins - breaking NFL records.

Texas players are magic baby.

Not to mention legends like the Tyler Rose, Tom Landry, Bobby Layne, and Tommy Nobis

I hope y'all enjoy Shreveport on a cold December night while y'all attend

Lousyanna States bowl game against Fresno State at the Independence bowl.

At least you can enjoy the New Years holiday by watching the NFL like offense of The University of Texas Longhorns play in a BCS bowl and God willing with some magic from TAMU over the Texas Traitor filled roster of OU and some other help - watch UT vs. Miami in the Rose Bowl.

I guess that smack from Elliot saying Rohan was better than Simms seems pretty foolish to you now doesn't it.

That dude needs to play linebacker if he wants to get in the NFL. He might

have a decent arm but he has no clue in the pocket, The difference between

how Eli Manning ran the passing game and Rohan did for LSU Saturday night

showed LSU's deficiency at the QB position. Fumbling, bumbling, stumbling

is the best way to describe his play.

CKL - you better buy your family Christmas gifts from the dollar store because you need to save your money to pay on the \$500 bet you made with me

the night of Val's wedding in that little bar in Natchez, Mississippi.

You

boldly put your soon departed money where your mouth was all night, since

all you were ranting was "tiger bait, tiger bait" any time I was trying to

tell you how UT would whip up on LSU like the 3 lesser ranked teams have already done this season.

The bet for \$500 was to go to the person whose team would be ranked higher

at the end of the 2001 College Football season: Me = University of Texas You = LSU.

Well since UT is in the top 5 and with a worst case scenario would not finish out of the top 15 this year and the fact that LSU will not even finish the season ranked - you need to start saving your extra pocket cash

- or we can work out an installment plan.

Lenhart was a witness as well was another of Val's amigos (I forgot the name but know the face).

It looks like history will keep on repeating itself with the Great State of

Texas always being superior in every facet over it's little cajun neighbor

to the east - Lousyanna.

Texas has the winningest NFL team of all time in the Dallas Cowboys, the

3 time champions and top 4 ranked Texas Longhorns.

Conversely Lousyanna has the losingest NFL team of all time in the Aints,

and the doormat of the pathetic SEC west Lousyanna State university.

The last Governor of Texas is the President of the United States and leader

of the free world.

The last Governor of Lousyanna is in prison licking Boudreaux's balls for

the next 15 years or so.

And the bottom line is that y'all are in my State working because there are

no jobs outside of casinos and bars in Lousyanna

Even the only bright spots in the pathetic history of y'all's only professional sports franchise is provided by Texas players - Earl Campbell and Ricky Williams.

He who laughs last laughs best.
Man this note is a classic. I think I will be sending it to Jim Rome.

Hook 'Em

Val forward this note all over the Red Stick and all over that God Forsaken land east of the Sabine.
The Truth shall set your people free.

Brian

Colleagues:

In addition to the regulatory assessment for Transredes, Elektro, and the San Juan Gas rate case (previously communicated), here is the current workload in TIRS with their corresponding project leads.

- 1) Monetization:
 - a) CALIFE - Venezuela: Support the sale of asset through providing the requested due diligence. This function includes a regulatory analysis and determination of the base rate, the exercise of which should allow the determination of the strategies used by the regulator to set Calife's tariffs. Lead: Alberto Levy
 - a) SPC - Philippines: Support the sale team through providing regulatory due diligence to the current draft regulatory law. Emphasis is placed on articles affecting grandfathering contracts, in addition to full assessment of the draft. Lead: Mike Grimes
- 2) Asset Acquisition:
 - a) Nicaragua Privatization: Support the acquisition team through providing regulatory due diligence. Lead: Alberto Levy

As these services have been demanded by the above individual business units, kindly remember that business units should pay out-of-pocket costs, if any.

With the exception of SPC project, Team Leads shall discuss their demand on internal resource in the Section meeting planned on Nov. 3rd.

Please let me know if you have any question.

Prior to 7/99 this was ENA not HPL, but there may be some issues on it as well for 3/99 to 6/99. The deal ticket we used was 62717. I will have to look further into the ENA activity because I know we still have some invoices that were paid under one company and we still have drafts under the other.

Daren,

I am trying to get some payments out to Williams for old months 11/2000 and 1/2001 but global counterparty said this deal should have Black Marlin Pipeline Company Inc. instead of Black Marlin Pipeline Company effective 3/99. The Black Marlin Pipeline Company was for an internal record (when it was an Enron entity).

* NEW MEDIA MARKETS *

<http://f0am.net/cgi-bin/foam/click.cgi?i=2109&c=81&a=30020&l=180>

Dear MR MC CONNELL

"New Media Markets provides in-depth analysis of everything
that's happening in the pay-TV business...it's an indispensable
read!" Stuart Prebble, Chief Executive, ITV

Please CLICK BELOW to download your second FREE issue of NEW
MEDIA MARKETS - the premier weekly newsletter covering business
strategies and technology in the European cable, satellite and
digital television industry.

Subscribe to NEW MEDIA MARKETS and benefit from:

- * WEEKLY DELIVERY- keeping you fully informed of all the latest news
- * EXCLUSIVES - giving you vital news and information on key companies ahead of other sources
- * QUALITY ANALYSIS - offering you insight into how new developments will affect the industry.

CLICK BELOW TO DOWNLOAD YOUR SECOND FREE ISSUE

<http://f0am.net/cgi-bin/foam/click.cgi?i=2109&c=81&a=30020&l=164>

NEW MEDIA MARKETS also brings you monthly SPECIAL GUIDES -
giving you detailed statistics and essential information on
key players and their strategies, providing insight into the
hot topics in the industry. COMING IN NOVEMBER: The set-top
box market in Europe; IN DECEMBER: European football rights.

NEW MEDIA MARKETS, now in its twentieth year of publication,
is relied on by senior executives and decision-makers throughout
your industry - can you afford to be left behind in this
fast-paced market?

CLICK BELOW TO ORDER

<http://f0am.net/cgi-bin/foam/click.cgi?i=2109&c=81&a=30020&l=174>

New Media Markets: 895 GBP / 1343 USD / 1432 EUR
New Media Markets Online: 1045 GBP / 1568 USD / 1672 EUR

Other benefits of subscribing to NEW MEDIA MARKETS:

1. You'll become a member of the Subscriber Club
(<http://f0am.net/cgi-bin/foam/click.cgi?i=2109&c=81&a=30020&l=165>) - giving you up to GBP 2000 worth of discounts and special offers across Informa Media & Telecoms products.
2. Order using your credit card and you'll receive a free copy of GLOBAL DIGITAL TV - worth GBP 800 / USD 1360! Gain exclusive forecasts of satellite, DTT and cable TV households to 2010, plus in-depth country and company profiles from 23 key markets

Just wanted to let you guys know I will out in LA
for two weeks of training and will return on Nov. 9th.
I will have my cell (new number) and yes it is a Houston number with me
832 279 0830.
Everyone have a great Halloween and I will see you
when I get back.
Sandee

Web Fares for the week of February 23, 2002
<<http://www.delta.com/images/emailprograms/spacer.gif>>
Dear Mr. Motley,

Delta's Weekly Web Fares offer special fares to your favorite destinations. All fares are for round-trip travel and offer huge savings and the opportunity to earn miles with the Delta SkyMiles program.

Before and during your trip, there are new federally mandated security procedures that will only affect customers checking bags. Check [delta.com](http://e-mailprograms.delta.com/AC/Clickthru?q=ed-jLsvQgVb7YhkUVn0vNB-d20yG_du) <http://e-mailprograms.delta.com/AC/Clickthru?q=ed-jLsvQgVb7YhkUVn0vNB-d20yG_du> for the latest information.

<<http://www.delta.com/images/emailprograms/spacer.gif>> Restrictions: Se
ats are limited and fares may not be available on all days or all flights. Fares
available only on non-stop flights.

Purchase Requirements: Fares must be purchased via Delta's Web site (delta.com) only. Fares are round-trip and require a round-trip purchase. Tickets must be purchased at the time of reservation using a credit card/check card only.

Ticketing Period: Tickets must be purchased by 02/23/02.

Travel Period: Outbound travel is permitted on Saturday 02/23/02 only. Inbound travel is permitted on Monday 02/25/02 or Tuesday 02/26/02 only.

Blackout Dates: None.

Minimum/Maximum Stay: Minimum stay: Saturday night. Maximum stay: 3 days.

Fare Validity: Fares are valid in the Economy (Coach) cabin on Delta/Delta Connection/Delta Express.

Taxes/Fees: Fares do not include a federal excise tax of \$3.00 which will be imposed on each flight segment of your itinerary. A flight segment is defined as a takeoff and a landing. Fares do not include Passenger Facility Charge(s) of up to \$18. Fares do not include a federal September 11th Security Fees of up to \$10.00 round-trip. These fees are the responsibility of the passenger and must be paid at the time of ticketing.

Changes/Standby: All fares are nonrefundable. Wholly unused tickets: Although fares are nonrefundable, customer may apply value of fare to any applicable published fare less \$100 (\$50 for Delta Express) plus any applicable fare difference. Partially used tickets: Changes not allowed. All changes must be made prior to the original date/time of departure. The value of the unused ticket/coupon or any credit vouchers may not be used as credit towards another ticket purchased on delta.com. Fares offered at delta.com do not apply for reissue/downgrade of previously purchased tickets. Same day standby is allowed.

Miscellaneous: Fares and rules are subject to change without notice. Third party purchases of tickets are not permitted on delta.com. The credit card/check card holder making the purchase must be a traveling passenger or have the same last name of at least one passenger. Special offers issued on delta.com may not be applied to other Web fares. These special offers are not combinable with other Delta fares. Other restrictions may apply. ©2002 Delta Air Lines, Inc.

*Qualifying transactions include all Delta purchases posted from 1/15/02 to 2/28/02. Delta purchases made from 1/15/02 to 2/28/02 are only eligible for one bonus SkyMiles offer. The offer is available to Corporate, classic, Gold and Platinum Delta SkyMiles Credit Cardmembers only. Please allow 8 to 12 weeks after the p

promotion for bonus SkyMiles to be posted to your Delta SkyMiles account. All standard Delta SkyMiles program rules and conditions apply. ©2002 American Express.

I understand that the lease assignment needs to happen. However, it is my understanding from talking directly to the landlord that they are modifying the lease to require us to pay for certain separation costs and upgrades to their facilities (e.g., security access to all of their floors in this building). The landlord has also agreed, in concept, to provide us a six month option at the beginning of the term.

Based on discussions with you yesterday, it seemed that UBSW was not willing to insert any of the language that I wanted into the lease (e.g., six month option to get out), but was willing to insert language that the landlord wanted (obligating UBSW to several \$100k of costs). Why would UBSW do this?

I recommend that we either (1) make the landlord's changes and my changes this week or (2) make no changes this week and work to get the lease that both sides want next week.

Tim Belden

Subject: FW: Portland

CONFIDENTIAL:

Tim,
As discussed the Portland Lease is proposed to be assigned from Enron North America Corp. to UBS AG (or UBS Warburg Energy LTD.). The bankruptcy judge has only approved a full assignment and therefore a partial assignment (e.g. for the 3rd floor for 15,615.64 rsf) would not be possible. Enron in turn is expected to sublease the 4th floor (5,563.11 rsf). This Assignment of this Lease Agreement requires the written consent of the Landlord (Portland General Electric Company), which should be received within 30 days. All lease agreements with Enron (including Portland) are expected to be executed this week as part of the Legal Closing, scheduled for 2/08/02.

We understand that the Landlord would like to recapture our space ASAP. The longer term space needs may only be approx. 10,000 rsf. Therefore a relocation may be feasible. However it is my understanding that issues related to a possible relocation would be discussed with all parties involved (incl. Landlord) only after the Legal Closing.

Regards

Markus

Dear Rajan,

Sat sri akal. It was a pleasure to talk to you yesterday. I had discussed with you our programme for the return journey. Though our return journey is fixed on 18th of Nov. but due to circumstances as discussed with you yesterday, we may have to extend our stay for a couple of months if we could get clearance from INS for which AP has applied. In the meantime, if we could have an understanding with Dimpy/AP we may move earlier as planned. Any case we must keep more medicines so that at that time we may not have any problem. I therefore will greatly appreciate if you can arrange to get the following medicines from India with Raj's mother who is coming in the next month and then later on these can be sent to us.

Hunter,

Attached is the latest budget with the revision to \$10,000 for travel and entertainment. Here is the breakdown of the \$475,600 for outside services:

\$250,000 - PI/Dwights from IHS energy (needed for supply forecast, was paid by Enron Corp. and has never been in the budget before)
\$70,000 - MIPD(Major Industrial Plant Database), PI Grid, IHS DRN monthly updates (needed for database and web scraping)
\$40,000 - 1/3 of PIRA annual fee

\$15,000 - WEFA energy consulting monthly updates and AGA forecast
\$6,600 - Earthsat/PIRA weekly AGA forecast
\$20,000 - Dow Jones Interactive (14 users at \$120/month)
\$24,000 - Bloomberg (1 terminal at \$2000/Month)
\$30,000 - Reuters (4 users at \$600/Month)
\$5,000 - SAS software
\$15,000 - Misc. data (state rig count data, Railcar loading data, etc.)

Let me know if you have any questions.

Chris

Subject: Medicine Bow Tie-In Capacity

Dear Medicine Bow Shipper:

This morning we received FERC approval for the fourth tie-in segment (to gate #7) contracted for 92 Mdth/day. This brings the firm capacity of the Medicine Bow system to 472 Mdth/day. The contract effective date will be October 19, but you will be able to utilize this capacity as soon as we have it set up in the system today.

Please call me if you have any questions.

Laine Lobban

Hello! Megan Rogers has just sent you a greeting card from Bluemountain.com.

You can pick up your personal message here:

<http://www7.bluemountain.com/cards/boxg227236u6/3pts7dry66z9fu.html>

Your card will be available for the next 90 days.

This service is 100% FREE! :) Have a good day and have fun!

Accessing your card indicates agreement with Blue Mountain's Website Rules:
<http://www.bluemountain.com/home/WebsiteRules.html>

Send FREE Blue Mountain cards to friends and family (and attach gifts too!)
<http://www.bluemountain.com>

This message is only relevant for those going to UBS.
...

It appears that the following email may not have been clear. You have to copy a
ll documents yourself.

This is my cheat sheet if it helps:

H Drives:

1. Each person will have to move any data over personally from the old H drive
(which is now Z:) drive to their new H drive.

2. The Z: drive (old H:) will be removed from UBS employees on Thursday night.

0 Drives:

1. For the old O or M drives go to O:\ESTATE\ O (or M ? pending location of data) and copy to the new common O. The Estate O and M will be removed from UBS employees on Thursday night.

Do not delete anything and only copy information which is complies with the policy. Please make sure that those people who are not in the office are contacted and comply.

Louise

To: All Enron Employees Transferring to UBS Warburg Energy (or its affiliates)

Under the terms of the various agreements among certain Enron entities and UBS AG, certain Enron data and documents may be provided to UBS. To ensure compliance with those agreements, Enron's document retention policy, as well as directives of various investigative agencies, the attached protocol regarding the process for migration of any information or data to UBS has been developed.

Please review the protocol carefully. Then, complete the attached Certification and return it, with attachments, to Linda Guinn at EB 3829a no later than February 11, 2002.

Questions about this matter may be directed to Michelle Cash at (713) 853-6401 or Francisco Pinto-Leite at (713) 345-7942 .

Dear Mr. Abby:

Q: My husband wants a threesome with my best friend and me.

A: Obviously your husband cannot get enough of you! Knowing that there is only one of you he can only settle for the next best thing - your best friend. Far from being an issue, this can bring you closer together. Why not get some of your old college roommates involved too? If you are still apprehensive, maybe you should let him be with your friends without you. If you're still not sure then just perform oral on him and cook him a nice meal while you think about it.

Dear Mr. Abby:

Q: My husband continually asks me to perform oral sex on him.

A: Do it... Sperm can help you loose weight and gives a great glow to your skin. Interestingly, men know this. His offer to allow you to perform oral sex on him is totally selfless. This shows he loves you. The best thing to do is to thank him by performing it twice a day. Then cook him a nice meal.

Dear Mr. Abby:

Q: My husband has too many nights out with the boys.

A: This is perfectly natural behavior and it should be encouraged. The man is a hunter and he needs to prove his prowess with other men. A night out chasing young single girls is a great stress relief and can foster a more peaceful and relaxing home. Remember, nothing can rekindle your relationship better than the man being away for a day or two (it's a great

time to clean the house too)! Just look at how emotional and happy he is when he returns to his stable home. The best thing to do when he gets home is for you and your best friend to perform oral on him. Then cook him a nice meal.

Dear Mr. Abby:

Q: My husband doesn't know where my clitoris is.

A: Your clitoris is of no concern to your husband. If you must mess with it, do it in your own time or ask your best friend to help. You may wish to videotape yourself while doing this, and present it to your husband as a birthday gift. To ease your selfish guilt, perform oral sex on him and coo him a delicious meal.

Dear Mr. Abby:

Q: My husband is uninterested in foreplay.

A: You are a bad person for bringing it up and should seek sensitivity training. Foreplay to a man is very stressful and time consuming. Sex should be available to your husband on demand with no pesky requests for foreplay. What this means is that you do not love your man as much as you should he should never have to work to get you in the mood. Stop being so selfish! Perhaps you can make it up to him by performing oral sex on him and cook him a nice meal.

Dear Mr. Abby:

Q: My husband always has an orgasm then rolls over and goes to sleep never giving me one.

A: I'm not sure I understand the problem. Perhaps you've forgotten to cook him a nice meal.

Note: Update on ammonia plant operations. Check out the economics in the last paragraph. LB

Ammonia Industry Finally Approaches Full Production

Plummeting gas prices have prompted a large number of idled ammonia producers to restart operations this month, after lengthy downtime due to last winter's record gas price increases. Houston-based Industrialinfo.com, which tracks manufacturing, said most of the Gulf Coast and Midcontinent plants are at partial or full capacity.

An ammonia industry expert at Duke Energy said there has been a 20% increase in ammonia production (222,000 tons of ammonia) since August, representing about 7.6 Bcf of gas demand (34 MMBtu per ton of ammonia). There was a doubling of ammonia productive capacity in Louisiana alone. "We think just about every plant in the U.S. is back on or in the process of coming back up right now," he said. "Obviously they are not going to be running full out, but every plant is coming back up."

A year ago, ammonia producers were rocked by soaring natural gas prices, which reached \$10/MMBtu, up from a historical average of \$2. Combined with product over capacity, the rising costs caused a wave of plant shutdowns across the country. Louisiana was particularly hard hit, with five out of eight ammonia plants idled during the summer. Arkansas, Georgia and Texas were among other ammonia producing states affected.

The recent decline in gas prices and inventory, however, has sparked some ammonia producers into ramping up production. Triad Nitrogen and PCS Nitrogen both resumed full production in September at their respective plants in Donaldsonville and Geismar, LA, Industrial Information reported. Terra Industries restarted a Verdigris, OK, plant after an extended shutdown and is expected to bring its Blytheville, AK, plant online sometime this month. Koch Industries and IMC Agrico, with plants in Sterlington, Donaldsonville, Convent and Uncle Sam, LA, are now operating at partial capacity.

Other ammonia manufacturers are waiting to see if natural gas prices remain stable before resuming production. DuPont in Beaumont, TX, Borden Chemical in Geismar, LA, and PCS in Augusta, GA, remain idled.

"It looks as if these guys are going to make money running their plants all winter," the Duke Energy ammonia industry expert said. "They are making less and less money as gas prices rise and ammonia prices fall. I see them at the closest to break-even by February where gas is averaging about \$2.85.

"Last year the domestic producer margin was only about \$3/ton," he said. "They pretty much broke even in terms of gas costs on average. This year they are probably going to make \$20-25/ton of production. At \$2.80/MMBtu for gas and 34 MMBtu of gas per ton of production, plus \$25/ton of additional costs, it will cost them about \$120/ton for ammonia production. In New Orleans they will probably cover that for most of the season."

Ruth,

I have confirmed the meeting with Williams to discuss the Athens and Hart Co. projects for 3:00 on Wednesday. Location TBA. We will meet with Allen Smith and Orlando (Alvarez?).

Regarding the Midway project in St. Lucie County (and other sites as well) we need to get a rough estimate on the estimated schedule for completion. In particular, we need to know whether it is possible to get gas to the Midway site by May 2002. Is there any way we can talk to someone today about this?

Thanks.

Raimund D. Grube

Dynegey Issues Statement On Enron Merger Status

11/21/2001

Business Wire

(Copyright (c) 2001, Business Wire)

HOUSTON--(BUSINESS WIRE)--Nov. 21, 2001--Dynegey Inc. (NYSE:DYN) Chairman and CEO Chuck Watson today said he is encouraged by Enron Corp.'s report this morning that it has closed the remaining \$450 million credit facility secured by the assets of Northern Natural Gas Pipeline and has received a commitment from its lead bank to extend the \$690 million note payable obligation described in Enron's recent 10-Q filing.=20

"We are continuing our confirmatory due diligence and working to accelerate the regulatory approvals required to complete the merger in accordance with the previously announced agreement," he said.

Watson also noted that ChevronTexaco recently reiterated that it has "full confidence in Dynegey's disciplined management approach to complete the merger and to build a new company into an industry leader." ChevronTexaco owns 26 percent of Dynegey's outstanding common stock.=20

Dynegey Inc. is one of the world's top energy merchants. Through its global energy delivery network and marketing, trading and risk management capabilities, Dynegey provides innovative solutions to customers in North America, the United Kingdom and Continental Europe.=20

Certain statements included in this news release are intended as "forward-looking statements" under the Private Securities Litigation Reform Act of 1995. These statements include assumptions, expectations, predictions, intentions or beliefs about future events. Dynegey cautions that actual future results may vary materially from those expressed or implied in any forward-looking statements. Some of the key factors that could cause actual results to vary from those Dynegey expects include changes in commodity prices for energy or communications products or services; the timing and extent of deregulation of energy markets in the U.S. and Europe; the timing of required approvals for the Dynegey/Enron merger and the success of integration and cost savings measures relating to the merger; the effectiveness of Dynegey's risk management policies and procedures and the creditworthiness of customers and counterparties; the liquidity and competitiveness of wholesale trading markets for energy commodities, including the impact of electronic or online

trading in these markets; operational factors affecting Dynegy's power generation or Dynegy's midstream natural gas facilities; uncertainties regarding the development of, and competition within, the market for communications services in the U.S. and Europe; uncertainties regarding environmental regulations or litigation and other legal or regulatory developments affecting Dynegy's business; general political, economic and financial market conditions; and any extended period of war or conflict involving the United States or Europe. Moreover, Dynegy's expectation that the acquisition will be accretive to earnings in 2002 and beyond is based upon achieving certain sales projections, meeting certain cost targets and successfully integrating the acquired assets. More information about the risks and uncertainties relating to these forward-looking statements are found in Dynegy's SEC filings, which are available free of charge on the SEC's Web site at <http://www.sec.gov>.

Enron says repayment of 690 mln usd debt extended until mid-Dec

11/21/2001

AFX News

(c) 2001 by AFP-Extel News Ltd

HOUSTON (AFX) - Enron Corp said its creditor banks have granted an extension on a 690 mln usd note payable by Nov 27 until mid-December, giving it enough time to restructure the debt.=20

In a statement, the troubled energy company said the extension has been agreed following talks with its main creditor banks on restructuring its debt to avoid a liquidity crisis.

"We have been in continuous contact with our banks and believe we can identify a mutually beneficial restructuring to enhance our cash position, strengthen our balance sheet and address upcoming maturities," said chief financial officer Jeffrey McMahon.=20

Enron first informed investors of the possibility it would be forced to repay the 690 mln usd note in a filing to the Securities and Exchange Commission on Monday.=20

The obligation arose after Standard & Poor's cut the company's long-term debt rating to BBB- last week, forcing it to either post collateral on the note or repay it on maturity.=20

Enron said it has also secured the remaining 450 mln usd of a previously announced 1 bln usd credit line from JP Morgan and Salomon Smith Barney. The facility is secured by the assets of Enron's Northern Natural Gas Co unit.=20

The other 550 mln usd are secured by the assets of its Transwestern Pipeline Co.=20

Enron also said it is still committed to its merger with Dynegy Inc, announced on Nov 9.=20

"We continue to believe that this merger is in the best interests of our shareholders, employees, and lenders," said chairman and chief executive Kenneth Lay. "It offers the opportunity to create a formidable player in the merchant energy business with substantial growth prospects and a strong financial position."=20

JP Morgan Chase vice chairman James Lee said the bank will work with Enron and its other creditor banks "to develop a plan to strengthen Enron's financial position up to and through its merger with Dynegy", which is expected to close in the third quarter of 2002.=20

USA: Enron secures credit line as shares fall.

11/21/2001

Reuters English News Service

(C) Reuters Limited 2001.

NEW YORK, Nov 21 (Reuters) - Enron Corp. said on Wednesday it secured the remaining \$450 million of its \$1 billion credit line and reaffirmed its commitment to an agreement to be taken over by rival Dynegy Inc.=20

Facing a crisis of confidence, Enron said it is in active talks with its other lenders to restructure its debt obligation and had pushed back the deadline for repaying a \$690 million loan obligation to mid-December.

"We continue to believe that this merger is in the best interests of our shareholders, employees, and lenders," Enron Chairman and Chief Executive Ken Lay said in a statement.=20

Enron shares were down 28 percent after noon on Wednesday, after being down 33 percent earlier in the day. Its shares fell about 23 percent on Tuesday amid concerns over its liquidity and growing questions over whether the proposed takeover by Dynegy would go ahead.

Enron stock free-fall continues

11/21/2001

Associated Press Newswires

Copyright 2001. The Associated Press. All Rights Reserved.

HOUSTON (AP) - Shares of embattled Enron Corp. plunged another 32 percent Wednesday morning as analysts and investors continued to doubt the once-mighty energy trader's ability to recover lost business and investor confidence.=20

In a report released Wednesday, Goldman Sachs & Co. analyst David Fleischer became the latest to question Enron's future, saying that an SEC filing by the Houston-based company earlier this week "raised new issues about liquidity and the ability of the company to even finance itself over the next several months."

Analysts are also questioning whether Dynegy Inc.'s planned \$8.9 billion acquisition of Enron will survive given the latest revelations.=20

Documents filed with the Securities and Exchange Commission by Enron late Monday restated the company's third-quarter earnings and stated that it may have to repay a \$690 million debt by next week because of decreased credit ratings.=20

The filing also noted that Enron's financial woes have led to a "reduced level of transaction activity" with the company by trading partners.=20

Enron shares fell 23 percent Tuesday, then dropped another \$2.25, or 32 percent, to \$4.74 Wednesday in extremely heavy trading on the New York Stock Exchange.=20

Fleischer said Enron's Nov. 16 cash balance of \$1.2 billion is inadequate to meet remaining debt obligations.=20

Fleischer acknowledged, however, Enron's efforts to renegotiate next week's due date for the \$690 million debt, which was triggered Nov. 12 when the company's credit rating was downgraded to BBB-, saying that there are indications that Enron's banks may be willing to roll current maturities over and even make new equity investments.=20

Michelle Foss, director of the Energy Institute at the University of Houston, said this latest round of troubles had to raise concerns about whether the Dynegy-Enron deal will be pulled off.=20

"It doesn't look like it's going to be able to happen," Foss said. "It did look like a decent idea when they proposed the merger, but today I'm sure they'll look at it and see if they can salvage their attempt to buy Enron."=

=20

Shares of Dynegy were off dlrs 2.55 to dlrs 39.15 in trading on the NYSE.=

Tobacco suits by Venezuela, Brazil's Espirito Santo dropped=20

MIAMI (AP) - Health care cost-recovery lawsuits against major U.S. cigarette makers by Venezuela and the Brazilian state of Espirito Santo have been dismissed.=20

"This is another important reminder to American plaintiffs' lawyers that a state court won't ignore the overwhelming number of decisions by federal courts rejecting these lawsuits," William S. Ohlemeyer, Philip Morris Cos. vice president, said Tuesday after the decisions.=20

Attorneys for several foreign governments have filed an assortment of lawsuits in U.S. federal and state courts in an attempt to find some legal mechanism that withstands judicial scrutiny.=20

Russia and other Brazilian states are among the foreign governments that have sued in Miami, where a verdict of dlrs 145 billion was awarded to Florida smokers against the five biggest U.S. cigarette makers.=20

Ecuador's suit in Miami was withdrawn earlier when another state judge announced his intention to dismiss it.=20

----=20

General Motors of Canada inks supplier agreement with Quebec rubber plants=20

Eds: Dollar figures are Canadian.=20

MONTREAL (AP) - General Motors of Canada has signed supplier agreements with a Quebec auto-parts maker that helped create about 800 jobs, news reports said Wednesday.=20

The deal with Saar-Gummi Automotive Group in Magog, Quebec, is part of General Motors' commitment to offset the jobs that will be lost when it shuts down its car assembly factory in Boisbriand, Quebec, next year, killing 1,400 jobs.=20

GM did not reveal the value of the contracts, but German-based Saar-Gummi said Tuesday it has made a dlrs 40 million investment in its seven Magog plants, doubling its workforce to 1,600 employees from 800 since last summer.=20

The factories make molded rubber parts for cars, such as the rubber strips and molding found along the doors of vehicles. Most of the production is sold to GM, and goes into 56 GM plants in Canada, the United States and Mexico.=20

The products will be used in several models including the Chevrolet Avalanche, GMC Envoy, Saturn VUE and Cadillacs.

Enron Closes On \$450M Secured Credit Line

11/21/2001

Dow Jones News Service

(Copyright (c) 2001, Dow Jones & Company, Inc.)

HOUSTON -(Dow Jones)- Enron Co. (ENE) closed on the remaining \$450 million of a previously announced \$1 billion in secured credit lines and said it is in active discussions to restructure its debt to improve liquidity.=20

In a press release Wednesday, Enron said the \$450 million credit facility is secured by the assets of Enron's Northern Natural Gas Co.

A \$550 million credit facility, secured by the assets of Enron's Transwestern Pipeline Co., closed Nov. 16. The proceeds are being used to supplement short-term liquidity and to refinance maturing obligations.=20

The company said it was informed by the lead bank on the facility that the maturity on its \$690 million note payable obligation will be extended to mid-December. Enron expects the extension to be finalized shortly.=20

Dow Jones Corporate Filings Alert reported Monday that Enron is currently p=

reparing a restructuring plan aimed at taking aggressive steps to rationalize the company's existing cost structure, accelerating the process of divesting noncore businesses and assets and restructuring scheduled maturities of debt and other obligations.=20

Enron's credit lines are from J.P. Morgan, the investment-banking arm of J.P. Morgan Chase & Co. (JPM), and Salomon Smith Barney, the investment-banking arm of Citigroup Inc. (C).=20

Enron also reaffirmed its commitment to the merger with Dynegy Inc. (DYN). On Nov. 9, Enron and Dynegy signed a definitive merger agreement that would give Enron shareholders 0.2685 share of a Dynegy share. The merger is expected to close by the end of the third quarter of 2002.=20

On Monday, Enron filed its Form 10-Q for the third quarter, which reflected a wider loss by 3 cents a share. The energy company previously reported a loss of \$618 million, or 84 cents a share, on revenue of \$47.6 billion for the third quarter ended Sept. 30.=20

-Stephen Lee; Dow Jones Newswires; 201-938-5400

Copyright ? 2000 Dow Jones & Company, Inc. All Rights Reserved. =09
USA: UPDATE 1-Enron shares fall further on credit concerns.

11/21/2001

Reuters English News Service

(C) Reuters Limited 2001.

NEW YORK, Nov 21 (Reuters) - Enron Corp. shares tumbled 33 percent in early trading on Wednesday, following a 22.8 percent drop on Tuesday, amid concerns over the company's liquidity and growing questions over whether the proposed takeover by Dynegy will go ahead.=20

Enron's shares were down \$2.29 to \$4.70 in early trading on the New York Stock Exchange. The stock was the biggest loser by percentage and the most active stock on the NYSE.

"The Dynegy deal will take a long time and a lot of things could happen over that time period. Dynegy did their homework, but if they missed anything, they have a number of exit opportunities," said Fulcrum Global Partners analyst Michael Barbis.=20

Dynegy was not immediately available for comment.=20

Wall Street analysts said Enron is losing market share because of credit concerns from its trading partners and questions over Dynegy Inc.'s takeover offer. Enron warned on Monday it could be forced to pay by next week a \$690-million debt triggered by a credit downgrade last week.=20

"Enron is definitely losing market share on credit concerns. Cash needs to run the business have now increased. The market perceives Enron as needing more cash," said Barbis.=20

On Monday, Enron disclosed it is up against a deadline of Nov. 26 to deliver collateral against the debt owed to a third party in one of its many partnerships.=20

If not, the partner has the right to liquidate all of the assets of the partnership, which include a Brazilian natural gas company that Enron was counting on selling to raise \$250 million in cash.=20

Enron is working to make alternative payment arrangements, since it can ill-afford to pay the debt now. Enron has already maxed out its \$3 billion credit line, secured roughly \$2 billion in loans and is looking for more cash to stay afloat.=20

On Monday, the Houston-based company also reduced previously reported 2001 third-quarter earnings by 3 cents per share and increased reported earnings for the first 9 months of the year by a penny per share.

Copyright ? 2000 Dow Jones & Company, Inc. All Rights Reserved. =09

USA: Enron shares tumble on credit concerns.

11/21/2001

Reuters English News Service

(C) Reuters Limited 2001.

NEW YORK, Nov 21 (Reuters) - Enron Corp. shares tumbled 19 percent in opening trade on Wednesday, amid concerns over the company's liquidity and growing questions over whether the proposed takeover by Dynegy will go ahead. Shares were down \$1.33 to \$5.66 in early trading on the New York Stock Exchange.

Wall Street analysts said Enron is losing market share because of credit concerns from its trading partners and questions over Dynegy Inc.'s takeover offer. Enron warned on Monday it could be forced to pay by next week a \$690-million debt triggered by a credit downgrade last week.

"The Dynegy deal will take a long time and a lot of things could happen over that time period. Dynegy did their homework, but if they missed anything, they have a number of exit opportunities," said Fulcrum Global Partners analyst Michael Barbis.

Business

Upgrades and Downgrades

Rhonda Schaffler, Charles Kadlec

11/21/2001

CNNfn: Market Coverage - Morning

(c) Copyright Federal Document Clearing House. All Rights Reserved.

RHONDA SCHAFFLER, CNNfn ANCHOR, MARKET CALL: Time now for upgrades and downgrades.=20

Salomon Smith Barney downgrades Microsoft (URL: <http://www.microsoft.com/>) = to neutral from outperform saying the company's earnings estimates too aggressive in light of the economic conditions.

Goldman Sachs, as we heard from Chris, removing three energy firms; Enron (URL: <http://www.enron.com/>), Dynegy (URL: <http://www.dynegy.com/>) and Williams (URL: <http://www.williamsenergy.com/>), from the recommended list.=20

Dynegy was expected to buy the troubled Enron. It is still, but it's rated = market perform now as is Enron. Williams rated market outperform. Goldman says it's concerned about Enron's ability to recover from the loss of significant business deals and sees no positive catalysts for the entire group largely due to the problems in Enron.=20

On the upside, Deutsche Bank is raising Xerox (URL: <http://www.xerox.com/>) = to buy from market perform saying it's pleased with the company's turnaround strategy. We're going to talk about that in detail when we speak with the analyst who made that call in just a moment.=20

First, we want to take a look at how these stocks are trading. Entire group = is down with the exception of Xerox. It's up 15 cents.=20

Peter Ausnit is imaging analyst at Deutsche Bank Alex. Brown and joins us. =20

And thanks for joining us here on MARKET CALL. What is it about Xerox you like?=20

PETER AUSNIT, IMAGING ANALYST, DEUTSCHE BANK ALEX. BROWN: Well I think the = company's really put its liquidity concerns behind it and now investors can look at the long-term picture, which is much brighter.=20

CHARLES KADLEC, J&W SELIGMAN: Peter, it's Chuck Kadlec. Good morning. Is this = is a heroic recommendation here? Is this - should we consider this more = of a speculative investment or is this something that a conservative investor ought to be interested in?=20

AUSNIT: I think investors should be interested in this if, over the next several quarters - in the near-term, the conditions are still quite difficult = but over the long-term it's not that speculative. Xerox has a large instal=

l base, a tremendous sales and service force and can probably return to industry standard margins.=20

KADLEC: As you say, this probably depends on management's ability to execute here. Why do you believe this management is going to be able to execute their strategy?=20

AUSNIT: Well their track records during the turnaround has been fairly strong and the strategy has made a lot of sense. They've sold a lot of businesses. They've done most of the things they promised to do such as bring on new third party equipment financing and they're going to bring on a new CFO as well.=20

SCHAFFLER: Peter Ausnit of Deutsche Bank Alex. Brown, thanks for joining us.=20

USA: RESEARCH ALERT-Enron, Dynegy cut by Goldman.

11/21/2001

Reuters English News Service

(C) Reuters Limited 2001.

NEW YORK, Nov 21 (Reuters) - Goldman Sachs said on Wednesday it removed merger partners Enron Corp. and Dynegy Inc. from its "recommended list" and downgraded the stocks to "market perform."=20

Goldman said it cut Enron's 2001 earnings estimate to \$1.35 a share, and cut the 2002 estimate to 50 cents a share amid concerns about "new and major" liquidity issues, and the company's ability to recover the business that has been lost.

The firm said the cash infusion from Dynegy "appears inadequate to restore the confidence of Enron customers."=20

It said Dynegy and Williams Cos Inc. have "excellent long-term prospects," but valuations throughout the sector may be under pressure until Enron's issues are resolved.=20

Shares of Enron closed at \$6.99 on Tuesday, while Dynegy closed at \$41.70. Shares of Williams closed at \$29.26.

Enron Gets Extension on \$690 Mln Note Due Next Week (Update1)
2001-11-21 12:38 (New York)

Enron Gets Extension on \$690 Mln Note Due Next Week (Update1)

(Updates with amount of debt in fourth paragraph.)

Houston, Nov. 21 (Bloomberg) -- Enron Corp., whose shares had dropped 92 percent this year amid a financial crisis, said lenders extended to mid-December the payment date on a \$690 million note due next week.

Enron, which agreed to be bought out by rival energy trader Dynegy Inc. in a transaction now valued at more than \$23 billion, said earlier this week a drop in its credit rating may force it to repay the \$690 million note. The repayment would strain cash reserves Enron needs to back its trading operations, investors and analysts said.

The Houston-based company didn't say in its release who holds the note, which is owed by an affiliated partnership that owns Brazilian natural-gas assets and was backed by Enron.

The note is held by a group of banks led by the Citibank unit

of Citigroup Inc., Standard & Poor's said in a press release yesterday.

Enron also is in discussions with other lenders on a restructuring of its debt, the company said in a statement distributed by PR Newswire.

``We believe the interests of Chase and Enron's other primary lenders are aligned in this restructuring effort,' James Lee, vice president of JP Morgan Chase & Co., said in the Enron statement. ``We will work with Enron and its other primary lenders to develop a plan to strengthen Enron's financial position up to and through its merger with Dynegy.' Morgan has been advising Enron on its merger with Dynegy.

Enron said yesterday it may have to pay \$9.15 billion in debt due by 2003, suggesting the company may run out of cash before the merger closes. Dynegy has said the merger should close before the end of the third quarter of 2002.

Enron said in a regulatory filing that it has less than \$2 billion in cash or credit lines.

Shares of Enron, the most active stock in U.S. trading, fell \$1.79, or 23 percent, to \$5.20 in midday trading. Before the announcement that it had renegotiated the \$690 million note, its shares had fallen as much as 42.78 percent, the lowest level in more than a decade.

Dynegy fell \$2.50, or 6 percent, to \$39.20. Shares of ChevronTexaco Corp., which owns 26 percent of Dynegy, rose 49 cents to \$87.02

Enron, Dynegy Shares Fall 2nd Day on Threat to Buyout (Update2)
2001-11-21 11:49 (New York)

Enron, Dynegy Shares Fall 2nd Day on Threat to Buyout (Update2)

(Adds analyst comment in fourth paragraph.)

Houston, Nov. 21, (Bloomberg) -- Shares of Enron Corp., the biggest energy trader, and Dynegy Inc. fell for a second day on concern Enron may run out of cash before its takeover by Dynegy can be completed.

Enron tumbled as much as 33 percent, and Dynegy dropped as much as 6.7 percent. Enron's bonds also fell. The company's 6.4 percent notes maturing in July 2006 were bid at 62 cents and offered at 66 cents, traders said. They sold at about 72 cents yesterday.

Institutional investors sold shares of both companies after Goldman, Sachs & Co. analyst David Fleischer downgraded them to ``market perform' from his ``recommend' list, other analysts said.

The Dynegy bid ``did not eliminate customer concerns about Enron's liquidity and long-term viability,' Goldman Sachs said in its report. ``We now believe that it will be difficult for Enron shares to generate strong returns until it is clear that

Enron can operate on a normal basis without having to provide cash or letters of credit to back routine transactions.'

Fleischer also cut his 2002 profit estimate for Enron to 50 cents from \$1.35. Enron had been expected to make \$1.90 next year, the average estimate of 16 analysts surveyed by Thomson Financial/First Call.

Enron said Monday it may have to pay \$9.15 billion in debt due by 2003, suggesting the Houston-based energy trader may run out of cash. The company said in a regulatory filing it has less than \$2 billion in cash or credit lines.

It also surprised some investors by saying a drop in its credit rating may force it to repay a \$690 million note next week. Enron said yesterday the terms of the notes, which it guaranteed for an affiliated partnership that owns Brazilian natural-gas assets, are being renegotiated and that it had a ``verbal indications'' that the maturity of the notes will be extended.

The company's dealings with affiliated partnerships led to earnings restatements, credit-rating cuts, a federal investigation and a management shakeup. Dynegy plans to complete its buyout by October, and Enron may have to ask lenders to restructure payment schedules.

Mirant Corp., Aquila Inc. and other big energy traders are doing fewer transactions with Enron as concerns increase about its credit rating and ability to finance daily business, executives said yesterday.

Enron's stock fell \$2.28, or 32 percent, to \$4.71 in late-morning trading. Earlier, it touched \$4.67, its lowest price in more than a decade. The shares have plummeted 92 percent this year. Dynegy fell \$2.70, or 6.5 percent, to \$39.00. The shares had dropped 26 percent this year.

U.S. Equity Movers: Cardiac Science, Enron, Guidant, TriQuint
2001-11-21 10:24 (New York)

U.S. Equity Movers: Cardiac Science, Enron, Guidant, TriQuint

New York, Nov. 21 (Bloomberg) -- The following is a list of companies whose shares are moving in U.S. markets Wednesday, Nov. 21. The stock symbol is in parentheses after the company name.

Major Moving Stocks:

Enron Corp. (ENE) fell \$1.54, or 22 percent, to \$5.45 and traded as low as \$5.44. The energy trader shares fell for a second day on concern Enron may run out of cash before its takeover by Dynegy Inc. (DYN) can be completed.

Other Moving Stocks:

Cardiac Science Inc. (DFIB) rose 51 cents, or 16 percent, to \$3.65 and traded as high as \$3.89. The maker of equipment used to restore a normal heartbeat to patients in cardiac arrest said the San Diego City Council approved an agreement for the company to

deploy automated external defibrillators in the region. The company made the announcement in a press release distributed by PR Newswire. Officials couldn't immediately be reached to comment.

Guidant Corp. (GDT) rose \$4.18, or 8.9 percent, to \$51 and traded as high as \$51.50. The maker of products to treat heart disease said a study showed implantable defibrillators cut deaths by 30 percent in heart-attack survivors, potentially expanding the \$1.9 billion market for the product.

Portal Software Inc. (PRSF) fell 34 cents, or 15 percent, to \$1.89 and traded as low as \$1.64. The provider of Internet-billing programs said in a release distributed by Business Wire that it forecasts a loss of 9 cents to 10 cents a share in the fourth quarter ending Jan. 31. The company is expected to lose 11 cents, the average estimate of analysts surveyed by First Call. Officials couldn't be reached to comment.

TriQuint Semiconductor Inc. (TQNT) fell \$1.99, or 10 percent, to \$17.56 and traded as low as \$17.35. The communications-equipment chipmaker said it would report fourth- and first-quarter results at the low end of previous forecasts. TriQuint was cut to ``neutral'' from ``buy'' in a report by U.S. Bancorp Piper Jaffray Cos. analyst Samuel May.

Tickers: ENE DFIB GDT TQNT

Money flows, the difference between the value of trades made at a higher price than the previous trade and those made at a lower price, may also appear for some stocks. These inflows and outflows show whether people are willing to pay more for a stock that's rising, or to sell a stock that's falling for less. If not it's a signal the share price may soon change direction.

Enron, Dynegy Shares Fall 2nd Day on Threat to Dynegy Bid
2001-11-21 09:57 (New York)

Enron, Dynegy Shares Fall 2nd Day on Threat to Dynegy Bid

Houston, Nov. 21, (Bloomberg) -- Shares in Enron Corp. and Dynegy Inc. fell for a second day on concern Enron may run out of cash before its takeover by Dynegy can be completed.

Enron fell \$1.37, or 20 percent to \$5.62 in early trading. Dynegy fell \$1.95, or 4.7 percent, to \$39.75.

Enron bonds extended declines. The company's 6.4 percent notes maturing in July 2006 were bid at 60 cents and offered at 68 cents, traders said. They traded at about 72 cents yesterday.

Enron Corp. Cut to 'Market Perform' at Goldman Sachs
2001-11-21 08:46 (New York)

Princeton, New Jersey, Nov. 21 (Bloomberg Data) -- Enron Corp. (ENE US=) was downgraded to ``market perform'' from ``recommend list'' by analyst David N Fleischer at Goldman, Sachs & Co.

| | | | |
|---------------------|---------|-------------------|--------------|
| Earnings estimates: | Period | Previous estimate | New estimate |

Enron Says Lenders Extend \$690 Mln Note Payment to Mid-December
2001-11-21 12:10 (New York)

Enron Says Lenders Extend \$690 Mln Note Payment to Mid-December

Houston, Nov. 21 (Bloomberg) -- Enron Corp. said its lenders extended to mid-December the payment date on a \$690 million note, giving the debt-laden energy trader more time to restructure its finances.

Enron said it's still committed to a takeover by Dynegy Inc. The company said it secured the remaining \$450 million of a previously announced \$1 billion credit line.

Enron shares pared losses after the announcement of the debt extension. The stock fell \$1.54, or 22 percent, to \$5.45 in midday trading.

Plunge Says End Is Near at Enron

By Peter Eavis <mailto:peavis@thestreet.com>

Senior Columnist

11/21/2001 12:32 PM EST

Enron (ENE <<http://tscquote.thestreet.com/StockQuotes.jhtml?tkr=3DENE>>:NYSE=
- news <<http://tscquote.thestreet.com/BBNews.jhtml?tkr=3DENE>> - commentary=
<<http://find.thestreet.com/cgi-bin/texis/cmttkrfind/results.html?tkr=3DENE&site=3Dtsc>> - research <<http://thestreet.multexinvestor.com/search.asp?Tic=ker=3DENE>> - analysis) <<http://www.riskgrades.com/clients/thestreet/index.cgi?tickers=3DENE>> shares plunged a second straight day Wednesday as fear mounted that the struggling energy trader's bailout merger plan will unravel.=20

A potentially lethal cash crunch appears to be gripping Enron, even though = its planned acquirer Dynegy (DYN <<http://tscquote.thestreet.com/StockQuotes.jhtml?tkr=3DDYN>>:NYSE = news <<http://tscquote.thestreet.com/BBNews.jhtml?tkr=3DDYN>> - commentary <<http://find.thestreet.com/cgi-bin/texis/cmttkrfind/results.html?tkr=3DDYN&site=3Dtsc>> - research <<http://thestreet.multexinvestor.com/search.asp?Tic=ker=3DDYN>> - analysis) <<http://www.riskgrades.com/clients/thestreet/index.cgi?tickers=3DDYN>> has injected \$1.5 billion of cash, = and banks have opened new credit lines. An Enron collapse would cause weeks = of dislocation in the energy markets that would damage other energy trader = s, and it would cause big losses for the Houston company's creditors.=20

Just before noon EST, Enron announced in a press release that it had extend = ed to mid-December a \$690 million obligation that was due next week. It als = o said that it had agreed with its bankers to draw down the remaining \$450 = million of a previously announced \$1 billion secured credit line that has J = .P. Morgan Chase as its lead banker.=20

Investors have been fleeing Enron since the company last month disclosed a = \$1.2 billion writedown to unwind some related-party hedging transactions. T = he Securities and Exchange Commission is probing Enron deals with related p = arties. The October disclosure made investors uneasy because it suggested t = he company hadn't been forthcoming about the true state of its finances, an = d it showed that Enron was facing serious liquidity problems.=20

Those fears were temporarily quieted earlier this month when Enron agreed t =

o be acquired by smaller rival Dynegy. But Enron's disclosure Monday that i= t faces additional earnings and financing troubles renewed the rush to the = exits. In the Wednesday release, Enron CEO Ken Lay said his company was sti= ll committed to the merger: "We continue to believe that this merger is in = the best interests of our shareholders, employees and lenders." Dynegy late= r issued a press release indicating it is "continuing our confirmatory due = diligence" regarding the merger. Neither Enron nor Dynegy returned calls se= eking comment.=20

After plunging 23% Tuesday to \$6.99, Enron was down a staggering 34% at one= point Wednesday. It moved slightly higher after the midday press release t= o trade at \$4.90. Enron shares have lost more than 80% of their value since= the company issued its third-quarter earnings release last month. Dynegy d= ropped \$2.44, to \$39.26, though it remains substantially above premerger le= vels.=20

At the heart of Enron's trouble is the sense that the company isn't letting= on the full extent of its troubles. The selloff in Enron shares began in e= arnest Oct. 16, when the company disclosed in an earnings conference call t= hat it would take a \$1.2 billion writedown to unwind some related-party tra= nsactions. Critics of the company said those deals, in which the company di= d business with separate entities involving Enron managers, raised serious = ethical and disclosure issues.=20

The Dynegy merger was taken as a vote of confidence for Enron, since as a b= ig trading partner Dynegy would appear to have a solid grasp of Enron's sit= uation. As a result, shares in both companies rallied after the deal's anno= uncement. But Monday's disclosure that Enron faced \$690 million in bond pay= ments next week reignited worries that the company faced steeper challenges= than it has detailed. According to a Merrill Lynch report cited in The New= York Times Wednesday, Dynegy wasn't aware of the \$690 million obligation. = Critics of the deal wondered whether Enron had told Dynegy about all its ob= ligations. <<http://www.thestreet.com/markets/detox/10003860.html>>=20

Liquidity fears have also been rekindled by information contained in a fili= ng of quarterly results that show the company consumed as much as \$5 billio= n of cash in recent weeks. By the end of 2002, Enron has to find around \$9 = billion to pay back various obligations. It had \$1.2 billion in cash on han= d as of Nov. 16, according to the filing.=20

Tellingly, Dynegy shares haven't plunged along with Enron, suggesting that = investors see a collapse of the merger as catastrophic for Enron but not fo= r Dynegy. At current levels, Enron shares are trading at more than a 50% di= scount to the Dynegy offer.=20

J.P. Morgan has taken a leading role in helping Enron. It has lent funds an= d it helped restructure the \$690 million obligation. The bank's stock was d= own 78 cents to \$38.62. "We will work with Enron and its other primary lend= ers to develop a plan to strengthen Enron's financial position up to and th= rough its merger with Dynegy," said James Lee, a top banker at Morgan, in t= he Enron release.=20

From CBS.MarketWatch.com, online at:

DYNEGY, ENRON SAY MERGER TO PROCEED

By Myra P. Saefong

1:52 PM ET Nov 21, 2001

WASHINGTON (CBS.MW) -- Merger partners Enron and Dynegy restated their commitment Wednesday to completing a deal, on the heels of embattled Enron's announcement that its lead lender granted it more time to pay off a \$690 million note set to come due next week.

"We are continuing our confirmatory due diligence and working to accelerate the regulatory approvals required to complete the merger," said Chuck Watson, Dynegy's chairman and chief executive, in a

statement.

Shares of Enron (ENE) recovered slightly in afternoon trading but remained under pressure.

On heavy volume, the stock -- which had touched \$4 earlier in the session -- was down \$1.83 to trade at \$5.16, a new 10-year low. Some 84 million shares had changed hands.

Enron declined 23 percent Tuesday after the company revealed the upcoming debt deadline and restated its earnings.

Meanwhile, Dynegy shares lost \$1.83 to stand at \$39.87.

Enron said that the lead bank on the \$690 million debt agreed to extend the maturity date to mid-December, which will give the company time to restructure the facility, and added it expects to further restructure its debt.

"We ... believe we can identify a mutually beneficial restructuring to enhance our cash position, strengthen our balance sheet, and address upcoming maturities," said Jeff McMahon, chief financial officer, in a statement.

J.P. Morgan Chase & Co. said it and other lenders are committed to helping Enron improve its financial position.

Also, Enron reaffirmed its commitment to a merger with Dynegy and said it closed on a previously announced \$450 million line of credit from J.P. Morgan, collateralized by the company's Northern Natural Gas Co.

Enron -- which is being acquired by its smaller rival Dynegy (DYN) at a fire-sale price -- revealed in a Securities and Exchange Commission filing Monday that it had to pay off or refinance \$690 million in debt obligations by next Monday or risk triggering nearly \$4 billion in additional payments.

If Enron had missed that deadline and didn't post collateral, investors had the right to demand immediate liquidation of the assets of one of Enron's limited partnerships, the unusual business entities at the center of the company's murky transactions currently under investigation.

The SEC filing of Monday also contained yet another restatement of financial results on the heels of a similar filing that disclosed more than four years of restated earnings figures.
<<http://cbs.marketwatch.com/news/story.asp?guid=3D%7B35D690E0%2D13BE%2D43D9=%2D9644%2D1B1CF4896115%7D>>

Earlier Wednesday, Goldman Sachs lowered its rating on Enron's stock to "market performer" from its "U.S. recommended list," citing "major" liquidity issues and concerns over whether the company can recover the business it has lost.

CIBC World Markets also cut Enron to a "hold" from a "buy."

Commerzbank weighed in Wednesday, saying Enron's viability is in doubt.

"We believe the filing clearly shows that Enron remains in a precarious financial position and its status as a going concern is much in doubt," analysts Andre Meade and Andrew Smith wrote. "It appears that Enron's

situation could worsen in a number of ways."

Though Enron's most recent disclosures shed more light on the fiscal situation, Meade and Smith characterized the information as "piecemeal."

"It appears that the full extent of Enron's problems is not currently known," they said in a note, cautioning clients against investing in Enron.

Dear Valued Customer,

The Enron Creative Center is initiating a comprehensive survey of its customers' satisfaction, and would very much like to include your feedback. Bowne Business Solutions is proud to be the onsite provider of Enron's graphic services. I would like to invite you to take a moment to complete a brief survey about the BBS services at Enron. In order to protect your privacy, BBS has engaged the services of independent market research firm Optimal Edge to manage the project. Your individual identity is guaranteed to be 100% protected, as all responses are accepted anonymously on a secure Web server, where the survey is hosted by CustomerSat, Inc. We sincerely hope you will take a few minutes to participate, as your feedback and comments will help BBS better understand your needs.

To go to the survey customized for Enron simply click on the following address:

<http://www.customersat3.com/s/JuWR0et0.asp?IID=uJeePEsEJvbyE>

or copy the URL and paste it into your Web browser. If you need assistance, please e-mail bowne@customersat.com.

Your opinions and satisfaction are very important to us. Thank you very much for your feedback!

Sincerely,

John Zilker
Client Services Manager

In the next few days, you will receive your ID and temporary password for the Financial Data Warehouse / Business Objects from the ISC.

When you do, take these three steps which will enable you to identify the additional reports and data items needed to perform your work: Logon and install Busin

ess Objects via the intranet; Review the existing Corporate Reports, and take the two ISC Training Courses for Business Objects (one is an on-line training course available anytime and the other is a classroom style course where you get hands-on experience).

First, logon to the Project Sunrise website and install the Business Objects web client:

open your Microsoft Internet Explorer,
enter the Project Sunrise site address sunrise.corp.enron.com into the address field and press enter,
when prompted, enter your ID (with a capital P) and your temporary password
follow the directions in the ISC's instructions that will be sent with your ID/password to install Business Objects over the intranet. (if this takes more than 3 minutes, call me at 3-9047). DO NOT GET BUSINESS OBJECTS INSTALLED BY THE IT GROUP, AS THIS IS THE WRONG VERSION (WINDOWS).
then Refresh your Report List and start reviewing the reports. The ISC's instructions will also cover the steps to select and run reports, (but please call me with any issues).

Second, review the existing reports in the "Corporate Documents" tab and identify the additional reports you need to perform your work and meet your customers' needs. Current report subjects include Cost Centers, Project Systems and on or about November 1st will also include Profit Centers, Consolidations, Accounts Payable and Accounts Receivable.

Third, take the two training courses to learn how to analyze data in drill mode, add other data warehouse fields to existing reports, etc. Once you have this ability, you can also determine which additional data fields need to be added to the Financial Data Warehouse to complete your reporting requirements. To enroll in the on-line and classroom Business Objects courses,
Logon to the Enron Learning Management site elm.enron.com
scroll to the bottom of the first pages and select ISC Courses
Scroll down to the middle of page two, click on Business Objects and enroll in the following:

BusinessObjects On-line Training Course for Financial Reporting (BO 101) Price - none

BusinessObjects Financial Reporting Basics (BO 202) Price - \$250 Classroom/hands-on training.

More information on training below and on ELM site.

Project Sunrise is in the process of identifying and designing its final deliverable now, so we need to identify our reporting needs quickly.

Thank you , Pat Cagney

Vicki, per our accounts receivable, listed below are the outstanding amounts for
the invoices for December, 2000 and also the Late Pay Charge invoice that was r
elated to the late payment of November, 2000. If you have any other questions,
please let me know, otherwise, I think the letter looks fine.

Late Pay Charge invoice \$4,519.89

December, 2000 invoices \$131,804.53

Thanks,

Raetta

Subject: RER DDVC/SMS Issue

Per my e-mail below, I am forwarding a draft of the letter to RER regarding the
DDVC/SMS issue. Please review the letter and provide any comments or concerns.
Bill is going to be in Minneapolis (at this point anyway) Tuesday through Frida
y of next week so I'd like to have it completed by the end of next week in order

to be prepared to discuss the issue when RER.

<< File: RER_ResponseLetter_1001.doc >>

Thanks,
Vicki

Subject: RE: RER Billing Issues

Hey guys,

Bill talked with RER regarding this issue last week and committed to get a letter to them articulating our position with supporting provisions of the tariff. Based on that conversation, the scheduled meeting was cancelled. Moreover, he is reviewing RER's original dispute letter from March and we can determine course of action thereafter.

Dari - Did you receive my e-mail of late which had a few questions regarding Section 8 of the tariff?

Thanks for your help and patience,
Vicki

Subject: RE: RER Billing Issues

It was my understanding that Bill Fowler was going to meet with RER last week to discuss this matter. Northern continues to stand firm on our interpretation of the tariff requirements regarding payment but marketing is to determine when and whether we will send a demand letter to RER. We are waiting for marketing regarding how we will proceed. Thanks MW

Subject: RER Billing Issues

Raetta called to find out if there was any update on the RER issues. Ranelle informed me that you, Dari, Vicki and Ranelle have met on this subject. Please update Raetta and let me know if the issues are resolved so that I may remove this from my issues list. Thanks.

This is the spreadsheet we have been working off of for the 2010 model that Kevin Howard is running. Please let me know if you have questions or would like me to summarize this for you in a more useful format for your reference.

Lindy

Subject: Letter to Rescind Offer

Attached is a proposed letter to use when rescinding an offer of employment. I

have consolidated drafts done by Fran Mayes and Terry Bosien. If you have other forms that you think work better, please send them our way. I think it will be useful to work from the same document across Enron.

Please note that each situation should be handled consistently with others in similar circumstances, and that special care should be taken for those who have quit prior jobs, relocated, or are in precarious visa situations.

Location: ECS 06980

Orientation will be split into two sessions and divided by alpha-order. Sessions will run 10am-12 pm and 2pm- 4 pm.

We encourage all of you to attend your designated session as valuable information will be presented, and you will have the opportunity to get answers to your questions.

You can speed things up tomorrow by filing in the attached forms - alternatively you can complete them there

10am Session Letters A- K

2pm Session Letters L-Z

PLEASE RSVP (BY REPLYING TO THIS E-MAIL) - IF YOU HAVEN'T DONE SO ALREADY

Only EOL market makers are allowed to use free loading brokers. Please do not use brokers for markets outside of your market making responsibility. I am going to have the back office decline to book all broker deals done by traders outside of their responsibility.

Thanks,
Mike

Yes, I did receive it, but I was going to call you because it was issued under my previous married name "Lindy H. Currier". How could I get it issued in the correct name "Lindy Donoho"? Please let me know.

REMINDER

We have not yet received your feedback. Your input is very valuable and to be included in the participant's summary report, it must be received NO LATER THAN CLOSE OF BUSINESS on Monday, October 22, 2001. Without your feedback, the participant may not receive a summary report or be eligible to attend the program.

* IMMEDIATE ACTION REQUIRED - Do Not Delete *
Executive Impact & Influence Program

Dear Jeff Shankman,

As part of the Executive Impact and Influence Program, each participant is asked to gather input on the participant's own management styles and practices as experienced by their immediate manager, each direct report, and up to eight colleagues/peers.

You have been requested to provide feedback for a participant attending the next program. Your input (i.e., a Self assessment, if you are a participant in this program, Manager assessment, Direct Report assessment, or Colleague/Peer assessment) will be combined with the input of others and used by the program participant to develop an action plan to improve his/her management styles and practices. If you are providing feedback as a Manager of the participant, please note that your feedback will be identified in the summary report.

It is important that you complete this assessment NO LATER THAN CLOSE OF BUSINESS on Monday, October 22, 2001.

To begin the online administration process, you will need the following Internet address and Password(s).
NOTE: If you are providing feedback for more than one person, each password and participant name is individually listed below.

Open your Internet browser e.g., Internet Explorer or Netscape Navigator, and please type or copy the URL address below into your Internet browser (please DO NOT go through Lotus Notes):

www.fsddatasvc.com/enron

4EEKAM (Per A. Sekse)

If you experience technical problems, please call Dennis Ward at FSD Data Services, 713-942-8436. If you

have any questions about this process, you may contact LeRea Pharr at Enron, 713-345-8434, or Christi Smith at Leadership Research Institute, 619-216-0404.

Thank you for your participation.

Attached is a copy of the preliminary report that recommends that the inlet pressure to Citizens "Griffith Plant" Station be limited to 740 psig. Note that this is only a preliminary report that Citizens is reviewing. Some of our "reviewers" are on vacation, and have held up the process of getting this report finalized.

Since I was temporarily assigned to another position during the time that gas was introduced to this line, I have asked my employee Martin Conboy to create a log of events on how these stations had been operated. I will send it to you later today.

Can you have David Roensch review to see if anything is missing. I feel that it is a good idea to document the different operation modes with results prior to agreeing on any further changes.

As many of you know, I have a provision in my employment contract which provides for a payment of \$20 million per year for the remaining term of my contract in the event of a change of control of Enron. The merger with Dynegy, or a similar transaction with any other company, would trigger this provision on closing. Assuming the merger with Dynegy is closed within 6-9 months, as we expect, this provision would entitle me to total payments of slightly more than \$60 million.

Many CEOs have change of control provisions in their employment contracts and mine has been in place since 1989. But given the current circumstances facing the company and our employees, I have been giving a lot of thought these last few days to what to do about this payment. Initially, I thought I would use part of the funds for a foundation for our employees and take the remainder in stock and cash. However, after talking to a number of employees this afternoon, I have decided that the best course of action would be for me to waive my right to any of this payment. Therefore, at closing, I will receive no payments under this provision.

I know this action does not remedy the uncertainty that you and your families face. But please know that I will continue to do everything in my power to serve the best interests of Enron's employees and shareholders. I am still very proud of what we have built at Enron, and I want to continue working with all of you to correct the problems and restore Enron to its rightful place in the energy industry.

Thank you.

This appears to be OK and we should be able to sign on however please review the statement and let me know if you see a problem with our support of the PHC statement. Sorry for the short notice and review time. I'll not respond until noon tomorrow. Thanks.

Glen

SoCalGas is circulating a draft pre-hearing conference statement for parties to sign on to, if they wish (please see attached). Given Transwestern's position in the BCAP, it makes sense to sign on to SoCalGas' generic PHC statement. Please take a few moments to review the same and let me know your thoughts. SoCalGas has asked for a response by Tuesday noon. Thanks. =20

Sent: 11/16/2001 11:14:43 AM=20
Subject: A.01-09-024 PHC Statement draft
To: Parties Who Participated in the A.01-09-024 (SoCalGas and SDG&E BCAP) Meeting and Confer:=20

Attached is a proposed PHC Statement as required by ALJ Brown in her Ruling of November 5, 2001. Per that Ruling, this Statement must be filed within 10 days of our meeting (which by my calculation would be the 26th of Nov=

ember). I would REALLY like to get it filed on the 21st if possible, before the Thanksgiving weekend.

I tried to keep the Statement simple, while reflecting the consensus view as articulated at the meeting. I tried not to go into too much detail on the description of some of the outstanding CPUC proceedings that may affect this case, but wanted to give the judge some flavor for each proceeding. I ask that each of you let me know by noon next Tuesday (the 20th) if you want to "sign on." I will incorporate any non-substantive edits you may have.

For substantive edits (hopefully there will be few if any) I will do my best to incorporate. However, let's remember that none of us want to be de-positioned by what is said in this document so argumentative statements will be ignored. If only nonsubstantive edits are received, I will file on behalf of all participating parties without further review. If substantive changes are made, a second review will be provided.

I hope we can keep this from becoming an unwieldy exercise. I ask for your cooperation and appreciate your input. If you want to provide your individual PHC Statement, fine. Just let me know so I can take your client's name off this one.

Thanks again.

Harry and Brandon:

Just to memorialize what I just communicated to Harry over the phone. My interface at TVA emailed yesterday requesting a phone dialogue to discuss where our Synthetic Peaker offer needs to be for TVA to execute. Holding all assumptions constant, we would need to come in between \$2.25-\$2.30/KW-month in order for TVA to execute. Our indicative quote was \$3.90/KW-month. I will attempt to find out if they have other offers in the sub-\$2.50 range or if they are just setting their own bid at the requested price.

This warning is sent automatically to inform you that your mailbox is approaching the maximum size limit.
Your mailbox size is currently 84068 KB.

Mailbox size limits:

When your mailbox reaches 75000 KB you will receive this message. To check the size of your mailbox:

Right-click the mailbox (Outlook Today),
Select Properties and click the Folder Size button.
This method can be used on individual folders as well.

To make more space available, delete any items that are no longer needed such as Sent Items and Journal entries.

You must empty the Deleted Items folder after deleting items or the space will not be freed.

To turn Journaling off,
click Tools | Options | Journaling Options and de-select all items.

See client Help for more information.

Cc: Ben Porath
Subject: More on OATI Certificates

We are hoping to be able to begin using OATI certificates by the end of this week or early next week. At some point, I will notify you of a default password to use for your first login. You will be expected to replace the default with your own password on your first login. However, before we can implement, I need updated information from you. Please reply to this message with the following information.

1. User name
2. Email address
3. Phone number
4. Do you currently have an OATI digital certificate?
5. If you have an OATI certificate, what is the common name?
6. If you do not have an OATI certificate, what is the name of your Security Officer or security contact?

I am not certain at this point whether we can use Tradewave and OATI certificates in parallel. It seems to be a good possibility, but hasn't yet been confirmed. If we are able to do so, we have until the end of June to complete everyone's conversion. If not, we will have to pick a date certain for the change. Since I will be on the road from June 25-28, the changeover date would have to be no later than June 24.

The attached file describes how to obtain a certificate from OATI.

Updated questions and answers for Enron employees have just been posted to <http://home.enron.com/updates/qa.html>
We recognize that as active employees you have special concerns and questions related to Enron's bankruptcy filing. We regret that we are not able to answer all of your questions as quickly as you deserve, but we are working to provide accurate responses to your most important questions about employee benefits, expense payments and so on. We appreciate your patience as we continue to try to provide timely and reliable information to you.

Sanjeev,

I should have a list of post-id's for you by 4:30 today. After friday, I will no longer have access to the estate, so if you could shoot this off over night so I could have something in the morning to work with I would appreciate it.

Let me know if that doesn't seem possible.
Thanks

Kam

Dear Expedia.com Customer:

We have received notice from CONTINENTAL AIRLINES that they have made a change to your flight schedule.
This change could mean a difference in departure or arrival time and/or a change in flight number on one

or more of your flight segments.

To review your new flight information online, access your itinerary by clicking on the following link. <http://expedia.com/pub/agent.dll?qscr=litn>

You may also access this information by going to www.expedia.com, click on My Trips and select itinerary number 13644492734.

If you are traveling with an e-ticket, you must provide proof of current date travel, such as a printed copy of your itinerary or a printed receipt, at security and airline check-in locations. We highly recommend that you check your itinerary on-line prior to your scheduled departure to ensure that the information that is displayed on your printed documents has not changed.

For additional information regarding these requirements, click on the following link:
http://172.30.78.59/pub/eta.dll?qscr=hgen&hfnm=h_FW_etix.htx

The airlines recommend that you reconfirm your flights 24 hours prior to departure. (72 hours for international travel). A list of airline toll free numbers is available at:

<http://www.expedia.com/daily/service/airlines.asp>

Please do not reply to this e-mail address. All e-mail correspondence should be directed to travel@support.expedia.com

Thank you,
Claire

Lisa:

Do you know if this issue was resolved ---did we verify how we charge BPA for LD's?

Thanks! Jenny

Subject: RE: BPA Cuts

What matters is what the contract indicates. What is the Enpower deal confirmation number? I will have someone pull the contract to determine EPMI's rights as it relates to charging BPA LD's.

Virgina, correct me if I'm wrong, I believe BPA has special rules when energy is curtailed. Instead of us charging them with liquidated damages, BPA will not bill for the hours curtailed. I track and record the cuts by modifying the deal in deal scheduling so that settlement is aware of the cuts.

lisa

Subject: RE: BPA Cuts

I assume that on all cuts on COB deliveries that we are charging BPA liquidated damages. In this case \$3.50/MWhr for 6/18. Please let me know if this is not the case. Also, how do we track and record COB non-delivery LD's for BPA's?

Subject: BPA Cuts

We were cut 40 MW today by BPA for peak hours on 6/18 at COB on enpower deal number 305699. Lisa purchased replacement power from Avista at \$30. Enpower 897712

We presold power to Avista at \$33.50 for the month and are now buying it back from them at \$30 to book out. Of course, BPA should not charge us for the 27.25 supply price under their contract.

Casey,

I ran a test deal through on EnronOnline. Please verify that Deal ID 665070.1 in ENPOWER TEST is correct. Please let me know so that we can go ahead and set this up in production.

eol deal #1631717

Thanks,

Melba

hello

in the last week we recived some mail with the virus attached.
the virus is strange because one window was opening automaticaly when we opened the connection.
probably some mail leaved from our pc with the virus attached (the virus is autoreply) but nothing appear in our exit-mail list
in this days we recived other mails with the some problem.
in this days we are checking better our pc with one antivirus and for one week we don't reply at any mail
probably the name of the virus is: Virus W32/Badtrans.B
so,please,pay attention and sorry for this disadvantage
best regardswww.zebramodernariato.com

Dear Sally & Beth,

We are already getting questions from different groups on how things will work in the new company (books, ERV, DPR). They are all assuming that we are going with the new company. I'm telling each of these groups that we are staying with the estate and as such, really don't know the answer to these qu's and are directing them to ask Jeff/Stacey. Please let me know if either of you hear any info that would be of help.

Thanks

Shona Wilson

Realtime group-

This occurs when your H drive is not mapped. To fix the mapping, follow the instructions at:

<http://172.17.172.62/rt/tips/mapHdrive.html>

Hope this helps!

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.
We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

| | | |
|-------------|----------------|-------|
| November 14 | 1:00 - 2:00 PM | EB560 |
| November 14 | 3:00 - 4:00 PM | EB560 |

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

| | | |
|-------------|----------------|-------|
| November 14 | 2:00 - 3:00 PM | EB560 |
|-------------|----------------|-------|

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928 .

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

One of the guys here recieved a call from a guy at EES looking for contacts at gas utilities in the Northwest. They are hoping to sell them some sort of deal where they provide the utility structured products and the utility pushes them through to the endusers... isn't that my Cascade deal? Let's discuss Monday, it sounds like something we need to nip in the bud.

QUOTE OF THE DAY

=====

"We were dragging our feet on getting it finished. The 11th
made me realize that you're more vulnerable than you
thought. And you can't control the circumstances."
-MARK GENENDER, 37, on preparing a will after Sept. 11.

Hi John,

As per our conversation last week, I just wanted to double check on a potential raise before the deal closes on Friday. I know that more than a few non-promotional raises have been offered and accepted for the transfer to UBS, and I'd like to make absolutely sure that I'm not eligible for one. As Cowan says, potentially the bonus pool may be much bigger next year, which is great, but it's not for sure. And given the promises Enron has dolled out over the years, it doesn't mean that much right now, especially considering it's in UBS's best interest for us not to make a killing in the first year in order to buy out the company at a lower price.

Thanks,
Ryan

We know how interested all of you are in the Retention & Severance Plan, so we want to update you on its status.

As many of you know, we have been working with members of the Creditors' Committee and their consultants since December to formulate a Retention & Severance Plan, and we formally presented the plan to the committee on Friday, February 22. We had hoped the committee would approve the plan quickly so that we could file it with the bankruptcy court and share the details of the plan with you before the end of the month.

We know that many of you have career options outside of Enron and that the Retention & Severance Plan may impact your decision to stay or to leave. We sincerely regret to inform you that approval of the plan for debtor companies is delayed. We're learning that, in bankruptcy, most things don't move as quickly as we are accustomed.

The committee outlined some concerns related to our proposed plan, but we are confident we will be able to reach agreement with the creditors on those concerns. The Creditors' Committee fully supports the implementation of a Retention & Severance Plan. Such plans align the company's objectives with the goals of the creditors and are fairly standard in bankruptcy. These plans are designed as a way to preserve and maximize value for the estate.

The Creditors' Committee also understands that time is of the essence for getting a plan in place and has established a subcommittee to expedite their review and approval process. To that end, we are meeting regularly with the subcommittee. We intend to work hand-in-hand with them to reach agreement on an acceptable plan as quickly as possible. This is currently our top priority, bar none!

When we filed for bankruptcy, we did not fully grasp how tedious the process of developing an acceptable plan would be. Unfortunately, that lack of understanding led management to set unrealistic expectations about how quickly a plan might be in place.

We now know that it takes significant time, resources and effort to understand, identify and gather the massive volume of required details, to formulate that information into a reasonable program, and to prepare a rationale and compelling presentation. The process mirrors the most time-intensive business presentation or deal negotiation with which Enron has been involved. That serves only as an explanation - it is not intended as an excuse.

We remain committed to working with the Creditors' Committee until we can reach agreement on a plan. We anticipate that negotiation process will take another week or so, and have targeted the week of March 11 to file a motion to adopt a plan with the bankruptcy court. We will continue to hold retention and severance as our number one priority until a plan is approved by the bankruptcy court.

With respect to non-debtor companies, or those companies not in bankruptcy, new severance plans are being approved and will be rolled out to employees in those companies in the very near future.

In the meantime, we have been working to finalize merit increases and promotions across the entire organization and plan to communicate those to employees next week.

And of course, we will update you on retention and severance as soon as possible.

I finished a spreadsheet for calculating historical correlations on forward curves. It gives the correlation matrix for contracts going out an arbitrary number of months out. I think it might be a handy tool for some of you.

You may get that on 0:\RESEARCH\CUSTOM\CORRELMATRIX\

It demands that you have access to our EGSPROD32 database. You must have that configured in your ODBC. It is a large spreadsheet, so it may take some computing resources. Let me know if you find any problem.

Thanks.
Paulo Issler

Alexander (leg) was placed on injured reserve, officially ending hi
s season. Walter Rasby will continue to start in his place, but Zeron Flemister
has emerged as the team's best receiving tight end with Alexander out. </

FONT>

Matt Hasselbeck, QB SEA - Bass/Hull Updated 12/27/01
The <i>Seattle Times</i> says Hasselbeck's season might be over. Mike Holmgren said he would only use him in an emergency this week, and the Seahawks coach may elect to have Hasselbeck use the season's final two games to rest his injured shoulder. Trent Dilfer will start at San Diego this week.

Amos Zereoue

, RB PIT - Free Agent Updated 12/27/01
Zereoue missed practice on Wednesday with a shoulder injury. He is listed as probable for this week.

Todd Bouman, QB MIN - Free Agent Updated 12/27/01
Bouman practiced without pads on Wednesday. If he cannot practice fully on Thursday, Spergon Wynn will get the start this week.

Keenan McCardell, WR JAC - Neal/McKay Updated 12/27/01

McCardell is listed as probable with a thigh injury. He should be able to start this week.

Chris Chambers, WR MIA - Free Agent Updated 12/27/01
Chambers is listed as questionable with an ankle injury. He practiced on Wednesday and should be able to play this week.

James McKnight, WR MIA - Free Agent Updated 12/27/01
McKnight is listed as questionable with an ankle injury. He practiced and is hopeful of playing this week.

Travis Minor, RB MIA - Giggles Updated 12/27/01
The <i>Miami Herald</i> reports Minor will get more work on offense this week. Lamar Smith will remain the starter, but the Dolphins are hoping Minor can inject some life into the offense.

James Stewart, RB DET - Hunter Updated 12/27/01
The <i>Detroit Free Press</i> says Stewart is not expected to play this week because of a sprained ankle. Lamont Warren and Cory Schlesinger will assume most of the workload in his place.

Mike McMahon, QB DET - Free Agent Updated 12/27/01
The <i>Detroit Free Press</i> says McMahon is not expected to practice or play this week. Ty Detmer will start in his place.

Brian Griese, QB DEN - Matty Updated 12/27/01
Griese told the <i>Denver Post</i> he is ready to take on the Broncos, although Mike Shanahan questioned how effective he would be in his return. "How do you know with a concussion?" Shanahan said. "There should be no side effects. Hopefully there's not. But we have learned a lot through the years about concussions and how serious they are!"

he!
y can be, and hopefully that's something in the past and they won't reoccur." >

e=bige01&owner=49699.10&random=3837&key=1116">James Stewart, RB DET - Hunter Updated 12/26/01
Stewart is day to day with a sprained ankle. His status for this week's game is unclear.

Jeff Graham, WR SD - Free Agent Updated 12/26/01
Graham may miss his second consecutive game this week because of the death of his father. With Tim Dwight (lung) still ailing, Trevor Gaylor may have to start again.

Skip Hicks, RB TEN - Free Agent Updated 12/26/01
Hicks is expected to miss this week's game with a hamstring injury, and may miss the rest of the season. Eddie George should assume a regular workload once again.

Emmitt Smith, RB DAL - Bass/Hull Updated 12/26/01
Smith is day to day with a hip injury. He is expected to play this week.

Peter Warrick, WR CIN - Giggles Updated 12/26/01
Warrick, who was benched late in last week's game, is expected to start. He has been a disappointment this year and Fantasy players should not use him at this point of the postseason.

Todd Bouman, QB MIN - Free Agent Updated 12/26/01
Bouman (thumb) may attempt to practice late in the week. His status remains unclear for this week's game, and Spergon Wynn is available to start if needed.

Bill, attached is a first draft of the advice letter comments. As noted in my earlier email, this is due tomorrow, not today. Please get back to me with any comments and/or suggestions. My apologies for the delay in getting

this to you.

Dan

Dan,

This is a follow up to our telephone conversation of this afternoon. The attachment, which apparently originated with you, is what we will talk about during our conference call at 8:00 a.m. (California time) on Monday. Thanks.

>
> The attached supplemental advice filing by SoCalGas replaces the
> changes to Rule 30, Transportation of Customer-Owned Gas, proposed by
> AL2837. The purpose of this filing is to describe the new internal
> receipt point operating procedures that SoCalGas is implementing, and
> to request Commission authorization to include the revised operating
> procedures in Rule 30. SoCalGas says this step is being taken in
> anticipation that it will be replaced with a system of firm tradable
> intrastate transmission rights in Gas Industry Restructuring (GIR)
> proceeding, I.99-07-003.
> During the GIR panel hearings, several parties requested that
> SoCalGas publish its windowing criteria in tariffs to facilitate a
> better understanding of the method used to allocate receipt point
> capacity. SoCalGas agreed to make such a filing, and D.99-07-015
> directed SoCalGas to file an advice letter adding windowing
> information to its tariffs. To comply with this directive, on August
> 6, 1999, SoCalGas filed AL2837, which has not been acted on by the
> Commission.
> Customer complaints about SoCalGas' windowing procedures have
> convinced SoCalGas that it should replace its internal windowing
> operating procedures with a system that is open to the maximum
> operating capacity at each SoCalGas receipt point. SoCalGas is making
> these internal operating changes effective November 1, 2001.
> SoCalGas held meetings with upstream pipelines on October 17, and
> with interested customers and stakeholders on October 18, regarding
> the upcoming changes. They were invited to ask any questions in the
> days leading up to the meetings.
> Comments and/or protests are due on November 21. Have a good
> weekend!

2002 Training Calendar for Settlements and Scheduling Infrastructure (SI) Training

Settlements and Scheduling Infrastructure (SI) Training classes are now available for registration for 2002. The dates are as follows:

Settlement Training Classes (class size limit = 40)

January 15-16, 2002

April 16-17, 2002

July 16-17, 2002

October 15-16, 2002

SI Training and Testing (class size limit = 20)

February 6-8, 2002 SI Training/February 12-14, 2002 SI Testing

May 8-10, 2002 SI Training/May 14-16, 2002 SI Testing

September 18-20, 2002 SI Training/September 24-26, 2002 SI Testing

November 6-8, 2002 SI Training/November 12-14, 2002 SI Testing

Registrations are handled on a first come, first serve basis, with priority given to new SC applicants. Registrations are limited to two students per SC. All classes are \$500.00 per person with the exception of the first two

attendees for new SC applicants. Payment is due prior to class start date. General agendas are attached for your review. To register: Please complete the attached registration form(s) and return to jpayton@caiso.com.

A broker just sent me this today. I am going to talk to him to get the details after trading. Thought you would like to know. Thanks.

John

"Here is the announcement: Reliant Energy Weather Risk Management Group has developed

Weather-sensitive Gas Load Indices ("WGLI"), indices that measure national or regional residential and commercial gas consumption during the heating season. We believe the indices will provide valuable information for gas traders as well as other market participants. We plan to make a swap market in the indices in the near future. We hope the WGLI swaps will become a new financial tool to help you or your clients to better manage their risks associated with the fluctuation of gas demand."

=09 =09 Dear Don, Members of Congress return from their Thanksgiving break on Tuesday as debate resumes in Washington. A bill that would renew the Price Anderson Act is being brought to the floor of the House of Representatives. The bill limits the liability for the nuclear industry in the event of a major accident. Significant revisions were made to the legislation in the wake of the September 11 attacks, with the addition of amendments that would strengthen the security of America's nuclear power plants. The Washington bureau will also have more reaction to the FERC's new policy for determining whether a company has market power in the electricity industry. Join us for these reports from the Washington bureau on Tuesday. From Houston on Tuesday, we'll bring you an update on Enron's continuing financial situation. UBS PaineWebber's Robert Young is stopping by the Houston bureau to discuss his perspective on the negotiations between Enron and Dynegy. He'll join us during the 10:00 a.m. ET newscast tomorrow. The Former Energy Advisor to the Prime Minister of Iran is speaking in Houston on Tuesday. Dr. Fereidun Fesharaki will be talking to the Asia Society about the Middle East, oil and economics. The Houston bureau will bring us a preview. Climate Solutions Co-Director Rhys Roth will be live from Olympia, Washington during the 3:00 p.m. ET newscast on Tuesday. West Coast Bureau Correspondent Kym McNicholas talks with Roth about the future of clean energy in the Northwest and how renewables will play a major role as a future energy source in the region. We'll also have an update on the California Department of Water Resources' efforts to pay generators for market transactions between January and July of this year. Join us for reports from the West Coast bureau. ENL is hitting the road later this week. Houston Correspondent Kim Benestante will report live from Anchorage, Alaska. Kim is attending a conference titled: Alaska Resources 2002: Can Alaska Compete? We'll have live coverage from the conference starting on Thursday. ENL's Gale Smith will attend the Arctic Gas Symposium in Houston on Thursday. The symposium will address supplying the North American market and the latest pipeline route update, among other topics. We'll have coverage of the symposium on Thursday. Closing Prices for Monday, Nov. 26, 2001 Crude: \$18.69 -\$0.27 Unleaded: \$0.5217 -\$0.0056 Heating Oil: \$0.05217 -\$0.0125 Natural Gas: \$2.696 -\$0.117 Keep in mind things are subject to change at a moment's notice. Occasionally guests have to cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and

d events. Be sure to watch our newscasts every business day - 9 a.m. to= 5 p.m. ET, at the top of each hour. =09 =09=09=09=09 =09 =09=09=09=09=09 =09 =09Jay Rickerts, EnergyNewsLive.com Anchor View today's Energy Wrap Vi= deo Windows Media Player: 56K | 100K | 300K Real Player: 56K | 100K = | 300K (Requires Windows Media Player or Real Player) Experience all = that Williams Energy News Live has to offer! Hi Jim.

We have narrowed our choice of vehicles to two minivans: a Toyota Sienna and a Chrysler Town & Country.

Surprisingly, Ben helped us eliminate SUV's from consideration. He prefers the smoother ride of the minivan. It will be better for taking long trips. The down side is he doesn't want to be seen driving a minivan once he turns 16. Ha! :)

We were able to help satisfy Anna (and Ben) by choosing a higher-end minivan that has many "bells and whistles" on it, yet still costs less than an SUV.

We are leaning toward the Toyota, even though it is a bit smaller than the Chrysler, because of its reliability and how it holds its resale value. The Toyota dealer also has "\$300 over invoice" sale on currently. Plus they told Mark there will be additional financing incentives starting this Saturday. Both the Toyota and Chrysler dealers have vehicles in inventory we can choose from.

So, we hope to close the deal with the Toyota dealer this coming Saturday. What do you think?

Love,
Linda

PS We got a pkg. in the mail today from you. Thanks!! I will wait until the kids are here to open it.

The Savings Plan Transition Period Ends Early!

We have been working closely with Hewitt Associates to get you access to your Savings Plan account before November 20 and are pleased to announce that the internet site went live as of 8:00 AM yesterday morning, November 13.

Log on to benefits.enron.com and check out the new website - you will enjoy the new features.

Once again, we have appreciated your patience during the transition period.

EnronBenefits . . . keeping pace with your lifestyle.

Hi Kevin,

Here all the people who have tried our online applications and subscribe to it.

Please let me know when you have time to do another trial. It appears a lot of people at Enron have an interest in the information we provide.

Henwood Energy Services, Inc.
Solutions to EmPower Your Business

NextGen a revolutionary new online service from Henwood that tracks proposed generation units and provides instant access to the data without any software to install or database to maintain. NextGen helps decision-makers by supplying them with a database of proposed generation unit information and allowing them to filter through specific parameters. The program has the capability to display graphs based on individual unit development cycles and compare those figures against a specified regional load forecast.

GenReporter provides on-line hourly operational data for over 2,000 fossil fuel electric generation plants across North America. 30 million records available instantly at your fingertips without any software to install or database to maintain. GenReporter provides hourly detail on Heat Input, Energy Output (MW or Steam), Operation Time, and SO₂, NO_x and CO₂ emissions as well as standard Unit descriptive data (e.g. unit type, capacities and fuel). Easy to use filters and point-and-click navigation tools allow users to quickly locate specific generators for detailed review and analysis, viewed in hourly detail in tabular or chart format.

MarketWatch includes hourly electric prices for published cash and forwards markets from various data sources including each of the Independent System Operator (ISO) markets in North America, Europe and Australia, and can incorporate any data sources that you currently subscribe to. MarketWatch has a user-friendly interface that facilitates quick data inquiries instantly at your fingertips without any software to install or database to maintain. The results of the queries can be presented in tabular or chart form. The MarketWatch price database is updated on a daily basis.

Rick,

Slide 4 is the proposed new slide. I also added slide 3 just for your review so that you can see what is normally in the bank presentations. They asked us to keep each part of RAC to 2-3 bullet points, at most. Please call me at x31946.

Thanks,

Sharon

I've been here the whole time and enjoying all the Beta Banter. Thanks to John Miller for the update on BWall's father. I sent him a message and he responded. Sorry, but I will be in Santa Barbara visiting my fully employed off the payroll and out of college son Aaron that weekend. Have a great time.

Brothers,
It has come to my attention that either our YahooGroup is not working, or you are not communicating. So this message is a Search for ExtraTerrestrial Intelligence among the select Betas that make up this august group. I will even count terrestrial intelligence this time.

What with Homecoming only 5 days away, we figured there would be some message traffic on eWooglin.

Hit reply when you see this message to let me know if there is life

out there.

-kai-
Shack

At Homecoming 2000, the BETA TENT had the biggest crowd by far. Stay connected and consider a future homecoming BETA reunion. It's incredible...forget the 20 years in between...everyone just seems to pick it up right where they left off years ago.

Dear Colleagues,

We know you have many questions about your new benefits plan, payroll issues and other changes that will occur over the next few weeks. Human Resources and Communications are preparing a thorough Q&A, which we will send to you tomorrow and will regularly update as more information is available.

Meanwhile, please read the announcement below from Security about how you can obtain a new UBS Warburg access card that will allow you to enter our new office space after Friday.

I am confident that you share my enthusiasm about our new opportunity. We look forward to working along side each of you in the coming days.

David Oxley

Access Cards

There will be a two-day transition for the new UBS Warburg access cards. Beginning Monday, February 11, access to the 5th and 6th floors of Enron Center South will require these new cards. UBS Warburg access cards can be picked up from 7 a.m. to 7 p.m. at the reception area on the 5th floor of Enron Center South on Thursday, February 7th ; Friday, February 8th ; and Monday, February 11. Enron Security will produce new access cards with existing photographs, then simultaneously issue the new and collect the old cards. Employees without UBS Warburg cards will be allowed into the Enron Center South building on Monday but will have to collect their new cards as soon as possible to gain access to the 5th and 6th floors.

Employees who fail to collect their new cards by 7 p.m. Monday will be required to contact Enron Security's general information number at 713-853-5360 to arrange to pick them up.

There will be security staff available at the pick up point on ECS 5 to help with any problems you might have.

It is suggested employees wear their access cards at all times while on the premise.

Accessible Areas - The new cards will allow UBS-W employees to enter:

5th & 6th floors and Plaza area of Enron Center South ,

The Sky Ring

Body Shop, Enron Center North Plaza and therefore access the Credit Union and Cafeteria from either building.

Restricted Areas - Employees must submit to Enron Security a Restricted Access Request form (available by calling 713 8535360) and signed by Bob McAuliffe (713 -853-7468) to enter:

Enron Center South, 8th and 9th floors

Enron Center North, 22nd and 34th floor

Ardmore Data Center.

Employees staying with the Enron estate while visa and other issues are completed - Employees in this group who are on assignment arrangements to UBS-W will be issued a regular access card - available in the same way as other new UBS-W employees.

Estate employees who are working with UBS-W on transition issues - If they will be based in UBS-W office space they should talk to their UBS-W counterpart for approval and then UBSW HR for the issue of a UBS-W contractor card (in addition to their regular Enron badge).

hey- got the grandparent dinner changed to weds, so am free for festivities tues night. i vote a little happy hour, good dinner, then whatever. know you working folk keep different hours, plus i have another "mole appt" noon on weds, so can't be ultra shameful night before....guess we should call kates and you-know-who....
appt tomorrow morn at 11 am, and me be out and about most of day, but will try to call early morn or late afternoon. was thinking maybe ruggles or ouises or something- i know, i know- am ultra-predictable, but i'm the bon vivant leaving and it's all about ME, ME, ME! could really get used to that....

We have upgraded the web site and it the newer version now is on a new server. The transition should be very smooth as it is identical on face value to the existing site. Please note the new link and replace your current favorites entry with this one.

<http://eastpower.test.corp.enron.com/portal/>

We will run both sites in parallel for the next week. Barring any major complications the current site will go down next Friday Sept. 21 afternoon.

Thanks
Mark Symms

Are all the good men REALLY already taken?

I sometimes think I'm a walking contradiction: I'm feminine but like being "one of the guys", cynical but trusting, opinionated but accepting, set in my ways but adaptable, shy but outgoing. I've been told I'm very "real" -- what you see is what you get.

....just crazy, I've been dying to call you all day to make sure you were okay but I figured your probably being bombarded with calls right now, so I was just waiting for some time. There are a lot of rumors out there? Are you okay? The latest piece of news is your possible chapter 7 filing, and I've been raking my mind trying to see if you guys will be taken care of in that case. I know you all have personal contracts. Its amazing how a great company like Enron can come tumbling down to its knees. I can't even imagine the atmosphere over there, I was watching the screen as you guys pulled all of your numbers, I really couldn't speak for a second. This industry is never boring that's for sure. I've been getting calls from everyone, it looks like the key word for the day is exposure....

Dear member,

Per your request, please follow these 3 steps to reset your password for NYTimes.com.

If you have any questions, write to forgot@nytimes.com; do not reply to this message.

1. Make a note of your NYTimes.com ID:

brapp0

2. Click the link below to choose a new password:

http://www.nytimes.com/guests/forgot/forgot?key=87817610_15962987

If the link is not clickable, you can copy and paste the address into your Web browser's Address window.

3. Follow the instructions on the screen to choose a new password. After you have chosen a password you will automatically enter NYTimes.com.

NYTimes.com Customer Service
forgot@nytimes.com

If you did not request your ID and password for NYTimes.com, someone has mistakenly entered your e-mail address when requesting their password. Please ignore this message, or, if you wish, you may go to the address above to select a new password for your account. To protect your privacy, we will only send this information to the e-mail address on file for this account.

|-----+-----+-----|

Determining Option Premiums

Inputs to determining options premiums:

- ? Price Curve
- ? Strike Price
- ? Interest Rate
- ? Volatility
- ? Expiry or maturity

Relationship between these inputs and how it relates to option premium (e.g. Holding all other things constant, if volatility increases, what does this do to your option premium?)

Futures Market

Thoughts to include:

- Traded over an exchange
- Clearinghouse is always counterparty, but does not set the price
- Prices determined by open auction on trading floor
- Prices are transparent and real-time
- Comparison to spot market
- Bi-directional trading
- Expiry and settlement

Assignment: Due 10/12/01

To: Dutch.quigley@tcpolice.org
cc: Monica L.

Subject: BRM Weekly

Dutch -

As we've discussed before, you will be responsible for developing the Risk Identification and Commodities Fundamentals topics for the Knowledge System. Once we complete our development phase, you will also be responsible for reviewing the Options and Accounting & Reporting topics.

| NAME | TOPIC TO BUILD | TOPIC(S) TO REVIEW |
|---------------|-------------------|--|
| Dutch Quigley | Options, Forwards | Risk Management Inputs,
Risk Identification |

For this first week you will be developing in Microsoft Word (or even in an email) instead of the online content development tool. Below, I've included the high-level outline for each content area that you should follow when writing this content.

This Week's Assignment: This week's assignment will be to create two-three paragraphs of content for each of the following areas:

- 1) Determining Option Premiums
- 2) Forward Market

Due Date: Friday, October 12th, 2001

*NOTE: We are giving this assignment to you a few days early. In the future expect your assignments on a Friday to be due by EOD the following Friday.

Outlines to Help Guide You When Writing

Determining Option Premiums

Inputs to determining options premiums:

- ? Price Curve
- ? Strike Price
- ? Interest Rate
- ? Volatility
- ? Expiry or maturity

Relationship between these inputs and how it relates to option premium (e.g. Holding all other things constant, if volatility increases, what does this do to your option premium?)

Forward Market

- Traded on the OTC
- Known counterparty
- Prices are transparent
- Comparison to spot market
- Expiry and settlement

Finally and most importantly, please keep in mind that the completion of these assignments significantly impacts the the ability of our BRM project to stay on schedule and within budget. If you are unable to complete an assignment for a given week, please notify me ahead of time and provide an estimated time for completion of that assignment.

Thank you.

Southwest Airlines Vacations weekly e-mail update

A Message to our Customers:

The Employees of Southwest Airlines Vacations are on the job to provide safe and affordable vacation travel to our Customers.

From all of us at Southwest Airlines Vacations, we would LUV to help you plan your next vacation.

Important Travel Information

For important information needed prior to traveling, including new FAA carryon baggage limitations, please visit <http://www.swavacations.com/splash.htm>

This week's e-mail features:

- I. Rapid Rewards Double Credit
 - II. Las Vegas Vacation SALE
 - III. Friends Fly FREE on Ski Vacations
 - IV. UNIVERSAL ORLANDO On-Site Hotels Specials
-

I. RAPID REWARDS DOUBLE CREDIT

Southwest Airlines Vacations is now offering Rapid Rewards double credit when you purchase a complete Southwest Airlines Vacations package for travel by June 30, 2002.

For details, visit <http://swavacations.com/features/info/rapid.htm>

II. LAS VEGAS ON SALE

Enjoy savings on a complete Las Vegas air/hotel package.

Special, reduced vacation prices are available when you purchase by Oct. 31, 2001, for travel Nov. 1-Nov. 10, Nov. 26-Dec. 22, 2001, or Jan. 5-Jan. 11, 2002, and stay at one of these participating hotels:

- Circus Circus Hotel/Casino-Tower
- Excalibur Hotel/Casino
- Golden Nugget
- Imperial Palace
- MGM Grand-Emerald Tower
- New York-New York Hotel and Casino Las Vegas
- Stratosphere Tower, Hotel and Casino
- Treasure Island at The Mirage
- The Mirage
- Westward Ho Casino-Rear

Reduced prices are available for travel from all scheduled Southwest Airlines Vacations origin markets excluding Orange County, CA.

For details on this sale and to Price and Buy a Las Vegas vacation package from your origin city, visit

<http://www.swavacations.com/vegas.htm>

III. FRIENDS FLY FREE ON SKI VACATIONS

Friends Fly Free on ski packages to Utah, Lake Tahoe, New Mexico, and Durango, CO when you book by Dec. 20, 2001, for travel as follows:

Utah:

Valid for travel Dec. 1-Dec. 13, 2001 and Jan. 5-Jan. 31, 2002.

Lake Tahoe, New Mexico, and Durango:

Valid for travel Dec. 1-Dec. 13, 2001, Jan. 5-Feb. 14, and Feb. 19-Feb. 28, 2002.

You can create a complete ski vacation including your choice of roundtrip flights, hotel/condo accommodations, lift tickets, ground transportation, Rapid Rewards double credit, and 24-hour traveler assistance.

For details on this sale and to Price and Buy a Ski vacation package, visit

<http://www.swavacations.com/friendsfly.htm>

IV. UNIVERSAL ORLANDO On-Site Hotels

Enjoy reduced package prices when you stay at one of Universal Orlando's On-Site Hotels:

Hard Rock Hotel at Universal Orlando Resort or Portofino Bay Hotel, A Loews Hotel.

No matter which Universal Orlando On-Site Hotel you choose, you will enjoy these special privileges throughout Universal Orlando Resort:

- Destination-wide charging privileges with your room key card
- Destination-wide complimentary transportation
- UNIVERSAL EXPRESS NO LINE, NO WAIT access to your favorite rides and attractions at both Universal theme parks during normal operating hours, all day, every day during your stay

Universal Express lets you bypass the regular lines and go straight to a special Express Entrance at each designated ride and attraction. It's the very highest level of Express Pass Privileges: no reservation is necessary - on-site guests just show their room key.

Sample two-night vacation prices are listed below. Sample prices are per person, based on double occupancy for Sun-Wed departures from Nov. 25-Dec. 19, 2001 and include:

- Roundtrip air
- Two nights hotel accommodations and taxes
- 2-Day/2-Park Ticket which offers unlimited park-to-park access to Universal Studios and Islands of Adventure for two days
- Alamo economy rental car
- Rapid Rewards double credit
- 24-hour traveler assistance

| Origin City | Per Person Price
at Hard Rock Hotel | Per Person Price
at Portofino Bay |
|-------------|--|--------------------------------------|
| Baltimore | from \$379 | from \$419 |
| Providence | from \$399 | from \$439 |

To Price and Buy a UNIVERSAL ORLANDO vacation package
from your origin city, visit

<http://www.swavacations.com/pricebuy.htm>

The following applies to prices quoted above:

- Prices do not include a \$2.75 federal excise tax per takeoff and landing
- Prices do not include airport taxes of up to \$18 roundtrip
- Prices quoted are examples, per person, based on double occupancy
- Prices are valid for departures on dates listed only
- Prices are valid if booked by 10/6/01
- Packages must be booked no later than four business days prior to departure
- Rates may be higher for other days of the week
- Surcharges apply to weekends, holidays, special events, and convention periods
- Rates are subject to change until purchased
- Seats are limited and may not be available on some flights that operate during peak travel times and holiday periods

Please share this great vacation information with your friends.

Baldwin's traveling--meeting with DWR today. But he knows we want to meet and knows the days we're talking about--left a message with his secretary. I suspect that, if DWR is free on either Monday or Tuesday, we'll be meeting.

Followed up with Fielder this morning. He's at an off-site all day and is supposed to call me back COB today. He knows we want to meet with Craver and offered to set it up. If he hasn't got it scheduled when I talk to him, I'll go directly to Craver. I'll hopefully have things more set in stone by end of today or tomorrow by noon.

That work?

Best,
Jeff

To: All Enron Employees:

Please join us at an all-employee meeting at 10 a.m. Houston time, Tuesday, October 23, in the Hyatt Regency Houston's Imperial Ballroom. We will review third quarter financial and operating highlights and action steps we're taking based on the results of the Lay It On the Line survey. We welcome your questions. Please send them to Courtney Votaw by e-mail (Courtney.votaw@tcpolice.org), fax (713-853-6790), or interoffice mail (EB 4704B). We look forward to seeing you there.

Ken, Greg and Mark

Accessing the Meeting via Streaming Video/Audio

If you are a Houston-based employee and can't attend the meeting, or if you are located in London, Calgary, Toronto, Omaha, New York or Portland (ENA), you can access the live event at <http://home.enron.com/employeeemeeting>. Enron Europe employees will receive a follow-up message from their Public Relations team concerning online access to the meeting.

Video Teleconferencing

The meeting will be made available by video teleconference to employees in Sao Paulo, Buenos Aires, Dubai, Rio de Janeiro, Bothell, Wash. and Chicago, IL. If your location would like to participate by video teleconference, please contact Yvonne Francois at (713) 345-8725.

Audio Via Telephone

For those of you who cannot view the live event by video stream or video teleconferencing, you can access the meeting via telephone by dialing the following numbers:

* The host will ask you what call or event you will be connecting to, reply Enron.

United States: (888) 400-7918

International: +1 (952) 556-2844

If you encounter technical difficulties, please contact your IT help desk.

Everyone's remote access has been changed due to security reasons. Brandee is in the process of initiating a E-Request for each of you. Once you get approve d you should get the following email.

In addition, each of you who uses a laptop will need to connect the laptop to the network here at the office and log on as yourself. This will syncrize your profile on that laptop.

Please pass the information onto your staff.

Thanks,

Tammy

Lets get on the phone today with (1) Bridgeline, (2) Gulf South, and (3) Dow to define a process for getting this sale done. When are you available?

Regards,
Brian

Any word from Bridgeline regarding their (i) level of interest/ability to purchase the pad gas in Caverns #13 and #14 and/or (ii) willingness to pay the lease payment for Q4 directly to Dow? Please advise.

Stuart

Dear Colleagues,

We know you have many questions about your new benefits plan, payroll issues and other changes that will occur over the next few weeks. Human Resources and Communications are preparing a thorough Q&A, which we will send to you tomorrow and will regularly update as more information is available.

Meanwhile, please read the announcement below from Security about how you can obtain a new UBS Warburg access card that will allow you to enter our new office space after Friday.

I am confident that you share my enthusiasm about our new opportunity. We look forward to working along side each of you in the coming days.

David Oxley
Head, Human Resources

Access Cards

There will be a two-day transition for the new UBS Warburg access cards. Beginning Monday, February 11, access to the 5th and 6th floors of Enron Center South will require these new cards. UBS Warburg access cards can be picked up from 7 a.m. to 7 p.m. at the reception area on the 5th floor of Enron Center South on Thursday, February 7th ; Friday, February 8th ; and Monday, February 11. Enron Security will produce new access cards with existing photographs, then simultaneously issue the new and collect the old cards. Employees without UBS Warburg cards will be allowed into the Enron Center South building on Monday but will have to collect their new cards as soon as possible to gain access to the 5th and 6th floors.

Employees who fail to collect their new cards by 7 p.m. Monday will be required to contact Enron Security's general information number at 713-853-5360 to arrange to pick them up.

There will be security staff available at the pick up point on ECS 5 to help with any problems you might have.

It is suggested employees wear their access cards at all times while on the premise.

Accessible Areas - The new cards will allow UBS-W employees to enter:
5th & 6th floors and Plaza area of Enron Center South ,

The Sky Ring

Body Shop, Enron Center North Plaza and therefore access the Credit Union and Cafeteria from either building.

Restricted Areas - Employees must submit to Enron Security a Restricted Access Request form (available by calling 713 8535360) and signed by Bob McAuliffe (713 -853-7468) to enter:

Enron Center South, 8th and 9th floors

Enron Center North, 22nd and 34th floor

Ardmore Data Center.

Employees staying with the Enron estate while visa and other issues are completed - Employees in this group who are on assignment arrangements to UBS-W will be issued a regular access card - available in the same way as other new UBS-W employees.

Estate employees who are working with UBS-W on transition issues - If they will be based in UBS-W office space they should talk to their UBS-W counterpart for approval and then UBSW HR for the issue of a UBS-W contractor card (in addition to their regular Enron badge).

You are invited to attend the following presentation:

PSIM: A Power Simulation Tool

PSIM is a proprietary model developed by Enron Research Group.

- ? It takes Power, Gas, Weather and demand information into consideration and uses Monte-Carlo simulation to assess the expected deal value and risk distribution.
- ? It evaluates complex electricity related contracts such as Full Requirement and load following contract.
- ? It also provides a valuation tool for power assets and asset management deals.
- ? It works for both deal specific or portfolio issues.

In this presentation we will show how the model can be used to deal with various types of contracts, explain the model structure and point out further applications.

Date: October 30, 2001
Time: 4:00 pm
Location: EB5C2
Presenter: Alex Huang

Registration is required for a head count.
Please call Shirley Crenshaw at 3-5290 to register.

Pizza and soft drinks will be served.

Player Updates NFL Reports

<<http://ad.doubleclick.net/ad/N1549.sportsline.com/B44933.5;sz=1x1;ord=1?>>
Latest NFL Player News

Ricky Watters <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1151&>>, RB SEA - Free Agent Updated 11/13/01

According to the Seattle Times, Watters is expected to return from his shoulder injury in two weeks. However, he is not guaranteed to reclaim the starting running back job with Shaun Alexander performing so well. We recommend you hold onto both players until it becomes clear which one will get the starts over the second half of the season, although we're betting it will be Alexander.

Rod Smith <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1220&>>, WR DEN - Matty Updated 11/13/01
Smith predicted Monday that he will be able to return from a sprained right ankle in time for Sunday's game against Washington. If he can't go, Keith Poole would become Denver's top receiving option, with Chris Cole, Scottie Montgomery and Kevin Kasper also filling in. However, Poole is already expected to replace Eddie Kennison as the team's second wideout.

Eddie Kennison <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1296&>>, WR DEN - Free Agent Updated 11/13/01

Kennison returned to the Broncos Monday and informed them that he is "unretiring," according to the Denver Post. While this is a radical turnaround from his message of retirement over the weekend, he might not be welcomed back by the team as a result of his change of decision. It is unclear whether Kennison will be placed on the reserve/suspended list or reinstated to the roster, but either way it's highly unlikely he will be able to help any Fantasy teams the remainder of the season. Drop him.

Cameron Cleeland <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=12277&>>, TE NO - Free Agent Updated 11/13/01

According to published reports, Cleeland won't be available for Sunday's game against Indianapolis. His high ankle sprain still hasn't healed sufficiently, so look for Boo Williams and Lamont Hall to get the majority of the playing time in his absence.

Santana Moss <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=235234&>>, WR NYJ - Free Agent Updated 11/13/01

Moss is expected to make his season debut Sunday against Miami. He has been side

lined all season with a knee injury but is listed as probable for Sunday's game.

Wayne Chrebet <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1263&>>, WR NYJ - JWillie Updated 11/13/01

Chrebet is expected to play Sunday, despite suffering from a shoulder injury. Look for him to be a solid No. 2 Fantasy receiver.

Fred Taylor <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=12753&>>, RB JAC - Martin Updated 11/13/01

Taylor is expected to play Sunday against Pittsburgh. He has been sidelined for over a month because of a groin injury.

Damon Jones <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1736&>>, TE JAC - Free Agent Updated 11/13/01

Jones re-injured his shoulder in Sunday's game. He had an MRI done on the shoulder Monday. His status for this week's game is uncertain.

Mark Brunell <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1032&>>, QB JAC - JWillie Updated 11/13/01

Brunell is expected to play this week, despite suffering from a sore leg. However, he is not expected to practice. Nevertheless, look for Brunell to be a productive No. 1 QB this week.

Chad Johnson <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=235222&>>, WR CIN - Free Agent Updated 11/13/01

Johnson might play on a limited basis in Sunday's game against Tennessee. He will be re-evaluated on Tuesday, according to The Cincinnati Post. Johnson has been sidelined for a month because of a fractured collarbone.

Terry Glenn <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1254&>>, WR NE - Matty Updated 11/13/01

Glenn should be able to play Sunday if he practices with the team this week, according to The Boston Herald. He has not practiced in over three weeks because of a hamstring injury. The Patriots first two workouts are on Tuesday and Wednesday.

Brian Natkin <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=236970&>>, TE TEN - Free Agent Updated 11/13/01

Natkin started Monday's game. He was used to replace the injured Shad Meier and Erron Kinney. Natkin played the entire game but had only one catch for 18 yards.

Frank Wycheck <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1372&>>, TE TEN - Matty Updated 11/13/01

Wycheck left Monday's game briefly because of an ankle injury but returned. He will be evaluated on a daily basis. Wycheck had two catches for 18 yards Monday.

Jeff Garcia <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=146325&>>, QB SF - JWillie Updated 11/13/01

Garcia made it through another game using a brace to protect his sprained knee, and had no problems afterwards. Head Coach Steve Mariucci is optimistic that Garcia will be able to play without the brace soon.

Reggie Kelly <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=133334&>>, TE ATL - Free Agent Updated 11/13/01

Kelly suffered both knee and ankle injuries during Sunday's win over Dallas. He will have an MRI this week to determine the extent of the injury, and his status for this weekend's game against Green Bay is unclear at this time.

Elvis Grbac <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1035&>>, QB BAL - Free Agent Updated 11/13/01

Grbac started in Monday's game despite suffering from chest/rib injuries. He threw for 192 yards and a touchdown, but was also intercepted once. Nevertheless, Grbac appears to have overcome his injuries and should be a solid No. 1 QB this week.

Kurt Warner <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=12797&>>, QB STL - Hunter Updated 11/13/01

Warner admitted to STLtoday.com that the thumb injury he sustained in the season opener against Philadelphia is effecting his ability to throw the ball deep. The team has begun extensive treatment on the thumb, and coach Mike Martz doesn't feel as though his Pro Bowl QB will miss any playing time. "I don't anticipate this being a real problem unless he gets it banged and re-injured," Martz said. "He has played pretty well with it since Philadelphia. We should be fine."

Terry Allen <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1177&>>, RB BAL - Tori Updated 11/13/01

Allen played in Monday's game against Tennessee but suffered a fractured left hand in his first and only carry of the game, during the second quarter. His status for Sunday's game is uncertain. !

Kevin Dyson <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=12342&>>, WR TEN - Bass/Hull Updated 11/13/01

Dyson played in Monday's game despite suffering from a toe injury. It appears he has recovered from the injury. He had six catches for 68 yards and a touchdown. Dyson should be a productive No. 2 or No. 3 wideout if he remains healthy.

Panthers <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=5&>>, DT CAR - Free Agent Updated 11/13/01

Defensive end Sean Gilbert will likely miss a month of action after suffering a Grade II sprain in his left knee on Sunday. In other news, linebackers Dan Morgan (ankle), Dean Wells (calf) and Cory Minor (knee) will likely return to action this weekend against San Francisco.

Chris Weinke <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=235174&>>, QB CAR - Tori Updated 11/13/01

Weinke (shoulder), who missed Sunday's 48-14 loss to St. Louis, has been cleared to practice. His status for this weekend's game against San Francisco is still unclear, however, but coach George Seifert expects him to play.

Chris Chandler <<http://football222.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=2840&key=1004&>>, QB ATL - Free Agent Updated 11/13/01

According to Head Coach Dan Reeves, Chandler's final status for Sunday's game against Green Bay won't be determined until at least Wednesday. Chandler missed his last start due to a rib injury, but Reeves believes that Chandler will be available for the game.

Terrell Davis <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1097&>>, RB DEN - JWillie Updated 11/12/01

Davis has a torn lateral meniscus in his left knee and will be out 10 to 12 days, Mike Shanahan said. He will undergo surgery, and is not expected to play in the next two games. Mike Anderson will start in his place.

Bill Schroeder <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1593&>>, WR GB - Frank Updated 11/12/01

Schroeder may have re-aggravated his ankle injury during a TD celebration on Sunday. His current status is day to day.

Drew Bledsoe <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1041&>>, QB NE - Free Agent Updated 11/12/01

Bledsoe is expected to be cleared to return to practice this week, and he could be ready to play Sunday night against St. Louis. Patriots coach Bill Belichick said Monday he expects the team's doctors to give Bledsoe the OK this week. But that doesn't mean he will replace Tom Brady, who is 5-2 as a starter since Bledsoe's chest injury, as the starting quarterback.

Kurt Warner <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=12797&>>, QB STL - Hunter Updated 11/12/01

Warner says his thumb is affecting the way he throws the ball. X-rays revealed a sprained ligament, and he will be limited in practice this week.

Rob Johnson <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1033&>>, QB BUF - Giggles Updated 11/12/01

According to published reports, Johnson will miss at least four weeks with a broken clavicle. Alex Van Pelt will start while he is out.

Randy Moss <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=12576&>>, WR MIN - Russell Updated 11/12/01

Moss felt soreness in his ankle on Sunday, but he is fine and there is no apparent reason to expect him to miss any playing time.

Tyrone Wheatley <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1140&>>, RB OAK - Giggles Updated 11/12/01

Wheatley did not play at Seattle. His return date is still unclear.

Freddie Jones <<http://football222.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=2840&key=1843&>>, TE SD - Neal/McKay Updated 11/12/01

Jones (ankle) played on Sunday, but did not start. His current status is day to day.

MIMS-THURSTON, PATRICE L,

You have been selected to participate in the Mid Year 2001 Performance Management process. Your feedback plays an important role in the process, and your participation is critical to the success of Enron's Performance Management goals.

To complete a request for feedback, access PEP at <http://pep.enron.com> and select Complete Feedback from the Main Menu. You may begin providing feedback immediately and are requested to have all feedback forms completed by Friday, May 25, 2001.

If you have any questions regarding PEP or your responsibility in the process, please contact the PEP Help Desk at:

Houston: 1.713.853.4777, Option 4 or email: perfmgmt@tcpolice.org

London: 44.207.783.4040, Option 4 or email: pep.enquiries@tcpolice.org

Thank you for your participation in this important process.

The following is a CUMULATIVE list of employee feedback requests with a status of "OPEN." Once you have submitted or declined an employee's request for feedback, their name will no longer appear on this list. NOTE: YOU WILL RECEIVE THIS MESSAGE EACH TIME YOU ARE SELECTED AS A REVIEWER.

Employee Name:

DOAN, JAD

ESPIÑOZA, VERONICA

LOVE, PHILLIP

STRAIGHT, MARGIE

VANEK, DARREN

Keith i would love to meet you for a beer but i am in massachusetts at the moment. hopefully this head-hunter chick can set me up with some interviews in houston and we can meet up then. As for your world tour, it really depends on how much you want to see. You can take 3 months and rush through 20 countries and just see their main tourist sights, or you can take the same 3 months and see 4 countries really thoroughly and get a feel for a place's people, culture, way of life, economic system, food... all that jazz. I can definitely recommend some amazing places to you though. I've taken 14 months and still haven't seen nearly everything i wanted to. It's a big f-ing planet!

>hey there mr. pilot, government been around asking you questions about your recent interest in flying? hope everything is going well at Enron and with your bird. I just got off the phone with a head hunter type lady who is going to try to help me find a trading job in the gas/power industry and I left her you and Tori's names as references. Just wanted to give you the heads up so you can have enough time to prepare your "speech of praise". I'm sure they won't ask questions about my golf game so you won't have to say anything bad about me.

>
>Drop me a line sometime and let me know how things are going in Houston.
>talk to you soon

POWER BRIEFS

FRIDAY, MAY 25, 2001

NEWPOWER IN THE NEWS - =20

PULLING PLUG ON TXU IS A BRIGHT IDEA - [Fort Worth Star-Telegram, May 17.] =

NewPower, 43 percent owned by the Houston energy powerhouse Enron, is the = price leader [for householders] who keep the home lights fully ablaze. Reli= ant Energy, corporate kin to Houston Power and Light, is the price leader f= or frugal homeowners? New Power offers power users a choice of locking in po= wer rates at 8.3 cents for two years subject to a \$7.50 monthly service fee= , or accepting a guarantee that their power bills will always be less than = TXU's comparable bite for the same period. For the moment, the low-price gu= arantee plan sports the lowest rates? "We're trying to figure out what custo= mers want," says Gael Doar, a NewPower spokeswoman. "The whole thing about = energy restructuring is that you have a choice." To date, the PUC has recru= ited 17 percent of the 90,000 volunteers it hopes will become TXU exes this= summer. One result is sweeter deals. New Power will toss in free electri= city this December and next to folks who sign up by May 31. On Wednesday, = a New Power sales representative tossed in a \$25 gift certificate at Home D= epot if I'd sign up on the spot.

A FLICKERING PILOT - [Houston Chronicle, May 20.] NewPower Co., a partnersh= ip of Houston-based Enron Corp., America Online and IBM, is mailing various= offers to homes, including one for free Continental Airlines frequent-fli= r miles, while Green Mountain Energy Co., which sells only wind-produced po= wer in the state, has set up information booths at local events such as the= Texas Crawfish Festival? Separate slots were also reserved for commercial = and industrial customers to participate in the pilot. In many areas statewi= de, a lottery was held because more than enough nonresidential customers si=

gned up. "Businesses make these kinds of decisions all the time, whether it be coffee or copiers. They will switch if there is economic value," said Tim Vail, NewPower's vice president of energy technology solutions. "Consumers have a different view, much more of an emotional sale."

CLEVELAND MAYOR PROPOSES NATURAL GAS SAVINGS - [Cleveland Plain-Dealer, May 22.] Tens of thousands of Cleveland residents would save about \$100 on natural gas next winter under a cooperative-buying arrangement proposed yesterday by Mayor Michael R. White. As proposed, the discounted natural gas would come from the New Power Co. The city identified New Power as a gas supplier with operating licenses in 19 states and 630,000 customers. The proposal was praised by Councilman Michael O'Malley, chairman of council's Public Utilities Committee. O'Malley said he expected the the City Council to approve the deal with New Power. http://www.cleveland.com/cuyahoga/plaindealer/index.ssf?/xml/story.ssf/html_standard.xsl?/base/cuyahoga/9905238071687131.xml

NEWPOWER, AMPO TARGET OHIO - [Gas Daily, May 22.] A venture of The New Power Company and AMPO will co-brand a new marketing program targeting residential and small commercial customers who wish to pool their volumes for a better gas price in Ohio. See p. 5 on the following link: <http://home.enron.com/pubs/gasdaily/data/gasdaily.05.22.2001.pdf>

CUYAHOGA FALLS HOOKS CITY UP WITH GAS PLAN - [Akron Beacon Journal, May 22.] Fifty-six percent of Cuyahoga Falls natural gas customers who did not sign up for one of the many discount rate plans offered beginning last summer will have a chance to do so.

The city has reached an agreement with American Municipal Power-Ohio (AMP-Ohio), its electricity supplier, to allow residents to sign up for a reduced natural gas rate beginning June 25, Mayor Don Robart announced yesterday. To do so, AMP-Ohio is working with NewPower, a New York-based independent company that supplies natural gas to more than 630,000 residential and small commercial customers. <http://www.ohio.com/all/2001/May/22/newsdocs/002572.htm>

AMP-OHIO DEAL MAY SET A PATTERN FOR NEWPOWER ADVANCES - [Restructuring Today, May 23.] American Municipal Power - Ohio in Columbus, has 10 customers that serve 85 cities and towns - some as large as Columbus and Cleveland - and 10 industrials. A subsidiary of the joint action agency, AMPO Inc, has embarked on a two-year venture with The New Power Co to co-brand a gas aggregation program for residents and small businesses throughout the 85 jurisdictions to leverage group buying power of the consumers. NewPower's David Eichinger hopes to develop similar deals. He finds AMPO "a treat to work with" and we suggested that if the deal goes well, NewPower may open doors to the public power community for aggregation. AMPO sells less than \$4 million in power annually at retail but sells \$216 million at wholesale. The City of Cleveland in a related agreement will work with NewPower to offer a low, fixed-cost plan for the coming heating season. Given the natural gas price spikes of the past winter it looks like AMPO and NewPower may have an attractive package. Eichinger thinks that the reason markets are opening up is to provide the public with the best deal and the most innovative services. "Forward thinkers like AMPO are going to be great for us to work with," Eichinger observed. What about selling electricity with AMPO? "Absolutely," he replied. Working with AMPO helps NewPower build brand and a presence, he noted. Add to that an endorsement to sell all of the products and services including new technologies.

OTHER ENERGY NEWS - NewPower shares news items weekly to inform employees about coverage of the energy industry. Publication of a news clip is not an endorsement of its viewpoint or accuracy.

UTILITIES TINKERING WITH PRICING PLANS - [Atlanta Journal & Constitution, May 20.] Retail prices are regulated in most parts of the country. But when utilities pay more for wholesale power, they have to pass it on. How much prices rise depend partly on whether we learn, again, to conserve. http://www.accessatlanta.com/partners/ajc/epaper/editions/sunday/business_b370252301=5142660068.html=20

ADMINISTRATION REJECTS CARTER-ERA SACRIFICES, SUGGESTING COMMON SENSE - [Associated Press, May 20.] Bush's blueprint relies on more energy supplies and a basket of enticements for greater energy efficiency. In his speech introducing it, he called conservation "the result of millions of good choices made across our land on a daily basis," and asked for no hard choices in particular. Rozanne Weissman, speaking for the Alliance to Save Energy, was not surprised. "Americans do not want sacrifice and deprivation," she said. <http://www.chron.com/cs/CDA/story.hts/business/energy/915261>=20

'SMART' METERS MAY EASE BEATING METE OUT BY ENERGY PRICES - [Boston Globe, May 21.] Proponents of electricity deregulation insist that introducing market competition to the once-quintessential monopoly industry will save people money in the long run. But a big, still largely unsolved challenge of electric deregulation involves something fundamental to successful markets: accurate, timely prices for the product that consumers can respond to in the classic supply-demand dance. http://www.boston.com/dailyglobe2/141/business/_Smart_meters_may_ease_beating_mete_out_by_energy_prices+.shtml=20

PG&E TARGETS BUSINESS CUSTOMERS TO CONSUME LESS - [IndustryClick, May 21.] In conjunction with its customer education campaign called "The More You Know About Conserving Energy, the Less Energy You Need," Pacific Gas and Electric Co. has stepped up its efforts to update business customers on the energy crisis and provide tools to help them conserve energy-especially in the coming months when power shortages are likely. <http://www.telecomclick.com/magnewsarticle.asp?newsarticleid=3D201641&magazineid=3D11>=20

PARTNERSHIP TO EDUCATE CONSUMERS; SUPPLIERS OF POWER, GAS WILL BE SELECTED - [Richmond Times-Dispatch, May 23.] A partnership called the Virginia Energy Team will run the advertising and education programs needed to get consumers ready for competition among power and natural gas suppliers. Teaching consumers about deregulation and how to choose a power supplier is considered critical if the pricing of power is to be turned over to market forces without harming consumers. The SCC has planned a five-year, \$30 million education program. Efforts also will be made to reach people directly, such as through community groups. Small-scale grants will be available to groups to help them conduct consumer education. <http://www.timesdispatch.com/business/MGB5IY5Z0NC.html>=20

ONLY 11 PERCENT SAY THEY HAVE BEEN GREATLY INCONVENIENCED BY ENERGY WOES - [Associated Press, May 23.] Seventy-five percent of Californians say the state's energy woes have become a very serious problem, but so far only 11 percent say they have been greatly inconvenienced by power blackouts, according to a new poll. Thirty-two percent said they have been inconvenienced some or a little by blackouts. Fifty-seven percent said they experienced no inconvenience or had not been hit by a power outage. http://www.contracostatimes.com/news/california/stories_statebrk/powerpoll_20010522.htm=20

TXU TO DIVIDE DEREGULATED, REGULATED UNITS WITHIN FIRM - [Dallas Morning News, May 22.] TXU Corp., owner of the state's largest utility, plans to further separate its regulated power delivery business from its power generation and energy trading business, chief executive Erle Nye told analysts Monday. Deregulation will allow residential consumers to choose their electricity provider for the first time in generations. "Investor-owned" utilities such as Dallas-based TXU Corp.'s TXU Electric will also be able to compete for customers outside their service areas for the first time. Its power deli=

very business, which includes the poles and wires that transmit electricity=, will continue to be regulated. http://www.dallasnews.com/business/stories=/373364_TXU_22bus.ART.html=20

TEXAS TO EASE INTO NEW PILOT - Houston Chronicle, May 22.] The PUC has decided that electric customers enrolled in Texas' upcoming pilot market will be switched to new retail electric providers (REPs) gradually this summer in the interest of optimal operation of all necessary systems. <http://www.newsalert.com/bin/story?StoryId=3DCoWNKqaicse8TrevsruC&FQ=3D%22ERCOT%22&Nav=3Dna-search-&StoryTitle=3D%22ERCOT%22>

CONSUMER GROUPS SAY GPU CASE CRITICAL TO RATEPAYERS - [Pittsburgh Post-Gazette, May 22.] The Public Utility Commission is expected to consider a case that could affect the future of electricity deregulation in Pennsylvania. After being hit with significant losses, GPU Energy, an electric utility with customers in the Erie area and in pockets throughout Pennsylvania, has asked the PUC for permission to increase its rates beyond the caps it agreed to when electric deregulation began. Consumer groups fear that if the PUC allows GPU Energy to do this, it will prompt other utilities to seek a rollback of rate caps that have helped protect Pennsylvanians from the soaring electric bills that have Californians reeling.=20
<http://www.post-gazette.com/businessnews/20010522puc5.asp=20>

ASSEMBLY FORMS ENERGY PLAN - [Albany Times Union, May 22.] Assembly Democrats plan to unveil a comprehensive energy package today that will promote conservation efforts, provide rate relief and enhance consumer protections. The bills, to be outlined by Assembly Speaker Sheldon Silver and Energy Committee Chairman Paul Tonko, include a measure to set up a block of discounted power for consumers -- the first 200 kilowatts on a monthly bill, according to some sources. The average New York consumer uses 300 kilowatts. Also, a bill is planned that would protect consumers from requirements of energy service companies.
<http://www.timesunion.com/AspStories/story.asp?storyKey=3D58618&category=3DY>

NATIONAL ENERGY MARKETERS ASSOCIATION CALLS FOR TARGETED INCENTIVES FOR NEW SUPPLIES, CONSERVATION, INFRASTRUCTURE AND TECHNOLOGY - [NEM Press Release, May 22.] The National Energy Marketers Association (NEM), responding to the Administration's Energy Plan and the Democrat's Response is issuing an urgent call for bipartisan support for meaningful incentives for massive new investments in additional energy supplies, conservation, infrastructure and technology.=20
<http://biz.yahoo.com/bw/010522/2504.html=20>

SITHE RETURNS FIRE ON NSTAR - [Boston Herald, May 22.] Sithe Energies yesterday forcefully denied a claim by NSTAR that it overcharged customers \$70 million for electricity during times of peak demand and blamed NSTAR for causing the problems. NSTAR last week accused power generators Sithe and PG&E National Energy Group of overcharging for electricity last year when congested transmission lines made it tough to get cheaper outside power. It also asked regulators to cap prices. NSTAR, the successor to Boston Edison, Commonwealth Electric and other power companies, plans a rebate to customers if it wins back the \$70 million. <http://www.bostonherald.com/business/business/powr05222001.htm>

CONSUMER RIGHTS CITED IN PETITION WITH TEXAS PUC - [Houston Chronicle, May 23.] Residential consumers switching power companies under a pilot deregulation program aren't being properly informed of their rights, four consumer groups said Tuesday. Consumers Union, Texas Legal Services Center, Texas Ratepayers' Organization to Save Energy and the AARP Capital City Task Force=

for Deregulation of Electricity filed a petition Tuesday with the PUC. In it, they asked the PUC to require electric providers to fix their documents, to take any other action needed to clear up consumer confusion that may be occurring, and to develop a standard document format for providers to use. They also ask that the PUC's education campaign better inform consumers of their rights. <http://www.chron.com/cs/CDA/printstory.https/business/918674>

US LAWMAKERS PLEDGE TO COOPERATE ON ENERGY POLICY INITIATIVES - [Oil & Gas = Journal Online, May 24.] Partisanship is being left at the door when it comes to energy policy, key energy lawmakers and Bush administration officials pledged Thursday. At a Senate energy panel hearing Thursday, featuring Energy Sec. Spencer Abraham, there was already a clear acknowledgement that the new Senate makeup will require the two political parties to be more open to compromise if energy legislation is to move forward this summer. Abraham stressed, "We start from a wide base of agreement. We all recognize energy as a critical challenge. Both the chairman and ranking member of this committee have sponsored robust energy bills, and I am struck by how much common ground there is between these bills and our proposals." Bingaman also concurred that his bill "has many areas in common" with the others and added that "we need to identify" areas of mutual agreement. http://ogj.pennnet.com/articles/web_article_display.cfm?Section=3DOnlineArticles&ARTICLE_CATEGORY=3DTOPST&ARTICLE_ID=3D102093

MEDIA QUOTE OF THE WEEK: There's been a lot of talk from some of our critics that somehow the only focus is on additional supplies. . . . That's simply not true," declared Cheney. "Anybody who says that simply hasn't read the report." - Associated Press, May 23 <http://inq.philly.com/content/inquirer/2001/05/23/business/NUKE23.htm>

OF INTEREST * * * "OW, SUMMER'S COMING" - NEWPOWER DEBUTS NEW TEXAS PRINT ADS

Beginning June 1, TXU, HL&P and other Texas investor-owned utilities must offer customer choice for up to five percent of their electrical load. To date, NewPower has captured an average of roughly 40 percent of the available marketshare in the TXU/HL&P service territories. We can, however, continue to sign up customers for the pilot as long as slots are available. Last weekend, new NewPower advertisements began appearing the Dallas Morning News and Houston Chronicle. These ads (click twice on pdf attachments below) will continue to run on weekends and on a few key weekdays over the next four to six weeks. NewPower's lead product in Texas is the Guaranteed Savings Plan, offering consumers a guaranteed savings over the utility provider. Another offer, the Peace of Mind Plan, locks in a fixed rate for two years.

The Texas pilot will end when full regulation begins on January 1, 2002. Guaranteed Savings Ad (Dallas Morning News example)

- N01NP003#12 3125x15.75.pdf

Peace of Mind Ad (Houston Chronicle example)

Patrice

Thanks for the call the other day. Here is a copy of our contract. It is written with Aux Sable as an end-user in mind and therefore differs from the typical pipe-to-pipe contract.

<<ASLP Master Inlet Gas Purchase Agreement.doc>>

You can give me a call at 403-508-5852 if you have any questions.

If you have any questions on credit you can have your people contact me or Gerry O'Connor, our VP of Finance. Gerry has been talking to Jennifer Shipohs (I may have the spelling wrong) of your Industrial group, about financial instruments and credit.

Another name and number you should have is Bob Lee, who is our short term (30 days or less) trader. Bob's number is (403) 508-5851. I look after longer term arrangements (30 days or more) and back-up Bob when he is away.

Derek Ashing

PS for Aux Sable - Patrice is the Enron physical trader for Chicago. Bob, if you have any questions about what is being posted on Enron Online for Chicago, this is the person to talk to. Patrice's number is 713-853-5772

Megan,

I'm sorry for the delay... I've been working hurriedly on the Colorado invoicing first as I've been directed. My holdup now is the PSCo invoice from Theresa Staab (or Paul Lucci since Theresa's out 'til Wednesday) in ENRON's Denver office. As soon as I get that finished I can get Arizona done. Probably late today if I can get that PSCo invoice this morning.

-Craig

Craig:

I just wanted to check to see if you have had a chance to review the file I sent to you for October. I will not be in the office next week and I need to send the invoices out before I leave.

Also, I am still working on the CIG issue for prior months. I have two more months of invoices to review and am waiting to hear back from our Denver office on the volume reconciliation. Have you received any wire detail from your payable department? It would really help in finding the cash that belongs to the CIG invoices. Since all points were paid together and sporadically, it is very difficult to confirm that the CIG invoices were paid in full. I appreciate your help and patience in this matter.

Megan

John,

I need to get with you sometimes soon to make those changes to my contract (2001 bonus). I was in somewhat of a rush yesterday evening and neglected to make the changes you had advised me about. I have already forwarded the information back to Enron.

Thanks

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.
We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560

November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

.

The cost is \$100.00 per person.

No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

r 10. New management team with proven track record of business success. 11=
. HYPD'S business model is targeted on obtaining recurring revenue streams =
[IMAGE] INVESTMENT SUMMARY HYPD is a premier provider of comprehens=
ive integrated technology services (ITSP) and solutions for a client base=
in the rapidly growing ITSP marketplace for small-to-medium sized business=
es. HYPD is capable of handling a wide range of its clients' unique ITSP=
needs, with services ranging from conventional IT services to enterprise m=
igration and comprehensive IT HyperSource solutions (outsourcing all of a c=
lient's e-business needs). HYPD has positioned its future business strateg=
y around the development of uniquely designed Integrated Technology Centers=
(ITCs), which will offer client companies comprehensive bundled ITSP servi=
ces and solutions integrated with its state of the art facilities. The fir=
st Houston based ITC has recently begun operations, and is offering its cli=
ents a full and expansive range of outsourced IT and back-office services. =
HYPD'S first ITC is designed around an AT&T Dedicated Entrance Facility wit=
h on-net redundant fiber provisioning offering scalable bandwidth up to an =

OC-48 and beyond. This comprehensive Tier-1 hosting center enables HYPD to offer clients complete end-to-end IT services in a fully redundant and seamless environment. Through recently developed Hyperserve connection products, HYPD has been able to improve the functionality of its services by offering clients remote server appliances that connect to the ITC. Bolstered by strategic alliances and strong working relationships with major players in technology and telecommunications, including Microsoft, Intel, AT&T, and Great Plains, HYPD has demonstrated a superior ability to cater to the unique needs and limitations of small-to-medium sized businesses, effectively creating a business model that partners HYPD's success with that of its clients. Utilizing this innovative approach, HYPD should be able to grow its business in conjunction with client business growth, and position itself as the ITSP provider of choice for an emerging market of small and mid sized companies. Within the Houston region, and with this small and mid sized target market, HYPD is well positioned to grow its business substantially over the near to intermediate term and achieve niche market dominance within an appreciable time period. HYPD has recently aimed its full-service IT hosting business model towards the unique needs and growth strategies of small to medium-sized businesses, a rapidly growing market that is relatively underserved by major IT service providers such as Level 3, UUNet, and Sprint. HYPD has based this approach around the potentially lucrative, long-term revenue streams afforded through association with growing companies. For example, HYPD has recently initiated long-term Hypersource IT hosting arrangements with Eagle Wireless International and Premiere Media Group. Eagle Wireless is a leading supplier of broadband wired and wireless equipment and services for a variety of markets, including the Internet, digital set-top boxes, and wireless convergence products, and is anticipated to reach national market penetration within the next several years. As the client company grows its business over the next several years, the highly scalable nature of the Hyperdynamics IT hosting model will enable the Company to offer additional needed services readily while retaining high margins. By being able to refine and scale up client IT services in a quick time period, and for minimal additional expenses, HYPD has opened up access to significant and recurring long-term revenue streams from smaller and mid-sized business clients. Moreover, HYPD offers client companies an unprecedented degree of personalized attention and customization, when compared to major national ITSP providers. The infrastructure of HYPD's first ITC, designed to support end-to-end ITSP services can also be leveraged for easy and smart diversification. With its recent acquisition of Seacon Computer Systems, Inc. (SCS), HYPD has been able to enter the vertical seismic data management market. Thus, in addition to its horizontal industry approach for ITSP services, new and innovative vertically oriented business opportunities offering diversified revenue streams are coming to HYPD. For example, SCS is a seismic data management company that has developed a unique and cost saving method for transferring seismic and geologic data for oil and gas companies on 8mm and 9mm magnetic tapes to state of the art DVD (optical) storage. The current methods of storing this type of data on magnetic tapes are time consuming, prohibitively expensive, outdated (the technology is over 40 years old), and inefficient. SCS will enable clients in the expanding oil and gas industry to migrate the estimated 3 billion magnetic tapes that degrade in 8-20 years to DVD storage, with an expected lifespan of over 50 years, at a cheaper price point and with easy accessibility. The SCS acquisition, moreover, provides an ideal strategic fit to the core data center business of HYPD, and opens up significant and highly lucrative revenue streams. SCS will derive revenues from three principal sources: (1) conversion of existing tapes to superior DVD storage technologies; (2) accessing DVD data through HYPD's ITC facility; and (3) a vertical ASP approach to remote seismic interpretation processing of data through the Houston ITC using technical and hardware support from Intel. In addition to opening up an innovative and new business through the SCS acquisition, HYPD believes that it will be able to apply this type of vertical ASP approach towards other target industries, such as insurance services, either through additional acq=

quisitions or joint ventures. HYPD's projected revenue and business growth will be largely driven by several principal catalysts, including: (1) continuing to implement its full service IT hosting solution, Hypersource, through the Houston-based, state-of-the-art Integrated Technology Center and future planned ITC's in regional markets; (2) orienting its ITSP solutions and services towards the unique needs of expanding small-and-medium sized businesses; (3) entering into long-term, recurring revenue contracts by growing with its clients, and providing additional services at higher margins as these client businesses expand; (4) opening up new and lucrative revenue streams through its subsidiary SCS, and integrating this business opportunity through internal synergies with its core IT hosting and services business; and (5) positioning itself within a competitively underserved marketplace for ITSP services and products for small and mid-sized business clients.

VALUATION Consolidation within the ITSP industry has been a consistent theme within the past several years. Major ITSP hosting players have been acquired in a series of recognizable transactions. Notable among these has been the acquisition of Verio by NTT, and the acquisition of Digex by WorldCom. Within the remaining players in the IT hosting industry, remaining players have been devastated by the decline in valuations accorded, based on consistently increasing earnings deficits and increased cost of services provided. In addition, these players have suffered due to aggressive acquisition strategies undertaken during the previous two years that have not proven out as significant growth catalysts and increased debt structures. By contrast, HYPD has pursued a conservative growth strategy with limited acquisitions carefully calculated to directly and immediately benefit aggregate revenues and earnings. Relative to comparative companies within the ITSP industry, HYPD could realize superior growth in business and earnings over the near-to-intermediate term period. A grouping of comparable companies within this sector currently trades at an average price to sales multiple of 2.70 X. On a forward looking basis, using FY 2003 revenue and earnings estimates for the Company (fiscal year 2003 starts July 1, 2002), this represents roughly a 8-fold premium to current trading levels. Thus, when applying the comparative grouping's average price to earnings and price to revenue multiples to HYPD we can arrive at a relative valuation of \$4.30 per share over the next 12 months.

SUMMARY Aggressive investors looking for above-average return potential on a portion of their investment capital should give HYPD a serious look. Management of the Company, headed by CEO Kent Watts, are highly talented and educated in their technical areas.

We believe HYPD has assembled an astute, goal oriented, sophisticated team committed to HYPD becoming very, very successful. Investors at current levels may be rewarded in the short term, and beyond, as HYPD's business plan is executed. HYPD may very well be one of the stock market's best secrets! **[IMAGE]** Disclaimer: **[IMAGE]** Marketwizardalerts (MWA) publishes reports providing information on selected companies that MWA believes has investment potential. A NOTE ABOUT PRICES

Prices are subject to availability and subject to change without notice. Prices shown may not include applicable taxes, fees and fuel surcharges. The airlines' lowest published fares are the lowest roundtrip fares published by the airlines for your routes. These fares may not be available on the days you wish to travel. Our Fare Calendar shows you when these fares are available. The fares shown as found by Expedia.com customers are listed to help you determine the ideal price for your route.

<http://www.delta.com/images/spacer.gif>
<http://www.delta.com/images/emailprograms/spacer.gif> LendingTree Mill
ion Mile Sweepstakes*
Register for your chance to win 1,000,000 miles at LendingTree.com/Delta <http://
/e-mailprograms.delta.com/AC/Clickthru?q=3e-F5gnIizQmo63u5o47KTUG3suc43X>.*

Also, SkyMiles members can earn miles for a home purchase or sale, mortgage, home equity, and auto finance through LendingTree.

Home Buying and Selling

Let LendingTree help you find the perfect local real estate agent and earn 3,000 miles for every \$10,000 of your home's purchase or sale price. Buy and sell through the program and earn miles for both transactions!

As discussed, can you provide a NYMEX + basis quote for the following volumes?
Thanks.

National Fuel Gas Distribution:

Jun01	6737
Jul01	4561
Aug01	5062
Sep01	9617
Oct01	67218
Nov01	104874
Dec01	148372
Jan02	169742

Feb02 150358
Mar02 132839

Corning, RG&E & NYSEG delivered on CNG:

Oct01 54717
Nov01 94692
Dec01 144993
Jan02 149949
Feb02 122975
Mar02 119369
Apr02 78740
May02 30347
Jun02 9898
Jul02 6345
Aug02 6200
Sep02 15473

All volumes are dth/month, primary firm. I am looking to buy.

Periodically, I need some help in data gathering for analysis. Is it possible for someone at Enron to occasionally provide the gas market data that I need?

I would like to look at the following data for 1999 and 2000 prior to our November 13 meeting.

- * Daily Henry Hub Prices
- * Daily Ventura Prices
- * Monthly Index Henry Hub (Inside FERC Gas Market Report)
- * Monthly Index Ventura (Inside FERC Gas Market Report)

Please give me a call.

There is no inventory on S02 credits. We did not record a cost of sales entry.

Importance: High

Mary,

If so what else makes up the \$151,404,038.50?

Difference is September liquidations

Eloise,

Will you provide Mary with the entry recording the cost of sales.

-----Original Message-----

From: Fischer, Mary

To: White, Nicole
Cc: Caminos, Facundo; Herrold, Jeff; Swafford, John; Williams, Eloise
Subject: Sale of S02 credits

Nicole,

After thinking about our conversation this morning I don't think that we are on the same page. I am looking for a sale of S02 credits that were sold by 33R but were held in inventory on 33Q.

Eloise Williams sent an e-mail to Jeff Herrold saying that an entry was made to the following accounts on 33Q:

Debit to 1999995	Cash	\$138,475,829.50
Credit to 4500000	Other Commodity - Third Party	\$138,475,829.50

My question is was the sale reclassified to 30R by the following entry:			
33Q	Debit to 450160000	Financial Settlements - Intercompany	\$151,404,038.50
	Credit to 20023000	Accts Rec/Payable Non Trade - Interco	\$151,404,038.50
33R	Debit to 20023000	Accts Rec/Payable Non Trade - Interco	\$151,404,038.50
	Credit to 450160000	Financial Settlements - Intercompany	\$151,404,038.50

If so what else makes up the \$151,404,038.50?

My next question is what is the cost of the inventory that went to cost of sales for the sale of \$138,475,829.50 S02 credits? What was the entry that recorded

the amount into cost of sales?

If you could get back to me as soon as possible, I would greatly appreciate it.

Mary

HENDRICKSON, SCOTT E,

You have been selected to participate in the Mid Year 2001 Performance Management process. Your feedback plays an important role in the process, and your participation is critical to the success of Enron's Performance Management goals.

To complete a request for feedback, access PEP at <http://pep.enron.com> and select Complete Feedback from the Main Menu. You may begin providing feedback immediately and are requested to have all feedback forms completed by Friday, May 25, 2001.

If you have any questions regarding PEP or your responsibility in the process, please contact the PEP Help Desk at:

Houston: 1.713.853.4777, Option 4 or email: perfmgmt@tcpolice.org

London: 44.207.783.4040, Option 4 or email: pep.enquiries@tcpolice.org

Thank you for your participation in this important process.

The following is a CUMULATIVE list of employee feedback requests with a status of "OPEN." Once you have submitted or declined an employee's request for feedback, their name will no longer appear on this list. NOTE: YOU WILL RECEIVE THIS MESSAGE EACH TIME YOU ARE SELECTED AS A REVIEWER.

I will be out of the office for the rest of the week, and will return on Monday.

Irena will be here should you need anything. Have a great weekend everyone!

Alex Villarreal

Recently, I asked you to "Lay It On the Line" and tell me what you believe are the most critical issues that we need to address. Many of you responded, and I want to share the survey results with you. Additionally, I want to share with you the things we are currently doing or plan to do to move Enron forward.

First, let's take a look at the survey results.

In just three days, more than 4,000 employees completed the survey. I sincerely appreciate your participation.

I. We asked you to identify the top five issues facing Enron today. The responses were:

1. Stock price
2. The PRC
3. Employee/internal morale
4. External reputation and image
5. "Walking the talk" of integrity and respect

II. We asked you general questions about working at Enron, comparing 2001 to 2000.

% of employees responding strongly agree/agree:	
I am committed to staying at Enron.	64.1%
Enron is a company I would invest my money in.	60.1%

I am treated with respect. 60.0%
 I would recommend Enron as a place to work for friends and family. 59.1%
 I have talents and skills that Enron is not fully utilizing. 54.7%
 Enron truly encourages people to take risks. 47.5%
 My immediate supervisor has a clear view of where Enron is going and how to get there. 46.6%
 Executive management has a clear view of where Enron is going and how to get there. 41.6%

 III. We asked you to what extent you would associate the following attributes to Enron, comparing 2001 to 2000.

	More	Same	Less	N/A			
Concerned for communities				34.5%	44.9%	10.3%	10.3%
Innovative	30.8%		35.7%	24.6%	8.9%		
Entrepreneurial	28.5%		37.8%	23.7%	10.0%		
Ethical	17.0%	45.1%	28.1%	9.8%			
Trustworthy	14.9%		39.0%	36.9%	9.2%		
Arrogant	39.1%		32.4%	13.3%	15.2%		
Self-serving	41.9%		38.6%	7.5%	12.0%		

 IV. Finally, we asked you to identify the top three things you like about working at Enron.

1. People (the high quality of people at Enron was the most widely-cited aspect):
 - talented
 - creative
 - learn from one another
2. Culture and reputation:
 - innovative spirit
 - willingness to be aggressive and take risks
 - ability to embrace change
 - involvement in community
3. Work environment:
 - pay and benefits
 - true meritocracy
 - unlimited opportunities

 The results of our survey confirmed for the Management Committee and me the great things you feel about Enron and also what you see as the issues we must address to move Enron forward. The following are some of the things we're doing now or going to do in the next few days and weeks to address the top five issues you identified. Keep in mind this is only the beginning of an ongoing effort to address your concerns and engage your feedback.

Now, here's what we're going to do based on your feedback.

STOCK PRICE

We are all concerned about our stock price, which has declined significantly this year. The primary reasons for the sharp decline from our highs earlier this year

ear include:

- A decline in the overall market and economy;
- Certain Enron-specific issues, such as California, India and recent management turnover;
- A "meltdown" in the broadband sector, which may have been as much as \$30-\$40 of our stock price at the high;
- Lower energy commodity prices and volatility relative to last winter's high; and
- Concerns over the pace of energy deregulation.

These concerns mask the strong underlying recurring earnings growth in our transportation and distribution, wholesale and retail businesses. Very few companies have demonstrated the earnings growth, and future earnings growth, as has Enron. We fundamentally believe that if we focus on continued earnings growth and reestablishing the confidence of our financial investors, our stock price will reflect the value these businesses deserve.

--- Over the past month, we have met with all of our major institutional shareholders and all of our analysts, reviewing the strong prospects in each of our businesses.

--- We have also committed to provide more segmented information about our business units and how we operate so that analysts have a better understanding of our businesses and how we make money.

We also want to make sure that employees know what we are doing going forward:

--- Mark Koenig, executive vice president of Investor Relations, will host Brown Bag sessions with groups of employees to discuss stock price issues and answer questions. He will also continue to host eSpeak sessions to answer employee questions.

--- Greg Whalley, Mark Frevert and I will also hold discussions with various groups of employees, which will be taped and made available to employees worldwide. Watch for these events.

THE PRC

The relative discussion of talent is absolutely critical to maintain our business and our meritocracy. Understanding which employees have demonstrated the greatest contribution and behaviors, which individuals should be given greater responsibility and leadership, and identifying our top and bottom talent are essential to achieve our business objectives. Nevertheless, we recognize that certain aspects of the PRC may have caused some of you concern, and we believe we can improve, refine, streamline and better clarify the process objectives for everyone.

Therefore, we will make the following changes to the PRC process prior to year-end:

--- Effective immediately, relative performance discussions will occur annually at year-end. However, business units will have the flexibility to determine if they need to have those discussions more frequently.

--- The current preferred distribution will no longer be required across Enron. Business units will be asked to identify only their top 10% and bottom 10% performers for review by Enron's Office of the Chairman annually at year-end.

--- We will continue to use the PEP 360 degree feedback system as input into performance feedback once a year for all employees. We will also reinforce to all supervisory employees the absolute necessity of continual communication and feedback to their direct reports throughout the year.

--- Finally, we have formed an employee task force that will give us feedback on future changes.

In the November issue of Enron Business, we will feature the first in a series of articles discussing our performance evaluation process. In addition, there will be other communication and training that will occur prior to year-end.

EMPLOYEE MORALE

We believe the stock price, our external reputation and the performance review process have all affected morale. Additionally, some employees have indicated they do not feel that they have a place to go to voice their ideas and concerns. Effective immediately, we will provide an additional resource for employees who do not currently feel comfortable going to either their supervisor or their Human Resources (HR) rep.

--- We are establishing a new business function we are calling Employee Relations (ER) that will report directly to the Office of the Chairman. Cindy Olson will head this function. More details of how this group and HR will operate will be communicated in the next few days.

Over the long term, we want our managers to address employee issues and concerns and therefore are providing the following leadership training for those with supervisory roles.

--- We will encourage vice presidents and above, as well as other current and emerging leaders, to complete Executive Impact & Influence training. These sessions are designed to improve leadership skills such as coaching and effective communication that have a direct impact on performance and managing people.

--- Additionally, we will encourage every employee with supervisory responsibilities to complete online communications training via Communicate!, which will be rolled out immediately. Communicate! is an interactive training course that uses Enron scenarios and a combination of video, voice mails, e-mails and meetings notes, to analyze user performance based on a participant's responses and actions.

EXTERNAL REPUTATION

We all recognize that our external reputation has suffered this year. The single most important factor that influences our reputation is our actions - how we act and how we communicate those actions as a company and as individual employees. We recognize that as Enron's ambassador's in the marketplace, the more you know about our strategy, performance and challenges, the more you can help disseminate accurate information about our company. To ensure you are better informed:

--- We will do a better job providing you with timely information about issues affecting Enron. In addition to our existing communication efforts, like e-mail messages and internal publications eBiz and Enron Business, we will post a Q&A on current issues on the Enron intranet at home.enron.com <<http://home.enron.com>>. This will give us a consistent message across the organization and will equip you with information when talking to your customers.

--- As we said before, Greg, Mark and I, as well as members of our Management Committee, will meet with groups of employees across Enron to hear your thoughts and share with you our business direction and challenges. Look for these to start in mid-October.

INTEGRITY & RESPECT

I believe, as I said previously, we need to reinforce our core values, particularly integrity and respect. From what you have told us in this survey, you agree:

--- Enron's values will have more importance in each employee's evaluation and feedback. We ask that all employees, regardless of level, hold themselves accountable for the way they interact with people on a daily basis. We are all responsible for how we treat our coworkers and customers.

--- We will also conduct employee focus groups on a frequent basis to gather additional, specific feedback on employee issues like ethics, integrity and individual concerns. If you would like to participate in these focus groups, please send an e-mail to Cindy Olson.

--- Periodically, I will host a special feature column in Enron Business to keep you informed of the action steps we are taking and their results.

Finally, I give you my commitment that we will do a better job giving you more information regarding Enron's strategy and challenges, and listening to your conc

erns and ideas. But we would ask for your commitment, too. We need your dedication to Enron and its values, as it is only through your commitment that we will achieve long-term success. We will conduct another employee survey early next year. Please continue to send me your feedback and let's continue to work together and keep Enron one of the best places to work in the world.

Would you mind checking into something for me? One of our lawyers was called by someone from Industrial Markets who was laid off. He indicated that he had an employment contract that has a six month non-compete for involuntary termination. He said that he called HR to get a waiver of the non-compete so that he could pursue new employment and was told that no waiver would be granted. Is that our policy or are these issues being addressed on a case by case basis? I find it hard to believe that we would even think about enforcing a non-compete for someone we've laid off, so why not grant the waiver? If this is not the policy, we need to get this straightened out.

Have we forwarded this on to anyone yet to make sure that corp. is requiring us to take this action?

-----Original Message-----

Cc: Dietrich, Janet; Smith, Mike D.
Subject: EES contracts

I wanted to bring you up to speed about some meetings we have been having regarding contract issues in the bankruptcy proceedings.

In connection with our asset sales, EES has been concerned about the deterioration in the value of the EES book as we receive notices from customers that they are terminating their contracts with us. In general, our customers would not have the right to terminate EES contracts unless the contracts are considered forward contracts. If the contracts are non forward executory contracts, the customer would have no right to terminate, and only EES as the debtor could effectively terminate by rejecting the contract.

In any event, EES had been planning to write to the utilities where we had customer books that we are trying to sell, and state, in short, that the utility did not have the right to terminate our contracts with the utility because they were executory contracts, and that the utility did not have the right to process customer requests to switch to other retail energy providers because the customers did not have the right to terminate our contracts, since they were executory contracts.

As we have discussed, it is an open issue as to whether our contracts are forward or non-forward contracts. The arguments that these contracts are not forward contracts would be based on the theory that our customer is not a forward contract merchant, that retail contracts are much more than commodity contracts and include numerous other services, and that the contract can only be terminated by a forward contract merchant. If we receive some offers to buy the retail books, claiming that our contracts are non-forward contracts would maximize the value of EES because the customers would be prevented from terminating their contracts and would not be switched to new retail energy providers. However, on a long term basis, there may be advantages to any retail business on a go forward basis to consider these contracts forward contracts. This would allow energy providers in the future to terminate upon customer bankruptcies.

At the trading issues meeting Janet, Mike and I attended yesterday, it was the strong view of the group that the best position for Enron in the bankruptcy process was that retail contracts were forward contracts, and that this position should be taken on an Enron wide basis. I am assuming that we will want someone in a commercial role to confirm that this is the position EES is being asked to take for the benefit of the overall estate, and that we should not, in any letters we are writing to the utilities, describe our contracts as executory and subject to the automatic stay of the bankruptcy court. I think we would go forward with other parts of the letter to the utilities that is not inconsistent with the overall positions.

Please let me know if you need more info. Thanks.

Dear ClickAtHome Participant,

ClickAtHome is interested in making sure you have the latest security tools available to you. As part of the ClickAtHome program, you may download and update Norton Anti-Virus and BlackICE Defender software from the ClickAtHome Portal.

Norton AntiVirus software repairs computer virus infections automatically. It scans and cleans your hard drive, diskettes and both incoming and outgoing email.

BlackICE Defender is an industrial-strength anti-hacker system that protects your PC by scanning your DSL, cable modem, or dial-up Internet connection looking for hacker activity. When it detects an attempted intrusion, it automatically blocks traffic from that source, keeping intruders from accessing your system. By installing and updating both Norton AntiVirus and BlackICE Defender, your ClickAtHome PC will have the latest security offered by these two products. Instructions for accessing the Portal and downloading the software are provided below.

If you have any questions or wish to provide feedback, please email clickathome@tcpolice.org. Thank you for your participation in ClickAtHome.
The ClickAtHome Team!

To download the software:

- 1) Visit the ClickAtHome Portal at www.clickathome.net from your ClickAtHome PC
- 2) Logon to the Portal with your personally created Portal User ID and Password, or create a new account if you have not created a user ID and password by selecting "Create a NEW Account" at the top left corner. The Portal User IDs and Passwords are created by you. The Enron Help Desk is not able to assist with Portal support, but if you need any assistance, please send an email to "clickathome@tcpolice.org".
- 3) Once you have logged on, select "Tools" from the top menu bar.
- 4) Under the "Secure Download" heading, click on "BlackICE" or "Norton" and log on to the download page using your SAP ID and Date of Birth.
- 5) Follow the directions provided on screen.

The Resolution Center will be decommissioning one of its 888 numbers (888-877-7757) as of January 7, 2002.

You can continue to contact the Resolution Center, Toll Free, by using the following steps:

To contact the ENW IT Resolution Center:

? Call 1-800-973-6766 (1-800-97-ENRON)

? Select 1 to transfer to an extension within the Enron Building

? Select 31411 and you will be transferred to the helpdesk.

The following options are also available through the toll-free number:

0: Connect to voice directory

1: Transfer to an extension in the Enron building

2: Access voicemail in the Enron building

3: Transfer to 3 Allen Center

4: Transfer to Omaha

5: Transfer modem or fax with 646 prefix

6: Speak to an Enron operator

7: Transfer to a fax machine in the message center

8: Transfer to Aviation

9: Leave a confidential message for Enron Chairman

Please contact the Resolution Center at 3-1411 for assistance

ETS customers should continue to contact the ETS Solution Center-Houston at 713-345-4745 or 888-465-4745, and the ETS Solution Center-Omaha at 402-398-7454.

Sent: Monday, October 29, 2001 8:29 AM

To: Goodell, Scott; Germany, Chris

Subject: PAL K's

Scott and Chris--

I show you still have the following imbalances on some of your PALs.

K#36621 Enron Park put long).	Balance: 1,783 Dth long (Activity on 10/17)
K#37001 Enron Loan	Balance: 2 Dth Long (No Activity)
K#37875 Enron Park	Balance: 1 Dth Long (No Activity)
K#37876 Enron Loan	Balance: -1780 Short (No Activity)

The numbers should equal out, except that you will be 4 long on one contract and 4 short on another when added up.

Let me know how you want to resolve.

Corey

Jeff,

Looks like you are going to need to have a conversation with Sheriff regarding L
NG terminal development in Europe. Lets discuss.

Eric

-----Original Message-----

From: Enron Europe General Announcement/ECT@ECT On Behalf Of Enron Europe Office of the Chairman
Sent: Tuesday, October 16, 2001 9:42 AM
To: ECT Europe@ENRON
Subject: Organization Announcement

We are pleased to announce the following changes to our Continental European Commercial team. Three primary groups will be headed by Eric Shaw, Paul Mead and Gregor Baumerich all of whom will report to the Enron Europe Office of the Chairman.

Eric Shaw's team called "Continental Origination" will include:

1. Continental Gas trading and origination including the Frankfurt employees that work on gas. For this segment, Eric's reporting line will be to Richard Lewis.
2. All gas fired generation development on the continent or any other non-renewable energy asset (i.e LNG).
3. Origination in Central and Eastern Europe.
4. A small team to work on large structured transactions Europe-wide.
5. Principal management of offices in Central and Eastern Europe.

Paul Mead's team called "Regional Power" will include:

1. Power trading and origination in Netherlands, Belgium, Spain and Italy.
2. Power trading in Poland.
3. Renewables trading everywhere outside of the UK.
4. Principal management of the offices in the Netherlands, Italy and Spain.

Gregor Baumerich's team called "Continental Power" will include:

1. Power trading and origination in Germany, Switzerland, Austria, France and Slovenia.
2. Cross-border sales into Italy (in cooperation with Paul's team)
3. Power trading in Central and Eastern Europe.
4. Principal management of the offices in Germany and Switzerland.

Andreas Radmacher remains the country manager for Germany and will report jointly to Eric and Gregor.

Eric, Paul and Gregor will be distributing details of their organizations in the near future so that we all fully understand responsibilities in their areas.

John and Michael

Please ring Draper at AEP

Current position:

We have paid them all of the margin they have contractual rights for - \$33.5mm gone out today which is margin under our financial gas contract. However, they want full collateral on all of their power position (this is being driven by Bill Reid on their power floor -ex Enron employee), the amount is another \$220mm (they have no collateral rights to this).

Essentially, the credit guy (Frank Hilton) is hurting us in the market and anything you can do to help is appreciated. I believe some of this is vindictive behaviour from an ex-employee and senior management may not know what he is up to.

Louise

Dear PETER,

Travelocity's Fare Watcher, your ultimate tool for keeping on top of rapidly changing air fares, found fare changes in 2 of the markets you are watching. When you review the airfares below, remember that fares change rapidly! Low fares sell out quickly, and the sooner you check, the more likely you are to find available seats.

Have your travel needs changed? Are you looking to go someplace new? Remember to update your Fare Watcher subscription so that you're always notified when fares change to your favorite destinations.

To find one of the fares below, point your web browser to your Personal Fare Watcher Page on Travelocity by clicking on the following URL link. You can also copy and paste the URL into your browser.

<http://dps1.travelocity.com:80/fwemindiv.ctl?fw=018N0G2|TRAVELLOCITY>

IMPORTANT FARE INFORMATION:

All fares are quoted in US Dollars. Fares shown are for one adult round-trip between your selected cities and are subject to additional charges, including, but not limited to, Passenger Facility Charges (ranging from \$2-\$18), Federal Segment Fees of \$2.75 per segment (defined as a takeoff and a landing), and taxes/fees associated with international itineraries of up to USD \$113 or local currency equivalent. Fuel surcharges, if applicable are included in the fees listed.

Total fare per passenger, including all charges, will always be displayed to you prior to final ticket purchase. Please note that fares are subject to restrictions, may not be available on all flights, and may change without notice. For detailed descriptions of the fare rules, click on the corresponding rules link.

Everyone,

We are in the process of creating new contracts with UBS for all Market Data real-time applications, subscriptions and publications. Attached is a comprehensive list of all contracts that will be renegotiated under the UBS name for use by the Gas and Power trading entities.

In order to leverage UBS' significant discounts and avoid duplicate efforts, Danielle Marcinkowski with Market Data will be the initial point of contact when inquiring about the addition or status of applications or publications. I bring this to your attention because we understand that several groups have initiated discussions with the various vendors over the past few days.

If you have any questions please feel free to contact me at 713-853-9358 or Danielle at 713-853-7926. If you think something is missing from the list, please bring it to our attention immediately. Please pass this word around within your group as appropriate.

Regards,
Chris Behney

I am not sure if they have confirmed either deal. However, deal #1034254 was never pathed by us, whereas 1027152 was. Therefore, nothing billed out under 1034254.

Bonnie - I am including you on this note in case you can add anything about the pathing of the two deals mentioned in this note. Neither CMS organization shows anything on Trunkline that matches this. We spoke briefly about this last week.

Phillip - I am including you in case you can add any clarity or determine who we did this deal(s) with.

Thank you,
Scott

Tom,

In contacting our scheduler and subsequently a CMS scheduler, neither CMS Field

Services nor CMS Marketing, Services, and Trading are able to identify the deal. Currently, I am preparing to fax a copy of our confirmation on the deal to CMS Field Services. Again, it is not an executed copy, but I am assuming they may not have sent it back. Furthermore, the CMS Field Services scheduler has told me that they don't even schedule any Trunkline deals.

Considering all of this, I am assuming the worst - that unless we can provide a trader name etc. they will short pay on this deal. So, do you know who represented us with CMS on this deal any one that might know who their trader is or how this deal was booked? We are getting ready to settle for Sep prod so any help a sap would be appreciated.

Scott

They do not recognize that deal at all.

The most recent name and number is a Conoco trader. I have a confirmation on this deal with CMS. However, it is not an executed copy (i.e. sent back or confirmed by CMS). Is there some one who represented us with CMS on this that might know who their trader is or how this deal was booked? I will attempt to contact the scheduler in the mean time but any help would be good.

thanks.

Today we announced another positive development in our efforts to regain shareholder and market confidence, strengthen our balance sheet and help maintain our credit rating.

We have executed a commitment letter with two of our longstanding banking partners, JPMorgan (the investment banking arm of JPMorgan Chase & Co.) and Salomon Smith Barney (the investment banking arm of Citigroup Inc.), that will provide us with additional secured credit lines worth \$1 billion. Our Northern Natural Gas Company and Transwestern Pipeline Company will support these assets. The proceeds will be used to supplement short-term liquidity and to refinance maturing obligations.

The pipelines are not being sold. Enron is only using these assets for this new credit line. Secured financing like this provides an expeditious way to increase liquidity and restore confidence. We also have the capacity to increase this facility by an additional \$200 million if we bring in additional banks to participate.

This money is in addition to the \$3 billion in our credit lines we accessed last week to pay off short-term commercial debt and keep more than \$1 billion in cash.

I know it is discouraging to read the negative media coverage about our company. On a positive note, there was an editorial in last Sunday's Houston Chronicle that I want you to read: <<http://www.chron.com/cs/CDA/story.htm/editorial/outlook/1107504>>. This is an extremely difficult time for everyone and I appreciate everything you do for Enron.

Don't forget to read our voice mail and e-mail transcripts covering these developments on the Enron Updates intranet site at (<<http://home.enron.com/updates/>>).

Thank you.

NGI's Daily Gas Price Index

Breaking News : posted Nov 7, 9:56 AM

Cross Bay Pipeline to New York City Gets FERC Nod

FERC granted a final certificate to Cross Bay Pipeline Co. LLC of Houston to assume ownership of a 37-mile portion of Transcontinental Gas Pipeline's Lower New York Bay Extension and add 16,000 hp of compression in Middlesex County, NY, in order to boost gas deliveries into New York City by about 125,000 Dth/d. The Cross Bay project, first announced in January 1998, is estimated to cost \$59.5 million.

Once completed, the compressor station and pipeline would form a new interstate pipeline system that would extend from Middlesex County across the lower New York Bay, all the way to Nassau County, NY. The pipeline's capacity would be more than 600,000 Dth/d, with the additional 125,000 Dth/d of incremental capacity.

"By expanding the capacity of these existing facilities, Cross Bay Pipeline Co. will be able to create an important gas transportation alternative for New Jersey and New York markets in an economical, efficient manner with minimal impact on the environment," project sponsors said in an earlier statement.

Williams and Duke Energy each have a 37.5% ownership stake in the limited liability company, while KeySpan, which came on as a third partner in August 1998, owns 25% of Cross Bay (see Daily GPI, July 24, 2000 <<http://intelligencepress.com/subscribers/daily/news/d20000724c.html>>).

Since its inception three years ago, the Cross Bay project has undergone some changes in size, cost and design. It originally was scheduled to go into operation in November 2000.

When E-Tag 1.7 is activated on March 6, 2002 the OATI webTag (ETS) system will require secure access using an OATI Digital Certificate. OATI Digital Certificates will be provided to our existing webTag customers at no additional cost under their existing ETS Agreement.

For those companies that have not yet acquired OATI Digital Certificates, to start the process, please download the Company Information document at the following URL:

http://www.oaticerts.com/repository/company_information.doc

Complete the form, and then e-mail it to OATI at support@oatiinc.com. Please do not delay, get this service today to avoid access problems on March 6.

For those companies that have already acquired OATI Digital Certificates, our OATI webTag Administrator will be contacting your company shortly to activate this service with your current E-Tag 1.67 access.

If you have questions, please feel free to contact us at (763) 553-2725 or support@oatiinc.com.

I submitted the Parking Provision outline to Bay Gas last week after our meeting.

I need to circle back to determine where we are relative to getting pricing pulled together for the gas portion. I've been in need to put a hard offer in front of this customer for several weeks now. They are in the process of making a critical decision & I would like to have something in hand that values the Parking optionality.

Thanks
mk

Team,
I'm not sure what the latest discussions you've had since our last meeting, but I need to get this concept outlined and in the hands of my customer. They are making their decision any day now and I believe this structure will add to the value of our Compression Service and reduce our dependence on the minimum load factor.

I've attached a basic outline as I see it. Please review or we will discuss at our 3:00 meeting today.
I would like to define or understand our (Enron's) wish list as well as a relative value at a minimum.
I need to get the specifics to my customer tomorrow since it's not going to happen today.

I ultimately need to have a price for the gas that ECS would be receiving ASAP.

Thanks,
mk

Subject: Western Natural Gas Organization

Dear Western Region:

I would like to thank Phillip Allen for his leadership of the west desk for 2000 and 2001. He will continue as Managing Director at Enron North America and trade a financial book for the natural gas trading group. Phillip will be sitting near the western region and will continue to participate in our goal to analyze the western market fundamentals to maximize wholesale trading efforts. I will be assuming all management responsibilities of the west trading group effective immediately.

I would like to take the opportunity to discuss our new organization for the Western Region trading group. I have organized a vertical based trading structure that clearly defines each employee's responsibilities going forward. Our goal is to organize all of our efforts in the west such that we will offer Enron North America the most profitable wholesale trading model.

The most significant change to the western region organization will be Keith Holst's role as Director of West Fundamentals. Keith will manage this unit from the west desk, while using the services of Enron's centralized fundamentals group, headed by Chris Gaskill. Our western region Fundamentals group will be responsible for delivering the most complete and market sensitive data to the trading desk. We will all share in Keith's efforts to make our fundamental analysis the standard for all trading units within the company.

West Origination, led by Barry Tycholiz, will play a larger role in our term trading efforts going forward. They will be joining our desk for fundamental forecasting meetings and discussions. Our goal is to capture a majority of the term risk management efforts of our customer base. We must succeed in capturing a majority of our customers' business to increase our share of lower risk earnings. This contribution, along with our wholesale trading, will help our desk beat earnings expectations consistently.

The West trading organization is structured to maximize profitability by sub-region. The emphasis for the trading group will be to increase profitability and market information from each trader's sub-region. We will be evaluated on how we organize and build the business and profitability in our respective trading areas. This structure, however, does not preclude west traders from trading positions throughout the Western region and the North American gas market. The West trading organization will be successful by creating accountability for trading responsibilities.

Please review the attached outline for the new trading structure. We will be meeting as a group to discuss the changes soon. The implementation of this structure will rely on our back office to set up the new books for each trader.

Sincerely,

Michael D. Grigsby
West Gas Trading

Subject: Transwestern Off-system Transportation Contract T39817

I talked to my Supervisor and here is what we can do, PNMGS will not accept or confirm any nominations under Off-System Transportation Contract T39817. This will put the Contract in an "INACTIVE" status instead of total Termination of the Contract.

Prior to any future expectation of Off-system Transportation, pursuant to Contract T39817 between PNMGS and TWPC, there will then be an updated and current determination on the Financial Responsibility as set forth under ARTICLE XII. FINANCIAL RESPONSIBILITY. PNMGS will then decide what, if any, steps will need to be taken prior to such Off-system Transportation.

A. Lindsey McMurray

Dear Colleagues,

We know you have many questions about your new benefits plan, payroll issues and other changes that will occur over the next few weeks. Human Resources and Communications are preparing a thorough Q&A, which we will send to you tomorrow and will regularly update as more information is available.

Meanwhile, please read the announcement below from Security about how you can obtain a new UBS Warburg access card that will allow you to enter our new office space after Friday.

I am confident that you share my enthusiasm about our new opportunity. We look forward to working along side each of you in the coming days.

David Oxley
Head, Human Resources

Access Cards

There will be a two-day transition for the new UBS Warburg access cards. Beginning Monday, February 11, access to the 5th and 6th floors of Enron Center South will require these new cards. UBS Warburg access cards can be picked up from 7 a.

m. to 7 p.m. at the reception area on the 5th floor of Enron Center South on Thursday, February 7th ; Friday, February 8th ; and Monday, February 11. Enron Security will produce new access cards with existing photographs, then simultaneously issue the new and collect the old cards. Employees without UBS Warburg cards will be allowed into the Enron Center South building on Monday but will have to collect their new cards as soon as possible to gain access to the 5th and 6th floors.

Employees who fail to collect their new cards by 7 p.m. Monday will be required to contact Enron Security's general information number at 713-853-5360 to arrange to pick them up.

There will be security staff available at the pick up point on ECS 5 to help with any problems you might have.

It is suggested employees wear their access cards at all times while on the premise.

Accessible Areas - The new cards will allow UBS-W employees to enter:
5th & 6th floors and Plaza area of Enron Center South ,
The Sky Ring
Body Shop, Enron Center North Plaza and therefore access the Credit Union and Cafeteria from either building.

Restricted Areas - Employees must submit to Enron Security a Restricted Access Request form (available by calling 713 8535360) and signed by Bob McAuliffe (713 -853-7468) to enter:
Enron Center South, 8th and 9th floors
Enron Center North, 22nd and 34th floor
Ardmore Data Center.

Employees staying with the Enron estate while visa and other issues are completed - Employees in this group who are on assignment arrangements to UBS-W will be issued a regular access card - available in the same way as other new UBS-W employees.

Estate employees who are working with UBS-W on transition issues - If they will be based in UBS-W office space they should talk to their UBS-W counterpart for approval and then UBSW HR for the issue of a UBS-W contractor card (in addition to their regular Enron badge).

US Men's Clay Court Championships Downtown Exhibition Event - Today at 12 PM!!!

Today at 12 PM, downtown Houston is hosting a exhibition tennis event on Texas Avenue in front of Bayou Place featuring Jan-Michael Gambill in honor of the US Men's Clay Court Championships being held at Westside Tennis Club this week. The event is free and will last approximately 45 minutes.

Please join us for a brownbag concert on Friday, May 4 from 12:00 - 1:00 p.m. at Two Allen Center in the Forum (7th floor). Da Camera presents, "The Ying Quartet" performing selected 20th Century chamber pieces.

Also, De Camera is offering a 20% discount to Enron employees to Da Camera's 2000/01 season finale concert, "Celebrating Patronage" on Saturday, May 6 at The Wortham Center.

If you are interested, please RSVP to Jessica Nunez at X31918

Do you hate to garden in the summer because everything you plant dies? Linda Gay, Director of the Mercer Arboretum and Botanic Gardens in Humble, will teach us about plants that not only survive, but thrive during the dog days of Houston's summers. Topics will include tropical-looking plants for sun and shade, ginger, fragrant plants, and drought-tolerant plants.

WHEN: Tuesday, May 8th, 11:30 a.m. - 12:30 p.m.
WHERE: The Forum, 12th floor of 2 Allen Center

Houston area singles interested in jazz, dessert and classical music can meet and mingle on Friday, May 4, 2001.

The evening of entertainment begins at 5:30 p.m., with live jazz by the Blue Monks at Sambuca Jazz Cafes at 909 Texas Avenue. Complimentary hors d'oeuvres and a cash bar are available at the pre-concert party.

At 7p.m., you're off to Jones Hall across the street for dessert at the Round Bar before the Houston Symphony performance at 8 p.m.

David Robertson, Musical America's Conductor of the Year 2000, will lead Beethoven's idyllic romp through the countryside, Symphony No. 6, Pastoral. The program concludes with Prokofiev's patriotic Alexander Nevsky, originally written for the Eisenstein film of the same name, and the legendary Battle on the Ice, featuring the Houston Symphony Chorus.

Tickets are \$35 and include the pre-concert party at Sambuca, dessert at the Round Bar in Jones Hall and reserved concert seating. Pre-paid reservations are required and space is limited. Singles only please. Make your reservations online at www.houstonsymphony.org or call 713 238-1477.

Project Mom @ Friendly Haven on Saturday, May 11th.... in Honor of Mother's Day!
Join Enron employees at Friendly Haven, a housing assistance program supported by AFH (AIDS Foundation Houston), for a volunteer project designed to celebrate Mother's Day. Approximately 40 single mothers comprise Friendly Haven's residents and we would like to make the day special for both them and their children.

Enron volunteers are needed to facilitate a children's craft activity for Mother's Day presents and also serve a special brunch to all of the mothers in the program. This project can be utilized as a team building opportunity for a department with 15 - 25 employees or individual volunteers may sign up by contacting Janice Riedel at x37507 - for more information on AFH, visit <http://www.aidshelp.org/programs/housing.htm>.

ChildBuilders, Houston's Advocates for Mental Health in Children, is hosting a special lunch time event on Tuesday, May 8th from 11 AM - 2 PM, in honor of Children's Mental Health Awareness Week at Hermann Square, featuring actors performing vignettes on issues and parenting. Zydeco music, free soft drinks and desert s will also be available.

Volunteers will receive a free t-shirt and are needed to publicize the event, fill balloons, set-up tables and chairs, serve drinks and deserts, and to assist with clean-up. To sign up for these jobs, please open and read the attachment for more specific job descriptions and email the sign-up sheet with your name, phone number, and email address to Dottie Bates at dsquareb@msn.com or call (713) 932-8440.

It's that time of year again, wanted to get everyone's comments on having a Christmas lunch, with all the women on the west desk. Dates suggested for having it are December 13 or 14th. Janie suggested having it at Zulas. I'd like to get everyone's feedback on having it, the date you like best, and any different restaurant suggestions. Last year we had a \$15 limit on gifts. Also, should we invite Kim Ward and Stephanie Miller, they are part of the west desk. If I left any one off the list, please let me know

Oman LNG has decided that 2nd week of July works better for them. Please advise me regarding your availability during that time.

Tenatively, the agenda would be:

Dabhol Update
Dabhol Implementation Procedures
Visit to CMS Terminal
Spot Cargoes Remaining in 2001
Spot Cargoes in 2002 and Beyond

Please suggest other topics.

Paul

I am currently planning to be in Europe for most of that time, although I might be back in Houston. I should know in the next few days. Are the Omani's going to be here in Houston for the whole of that period?

Thanks,
Jonathan

How do your calendars look June 7-15 for meeting with the guys from OLNG? They are interested in a visit to CMS. Possibly they could be there for the Hoegh Gallen unloading.

Please let me know your date preferences and the names of anyone else that should attend the meetings.

Paul

To: Eastern RFP
Subject: Request for Proposals - PacifiCorp Eastern Control Area

The regulated merchant arm of PacifiCorp is requesting proposals from entities who are capable of supplying electric resources delivered to PacifiCorp's Eastern electrical control area. Responses to this Request for Proposals ("RFP") are due prior to 2:00 p.m. Pacific prevailing time on October 19, 2001. Both supply-side and demand-side resources capable of being scheduled for delivery on a day-ahead and/or hour-ahead basis are welcome to bid and those resources capable of accepting schedule changes during the day and/or hour of delivery will be ascribed the highest value. Resources not capable of being scheduled for delivery in advance are welcome to bid under this RFP, however, they will not be valued the same as resources capable of meeting their pre-scheduled amount with a high level of consistency. In addition, resources that are capable of providing either the spinning or non-spinning component of operating reserves are also encouraged to bid under this RFP.

Please review the RFP carefully. Your proposal will be considered separate from any existing wholesale purchase, electric service or DSM agreements you currently have in place with PacifiCorp. Entities bidding must have either FERC status for resource delivery or be capable of delivering resources under existing regulated restrictions and appropriate retail tariffs. PacifiCorp intends to pursue

definitive agreements with entities that provide PacifiCorp with the best combination of resource characteristics and evaluated resource costs, including credit risk factors.

The RFP provides a contact number for questions and shows a schedule for submission. Please note that a Notice of Intent to Propose form must be returned by October 1st in order to bid. There will be a pre-bid conference scheduled in early October. We look forward to your interest and proposals. If you still have additional questions, do not hesitate to contact Lisa Lynch, Project Management Office at (503) 813-5669.

Dan,

Have just been in a meeting with our technical people regarding the sticky steam manœuvre control valve, those steamleakages in the boiler and cleaning the flame arrestores in gas supply line.

We are sorry to say that the vessel need abt 48 hrs to carry out the necessary work on the steam plant in order to minimize the steam leakage and having service on the steam manœuvre control valve. As you know, we need some hrs to cool down the boilers/steam valve/pipes before it is possible to open and to work with, after both boilers are been shut down. To cooldown the steam plant take abt 10-12 hrs and to bring the plant into service again can take abt 6 hrs, so that means that we need 48 hrs, as mentioned above, to get our maintenace plan carried out.

According to the obervations done, last on the stopp last night, were the valve operated without any problems, we believe that the valve can be fixed without totaly dismantling. On the other hand, if the valve has to be completely dismanteled, the work can take more than the expected 2 days. We believe that the chance of this situation is slim.

Our schedule are:

Eta Algeciras 30/4 0500
Etd Algeciras 2/5 0900
Eta Port Said 6/5 1830
Etd Suez 7/5 1700
Eta Qalhat 13/5 0900
Etd Qalhat 14/5 2400

Kindly advice if this can be worked out.

Best regards

Kjell
Hoegh LNG

Thanks for the message. I cannot imagine what it must be like to be in the middle of all this. You just have to do your job and go forward. Please let me know when you plan to be in New York, and if you have time we will go to dinner. Fond regards, DAB

If you are a participant in the Enron Corp. Savings Plan, please read this very important message.

We understand that you are concerned about the timing of the move to a new Savings Plan administrator and the restricted access to your investment funds during the upcoming transition period scheduled to take place beginning at 3:00PM CST on October 26 and ending at 8:00AM CST on November 20.

We have been working with Hewitt and Northern Trust since July. We understand your concerns and are committed to making this transition period as short as possible without jeopardizing the reconciliation of both the Plan in total or your account in particular.

Remember that the Enron Corp. Savings Plan is an investment vehicle for your long-term financial goals. The Enron plan will continue to offer a variety of investment opportunities with different levels of risk.

As always, we advise you to review your overall investment strategy and carefully weigh the potential earnings of each investment choice against its risk before making investment decisions that are aligned with your long-term financial plans and your risk tolerance.

For that reason, it is critical that ALL trades among your investment funds be completed by 3:00 PM CST Friday, October 26 before the transition period begins.

errol,

FYI,

<http://www.jeffssoundvalues.com> is the website i was telling you about yesterday, lots of great deals on hi-fi stuff. click on the 'home stereo' link. its not a very user-friendly website but he has some really good deals on it.

<http://www.bc-acoustique.com> are the speakers.

-randy

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tccpolice.org.
We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560
November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928 .

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

Please make sure you do the following before you leave tonight....Thanks for your help. Tjae

Subject: IMPORTANT! Actions needed Tuesday.

In preparation for the upcoming move to Enron Center South we are moving your Home Directories to a new trading cluster.

WHAT YOU NEED TO DO:

This will occur for you this EVENING after 6:30PM.

We will need to restart your computer in order to complete this action.

Please log out of your computer by 6:30PM, if the machine is not logged off we will reboot the machine in order to complete these actions.

Save your data before going home this evening.

If you have outstanding circumstances and cannot be down, please speak to the tech when he comes to your desk.

HERE ARE A FEW OF THE BENEFITS OF THIS ACTION:

Newer, more stable environment

More disk space available for common data

Faster network connections

HOW THIS WILL EFFECT YOU:

If you are a laptop user and have to work at home, you should save any work to your 'C:' drive on the laptop. DO NOT use the "My Documents" folder. When you return to work and reconnect to the network, any changes made to files/folders in the "My Documents" folder may be deleted from the laptop.

Laptops reconnecting to the network for the first time will receive a synchronization error.

RESOLUTION:

Please call the Resolution Center (x3-1411) and they will correct the problem ASAP.

We will have additional Technicians available on the floor if the Resolution Center has any problems.

Hi Chris,

No word on your refund. Tamara is going to follow up again with the IRS in the next couple of weeks. Meanwhile, if it appears, please let us know.

Kind regards,

Judy Perdomo

All, see attached 2002 Blanco Hub O&M Budget with Overheads calculated to reflect Payroll Only.

Lindy/John/Darrell, I need to find out who to send this budget to for 2002 monthly billings (Billings should be 12 equal payments made on Budget Figures, not Actuals). I know in the past Je Chang did these billings, but don't know who does them now. If you could let me know I would appreciate it. Thanks,
tj

Many of you have requested more time in which to submit your nominations for the 2001 Chairman's Award. In response to your requests, the deadline has been extended to Friday, October 12.

Please take this extended opportunity to nominate that special individual who is your everyday hero and a role model who exemplifies Enron's core values of Respect, Integrity, Communication and Excellence.

This award represents how important Enron's core values are to the company. The success of this award program is determined by Enron's most valuable asset, you, the employee. Employees at any level can nominate fellow employees from anywhere within the Enron family - from the top down or the bottom up. All of those employees who have been nominated in the past are eligible to be nominated again this year and there is no limit to the number of nominations you may submit. Simply complete a nomination form and submit it by Friday, October 12, 2001. Forms can be obtained by visiting your intranet site or at home.enron.com and in Houston they are available in the elevator lobbies. In addition, this year we have a new way you can nominate that everyday Enron hero. Simply pick up the phone and dial 713-345-2492, follow the simple and quick instructions and leave your nomination by phone.

The finalists for the award, the Chairman's Roundtable, and the Chairman's Award winner will be honored at Enron's Management Conference in San Antonio on November 15.

Thank you for your participation.

Enron Discusses Credit Line of \$1 Billion to \$2 Billion With Banks
By Jathon Sapsford and John Emshwiller
Staff Reporters of The Wall Street Journal

10/29/2001
The Wall Street Journal
A10

(Copyright (c) 2001, Dow Jones & Company, Inc.)

Enron Corp., scrambling to restore confidence in its finances, is negotiating with banks for a new credit line of between \$1 billion and \$2 billion, and is likely to close a deal within days, according to officials familiar with the matter.=20

The new credit line is intended to bolster Enron's financial condition and head off a potentially devastating loss of investor and business confidence. The new credit would supplement existing lines, which are largely tapped out after Enron last week drew down about \$3 billion to increase cash reserves and calm fears in the stock, bond and energy markets.

An Enron spokesman confirmed that the company is negotiating a new credit line, but said he couldn't supply any further details.=20

Houston-based Enron is the nation's biggest energy trader and a principal in nearly one-quarter of all electricity and natural-gas trades. Once a favorite of Wall Street, the company now is in the unfamiliar position of convincing a deeply concerned investment community that, despite difficulties, its finances remain sound.=20

Confidence in Enron's financial situation was shaken after Enron earlier this month announced a \$618 million third-quarter loss and disclosed a \$1.2 billion erosion of shareholder equity related to controversial transactions it had done with entities connected to its then-chief financial officer, Andrew Fastow.=20

Last week, Enron replaced Mr. Fastow and said that the Securities and Exchange Commission was looking into the transactions. The company has consistently said that the transactions were proper and legal.=20

Enron's stock price fell again Friday. As of 4 p.m., in composite trading on the New York Stock Exchange, Enron shares were down 95 cents at \$15.40. Enron shares have fallen 50% in the past two weeks and are down 83% from a Sept. 18, 2000, high of \$89.63.=20

Late last week, Enron tapped its existing credit lines, with part of that money being used to redeem nearly \$2 billion of its outstanding commercial paper, or short-term corporate IOUs. Ron Barone of credit-rating agency Standard & Poor's said he believes that Enron was "getting a bit more resistance" recently in rolling over its commercial paper as it came due. Thus, Enron probably decided it would be easier simply to redeem the paper outstanding, he said.=20

The Enron spokesman yesterday said that paying off the commercial paper and still leaving the company with an additional roughly \$1 billion cash on hand would give it more financial flexibility.=20

Also last week, credit-rating agencies warned investors they were reviewing Enron's debt and commercial-paper ratings for a possible downgrade. A lower rating could hamper Enron's core trading businesses.=20

Behind the worries among these agencies, in part, is the loss of investor confidence, which one of the rating companies, Fitch, said in a report last week could impair "Enron's financial flexibility and access to capital markets, therefore impacting its ability to conduct its business."=20

The Enron spokesman said yesterday that the company's trading partners are doing business with Enron on "essentially the same terms" as they have in the past. "There has been no significant change in the credit conditions," he said. Trading partners demanding significantly stricter terms from Enron would be a sign of further deteriorating confidence in the energy giant's finances.=20

The banks involved in the current negotiations, including J.P. Morgan Chase & Co. and Citigroup Inc., are asking Enron for stricter covenants on the new credit line than they had asked for in the past, one official said.=20

Bankers involved with the company say the goal of the new credit line is to show the investment community that Enron can meet its commitments. "Confidence in this company was lost," said one bank official involved in the negotiations for a new credit line. "But confidence will be restored."=20

Corporations of Enron's size commonly establish credit lines only to demonstrate to the investment community that in case of an emergency, they have access to cash. In practice, few companies actually make use of these lines.=

Thus, drawing down credit lines, while providing immediate cash, also illu=

strates the pressure Enron is feeling.

Manager's Journal: How Enron Ran Out of Gas
By Paul Kedrosky

10/29/2001

The Wall Street Journal

A22

(Copyright (c) 2001, Dow Jones & Company, Inc.)

Is troubled Enron Corp. the Long Term Capital Management of the energy market, or merely yet another mismanaged company whose executives read too many of their own press releases? Or is poor Enron just misunderstood? Those are the questions after another week of Chinese water torture financial releases from the beleaguered Houston-based energy concern.=20

A year ago Enron was the hottest of the hot. While tech stocks were tanking, Enron's shares gained 89% during 2000. Even die-hard Enron skeptics -- of which there are many -- had to concede that last year was a barnburner for the company. Earnings were up 25%, and revenues more than doubled.

Not bad, considering where the company came from. A decade ago 80% of Enron's revenues came from the staid (and regulated) gas-pipeline business. No longer. Enron has been selling those assets steadily, partly fuelling revenues, but also expanding into new areas. By 2000, around 95% of its revenues and more than 80% of its profits came from trading energy, and buying and selling stakes in energy producers.=20

The stock market applauded the move: At its peak, Enron was trading at around 55 times earnings. That's more like Cisco's once tropospheric valuation than the meager 2.5 times earnings the market affords Enron competitor Duke Energy.=20

But Enron management wanted more. It was, after all, a "new economy" Web-based energy trader where aggressive performers were lucratively rewarded. According to Enron Chairman and CEO Ken Lay, the company deserved to be valued accordingly. At a conference early this year he told investors the company's stock should be trading much higher -- say \$126, more than double its price then.=20

Then the new economy motor stalled. The company's president left under strange circumstances. And rumors swirled about Enron's machinations in California's energy markets. Investors pored over Enron's weakening financial statements. But Enron analysts must have the energy and persistence of Talmudic scholars to penetrate the company's cryptic financials. In effect, Enron's troubles were hiding in plain sight.=20

It should have been a warning. Because of the poor financial disclosure there was no way to assess the damage the economy was doing to the company, or how it was trying to make its numbers. Most analysts blithely concede that they really didn't know how Enron made money -- in good markets or bad.=20

Not that Enron didn't make money, it did -- albeit with a worrisomely low return on equity given the capital required -- but sometimes revenues came from asset sales and complex off-balance sheet transactions, sometimes from energy-trading revenues. And it was very difficult to understand why or how -- or how likely it was Enron could do it again next quarter.=20

Enron's financial inscrutability hid stranger stuff. Deep inside the company filings was mention of LJM Cayman, L.P., a private investment partnership. According to Enron's March 2000 10-K, a "senior officer of Enron is the managing member" of LJM. Well, that was a puzzler. LJM was helping Enron "manage price and value risk with regard to certain merchant and similar assets by entering into derivatives, including swaps, puts, and collars." It was, in a phrase, Enron's house hedge fund.=20

There is nothing wrong with hedging positions in the volatile energy market=

-- it is crucial for a market-maker. But having an Enron executive managing and benefiting from the hedging is something else altogether, especially when the Enron executive was the company's CFO, Andrew Fastow. While he severed his connection with LJM (and related partnerships) in July of this year -- and left Enron in a whirl of confusion last week -- the damage had been done.=20

As stories in this paper have since made clear, Mr. Fastow's LJM partnership allegedly made millions from the conflict-ridden, board-approved LJM-Enron relationship. And recently Enron ended the merry affair, taking a billion-dollar writedown against equity two weeks ago over some of LJM's wrong-footed hedging. Analysts, investors, and the Securities & Exchange Commission were left with many questions, and very few answers.=20

To be fair, I suppose, Enron did disclose the LJM arrangement more than a year ago, saying it had erected a Chinese wall between Fastow/LJM and the company. And in a bull market, no one paid much attention to what a bad idea that horribly conflicted relationship was -- or questioned the strength of the wall. Now it matters, as do other Enron-hedged financings, a number of which look to have insufficient assets to cover debt repayments due in 2003.=20

We didn't do anything wrong is Mr. Lay's refrain in the company's current round of entertainingly antagonistic conference calls. That remains to be seen, but at the very least the company has shown terrible judgment, and heroic arrogance in its dismissal of shareholders interests and financial transparency.=20

Where has Enron's board of directors been through all of this? What kind of oversight has this motley collection of academics, government sorts, and retired executives exercised for Enron shareholders? Very little, it seems. It is time Enron's board did a proper investigation, and then cleaned house -- perhaps neatly finishing with themselves.=20

---=20

National Desk; Section A
Enron Seeks Additional Financing
By RICHARD A. OPPEL Jr.

10/29/2001
The New York Times
Page 9, Column 4
c. 2001 New York Times Company

DALLAS, Oct. 28 -- The Enron Corporation, still struggling to reassure investors it can weather a financial crisis over complicated transactions involving its former chief financial officer, is seeking \$1 billion to \$2 billion in additional financing from banks, an industry official said today.=20

Last week, Enron, the nation's largest energy-trading concern, used about \$3 billion in available credit lines and spent about \$2 billion to pay off commercial paper. Now, by obtaining even more financing, Enron is hoping to convince investors and other energy-trading firms that it will not face a cash squeeze that could lead trading partners to refuse to extend credit or do business with it.

Enron's board, which has been holding meetings by telephone over the last two weeks to monitor the company's financial situation, held another meeting this afternoon. "The board is meeting frequently and will announce any actions when appropriate," an Enron spokesman said.=20

Two weeks ago, Enron disclosed that its shareholder equity had been reduced by \$1.2 billion because of deals with investment partnerships involving its former chief financial officer, Andrew S. Fastow, who was ousted last week. The company also disclosed about \$1 billion in separate write-offs, and =

it said last week that the Securities and Exchange Commission had made an inquiry into its financial accounting.
Enron hopes to maintain its investment-grade credit rating, which is crucial to ensuring that other energy traders continue to do business with it. Lately, Enron's bonds have been trading at prices more like junk bonds, and two major credit-rating agencies are considering whether to downgrade the company's rating.

GLOBAL INVESTING: Enron stock plunge deals a heavy blow to mutual funds
Financial Times; Oct 29, 2001
By AGENCIES: AGENCY MATERIAL and ELIZABETH WINE

Enron shares plunged 40 per cent in the last week, doing severe damage to mutual funds, the company's largest institutional ownership bloc, and the havoc may continue.

More than 15 per cent of the 4,000 US equity funds held shares in the embattled company's shares as of the most recent reporting period, according to fund tracker Morningstar.

Mutual funds held a fifth of Enron's shares, but that percentage is likely to be much lower now, say fund analysts, who suggest much of the stock's halving in October is due to large sales by institutional holders.

Janus, the growth fund specialist, was the largest institutional shareholder according to the most recent filings, dated June 30, with more than 42m shares representing a stake worth Dollars 2.1bn.

The stake - if still held in its entirety - would be worth Dollars 659m at Friday's closing price of Dollars 15.40. Enron shares dropped 95 cents, or 5.81 per cent on Friday, taking its total fall to nearly 41 per cent last week on concerns over accounting questions and some limited partnerships created by Andrew Fastow, former chief financial officer. On Friday, several leading rating agencies put the company's debt on credit watches, and Enron bond prices plunged. The company's stock is down 81 per cent since January.

Most fund managers, including those at Janus, refuse to discuss a company in which they are actively trading. However, several mutual fund groups with large Enron stakes have said their listed positions are "dated", implying that the funds' positions in the company have changed.

Morningstar analyst Christine Benz, who follows the Janus funds, said managers of the group's larger funds had been "lightening up" their Enron holdings this year. She said Blaine Rollins, who manages the Dollars 23bn flagship Janus fund, said that in September he had sold some of his stake - listed as 2.15 per cent of outstanding shares as of April 30 - but did not say when.

Ken Zschappel, manager of the Dollars 11bn Aim Constellation fund, also declined to discuss his holdings, listed as 0.27 per cent of outstanding shares as of March 31. But Aim said the position had since been "trimmed substantially".

Other top fund owners, as of the most recent filings, included the Alliance Premier Growth fund, the Janus Twenty, Janus Mercury and Janus Growth & Income funds, Fidelity Magellan, AXP New Dimensions Fund, Putnam Investors, Putnam Voyager and Putnam New Opportunities funds and Morgan Stanley Dividend Growth fund.

COMMENT & ANALYSIS - Enron flickers.
By SIMON LONDON and SHEILA MCNULTY.

10/29/2001
Financial Times

COMMENT & ANALYSIS - Enron flickers - Once a paragon of the new economy, the US energy group is under scrutiny for its opaque accounting and free-wheeling management, write Simon London and Sheila McNulty.=20

Enron has some explaining to do. For the past decade or more, the Texas-based company has basked in the admiration of investors and business school professors eager to understand its transformation from staid utility to fast-growing energy trader. Now it faces scrutiny of a more unwelcome kind.

Its share price has been falling since the beginning of this year. The US Securities and Exchange Commission is investigating multi-million dollar deals with a private equity fund associated with its own chief financial officer, which resulted in a \$1.2bn reduction in shareholders' equity. A hastily-convened conference call last week with analysts raised as many questions as it answered about these "related-party transactions". The departure of Andy Fastow, the aforementioned CFO, soon followed.=20

With its credit rating under review by two leading ratings agencies, Enron has also been forced to draw down bank credit lines. Yesterday if confirmed it was trying to establish additional lines of liquidity.=20

"This marks the end of Enron's walk on the wild side," observes Curt Launer, an analyst with Credit Suisse First Boston, the investment bank.=20

On the surface, events at Enron can be explained by the combination of deteriorating trading conditions, a complex capital structure and poor investor relations. But the root causes go back further. The entrepreneurial culture and dynamic management that fuelled Enron's growth in the 1990s appear to have also sown some of the seeds of the present crisis. Therein may lie a cautionary tale for all executives trying to sprinkle "new economy" magic on to old economy companies.=20

Enron's transformation began in earnest in 1990 with the arrival of Jeffrey Skilling, who was hired from McKinsey, the management consulting firm, to develop energy trading.=20

For the previous decade Enron had been emerging as a force in the deregulating US energy markets under the guidance of Kenneth Lay, a former deputy under-secretary of energy. Mr Lay remains chairman. But it was Mr Skilling who spearheaded the move into trading energy as well as generating and supplying it.=20

The two sides of the business - trading and generation/supply - have always been strange bedfellows. The former demands an entrepreneurial spirit more likely to be found on Wall Street than in a utility. Mr Skilling's answer in the early 1990s was to bring in talent from outside the company. One of his first recruits was Mr Fastow, an expert in securitisation, the repackaging of financial assets so they can be traded in financial markets.=20

The energy trading division tried from the start to differentiate itself. A management structure was introduced with only four layers - vice-president, director, manager and associate/analyst - much like a consulting firm. Employees were free to take as much holiday as they liked, so long as they delivered results. As one of Mr Skilling's early recruits recalled: "It was all about creating an atmosphere and deliberately breaking the rules."=20

The seemingly free-wheeling style was based on a "loose-tight" management model expounded by Tom Peters and Bob Waterman, the management writers and McKinsey alumni. At Enron this meant that employees in the merchant energy business were encouraged by huge bonuses to pursue new ideas and innovate in existing markets.=20

Up-and-coming employees moved freely between projects in pursuit of glory. Louise Kitchen, the 32-year-old British executive who was the creative force behind Enron Online, the group's internet-based trading platform, changed jobs or was promoted seven times in five years.=20

Balancing these loose management practices were tight central control of risk, legal commitments, finance and performance evaluation/remuneration. Mr Skilling once described the approach in this way: "As long as you clear your deals or business ideas through those screens, you can do whatever you want around here."=20

This approach did deliver growth and innovation. As well as making markets = in its core energy products, Enron now trades everything from weather deriv= atives - which enable companies to insure themselves against unfavourable c= limatic conditions - to broadband telecommunications capacity and metals. T= he success of Enron Online allows the group to describe itself as the world= 's leading e-commerce company.=20

It has also started marketing electricity to US consumers through a joint v= enture with International Business Machines and America Online, the interne= t service provider.=20

In February this year Mr Skilling got his reward: he became chief executive= of a group ranked seventh in Fortune magazine's list of the 500 most power= ful US corporations - ahead of such corporate giants as IBM, AT&T, Bank of = America and Boeing.=20

In retrospect, however, this breakneck pace of growth and innovation was ac= hieved at a price. First was the personal cost to Mr Skilling. In August he= abruptly resigned after only six months in the top job. Personal, non-heal= th related reasons were cited and investors have received no further explan= ation.=20

A second cost was an enormous increase in financial complexity. In order to= avoid a ballooning of assets and liabilities as the group expanded, Enron = used a range of off-balance sheet vehicles to help finance expansion. LJM, = the private equity fund in which Mr Fastow played a role, is just one of a = cast of characters to be found in the footnotes to Enron's accounts. Other = financing vehicles include Osprey, Marlin, Whitewing, Atlantic Water Trust = and Azurix. "They went after too many things too quickly," says Stephen Moo= re of Moody's Investors Service, the credit ratings agency.=20

A third cost, associated with the last, was a loss of financial transparenc= y. The group's extensive use of swaps, options and other derivative financi= al instruments in its merchant energy business means that investors have li= ttle idea of how Enron actually makes its money - or the underlying risks t= o which it is exposed.=20

David Fleischer, an analyst at Goldman Sachs, summed up the views of many i= nvestors during last week's conference call. He told the group's management= : "The company's credibility is being severely questioned and there is a nee= ed for much more disclosure. There is an appearance that you are hiding som= ething or that there is something going on beneath the surface that may be = questionable."=20

The fourth cost was a loss of strategic focus. "The problems, in our view, = stem from Enron venturing too aggressively in areas outside of its core ski= lls," argues Raymond Niles, analyst at Salomon Smith Barney. "Power plants = in India, water companies, extension of their franchise to the mass retail = market, and using a fibre-optic network to deliver content over the interne= t are all unrelated, or only tangentially related, to their core merchant e= nergy business."=20

Enron executives also appeared to get carried away with the prospects for s= ome of these ventures. This time last year Mr Skilling was arguing that Enr= on Broadband was a business worth \$35bn (#24bn) in its own right. This hel= ped push the share price to all-time highs - and storing up trouble when tr= ading volumes failed to materialise.=20

"They over-promised on the new business they created," says Chris Bartlett, = a professor at Harvard Business School and long-time watcher of the compan= y. "Enron was trying to ride the dotcom bubble with Enron Online and the br= oadband business. To some extent they are now paying the price."=20

Will Enron weather the storm? Notwithstanding the risk of further out-of-th= e-blue financial shocks, most analysts believe that it will. The merchant e= nergy business remains powerful and profitable. Mr Niles at Salomon Smith B= arney points out that this side of the group drives more than 80 per cent o= f earnings and has shown consistent 30-40 per cent annual growth over the p= ast three years. Assets totalling more than \$4bn were also earmarked for di= sposal before the current crisis erupted, underlining that there is plenty = of realisable value within the group's portfolio of physical energy assets.= =20

And yet the doubts remain. It is, ultimately, a question of confidence and = credibility. Investors suspect that the balance between loose and tight man= agement methods has tilted too far towards the former. Mr Lay and his team = will have to tighten up.=20

Enron, the troubled US energy group, was attempting yesterday to persuade b= anks to provide additional credit to bolster its position after a sharp fal= l in its share price.=20

The Houston-based company was also due last night to hold a special board m= eeting to consider confidence-building measures after surprise financial di= sclosures damaged its reputation among US investors.

Last week the company raised \$3.3bn (Euros 3.7bn) in cash to bolster its fi= nancial position but Enron admitted yesterday that it was still looking for= additional finance. The company insisted, however, that it was in good fin= ancial health and that its core energy trading business remained strong.=20
Mark Palmer, an Enron spokesman, said he hoped the company would have somet= hing to announce in coming days from its latest effort to "establish additi= onal lines of liquidity". "Once we are able to get the liquidity position s= hored up, that will put a lot of fears of the unknown to rest," Mr Palmer s= aid.=20

The company's problems have become public since an announcement on October = 16 that it would take a \$1.01bn special charge and write down shareholders'= equity by another \$1.2bn. The moves followed losses arising from a private= equity operation run by Andrew Fastow, its former chief financial officer,= who was forced to take a leave of absence last week.=20

Enron's share price has fallen more than 50 per cent since the October 16 a= nouncement and its bonds have been trading at levels that are technically = "junk" status, though its official ratings are still investment grade.=20

"Our concern is that a reduction in the debt rating could impair their abil= ity to operate their trading and marketing operations," said Raymond Niles = of Salomon Smith Barney. "These activities require at least an investment g= rade credit rating, or Enron could be subject to an increase in margin requ= irements."=20

The controversy over Enron's balance sheet adjustment has resulted in a req= uest for information from the Securities and Exchange Commission. Enron fli= ckers, Page 22.=20

Enron Seeks Further Credit to Reassure Investors, WSJ Says
2001-10-29 04:30 (New York)

Houston, Oct. 29 (Bloomberg) -- Enron Corp., the largest energy trader, asked banks to provide a further credit line of as much as \$2 billion in a bid to restore investor confidence in the company, the Wall Street Journal reported, citing unidentified officials close to negotiations.

The new credit line is additional to the \$3.3 billion credit line it tapped last week, the paper said, and should be completed within days.

Investors have shunned the company since Oct. 16 when Enron reported a third quarter loss of \$618 million and wrote down shareholders' equity by another \$1.2 billion, the Journal said. The stock has fallen by 54 percent since the announcement.

The company's shares were further dented after an investor sued Enron last month, saying dealings with two partnerships run by former Chief Financial Officer Andrew Fastow, cost the company \$35 million. The suit also called Fastow's leadership of the partnerships, set up to cut Enron's debt, a conflict of interest.

USA: REPEAT-Electric cowboys get roped in at the energy corral.
By Janet McGurty

10/29/2001

Reuters English News Service
(C) Reuters Limited 2001.

NEW YORK, Oct 26 (Reuters) - Last year, Enron Corp. was a darling of investors and analysts, but the freewheeling trader of electricity and natural gas now faces a credibility crisis due to a lack of transparency in its business dealings.=20

Enron, trying to shake investor jitters over a possible downgrade of its credit worthiness and their unease over the company's complex financial transactions, has seen its shares shed more than half their market value in the past week.

But the largest natural gas and electricity marketer in the United States is not alone in getting its wings clipped as energy prices come down and the market volatility that drove earnings last year eases.=20

While Enron's problems differ from more traditional utilities, many other power producers are returning to their roots. They are scrapping plans for splitting operations and questioning whether more risky overseas operations can be supported by lower prices brought on by a slowing economy.=20

Paul Patterson, an energy analyst with ABN Amro, said there are common themes affecting the industry.=20

"One is lower power prices and the margins that are associated with them. And two is lower stock prices and the ability to finance more asset driven growth," Patterson said.=20

As earnings fall and forward earnings guidance is revised downward, some power companies are seeking strategies to address the bleaker environment. And plans to spin off units have been postponed or called off.=20

Shares of Enron slid \$1.05, or 6.4 percent, to \$15.30 in afternoon trade on the New York Stock Exchange on Friday.=20

THE WORLD HAS CHANGED=20

AES Corp. , a global power producer whose earnings fell for a second consecutive quarter on a poor showing from operations in Brazil and Britain, said Thursday it would revamp its organization and did not rule out selling off assets.=20

"It's a different place," AES' chief executive officer Dennis Bakke said of the business climate facing utilities today compared with last year's powerful growth. On Friday, Constellation Energy Group , parent company of Baltimore Gas & Electric, scrapped plans to split its power generation and trading operations into two company because of economic changes. Constellation also hired a new chief executive and severed ties with Goldman Sachs, which planned to make an equity investment in the company.=20

"The utility industry and energy markets, and indeed the entire U.S. economy

y, have changed considerably in the past year. As a combined company, we will be better positioned to seize opportunities to grow and deliver," said Christian Poindexter, Constellation's chairman.

RETURN TO TRADITIONAL VALUES

Bakke said one prong of AES's brave, new world scenario was a renewed emphasis on the traditionally profitable, long-term contract generation business.

It makes sense for power generating companies to sign about 75 percent to 80 percent of their generating capacity into long-term contracts because it provides stability and a level of profitability in a period of flat growth, according to Gordon Howald, energy analyst with Credit Lyonnaise.

"Calpine does it already," he said, referring to the California-based independent power producer that has the lion's share of the power it generates contracted out. "What drove the valuations in all these companies last year was that power markets were very inefficient. Physical reserve margins were low. But with flat to down demand in 2001 - as it appears to be the case - there is very little to lead us to believe that power prices will be anywhere near that level," he added.

Howald said with all the new generation coming on, natural gas prices should remain high but power prices should come down further, squeezing spark spreads, or profit margins, for solely gas fired companies.

SMALLER COMPANIES ALSO RETHINK STRATEGIES

As lower power prices impact earnings, many power companies are turning back to U.S. markets to try to maximize their bottom line.

"Earnings for the quarter is not the big deal. The big deal is that for 2002 they are not going to earn as much as people expected. It's a downward revision of earnings guidance," said Patterson.

Michigan-based CMS Energy Corp. cut its earnings estimates for the second time to \$2 to \$2.05 for 2002, down from \$2.79 and said it would sell off certain overseas assets and focus future growth primarily in North America.

CMS, whose earnings were down for the third quarter, said it took a charge for planned divestitures, including discontinued South American energy distribution units as well as other international investments.

Allegheny Energy Inc. also changed its strategy after reporting a fall in third quarter earnings.

The Maryland-based company said while it is continuing to work towards getting necessary regulatory approvals for a initial public offering to hold its unregulated assets, it will not proceed with the offering at this time.

"The company will integrated until market conditions are such that demonstrated value can and will be created for shareholders," Allegheny said.

Enron seeks new credit line; reportedly for 1-2 bln usd

10/29/2001

AFX (AP)

Copyright 2001 AFX News; Source: World Reporter (TM)

NEW YORK (AFX) - Enron Corp is negotiating with banks for a new credit line, a spokesman told the Wall Street Journal.

The company is in talks to raise between 1-2 bln usd and is likely to close a deal within days, it quoted officials familiar with the matter as saying.

The deal, which is intended to head off a potential loss of investor and business confidence, would supplement existing lines. These are largely tapped out after Enron last week drew down about 3 bln usd to increase cash reserves and calm market fears.

Enron earlier this month announced a heavy third quarter loss and erosion of shareholder equity related to controversial transactions it had done with entities connected to its then chief financial officer, Andrew Fastow.

Enron Said Seeking New Credit Lines
BY LAURA MANDARO and ALISSA SCHMELKIN

10/29/2001

American Banker

31

Copyright (c) 2001 Thomson Financial, Inc. All Rights Reserved.

The Texas energy and telecommunications giant Enron Corp. was reportedly negotiating with its lenders about new credit lines Friday, a day after it drew down billions on its existing lines.=20

J.P. Morgan Chase & Co. and Citigroup Inc. are the two banking companies with the largest lending exposure to the \$67 billion-asset Houston company, with an estimated \$400 to \$500 million in bank debt outstanding "in addition to derivatives and other structured product exposures," according to Goldman Sachs Group Inc. analyst Lori Applebaum.

Morgan Chase and Citi were the book runners on a 364-day, \$2.25 billion loan facility to Enron that closed in May, according to Thomson Financial Securities Data. Credit Suisse First Boston was the sole bookrunner on a \$582 million loan to the company that closed in March and matures in March 2004, the data company said. Bank of America, Citigroup, and Deutsche Bank also participated, Securities Data said.=20

On Thursday, Enron issued a statement that "in order to dispel uncertainty in the financial community," it had drawn on its committed lines of credit to provide over \$1 billion of cash liquidity. The Wall Street Journal reported on Friday that Enron drew down about \$3 billion from a credit line and was in talks about obtaining a new multibillion-dollar line.=20

"We continue to have conversations new our creditors about new liquidity -- that's nothing out of the ordinary," said Enron spokesman Eric Thode.=20

The developments followed a \$638 million loss for the third quarter, the departure of Enron's chief financial officer, and a Securities and Exchange Commission inquiry.=20

Enron, a natural gas company that has broadened its focus to include energy trading, transport, risk-management, and telecommunications products and services, has relationships with banks that extend beyond credit lines.=20

"Citi, J.P. Morgan, and possibly Wachovia and Bank of America also invested along with Enron in some of its partnerships," said Ms. Applebaum. A spokesman for Morgan Chase confirmed that the bank was a lender but said he did not know the amount of its exposure.=20

Many other regional banks have participated in credit facilities to Enron. Bank of America Corp. is estimated to have about \$200 million to \$300 million of exposure; Bank One Corp. about \$100 million; and Wachovia Corp., SunTrust Banks Inc., and FleetBoston Financial Corp. about \$50 million each, according to Goldman Sachs estimates. Bank of New York has between \$50 to \$100 million of exposure, and Northern Trust, U.S. Bancorp and KeyCorp also have some lending exposure, Ms. Applebaum said.=20

Representatives of these banks would not comment on their relationships with Enron, or did not return phone calls by deadline.

USA: Enron in talks for \$1-2 bln credit line - WSJ.

10/29/2001
Reuters English News Service
(C) Reuters Limited 2001.

NEW YORK, Oct 29 (Reuters) - Energy trading giant Enron Corp. is negotiating with banks for a new credit line of between \$1 billion and \$2 billion and could close a deal within days, the Wall Street Journal reported in its online edition on Monday.=20

According to officials close to the situation, the new credit would supplement existing credit lines, largely tapped out after the company drew down about \$3 billion last week to increase cash reserves and calm jittery investors' fears, the Journal reported.

The paper said that an Enron spokesman had confirmed that the company is negotiating a new credit line, but could not supply any further details.=20

Confidence in Enron has been shattered following disclosures about its involvement in complex partnerships. Its stock has tumbled amid a U.S. Securities and Exchange Commission inquiry into the company's ousted Chief Financial Officer's links to some of the partnerships.

JAPAN: Japan's Teijin, Enron study coal-fired power plant.

10/29/2001
Reuters English News Service
(C) Reuters Limited 2001.

TOKYO, Oct 29 (Reuters) - Japan's major polyester manufacturer, Teijin Ltd =, said on Monday it would conduct a feasibility study with U.S. energy giant Enron Corp on building a coal-fired power plant.=20

Teijin said in a statement that it and E Power Corp, a Japanese affiliate of Enron Corp, would look into building the 70,000 kilowatt coal-burning thermal power plant in Matsuyama, Ehime prefecture, on the southwestern island of Shikoku, where Teijin has a polyester plant.

"We are beginning to consider selling surplus power to third parties other than our own plants, with eyes on further deregulation in Japan's power market," a Teijin spokesman said.=20

Japan is in the process of deregulating its power market. Since March last year, large-lot consumers have been free to choose their suppliers.=20

In its polyester business, Teijin has expanded overseas output while reducing domestic production, a trend which would leave it with surplus power. It is thus looking at how to make good use of any surplus.=20

The two firms were also considering expanding the capacity of Teijin's existing power generator in Matsuyama, Teijin said. It hopes to reduce costs at the inefficient small plant with the help of Enron.=20

Enron Corp said earlier this year it had presented plans to build a liquefied natural gas (LNG) fired power plant in northern Japan, aiming to become the first foreign company to build such a power plant in Japan.=20

The Teijin spokesman said the two firms hoped to conclude the feasibility study by June 2002.=20

Teijin's shares ended the day down 13 yen or 2.68 percent at 472 yen.

Enron, Teijin to Build Power Plant in Japan, Report Says
2001-10-28 23:39 (New York)

Tokyo, Oct. 29 (Bloomberg) -- Enron Corp. and Teijin Ltd. will jointly build a coal-fired power plant in southwestern Japan as early as 2004, the Nihon Keizai newspaper said on its wire

service, without citing sources.

Enron, the world's biggest energy trader, and synthetic-fiber maker Teijin will together spend 1 billion yen (\$8.16 million) to build the 70,000-kilowatt plant in Ehime, southwest of Tokyo, the report said.

Enron wants to eventually build bigger plants and sell electricity directly to large commercial users without going through exiting utilities, the report said.

Once-Mighty Enron Strains Under Scrutiny
By ALEX BERENSON and RICHARD A. OPPEL Jr.

10/28/2001
The New York Times
Page 1, Column 2
c. 2001 New York Times Company

IS time running out for Enron?=20

At the beginning of this year, the Enron Corporation, the world's dominant energy trader, appeared unstoppable. The company's decade-long effort to persuade lawmakers to deregulate electricity markets had succeeded from California to New York. Its ties to the Bush administration assured that its views would be heard in Washington. Its sales, profits and stock were soaring. And under the leadership of Jeffrey K. Skilling, its chief executive, Enron's arrogance had grown even more quickly.=20

The company, based in Houston, dripped contempt for the regulators and consumer groups that stood between it and fully deregulated markets -- for electricity, water and everything else. Everyone would win under deregulation, Enron said -- especially its shareholders, whose stock would soar as the company profited from creating new markets.=20

"We are on the side of angels," Mr. Skilling said in March, dismissing those who saw the company as a profiteer in California's energy crisis. "People want to have open, competitive markets. They want fair competition. It's the American way."=20

But less than a year later, everybody seems to have lost, especially Enron's investors. Enron's stock is plunging, and questions about its finances are mounting.=20

Some experts in the energy industry worry that if the crisis at the company worsens, trading in natural gas and electricity could be seriously disrupted and energy prices could grow more volatile. In a worst-case outlook, Enron could become the 2001 version of Long-Term Capital Management, the huge hedge fund whose collapse roiled financial markets during the fall of 1998.=

Enron's shares have fallen more than 80 percent this year, erasing \$50 billion in shareholder value.=20

Enron closed on Friday at \$15.40, down 95 cents, after hitting a 52-week low of \$15.04 earlier in the day.=20

The future of electricity deregulation is in doubt, thanks to blackouts and soaring power prices in California earlier this year -- a crisis that ended only when that state contradicted deregulation's basic tenets by intervening deeply in the power market. Enron's efforts to become a profit-making water supplier and to create a new market in broadband communications capacity have been expensive failures. In August, Mr. Skilling quit, forcing Kenneth L. Lay, his predecessor as chief executive and still Enron's chairman, to resume day-to-day control of the company.=20

The company declined to make senior executives, including Mr. Lay, available for comment, and asked that questions be submitted in writing. Mr. Skilli=

ng could not be reached.=20

Enron's problems boiled over earlier this month, when it disclosed that its shareholders' equity, a measure of the company's value, dropped by \$1.2 billion in the last quarter because of a deal disclosed only very hazily in Enron's regular financial statements. The Securities and Exchange Commission is looking into the company's financial reporting, and some investors question whether Enron has overstated profits at its primary business of trading electricity and natural gas.=20

THE slump in the company's shares accelerated after Enron revealed the fall in its shareholders' equity. On Wednesday, the company forced out its chief financial officer, Andrew S. Fastow, who is at the center of the controversy over Enron's confusing finances. The company, which six months ago seemed to be reaping billions of dollars from California's energy crisis, today faces a potential cash crunch.=20

The surprise about shareholder equity inflamed investors' smoldering concern about Enron's opaque financial statements. Now, with Wall Street analysts and bond-rating agencies demanding more information about the complex transactions that have fueled the company's profits, Enron has been reduced to issuing news releases assuring investors that it has adequate access to cash.=20

Enron does not appear to be in immediate danger of running out of cash. On Thursday, the company drew down a \$3.3 billion credit line it had previously arranged with a group of banks led by Citigroup and J. P. Morgan Chase, which have each extended at least \$400 million. But because of Enron's importance in the natural gas and electricity markets, industry experts say that any problem at the company could disrupt energy trading nationwide.=20

The supply of natural gas and electricity would probably not be affected even if the company failed, because Enron is mainly a trader, rather than a producer, of energy. But a crisis at the company might increase the volatility of energy prices, which have swung wildly in the last year.=20

Philip K. Verleger Jr., an energy-markets economist, emphasized that he thought Enron would survive this crisis. But he said it was not clear what would happen if Enron ran out of cash or if traders that use the company's EnronOnline Internet trading marketplace defaulted on their obligations.=20

'You suddenly have all these positions they have taken on there -- are they good? Are the firm's hedges good? What's the situation?' Mr. Verleger said. 'It's got everyone scared.'=20

In the short run, Enron's credit rating may be its biggest problem. If the company's rating falls below investment grade, Enron could be forced to issue tens of millions of shares of stock to cover loans that it has guaranteed. But creating new shares would make the shares that already exist less valuable, because those shares would no longer represent full ownership of the company.=20

A drop in the company's credit rating could also prompt other energy traders and producers to back away from doing business with Enron, hurting the company's sales and profits.=20

Enron's credit rating stands several notches above the critical point. But its bonds, which are publicly traded, have fallen so low that they are now offering interest rates of almost 10 percent, comparable with many junk bonds. Two of the three major credit-rating agencies, Moody's Investors Service and Fitch Investors Service, have put Enron's bonds on review for possible downgrades.=20

'The issue that's in the front of everybody's mind right now is credit,' said Mark Gurley, senior vice president and general manager for trading at Aquila Inc., one of the nation's largest energy traders. Aquila is based in Kansas City, Mo.=20

For now, Aquila and other major energy traders and producers, including Reliant Energy, the El Paso Corporation and Dynegy, are continuing to do business with Enron. And Mr. Gurley said that Enron's own trading in the electricity and natural gas markets did not suggest the sort of frenzied selling reminiscent of the collapse of Long-Term Capital Management in 1998.=20

'They haven't done anything trading-wise that gives me any indication they

are closing their books down," he said.=20

Still, some executives at other companies said they were looking more carefully at transactions with Enron, especially long-term contracts. They also said risk-management and credit officers were calling each other regularly to discuss the situation.=20

Mark Palmer, an Enron spokesman, said on Friday that no energy-trading company had stopped doing business with Enron. He declined to say whether any of the company's trading partners had suspended or altered credit terms. He said the company was continuing to see normal volumes of business.=20

But the crisis that Enron will face if its credit rating is downgraded is just a symptom of the bigger problem the company must confront. For years, the details of Enron's finances have been a mystery even to the Wall Street analysts whose job it is to follow the company, and to the investors who own its stock and bonds. When Enron's profits were soaring and it was creating lucrative new markets, shareholders did not seem to care about the impenetrability of its financial statements.=20

Now they do. Yet the company seems incapable of offering straight answers to the questions investors ask.=20

To others in the industry, the opaqueness of the company's financial statements parallels Enron's efforts to keep its energy-trading business lightly regulated and free of disclosure requirements. Though they do not expect Enron to crumble like Long-Term Capital Management, they say that, like the giant hedge fund, Enron uses a lot of debt, regulatory oversight is limited and outsiders have a difficult time figuring out its finances.=20

The most pressing concerns are a series of partnerships and trusts Enron created to move some of its assets and debt off its balance sheet. With names like Marlin and Osprey, the partnerships have at least \$3.3 billion in bonds outstanding, backed by assets like a stake in Azurix, Enron's water company subsidiary. Enron has promised that if the partnerships' debts exceed the value of their assets, Enron will issue enough new shares to make up the difference.=20

DEALS with partnerships formed by Mr. Fastow, who was chief financial officer when they were organized, led to the \$1.2 billion write-off in shareholders' equity that Enron announced last week. The company has offered only skimpy details of its transactions with those partnerships.=20

Enron ended its relationships with those partnerships in the last quarter, after being criticized by shareholders. In the process, it wrote off a promissory note that it had carried on its books, reducing its shareholders' equity by \$1.2 billion. But, because of complex accounting rules, the transaction was not apparent in Enron's quarterly earnings report.=20

The transaction disturbs investors because it suggests that Enron may have found a way to hide losses, throwing the accuracy of its financial statements into question. When Enron released third-quarter earnings on Oct. 16, it reported a loss from \$1 billion in write-offs on failed investments. The earnings statement did not mention the additional \$1.2 billion equity write-down. But the company said its core business had been solidly profitable, and its shares rose.=20

In a conference call with analysts after the announcement, Mr. Lay, Enron's chairman, also disclosed the reduction in shareholder equity. The reference was a brief one, however, and some listeners did not catch it. Those analysts were angered when they found out the next day what Enron had done, and many were confused by the accounting procedure. Enron's stock began to slide, and investors clamored for more information about the write-off. But so far, the company's efforts to clear up the situation have further unnerved investors.=20

Mr. Lay has met with investors during the last two weeks to try to explain the deals, but some on Wall Street say they have come away with doubts about Mr. Lay's grasp of the situation. They say that the two people at Enron who appear to have been most knowledgeable about the deals -- Mr. Skilling and Mr. Fastow -- have both left the company.=20

In an interview in late August, Mr. Lay said he did not know some details about the deals involving Mr. Fastow. In response to one question about them=

, he said, "'You're getting way over my head.'"=20
Mr. Palmer of Enron disputed any suggestion that Mr. Lay did not have a grasp of the investments at issue, saying Mr. Lay was handicapped in talking about them because of the S.E.C. investigation. "There is not a whole lot we can say, or should say, about them," Mr. Palmer said. He also said the company expected to generate about \$3 billion in cash through asset sales by the end of next year.=20

In a conference call on Tuesday, analysts pressed Mr. Lay and other top Enron executives to reveal more information about the LJM write-down and its other partnerships. Instead, they offered only vague explanations of the deal, leaving Wall Street worried that more write-offs might be coming.=20

David Fleischer, a Goldman, Sachs analyst and a longtime supporter of the company, was among those who came away concerned. "If Enron is unable to clarify its off-balance-sheet transactions and restore confidence in the very near term by assuring investors that no more surprises are forthcoming that would affect the balance sheet or liquidity position, then the company will likely lose access to the capital markets," he wrote in a research note after the call.=20

To try to reassure investors, Enron said late Thursday that EnronOnline, its Internet-based trading exchange, executed more than 8,400 trades that day, a higher-than-normal volume.=20

"We know we have our work cut out for us if we are to rebuild our credibility with the investment community -- and we're working on that," Mr. Lay said in a statement. "But in the meantime, the best evidence of our strength is the willingness of customers to bring their business to Enron."=20

But those reassurances apparently are no longer enough for Wall Street. Enron's stock tumbled almost 6 percent Friday, to its lowest levels in six years.=20

Now analysts are scrambling to figure out the extent of Enron's off-balance-sheet debt and to assess the risk that the company will have to issue new shares to make good on its partnership guarantees.=20

Carol Coale, an analyst at Prudential Securities in Houston, calculates that Enron may have close to \$9 billion in off-balance-sheet debt. She said that Enron had for two years been trying to sell about \$6 billion in foreign assets -- including properties in Latin America and a power plant in India -- embroiled in a dispute with the state government -- and she worries about those prospects for sale in light of Enron's problems and the souring economy.=20

"As Enron is forced to sell assets to keep the ratings agencies off their backs, they may have to write those assets down," Ms. Coale said. On Wednesday, she downgraded her rating on Enron to "sell" from "neutral."=20

"The bottom line is, it's really difficult to recommend an investment when management does not disclose the facts," Ms. Coale said.=20

Short-sellers, who attacked Enron's accounting even before the company disclosed the write-off, say the company's problems may run even deeper than analysts fear. Enron may have used the partnerships not just to finance money-losing investments but to hide losses in its core trading business, they say.=20

"The company still isn't disclosing enough to know whether the core business, the trading business, is profitable," said Mark Roberts, director of research at Off Wall Street, which recommended shorting Enron's stock on May 7, when it stood at \$59.43. "The issue remains: why are they doing these transactions? Our theory has been that the core operations aren't that profitable."=20

James Chanos, a leading short-seller who has bet that Enron's stock will fall, said, "Is Enron booking gains when it has real profits, but hiding the losses when deals go against it?" Mr. Palmer of Enron said the company stood by its reported energy-trading profits.=20

Even traders at other energy companies say they do not have a clear picture of Enron's positions. Enron maintains that it is in no danger of being wiped out by a sharp move in electricity or gas prices because it keeps its trading book balanced -- meaning the energy it has agreed to sell is offset, =

in roughly equivalent amounts, by energy it has agreed to buy.=20
''With these guys, they tell us -- and all you've got is their word -- that= they're hedged,' said Mr. Verleger, the economist.=20
IN fact, Enron has lobbied forcefully over the years to limit regulation and disclosure of its trading operations. Last year, the company successfully= lobbied Congress to effectively ensure that its Internet-trading platform = would be exempted from regulation by the Commodity Futures Trading Commissi= on.=20

Enron and other power traders do file limited information in reports to the= Federal Energy Regulatory Commission, the agency that oversees wholesale e= lectricity and natural gas markets. But the commission does not keep track = of specific transactions and prices.=20

Large-scale energy trading has existed for only about a half-dozen years. E= nron pioneered the business, and now dominates it, accounting for about one= -quarter of all trading in the United States.=20

Before Congress and federal regulators opened up the market for wholesale e= lectricity, a process that began in earnest a decade ago, the power busines= s was a simpler affair. Utilities were given areas of monopoly service, and= their rates -- and ability to deliver enough electricity -- were overseen = by state regulators. But with the move to deregulate the business, independ= ent and unregulated generators and traders have flourished, providing an ev= er-growing portion of the nation's power.=20

Beginning in the 1980's, the sale and transportation of natural gas was als= o deregulated, spurring Enron, which used to be primarily a gas-pipeline co= mpany, to move into the trading business.=20

The company's shift to trading gas and electricity accelerated in the mid-1= 990's, with the ascension of Mr. Skilling, who became chief executive in Fe= bruary, just six months before his unexpected resignation. Underscoring the= change in direction, in securities filings this year Enron described its p= rincipal business as ''security brokers, dealers and flotation.'' Before, i= t had said it was in the business of ''wholesale-petroleum and petroleum pr= oducts.''=20

For most of its ascent, Enron reported outstanding profit figures and Wall = Street accepted them with pleasure. A year ago, when it disclosed the first= transactions with partnerships led by Mr. Fastow, the company's former chi= ef financial officer, analysts who asked questions were told that the deals= were routine and were being disclosed only because of Mr. Fastow's involve= ment.=20

Enron does not appear to face an immediate cash crunch. But the bank credit= lines that it drew on last week to pay off its short-term debt will have t= o be renegotiated next spring. The controversial partnerships do not have t= o pay their debts until the following year -- unless Enron loses its invest= ment-grade credit rating before that.=20

ENRON will also need to maintain its large trading positions, which could s= uffer if participants in those markets grow more nervous about Enron's cred= it. When Long-Term Capital was stumbling in 1998, some Wall Street rivals s= old the securities they thought Long-Term owned, trying to force Long-Term = to sell its positions quickly and at a loss. Something similar in energy ma= rkets might be possible. If so, Enron might find, as Long-Term did, that po= sitions that should offset each other do not.=20

Enron's new chief financial officer may yet persuade investors that in fact= the company's profits are real, and that its condition is better than the = short-sellers believe. As questions are answered, confidence, and the share= price, could rebound.=20

But for now, investors are skittish, and some competitors are eager to take= advantage of Enron's plight.

Photos: Enron, which is building a new headquarters in Houston, grew with d= eregulation. But with deregulation in doubt, Enron stock has dropped. (Phil= lippe Diederich for The New York Times); Enron owns 65 percent of the power= plant in Dabhol, India, but has had trouble collecting payments. Plumbing Mystery Of Deals By Enron
By FLOYD NORRIS

10/28/2001
The New York Times
Page 13, Column 6
c. 2001 New York Times Company

AT the heart of the sudden collapse in investor confidence in the Enron Cor= poration are unusual trades it entered into with partnerships led by its ch= ief financial officer, Andrew S. Fastow, beginning in the summer of 1999. B= ecause they were transactions among related parties, the company was requir= ed to disclose them, but the disclosures raised as many questions as they a= nswered. Following are some questions that investors are asking, and the cu= rrently available answers.=20

Q. Why did Enron enter into the deals?

A. Enron's first disclosures, in 1999, gave no reason. In later reports, it= said it was seeking to 'hedge certain merchant investments and other asse= ts,' by which it apparently meant investments in technology and telecommun= ications companies.=20

Q. How did those investments do?=20

A. It looks as if they plunged in value, although there is no clear disclos= ure on that.=20

Q. Why can't that be discerned?=20

A. The company never said just what the investments were. And the transacti= ons with the partnerships were complicated, involving a variety of derivati= ve securities, Enron stock and various promissory notes. Enron's financial = disclosures do not provide enough information to understand the arrangement= s completely.=20

Q. Why were they so complicated?=20

A. One reason may have been to use accounting rules to its advantage. One a= ccounting rule dictates that companies may not record profits or losses on = transactions in their own stock. If a company sells its shares at \$10 each = and then buys them back -- whether for \$1 or \$50 -- there is no gain or los= s. But shareholder equity does go up or down on the balance sheet -- in tha= t case reflecting how much extra cash the company took in, or paid out, on = the transactions. Enron's transactions appear to have been structured to fa= ll under that rule.=20

Q. Who made money from these transactions?=20

A. Enron reported some profits along the way from the deals, although not a= ll of the profits were spelled out in its quarterly filings. And it appears=

that the partnerships distributed money to investors.=20

Q. If the deals began in 1999, why all the uproar now?=20

A. Many investors and analysts were not curious about them when everything seemed to be going well. As long as Enron was exceeding its forecasted profits each quarter, they were willing to assume that what was not being disclosed was not really important.=20

Q. When were concerns raised with Enron?=20

A. The complaints grew as Enron's share price fell earlier this year. By this summer, Enron decided that Mr. Fastow would sell his stake in the partnerships. Then, because the partnerships would no longer be considered related to Enron, the company would no longer have to disclose anything about the transactions. But investors were still worried, and Enron later closed out its deals with the partnerships.=20

Q. How did Enron do?=20

A. Badly. It took a \$35 million loss, which, given the size of the transactions involved and the previous profits taken, was not very much. But it also reduced shareholder equity by \$1.2 billion.=20

Q. How did that happen?=20

A. That, like so much else, is not clear. But it looks as if the partnership owed Enron that much money, could not pay and was let off the hook by Enron. In return, Enron terminated "previously recorded contractual obligations to deliver Enron shares in future periods." Enron treated that like a share buyback, even though the shares in question had not been issued, and determined that there was no need to treat it as a loss that would reduce reported earnings.=20

Q. Is that legal under the accounting rules?=20

A. Presumably it is. But Enron's limited disclosures make it impossible to say for sure. Enron may have discovered ways to use the accounting rules to enable it to keep losses off income statements, while leaving profits on them. That may become clearer when the Securities and Exchange Commission, which has begun preliminary inquiries, completes its work. FLOYD NORRIS

Investors Seem to Ignore Discouraging News

By MICHAEL BRICK

10/28/2001

The New York Times

Page 17, Column 3

c. 2001 New York Times Company

Investors sent stocks markedly higher last week, despite reports on the economy and corporate profits that were resoundingly poor.=20

The Dow Jones industrial average, strengthened by triple-digit rallies on Monday and Thursday, ended the week nearly back to its level of Sept. 10, one day before the attacks on the World Trade Center and the Pentagon. Broader indicators ended slightly higher than they were on Sept. 10.

Investors overcame their initial discouragement about reports that orders for durable goods and sales of existing homes were deteriorating faster than expected. They also seemed unfazed by reports of corporate profits declining from a year ago, at some companies by more than 30 percent.=20

All the bad news, investors seemed to surmise, meant that the government was more likely to act aggressively in stimulating the economy, with tax breaks, spending and lower interest rates.=20

The Dow average gained 341.06, or 3.7 percent, to close at 9,545.17. The Nasdaq composite index rose 97.65 points, or 5.8 percent, to 1,768.96. The Standard & Poor's 500-stock index rose 31.13, or 2.9 percent, to 1,104.61.=20

Enron Asks Banks for More Credit After Stock Slide, FT Reports 2001-10-28 20:20 (New York)

Houston, Oct. 28 (Bloomberg) -- Enron Corp., the largest energy trader, asked banks to provide further credit after tapping a \$3.3 billion credit line last week to bolster investor confidence, the Financial Times reported, citing company sources.

Enron's stock has fallen more than 50 percent since Oct. 17 when an investor sued the company for conflict of interest over transactions with affiliates run by Enron's former Chief Financial Officer Andrew Fastow.

The company has been shut out of the leading market for low-interest, short-term loans since announcing Oct. 16 it would take a \$1.01 billion special charge and write down shareholders' equity by another \$1.2 billion, the FT said.

Enron spokesman Mark Palmer said he hoped the company would announce the new financing facility in coming days, the newspaper said.

Enron Asks Banks For Additional Credit -FT

Dow Jones Energy Service

(Copyright (c) 2001, Dow Jones & Company, Inc.)

NEW YORK -(Dow Jones)- Enron Corp. (ENE) is attempting to persuade banks to provide additional credit, The Financial Times reported on its Web site Sunday.=20

The company was also due to hold a special board meeting Sunday to consider confidence-building measures after surprise financial disclosures damaged its reputation among U.S. investors, The Financial Times reported.

The Financial Times quoted Enron spokesman Mark Palmer as saying he hoped the company could have something to announce in coming days as a result of its latest effort to "establish additional lines of liquidity."=20

"Once we are able to the liquidity position shored up, that will put a lot of fears of the unknown to rest," The Financial Times quoted Palmer as saying.

The vote is in. Lockheed Martin Corp. won the coveted right to build the nation's next-generation fighter aircraft, beating out Boeing Co. for what could be the biggest military contract ever.=20

Culminating a five-year battle between two of the world's largest defense contractors, Pentagon officials picked Lockheed Martin to begin development of the Joint Strike Fighter, with plans to purchase 3,000 of the planes at a cost of more than \$200 billion.

With the potential for foreign sales topping another \$200 billion, the contract is considered the most lucrative in U.S. history. "This really is the contract of the millennium," said Christopher Hellman, analyst with the Center for Defense Information. "Nothing has or will come close."=20

Peter Pae=20

Ford Settles Lawsuit Over Faulty Part=20

In the largest automotive class-action settlement in history, Ford Motor Co. will reimburse customers who paid hundreds of millions of dollars to replace a faulty part that caused their vehicles to stall.=20

It was uncertain how many consumers would qualify for reimbursements in the range of \$160 apiece.=20

The settlement caps six years of litigation. Plaintiffs' lawyers said the cost to Ford would be as high as \$2.7 billion.=20

Myron Levin=20

AMR Posts Record Loss in Quarter=20

Even though more Americans are flying again, the airline industry continues to reel and its problems are expected to worsen this holiday season.=20

AMR Corp., the parent of American Airlines, the world's largest airline, posted a record loss for the third quarter, even after getting \$508 million in federal financial aid.=20

Although the number of passengers has kept growing each week since the Sept. 11 attacks, about 20% fewer people are flying.=20

Less than a month before the busy Thanksgiving weekend, American Airlines says advance bookings for November are down 6% from a year earlier.=20

Meanwhile, the airlines are now reporting a little-noticed aspect of the go-

vernment rescue package: They have to pay federal taxes on the cash grants.=20

James F. Peltz=20

ITC Says Imports Hurt Steel Industry=20

The International Trade Commission ruled that foreign imports pose a serious threat to the domestic steel industry, paving the way for punitive sanctions that are likely to raise steel prices and intensify trade tensions with Europe and Asia.=20

The independent U.S. agency has until mid-December to provide the White House with a list of proposed remedies, which could include import quotas or hefty tariffs on foreign steel.=20

Beleaguered U.S. steelmakers applauded the decision.=20

President Bush, who instigated the ITC investigation, is expected to approve the protective measures, though critics warn they could harm a weakened domestic economy and complicate efforts to launch a new round of global trade talks.=20

Evelyn Iritani=20

Shares of Enron Plummet Amid Losses=20

Enron Corp.'s stock was pummeled by investors following disclosures of losses and shrinking shareholders' equity related to failed investments and a complicated hierarchy of limited partnerships used to shelter some Enron assets.=20

The stock slide was compounded by disclosure of a Securities and Exchange Commission inquiry into two of the partnership arrangements and by Wall Street worries about future cash flow and credit problems that might be caused by the investment vehicles.=20

Two conference calls with analysts and investors failed to calm nerves, and several analysts lowered their recommendations on Enron.=20

Enron has reiterated that its finances are strong. And although analysts note that Enron's core businesses remain sound, some analysts doubt that the usually taciturn company has revealed all of its problems.=20

To mollify investors, Enron replaced its chief financial officer, who until recently headed the two partnerships the SEC is eyeing.=20

Nancy Rivera Brooks=20

Pentagon OKs Northrop Bid for Newport News=20

Northrop Grumman Corp. was all but assured of winning the bid to acquire Newport News Shipbuilding Inc. as the Pentagon endorsed the deal and the Justice Department, citing antitrust concerns, blocked a rival bid by General Dynamics Corp.=20

It marked a stunning turn of events for Northrop, which got the nod to acquire the Virginia builder of nuclear submarines and aircraft carriers despite having been the underdog.=20

The Los Angeles-based defense contractor made an unsolicited offer for Newport News after the shipbuilder had inked a \$2.1-billion deal with General Dynamics.=20

Separately, Northrop said third-quarter earnings fell 22% because of a large drop in pension fund investments.=20

Peter Pae=20

Hollywood Production Jobs Fall to 4-Year Low=20

Skittishness following the Sept. 11 terrorist attacks has exacerbated an already slow season in Hollywood, pushing employment in the movie, television and film industry to a four-year low in September, state statistics show.=20

Cutbacks and delayed projects by the major studios has trickled down through the industry, leading to a spate of layoffs at small companies that provide equipment and services for the industry.=20

Meg James=20

Grammy Officials Urge Greene Settlement=20

High-ranking officials at the Grammy organization recommended a settlement of more than half a million dollars to resolve sexual assault and battery allegations against the nonprofit group's chief executive, C. Michael Greene, Grammy sources said.=20

The proposed settlement, subject to approval by the group's board of directors, has ignited an internal revolt, with at least a dozen of the 41 trustees privately calling for Greene's firing, the sources said.=20
Greene declined to comment. Attorneys for the Grammy nonprofit group previously denied that Greene assaulted or had any sexual contact with Jill Geimer, the Grammy executive who has threatened to sue over Greene's alleged misconduct.=20

Chuck Philips=20

EMI Ousts Record Label Executive Nancy Berry=20

British music conglomerate EMI Group sacked Nancy Berry, the vice chairwoman of its worldwide Virgin Records division.=20

Berry's exit came a week after the London-based record company ousted its global record chief, Ken Berry, who is Nancy Berry's former husband.=20

The shake-up follows a dispiriting period for EMI, including a disastrous sales debut from pop icon Mariah Carey, who suffered a nervous breakdown months after signing an \$80-million contract with the company this year. Nancy Berry spearheaded the elaborate marketing campaign for Carey's album, "Glitter," which has sold fewer than 400,000 copies since its Sept. 11 debut.=20

Jeff Leeds=20

Management Buyout of G&L Realty Approved=20

Stockholders of G&L Realty Corp. approved a management-led buyout of the real estate investment trust despite a higher offer by a rival group and concerns that the deal unfairly favors top executives.=20

The company's co-chairmen, Daniel Gottlieb and Steven Lebowitz, plan to take the small Beverly Hills-based company private after a majority of shareholders backed their \$12-a-share offer.=20

The management-led offer triggered a shareholder lawsuit this year that claimed G&L's board breached its fiduciary duty=20

Jesus Sanchez=20

Internet Archive Turns Back Web Pages of Time=20

The nonprofit Internet Archive launched its so-called Wayback Machine, allowing Web surfers to check out most Internet sites that have vanished and older versions of sites that are still around.=20

The San Francisco effort is the brainchild of Brewster Kahle, a millionaire technologist who wants to preserve the Internet's ephemera for generations to come.=20

Like many Internet pioneers, however, Kahle faces unfamiliar risks along with the opportunities: the archive might be the most massive violation of copyright law since ownership rights over words came into being.=20

More than 10 billion pages are available at <http://web.archive.org>.=20

Joseph Menn=20

Job Cuts, Make-Over in Store for Sears=20

Sears, Roebuck & Co. is getting a new look, borrowing from competitors that have been biting into Sears bottom line.=20

In a bid the company says will increase operating income by \$1 billion during the next three years, Sears will look more like a mass merchant, with more self-serve areas and centralized checkouts.=20

As part of its financial realignment, Sears will cut 4,900 jobs in the next 18 months.=20

The company's challenge, analysts say, is to offer something unique within its niche of serving middle-income consumers--an ever difficult proposition against innovative rivals such as Kohl's and Target.=20

Ralph Bivins

Devon Energy makes building its own with major lease

RALPH BIVIN

Staff

10/28/2001

Houston Chronicle

2 STAR

10

(Copyright 2001)

HOUSTON is known as the "Energy Capital of the World." And a glance around the downtown skyline proves the nickname is appropriate. Houston skyscrapers bearing the names of Enron, Chevron, Exxon and Shell make significant contributions to the view.

Now another name is being added to the downtown mix, enhancing the energy capital image even further. The 36-story Two Allen Center has been renamed Devon Energy Tower.

Devon Energy has just signed a lease for 193,000 square feet of space, more than doubling its presence in the building, and as part of the deal, Devon gets to put its name on the structure.

The lease also gives Oklahoma City-based Devon the right to take more space in the 1 million-square-foot building, at 1212 Smith St.

Devon recently announced its plans to acquire Mitchell Energy & Development, but it will maintain Mitchell's offices in The Woodlands, said Klay Kimker, manager of office administration for Devon.

Kevin Snodgrass and Tim Relyea of Cushman & Wakefield represented Devon in the transaction. Paul Frazier and Margaret Sigur negotiated the deal on behalf of TrizecHahn Office Properties, the owner of the building.

TrizecHahn owns both the Allen Center and Cullen Center office complexes, a total of 6 million square feet of space in downtown. The TrizecHahn office space is nearly full right now, but Enron will be vacating large amounts of space there next year when the nearby Enron building is complete.

Teamsters to build facilities

Teamsters Union officials are planning to build new headquarters facilities after the union sells its building on the Katy Freeway.

To replace the Katy Freeway building, the union expects to build two smaller structures near Bush Intercontinental Airport to house different chapters, said A.W. Parker, secretary treasurer of Local 968.

Parker's group is expecting to build a 13,000-square-foot building at Ella Boulevard at Beltway 8.

Another Teamsters group has purchased 4.5 acres on Beltway 8 at Diplomatic Plaza Drive, in the World Houston Business Center. The land was purchased from the Licha Family Trust. Tony Patronella and Marc Drumwright, both of Southwest Realty Advisors, handled the sale.

Chicago firm buying property

A Chicago real estate investment firm is on a quest to acquire suburban office buildings in Houston.

ML Capital Ventures has purchased two small office structures: the 71,736-square-foot building at 5500 Northwest Central Drive and the 66,338-square-foot building at 5301 Hollister. The building on Northwest Central Drive is the headquarters of BJ Services energy company.

Mike Luecht, president of ML Capital, said his firm will acquire two additional Houston office buildings before the end of the year.

ML Capital, which has been in business for eight months, will exceed Luecht's initial plan to buy more than \$22 million worth of suburban office space in Houston in the company's start-up phase.

Luecht said his firm was bullish on two types of real estate: buying warehouses in Chicago and buying office buildings in suburban Houston. Houston's economy has been adding jobs and it is a promising market that is overlooked by many investors, Luecht said. Many investors have been too slow to forge

et the devastating meltdown of Houston realty market in the 1980s, Luecht said.=20

In its most recent deal, ML Ventures bought the 5500 Northwest Central building in partnership with Avgeris & Associates of Chicago. Tom Bousquet of CB Richard Ellis brokered the deal.=20

Woodlands opens new section=20

Several \$1 million home sites go up for sale this weekend as The Woodlands opens a new section of its Carlton Woods gated community.=20

The premium lots will be facing the new Jack Nicklaus Signature golf course.=20

Custom lots will range in price from \$150,000 to \$1 million and range in size from one-fifth of an acre to two-and-three-fourths acres.=20

The Carlton Woods community is the first gated community in The Woodlands and has been well received by upper-end home buyers, said Paul Lazzaro, vice-president of marketing for The Woodlands.=20

Thirty-two homes are under construction in Carlton Woods and all of them are priced at more than \$1 million.=20

A total of 208 lots have been sold in Carlton Woods, which opened about a year ago.

Enron Taps All Its Credit Lines To Buy Back \$3.3 Billion of Debt

By FLOYD NORRIS

10/27/2001

The New York Times

Page 2, Column 5

c. 2001 New York Times Company

The Enron Corporation, trying to reassure investors that it has ample liquidity, began to repurchase all its outstanding commercial paper yesterday, using \$3.3 billion it borrowed from banks by depleting its lines of credit.=20

An Enron spokesman said that when the commercial paper repurchases are comp=

leted the company will retain more than \$1 billion in cash.
The moves did not appear to reassure investors, as Enron's share price fell to another six-year low. Shares traded as low as \$15.04 yesterday, before ending the day at \$15.40, down 95 cents.
The move will raise the interest expense for the company, because banks normally charge more than companies have to pay in the commercial paper market, and because its outstanding debt will rise by the additional \$1 billion.
Enron's debt is rated investment grade. But its bonds now trade below investment grade levels, although not so low that it appears investors fear an early default. But with the bonds trading so low, it is unlikely Enron will be able to sell more commercial paper.
Enron's stock has been plunging since Oct. 17, shortly after it disclosed that its third-quarter balance sheet, which has yet to be released, will show a \$1.2 billion reduction in shareholder equity as a result of complicated transactions involving partnerships formerly controlled by Andrew Fastow, who was the company's chief financial officer until he was replaced on Wednesday.
The stock has lost more than half its value since the earnings announcement, and the company has disclosed that the Securities and Exchange Commission has asked questions about its accounting practices.

COMPANIES & FINANCE INTERNATIONAL - Enron's bond prices drop to warning levels.
By ROBERT CLOW, SHEILA MCNULTY and JENNY WIGGINS.

10/27/2001

Financial Times

(c) 2001 Financial Times Limited . All Rights Reserved

Enron, the Houston-based energy trading group, continued to pay a heavy price for its lack of financial transparency yesterday as its bond prices plummeted.

Investor confidence in Enron has declined sharply since the company announced a \$1.2bn reduction of shareholder equity stemming from a complex off-balance sheet structure. The Securities and Exchange Commission has also launched an informal investigation into the company's finances.

Enron's five-year bonds were trading yesterday at 77 cents in the dollar with a yield of 11.13 per cent, down from 83 cents on Thursday. Bond prices at these levels normally suggest that investors expect a company to file for bankruptcy.

Late on Thursday, Enron announced that it would draw on its bank lines to buy back its outstanding commercial paper after two ratings agencies put the company on negative watch.

Commercial paper financing, which normally has to be rolled every 90 days, is one of the first forms of financing to disappear in a crisis.

"What they want to do is assure their clients and other trading partners that they are creditworthy and continue with business," said Robin West, chairman of the Petroleum Finance Company, the industry consultants. "In a situation like this, cash is king."

Enron's biggest immediate business risk is that its major trading counterparties, such as Duke Energy and Reliant Resources, start asking it for more collateral, increasing the cost of its everyday business.

If Enron were downgraded to junk, the counterparties could do just that. So far, credit rating analysts say, Enron's core business is holding up well. But their actions over the past few days acknowledge that the company could still be severely damaged by the scandal.

Enron has long faced criticism of its opaque financial reporting, but its m=

ost recent problems stem from the LJM private equity fund run by Andy Fastow, the company's former chief financial officer.
Enron compensated its partners in this complex off-balance sheet structure by promising to give them Enron shares, if the value of private equity investments in The New Power Company, technology and other things fell below a certain level.
Those investments fell \$1.2bn in value from the threshold level, which should have triggered the issue of 62m shares if the deal had not been reversed.
The complex deal was designed to make sure Enron did not experience the same balance sheet volatility that JP Morgan Chase and others have suffered from marking their private equity investments to market.

Enron taps credit line; stock slides

10/27/2001
Associated Press Newswires
Copyright 2001. The Associated Press. All Rights Reserved.

HOUSTON (AP) - After Enron Corp. tapped into more than \$3 billion in credit in an effort to boost confidence of investors and customers, stock prices were dropped.
Enron Corp.'s stock price hit its lowest point in more than five years Friday. Shares fell 95 cents on Friday to \$15.40, a level not seen since 1995, as analysts continued to muddle through a complicated series of bookkeeping issues revealed after the company's earnings announcement earlier this month.
The stock is down more than 50 percent in two weeks, and the company lost almost \$14 billion in market value.
Late this week the company decided to convert \$3 billion in revolving credit it has through various banks into cash. The company put about \$1.1 billion in the bank in an effort to reassure business partners and investors of its liquidity and is using the \$2.2 billion balance to begin an orderly repurchase of a certain kind of short-term corporate IOU known as commercial paper.
"Nothing spells confidence quite like cash, which is what we want investors to understand," said Enron spokesman Mark Palmer of the \$1.1 billion banked this week.
Palmer could neither confirm nor deny that the company is negotiating further

er lines of credit with banks but described such actions as "good management decisions."=20

On Oct. 16 Enron's third-quarter earnings release drew renewed attention to an issue investors and analysts had previously been unhappy about: Then-Chief Financial Officer Andrew Fastow, with the Enron board's approval, had formed and run two investment partnerships that could have created a conflict of interest.=20

The partnerships, LJM Cayman and LJM2 Co-Investment, did complex financing and hedging deals with Enron.=20

Fastow had resigned from his roles in the partnerships months ago when Wall Street began to question whether he could watch out for the interests of Enron's shareholders and the investment partnership simultaneously. But last week when the company reported a \$35 million loss related to ending its LJM ties as well as a \$1.2 billion reduction in shareholder equity, new questions began to arise.=20

The Securities and Exchange Commission's Division of Enforcement launched an informal inquiry into the partnerships, and earlier this week Fastow was put on a leave of absence.=20

Reducing the company's debt exposure through commercial paper and putting it back into more traditional financial tools, like a revolving line of credit, could give great peace of mind to Enron's investors, said Anatol Feygin, an analyst with J.P. Morgan.=20

"It helps them shore up their support behind their energy trading business, which is really the core of their operations," Feygin told the Houston Chronicle for Saturday's editions.=20

Carol Coale, an analyst with Prudential Securities, still sees the move as somewhat confusing.=20

"Just last week they were touting their unused lines of credit as a plus, but the fact that they tapped those now sends a strange, mixed message," she said. "Do they need the cash to keep the rating agencies off their back? Is it a gesture for customers? It first struck me as another one of these strangely timed actions on the part of management."

Enron Decline Continues
Bloomberg News

10/27/2001
Los Angeles Times
Home Edition
C-2

Copyright 2001 / The Times Mirror Company

HOUSTON -- Enron Corp. bonds and shares fell after the largest energy trader tapped a \$3-billion credit line because it has been shut out of the leading market for low-interest, short-term loans.=20

The company's stock has fallen 54% in the last 14 days after investors questioned its transactions with affiliates run by Enron's former chief financial officer. The shares fell 95 cents, or 5.8%, to \$15.40 on the New York Stock Exchange.

Investors said Chief Executive Kenneth Lay has failed to reassure them that the company's credit rating won't be cut. Enron can no longer borrow in commercial paper markets, where short-term loans carry lower rates than banks offer.=20

"Do they have the financial flexibility they once had? No," said John Cassidy, who helps manage \$3 billion in bonds at Fifth Third Bancorp. "People are questioning the credibility of management."=20

The company will use its credit line to pay off \$2.2 billion in commercial paper it has outstanding, Enron spokesman Mark Palmer said.=20

The price of Enron's 6.75% bonds, which mature in 2009, declined 11/2 point=

s to a bid of 84 cents on the dollar and an offer of 86 cents. At that price, the bonds, which carry a rating of BBB+, yield 9.53%.=20
Investors have grown concerned that the firm's credit rating will be cut after \$1.01 billion in third-quarter losses from failed investments. Enron needs good credit to raise cash daily to keep trading partners from demanding collateral and to settle transactions.=20
Enron's decision to tap its credit line was "a smart financial move," said Stephen Moore of Moody's Investors Service. "It took away the hassle and time-consuming nature of rolling commercial paper and insured access to capital."

Enron Corp.'s stock price hit its lowest point in more than five years Friday after it tapped into more than \$3 billion in revolving credit in an effort to re-assure investors and customers.=20

Shares fell 95 cents on Friday to \$15.40, a level not seen since 1995, as analysts continued to muddle through a complicated series of bookkeeping issues revealed after the company's earnings announcement earlier this month. =
The stock is down more than 50 percent in two weeks, and the company lost almost \$14 billion in market value.

Late this week the company decided to convert \$3 billion in revolving credit it has through various banks into cash. The company put about \$1.1 billion in the bank in an effort to reassure business partners and investors of its liquidity and is using the \$2.2 billion balance to begin an orderly repurchase of a certain kind of short-term corporate IOU known as commercial paper.=20

"Nothing spells confidence quite like cash, which is what we want investors to understand," said Enron spokesman Mark Palmer of the \$1.1 billion banked this week.=20

Palmer could neither confirm nor deny that the company is negotiating further lines of credit with banks but described such actions as "good management decisions."=20

Enron's most recent woes began Oct. 16 when its third-quarter earnings release drew renewed attention to an issue investors and analysts had previously been unhappy about: Then-Chief Financial Officer Andrew Fastow, with the Enron board's approval, had formed and run two investment partnerships that could have created a conflict of interest.=20

The partnerships, LJM Cayman and LJM2 Co-Investment, did complex financing and hedging deals with Enron and were formed originally as a way to offset risks associated with some of the company's newer businesses such as broadband and trading.=20

Fastow had resigned from his roles in the partnerships months ago when Wall Street began to question whether he could watch out for the interests of Enron's shareholders and the investment partnership simultaneously. But last week when the company reported a \$35 million loss related to ending its LJM ties as well as a \$1.2 billion reduction in shareholder equity, new questions began to arise.=20

The Securities and Exchange Commission's Division of Enforcement launched an informal inquiry into the partnerships, and earlier this week Fastow was put on a leave of absence.=20

Now Enron will begin repurchasing its commercial paper. This is a way for companies to raise money over a short period at rates that are usually slightly better than what banks offer, and often with more flexible terms.=20

"To some extent, redeeming the commercial paper is at the expense of the capital markets, which look at it negatively," said Anatol Feygin, an analyst with J.P. Morgan.=20

But reducing the company's debt exposure through commercial paper and putting it back into more traditional financial tools, like a revolving line of credit, could give great peace of mind to Enron's investors, he said.=20

"It helps them shore up their support behind their energy trading business, which is really the core of their operations," Feygin said.=20

Carol Coale, an analyst with Prudential Securities, still sees the move as somewhat confusing.=20

"Just last week they were touting their unused lines of credit as a plus, but the fact that they tapped those now sends a strange, mixed message," she said. "Do they need the cash to keep the rating agencies off their back? Is it a gesture for customers? It first struck me as another one of these strangely timed actions on the part of management."=20

Jeff Dietert, an analyst at Simmons & Co., said Enron management needs to continue to make clear the issues that have investors confused and concerned.=20

In a worst-case scenario, investor fears could create a vicious cycle that continues to drive the stock down, which would force bond rating agencies to consider downgrades of Enron. That could lead to lower credit ratings, which would force Enron's energy trading partners to limit their exposure to the company and cut back on business with it.=20

"Thus, we see a big incentive for Enron to clarify the issues," Dietert wrote in a report Friday. "Our gut feel is that Enron can pull it off."=20

Feygin said he also believes the company will continue to do better in revealing its financial dealings but thinks there may be more surprises in store.=20

For example, a Wall Street Journal article Friday discussed for the first time another business entity with ties to Enron known as Chewco. It was formed in 1997 with about \$400 million in financial backing to buy interests in unnamed Enron assets.=20

Chewco was run by Michael Kopper, a managing director of Enron's Global Equity Markets Group.

Enron says Microsoft breached contract
Staff

10/27/2001

Houston Chronicle

3 STAR

2

(Copyright 2001)

Enron Corp. filed suit against Microsoft Corp. in state district court in Houston this week, claiming the software giant breached a contract over a new high-speed Internet service.=20

The companies entered into an agreement last June in which Enron would provide Internet bandwidth to Microsoft as it rolled out its MSN Broadband service. Enron's broadband network would link MSN customers in over two dozen states, including Texas.

Qwest Communications is providing the Internet infrastructure in 14 other states for MSN.=20

On Oct. 23, Microsoft said that Enron would have breached the contract if it didn't provide an operational bandwidth system by Oct. 25, according to Bloomberg News. In the lawsuit, Enron claims Microsoft failed to deliver the ordering and billing system it needed to deliver its end of the project's first phase.=20

The lawsuit appears to be blocking the launch of the MSN service in all but the 14 states served by Qwest.=20

Enron officials declined to comment. A Microsoft spokesman said the company had not reviewed the filing but was "confident that we have upheld our agreement with Enron."

How to Lose a War

By Frank Rich

10/27/2001

The New York Times

Page 19, Column 2

c. 2001 New York Times Company

Welcome back to Sept. 10.=20

The "America Strikes Back" optimism that surged after Sept. 11 has now been stricken by the multitude of ways we're losing the war at home. The F.B.I. has proved more effective in waging turf battles against Rudy Giuliani than waging war on terrorism. Of the more than 900 suspects arrested, exactly zero have been criminally charged in the World Trade Center attack (though one has died of natural causes, we're told, in a New Jersey jail cell). The Bush team didn't fully recognize that a second attack on America had begun until more than a week after the first casualty. The most highly trumpeted breakthrough in the hunt for anthrax terrorists -- Tom Ridge's announcement that "the site where the letters were mailed" had been found in New Jersey -- proved a dead end. And now the president is posing with elementary-school children again.

Given that this is the administration that was touted as being run with C.E.O. clockwork, perhaps it should be added to the growing list of Things That Have Changed Forever since Sept. 11. But let's not be so hasty. Not everything changes that fast -- least of all Washington. The White House's home-front failures are not sudden, unpredictable products of wartime confusion but direct products of an ethos that has been in place since Jan. 20.=20

This is an administration that will let its special interests -- particularly its high-rolling campaign contributors and its noisiest theocrats of the right -- have veto power over public safety, public health and economic prudence in war, it turns out, no less than in peacetime. When anthrax struck, the administration's first impulse was not to secure as much Cipro as speedily as possible to protect Americans, but to protect the right of pharmaceutical companies to profiteer. The White House's faith in tax cuts as a panacea for all national ills has led to such absurdities as this week's House "stimulus" package showering \$254 million on Enron, the reeling Houston energy company (now under S.E.C. investigation) that has served as a Bush campaign cash machine.=20

Airport security, which has been enhanced by at best cosmetic tweaks since Sept. 11, is also held hostage by campaign cash: As Salon has reported, ServiceMaster, a supplier of the low-wage employees who ineptly man the gates, is another G.O.P. donor. Not that Republicans stand alone in putting fat cats first. In a display of bipartisanship, Democrats -- lobbied by Linda Hall Daschle, the Senate majority leader's wife -- joined the administration in handing the airlines a \$15 billion bailout that enforces no reduction in

the salaries of the industry's C.E.O.'s even as they lay off tens of thousands of their employees.=20

To see how the religious right has exerted its own distortions on homeland security, you also have to consider an administration pattern that goes back to its creation -- and one that explains the recent trials of poor Tom Ridge.=20

Mr. Ridge is by all accounts a capable leader -- a successful governor of a large state (Pennsylvania) who won the Bronze Star for heroism in Vietnam.=

A close friend of George W. Bush, he should have been in the administration from the get-go, and was widely rumored to be a candidate for various jobs, including the vice presidency. But after being pilloried by the right because he supports abortion rights, he got zilch. Instead of Mr. Ridge, the administration signed on the pro-life John Ashcroft and Tommy Thompson -- who have brought us where we are today.=20

The farcical failures of these two cabinet secretaries are not merely those of public relations -- though Mr. Thompson often comes across as a Chamber of Commerce glad-hander who doesn't know his pants are on fire, and Mr. Ashcroft often shakes as if he's not just seen great Caesar's ghost but perhaps John Mitchell's as well. Both have a history of letting politics override public policy that dates to the start of the administration. They've seen no reason to reverse their partisan priorities even at a time when the patriotic duty of effectively fighting terror should be their No. 1 concern.=

=20

Pre-Sept. 11, Mr. Thompson, in defiance of science, heartily lent his credibility to the Bush administration's stem cell "compromise" by going along with its overstatement of the viability and diversity of the stem cell lines it would deliver to researchers. Post-Sept. 11, he destroyed his credibility by understating the severity of the anthrax threat, also in defiance of science. Now he maintains that the \$1.5 billion the administration is requesting to plug the many holes in our public health system -- almost all of it earmarked for stockpiling pharmaceuticals, not shoring up local hospitals -- is adequate for fighting bioterrorism. This, too, is in defiance of all expert estimates, including that of the one physician in the Senate, the Republican Bill Frist.=20

It should also be on Mr. Thompson's conscience that for the first two weeks of the anthrax crisis he kept the federal government's house physician -- David Satcher, the surgeon general and a much-needed honest broker of public health -- locked away, presumably because Dr. Satcher, a Clinton appointee, became persona non grata in the Bush administration for issuing a June report on teenage sexuality that angered the religious right. Only after Mr. Ridge arrived on the scene was the surgeon general liberated from the gulag.=20

As for Mr. Ashcroft, he has gone so far as to turn away firsthand information about domestic terrorism for political reasons. Planned Parenthood, which has been on the front lines of anthrax scares for years and has by grim necessity marshaled the medical and security expertise to combat them, has sought a meeting with the attorney general since he took office but has never been granted one. This was true not only before Sept. 11 but, says Ann Glazier, Planned Parenthood's director of security, remains true -- even though her organization, long targeted by such home-grown Talibans as the Army of God, has a decade's worth of leads on "the convergence of international and domestic terrorism."=20

Ms. Glazier found the sight of Mr. Ashcroft and other federal Keystone Kops offering a \$1 million reward for anthrax terrorists a laughable indication of how little grasp they have of the enemy. "Religious extremists don't respond to money," she points out. Such is the state of the F.B.I., she adds, that one agent told a clinic to hold onto a suspect letter for a couple of days "because we have so many here we're afraid we're going to lose it" (perhaps among the Timothy McVeigh documents).=20

If either the attorney general or the secretary of health and human services inspired anything like the confidence that, say, Mayor Giuliani does, there wouldn't have been a need to draft Mr. Ridge. Even so, he's mainly a P.R.=

. gimmick -- a man who should have been in the administration in the first place reduced to serving as a fig leaf for lightweights. As director of homeland security, he's allegedly charged with supervising nearly 50 government agencies -- so far with roughly a dozen staff members. When asked to define Mr. Ridge's responsibilities, Ari Fleischer said on Wednesday that it was "a very busy coordination job," but so far Mr. Ridge is mainly sowing still more confusion.=20

The one specific duty that he has claimed -- in an interview with Tom Brokaw -- was that he'd be the one "making the phone call" to the president to shoot down any commercial airliner turned into a flying bomb by hijackers.=

That presumably comes as news to Donald Rumsfeld, who made no provision for any homeland security czar in the Air Force chain of command he publicly codified days after Mr. Ridge's appointment.=20

Since the administration tightly metes out the news from Afghanistan, we can only hope that the war there is being executed more effectively than the war here -- even as Mr. Rumsfeld and his generals now tell us that the Taliban, once expected to implode in days, are proving Viet-Cong-like in their intractability. The Wall Street Journal also reported this week that "instead of a thankful Afghan population, popular support for the Taliban appears to be solidifying and anger with the U.S. growing."=20

Maybe we're losing that battle for Afghan hearts and minds in part because the Bush State Department appointee in charge of the propaganda effort is a C.E.O. (from Madison Avenue) chosen not for her expertise in policy or politics but for her salesmanship on behalf of domestic products like Head & Shoulders shampoo. If we can't effectively fight anthrax, I guess it's reassuring to know we can always win the war on dandruff.

City - Enron directors cash in shares.

By Simon English.

10/27/2001

The Daily Telegraph

P31

(c) Telegraph Group Limited, London, 2001

LEADING executives at Enron, the troubled US energy giant, cashed in shares worth more than \$100m (£70m) this year in the run-up to a financial crunch that has left the company's credibility in ruins.=20

Research by Thomson Financial shows that Kenneth Lay, chief executive, sold about 400,000 shares this year, netting him more than \$25m. He still held 2.8m shares until July.

Other executives made similar sales, a revelation likely to anger investors who have seen the shares fall from \$83 at the start of the year to \$45 by July. They halved again this week and fell to below \$16 yesterday. Enron declined to comment on the share sales.=20

Mr Lay said in a statement that he is seeking to "dispel uncertainty in the financial community" by drawing on lines of credit to restore faith in Enron's financial strength. Enron will pay off debts of \$2.2 billion and keep another \$800,000 in cash. He said: "We know we have our work cut out for us if we are to rebuild our credibility with the investment community."=20

The company is facing an inquiry by the Securities & Exchange Commission into partnerships managed by Andrew Fastow, former chief financial officer.=20

Mr Fastow was ousted on Wednesday night as part of the company's moves to restore confidence, though Enron insists he has done nothing wrong.=20

Enron lost \$1 billion in the third quarter on what it has called "failed investments".

INDIA: Lenders to meet over Enron's Dabhol on Nov 3.

10/27/2001

Reuters English News Service

(C) Reuters Limited 2001.

BOMBAY, Oct 27 (Reuters) - Lenders to power plant in India majority owned by Enron Corp have called a meeting next week in London to discuss ways of reviving the beleaguered project, a banking source said on Saturday.=20

They will examine offers that two Indian companies have put forward for buying the U.S. energy giant's 65 percent stake, and those of two other U.S. firms, in Dabhol Power Company (DPC), which is building the controversial project, the source told Reuters.

The meeting of lenders, who include multinational banks such as Citibank and Bank of America, will be held on November 3, the source added.=20

At stake is not just the fate of the \$2.9 billion, 2,184 MW project, which is India's largest foreign direct investment, but also the over \$600 million investment of Enron, General Electric Co and Bechtel.=20

All three companies are founders of DPC, which in 1995 got permission from India's Maharashtra state government to set up the plant on its coast.=20

The plant's first phase of 740 MW was completed in 1999, but work on the second phase of 1,444 MW, which is 97 percent complete, was abruptly stopped in June this year following a blazing row with cash-strapped state utility MSEB.=20

MSEB, which agreed in 1995 to take the plant's entire output, said it can no longer do so because Dabhol's power is too costly.=20

Dabhol, in turn, accused MSEB of defaulting on its monthly payments and served a preliminary notice to terminate the power purchase contract.=20

Under this notice, both companies are given six months time to settle the matter through negotiations. If talks fail, Dabhol has the right to issue a final termination notice and take the matter to arbitration in London. That six month period expires on November 19.=20

Houston-based Enron, which owns 65 percent of Dabhol, further announced that it intends to exit the project and offered to sell its equity to the Indian government.=20

TIME RUNNING OUT=20

The Business Standard newspaper reported that next week's meeting would also discuss a request by Dabhol to finally terminate the contract after November 19.=20

"It is one of the items on the agenda," the paper quoted a senior banker as saying.=20

The paper said once Dabhol serves the final notice, the matter proceeds to arbitration, which would not help India.=20

"The widespread view among the government and lenders is that in such a situation DPC will win hands down," the paper added.=20

A Dabhol spokesman could not be contacted immediately.=20

The source said the meeting would review the progress made in resolving the dispute so far.=20

The Indian government has not responded to Enron's offer to buy its equity, but two Indian companies, BSES Ltd and Tata Power Ltd, have shown interest.=20

They have agreed to take over the project if the cost is reduced, and if the founders agree to sell their stake at a discount.=20

Local business daily, the Economic Times reported on Friday that Tata Power and BSES are willing to pay the founders \$450-\$600 million for the 85 percent stake held by Enron, GE and Bechtel.=20

Enron has rejected the offer and is not ready to settle for anything less than

han \$1 billion, the paper added.=20
Officials of Tata Power and BSES were not immediately available for comment.=20
(\$1=3D48.00 Indian rupees).

Enron sues Microsoft for breach of contract ; Move could block high-speed s=ervice

The Associated Press,Bloomberg News

10/27/2001

The Seattle Times

Fourth

E4

(Copyright 2001)

HOUSTON -- Enron has sued Microsoft, alleging it breached a contract for br=oadband services, in a move that could temporarily block the largest softwa=re company's MSN high-speed Internet service in some U.S. regions.=20

Microsoft said the dispute temporarily blocks the company from providing th=e high-speed service in areas where Enron provides broadband access, leavin=g MSN fully operational only in the 14 states -- including Washington -- wh=ere Qwest Communications International operates, said Bob Visse, director o=f marketing for MSN.

Enron's lawsuit was filed Thursday, the same day Microsoft had planned to o=ffer fast Internet access in 45 cities to give it access to potential custo=mers in 29 million homes. Microsoft, the No. 2 U.S. Internet provider, is m=aking a push to win customers from AOL Time Warner.=20

"We are trying to resolve the issues with Enron, as quickly as possible and=at the same time we are evaluating other providers," Visse said.=20

Enron spokeswoman Karen Denne declined to comment on the lawsuit, citing co=mpany policy on pending litigation. Enron, based in Houston, is the largest=energy trader.=20

Enron in June signed an agreement with Microsoft to provide bandwidth for M=SN Internet service. Under the agreement, Enron isn't required to deliver o=perational broadband services if Microsoft hasn't first provided a billing =and ordering system, Dow Jones news wire reported.=20

Enron claims in its lawsuit that Microsoft failed to deliver the ordering a=nd billing system required in the initial phase of the deal, Dow reported.=20

Alternative browser-users denied Microsoft entry=20

NEW YORK -- Microsoft's premier Web portal, MSN.com, denied entry to millio=ns of people who use alternative browser software such as Opera and told th=em to get Microsoft's products instead.=20

The decision led to complaints from the small but loyal Opera community tha=t Microsoft was abusing its status as the Internet's browser leader. Micros=oft later backed off and said yesterday that it would support the other bro=wsers after all.=20

Browser products affected by the shutout, which was triggered by a face-lif=t of the MSN.com Web site, included Opera, Mozilla and Amaya, said Kevin Re=ichard, editorial manager for Internet.com's BrowserWatch site.=20

Mike Pettit, president of ProComp, an anti-Microsoft group, urged state and=federal investigators to look into the matter as part of its lawsuit accus=ing Microsoft of anti-competitive practices.=20

-- The Associated Press=20

MicrosoftSF to shut down; Sony will run retail store=20

SAN FRANCISCO -- Sony will take over a retail store it manages with Microso=ft next month, when the biggest software maker's Xbox goes up against Sony'=s PlayStation 2 in a contest for control of the \$20 billion video-game mark=et, a Sony spokeswoman said.=20

The two companies agreed to shut down MicrosoftSF, a retail outlet in Sony's San Francisco Metreon entertainment complex. It will be replaced with a Digital Solutions electronics store run by Sony on Thursday, Metreon spokeswoman Kirsten Maynard said.=20

In April 1998, the companies said they would open the store that displays and sells Microsoft products alongside Sony electronics that run the software. In March 2000, Microsoft announced the Xbox, a game console with an advanced-graphics chip that goes on sale Nov. 15.=20

"A lot has changed with both companies," Maynard said. "It sort of became not-a-fit anymore."=20

Sony Metreon won't carry the Xbox or Game Cube, a new video console from Nintendo that goes on sale Nov. 19, she said. Officials at Microsoft couldn't be reached for comment on the shutdown.=20

Michelle,

It has been more difficult than expected to get a map with the power plant locations. I will send you a map of the area with a general idea of the plant locations. I will continue to work on finding a better way to make the exact locations.

Roger

Roger,
Please send me maps of your PG&E system. They can be mailed to:
Michelle Lokay, c/o Enron, P. O. Box 1188, Houston, Texas 77251-1188.
These will be beneficial in our evaluation of future opportunities.
Thanks and again, we enjoyed meeting with you guys last Tuesday.

Michelle Lokay
Account Director

My physical hedge strips are not matching sitara for San Juan and Permian. Please check the positions for DEC and take a look at how all of the transport is booked.

Thanks,
Mike

Subject:

I have stranded all the transport to the border out of Keystone for the month of December.

The transport volumes that have been taken out are as follows:

22,836 - Keystone --> Socal Ehrenburg

11,418 - Keystone --> Socal Ehrenburg (this is the Mexican de Cobra deal). Previously Mexican de Cobra was buying the gas from Texaco. Starting in December, Mexican will have to find another supply for this gas. They will no longer buy from Texaco. Phil Polsky is talking with Mexican, and a deal will be entered into. Sitara, once Mexican has found a supply. So as of now, the 11,828 supply coming into Keystone for this deal is not in the system.

3975 - Keystone --> Socal Topock

AirTran Airways today launched a special one-day sale for travel from Philadelphia. This sale on seven-day advance purchase tickets is valid to all cities served by AirTran Airways from Philadelphia. These fares are available for purchase for one day only, Tuesday, November 27, 2001, with all travel completed by March 13, 2002. These fares are discounted up to 65 percent from AirTran Airways' everyday affordable fares. Like all AirTran Airways fares, they require neither roundtrip purchase nor a Saturday night stay. You can save an additional five

dollars on sale fares by booking through <http://www.airtran.com>.

Sample one-way sale fares (travel may originate in either city):

	Sale Fare	airtran.com fare with \$5 discount
Philadelphia - Atlanta	\$44	\$39
Philadelphia - Bloomington/Normal	\$64	\$59
Philadelphia - Chicago (Midway)	\$54	\$49
Philadelphia - Dallas/Fort Worth	\$64	\$59
Philadelphia - Fort Lauderdale	\$54	\$49
Philadelphia - Fort Myers	\$64	\$59
Philadelphia - Greensboro/High Point/Winston-Salem	\$64	\$59
Philadelphia - Gulfport/Biloxi	\$64	\$59
Philadelphia - Houston (Hobby)	\$64	\$59
Philadelphia - Jacksonville	\$64	\$59
Philadelphia - Memphis	\$64	\$59
Philadelphia - Miami	\$64	\$59
Philadelphia - Minneapolis/St. Paul	\$64	\$59
Philadelphia - Moline/Quad Cities	\$64	\$59
Philadelphia - Myrtle Beach	\$64	\$59
Philadelphia - New Orleans	\$64	\$59
Philadelphia - Orlando	\$54	\$49
Philadelphia - Pensacola	\$64	\$59
Philadelphia - Pittsburgh	\$34	\$29
Philadelphia - Raleigh-Durham	\$64	\$59
Philadelphia - Savannah/Hilton Head	\$64	\$59
Philadelphia - Tallahassee	\$64	\$59
Philadelphia - Tampa	\$54	\$49
Philadelphia - Toledo	\$64	\$59

Book online today at <http://www.airtran.com> and save! Once you have booked your airfare, click on the Hertz link to get the great low AirTran Airways' rate on Hertz Rental Cars. You'll save on the ground once you land.

Rules and restrictions: All fares are one-way. All fares are non-refundable and a \$50 fee per person applies to any change made after purchase plus any applicable increase in airfare. Seven-day advance purchase required. Tickets must be purchased by November 27, 2001, and travel must be completed by March 13, 2002. Seats are limited, subject to availability and may not be available on all flights. Blackout dates are as follows: December 22, 23, 26, 27, 2001, and January 2, 3, and February 15, 18, 2002. Fares, routes and schedules are subject to change without notice. Fares do not include per-segment tax of up to \$3.00. A segment is defined as one takeoff and one landing. Airport Passenger Facility Charges of up to \$18.00 are not included.

As a subscriber to AirTran Airways' Net Escapes, we send you regular updates on our Internet specials. If you need to contact us for any other reason, please call us at 1-800-AIR-TRAN, or in Atlanta call 770-994-8258. Please note that any reference to Net Escapes fares, Feature City fares, or bonus discounts for booking online may ONLY be purchased on our web site, <http://www.airtran.com>.

As most of you know, American Airlines Flight 11 from Boston to Los Angeles was hijacked yesterday and then crashed into the north tower of the World Trade Center in New York. We are very sorry to report that we believe an Enron employee was on board that flight. Nick Humber, a director in Enron Wind's commercial origination group, was listed on the flight's manifest, and although his family has not received official confirmation that he boarded the flight, they have been unable to contact him. Nick was based in Boston and was traveling to Los Angeles for a meeting. We have talked with Nick's family and offered our full support. Please continue to keep Nick's family and everyone affected by this horrific event in your thoughts and prayers.

Subject: RE: Heartland Steel exposure at COB Jan. 24, 2001

Jason,

There is a net receivable of about \$75,000. Do I remember you saying yesterday that your mark-to-market exposure calculation is including the contract termination fee or not? Chuck Jacobs was given this \$890,930 number. It was included in the Jan invoice, but HS did not pay it. This fee was never entered in Sitara and Unify never generated an invoice for it. So, we won't see that as an outstanding receivable in SAP. Does this number get included? Please see my attachment and call if you need anything else. One more issue, there is approximately \$92,177.09 (11,319.01 on sale side & \$80,858.08 on the purchase side) that we owe them for rol adjustments on MGT following Jan 24. My thought is that this number should be included during negotiations on a final number. Do you want backup (pipe support) showing this credit is in fact valid?

Thanks,
Valerie

Subject: Heartland Steel exposure at COB Jan. 24, 2001

John, Valerie and Lisa -

I have run the calculations on Heartland Steel's mark-to-market exposure as of close of business on January 24, 2001. The figure I have calculated is \$1,078,209.

Please note that this number does not represent the entire termination payment. We also need to include the net payable/receivable as of COB 1/24/01 to determine the complete termination payment. I recall that we had a net receivable from Heartland, but I do not recall the amount. It should have been somewhere in the neighborhood of \$700,000 (~\$305,000 for December gas and ~\$395,000 for January gas to that point). Valerie, can you pull records to indicate what the receivable was on that date?

Please call me if you have any questions.

The terminated contracts with RMTC are now fixed receivables as of the early termination date of December 14, 2001 except for interest. NNG is owed \$4.8mm and T

W is owed \$33.9mm. Amounts are past due.

Definitions:

Physical deals modeled in the Caminus Zainet system are deals which have some form of price risk, (i.e. Index to index deals, and anticipated fuel sales) This does not include standard transport and storage agreements or unhedged natural positions.

P&L Daily: Daily change in the mark-to-market (MTM) valuation of all deals being tracked in the Caminus Zainet system. This includes the origination and changes in value for both the physical and financial sides of hedges, along with any speculative trades and floating unhedged physical positions.

VaR is "Value at Risk": Enron Corp policy defines this as the maximum expected one day loss on the portfolio given a 95% statistical confidence interval. This number is currently calculated on the Caminus system using a variance covariance methodology, rather than a Monte Carlo simulation per the Enron Corp policy.

Hunter, the meeting went well. We met with Bryan Murtagh (UBS attorney) and did an overview of the contract services we are looking to set up with the pipes, how those are utilized and some of the underlying risks/exposure of using these contracts. Basically the message was these are non-negotiable contracts, he seemed to understand that and didn't indicate this would require any major legal review from their side. We also had a discussion about the credit requirements and what some of the pipes are asking for. Follow up credit meeting to take place today to get into some greater detail and get a standard credit package together. Also UBS did indicate that they also want to do a credit review of the pipes before moving forward. To facilitate that we gave them a list of the Day 1 pipes to start their process.

In summary, I don't believe there will be any challenge on us entering into these agreements nor a lengthy review by the UBS attorneys. The credit issue is big, need to have them expedite their review of pipelines and also recognize our need to satisfy the pipeline credit requirements for a new customer (standard credit package and any additional requirements). Also need some definitive answers on when we can actually send this information out (is it now or is it when the deal closes). Suzanne is going to a legal meeting this AM to discuss/recap where everything is at this point in time. I will forward any additional information to you when I get it. This assumes the Power of Attorney issue will be settled shortly for contract execution.

Bob

We are pleased to present you with a 2001 Special Stock Option Grant Award. As a participant in this grant you have the opportunity to share in the ownership of Enron and the potential profit from increases in the value of Enron's common stock.

The 2001 Special Stock Option Grant was made to let you know how valuable you are and to recognize your contributions in making Enron the great company it is today. Although there are no guarantees as to Enron's future stock performance, we believe that an Enron stock option has tremendous future growth potential. The value you ultimately receive from your options will depend on the price of Enron stock at the time you exercise your options.

You can access your 2001 Special Stock Option Grant Agreement and the Stock Plan document governing the grant via your eHronline account on the intranet website at <http://ehronline.enron.com>. Unlike stock options granted in the past a copy of your grant agreement will not be mailed to your home address.

Additionally, the following information regarding the 2001 Special Stock Option Grant can be found on the HR website <http://hrweb.enron.com>.

? 2001 Special Stock Option Grant Highlights
? 2001 Special Stock Option Grant Frequently Asked Questions (FAQs)
? A "How to Exercise Options" document that contains contact information and PaineWebber forms applicable to your stock options

Please take time to review this material. It is important to us and to you. If you have any questions, please contact your Human Resources representative.

Dear Kam,

The Oracle Power database has been moved. The Excel Applications which are involved with the database need to be modified. So does your PCs' setting.

Please let us know when we can go to your desk for the changes. The time only needed < 20 minutes.

Thanks!

Min Zheng

It appears that the following email may not have been clear. You have to copy a ll documents yourself.

This is my cheat sheet if it helps:

H Drives:

1. Each person will have to move any data over personally from the old H drive (which is now Z:) drive to their new H drive.
2. The Z: drive (old H:) will be removed from UBS employees on Thursday night.

0 Drives:

1. For the old O or M drives go to O:\ESTATE\ O (or M ? pending location of data) and copy to the new common O. The Estate O and M will be removed from UBS employees on Thursday night.

Do not delete anything and only copy information which is complies with the policy. Please make sure that those people who are not in the office are contacted and comply.

Louise

To: All Enron Employees Transferring to UBS Warburg Energy (or its affiliates)

Under the terms of the various agreements among certain Enron entities and UBS AG, certain Enron data and documents may be provided to UBS. To ensure compliance with those agreements, Enron's document retention policy, as well as directives of various investigative agencies, the attached protocol regarding the process for migration of any information or data to UBS has been developed.

Please review the protocol carefully. Then, complete the attached Certification and return it, with attachments, to Linda Guinn at EB 3829a no later than February 11, 2002.

Questions about this matter may be directed to Michelle Cash at (713) 853-6401 or Francisco Pinto-Leite at (713) 345-7942 .

Day-After Doldrums

Western traders lucky enough to be back in the office the day after Christmas were greeted by rising day-ahead prices for the Thursday through Saturday package, largely due to anticipated load increases later in the week. Most parties, however, described post-holiday electricity trading on Wednesday as "thin and illiquid," especially for forward goods. Some players also attributed a bit of the daily strength to higher spot gas prices. Speaking of gas, NYMEX Henry Hub futures contracts rose sharply in early Wednesday trade amid forecasts calling for colder weather in the Midwest and Northeast, but fell late on a rash of profit taking. January Hub gas rose to a session high of 3.02\$/mmBtu, before profit taking caused prices to tumble, settling at 2.911\$/mmBtu, a rise of 1.6 cents from Friday's close. The January contract expires on Thursday. February contracts ended the day 4.8 cents higher at 2.937\$/mmBtu. NYMEX said it would extend Thursday's session by 15 minutes to 14:45 EST due to the late release of the AGA inventory report. Because of the Christmas holiday, the AGA will be releasing its weekly report at 14:00 PST on Thursday. Early estimates were calling for a draw of 50 to 75 bcf last week, well above the 175-bcf draw seen last year, and the five-year average draw of 140 bcf. Milder weather this year has kept withdrawals to a minimum and stocks near historically high levels.

Some Northwest daily dabblers said that Wednesday trading was relatively active, "for the day after Christmas," while others said that modest loads and abundant hydro had most parties well covered for the three-day piece. Nonetheless, peak power prices for the Thursday through Saturday package rose as much as 4\$/MWh on an anticipated increase in loads later in the week. Heavy load energy at the Mid-Columbia traded from 23 to 25\$/MWh, with most trades occurring between 23.5 and 24.5\$/MWh. Light load goods rose by an average of 2.5\$/MWh, with confirmed transactions from 19 to 21\$/MWh. Flow forecasts for Chief Joseph remained healthy, coming in at 105 kcfs Thursday, 95 kcfs Friday, 75 kcfs Saturday, 60 kcfs Sunday, 85 kcfs New Year's Eve, 50 kcfs New Year's Day, and 100 kcfs next Wednesday. The latest six-to-ten from the NWS was calling for above-normal temperatures in the region's major load centers for the first week of the New Year.

Peak power prices for the Thursday/Friday/Saturday package firmed up across the Golden State on Wednesday. An increase in off-line megawatts, a lack of liquidity in thin trading, and sharply increased spot-gas prices were the biggest factors in the price jump, according to California market players. Peak-hour prices at California hubs increased from 2.25 to 5.25\$/MWh for the three-day package, but off-peak hours did not necessarily reflect the increase. Bucking the statewide trend, off-peak pieces at SP-15 traded slightly lower than on Friday, ranging from 13.6 to 16.75\$/MWh. Players at the hub cited "getting caught with power on our hands that we had no choice but to sell." In the news, on Monday a U.S. Bankruptcy Court approved PG&E Corp.'s agreement to pay off the \$265 million in outstanding power bills to Calpine Corp. Starting Monday and continuing through November 2002, PG&E will make monthly payments of principal and interest to Calpine. As for unit news, generation was perhaps the most tumultuous factor in the power market over the long Christmas weekend. On Saturday, December 22, there were 4 new outages, three of which were planned. Etiwanda #3 and #4 (320 MW each) came off line on Saturday as planned, as did Duke's 336 MW Morrow Bay

#4. Helms PGP #3 (404 MW) tripped off line with an unplanned outage but came back a day later. There were two planned outages on Sunday the 23rd: Alamitos #4 (320 MW) and Morrow Bay #3 (337 MW), the latter of which came back on line on Wednesday December 26. On Christmas Day, Los Medanos (550 MW) was curtailed for the second time in less than a month with an unplanned outage, and was running at 36% of capacity as of this writing. The Sutter Plants (546 MW) were ramping up towards full power, and stood at 525 MW at 11:15am PST Wednesday.

Spot electricity prices in the Southwest displayed the largest gains in the West on Friday, primarily due to rising spot gas prices, and an expected increase in loads for later in the week. Peak power at Palo Verde gained as much as 6.25\$/MWh for the three-day combo, with confirmed trades anywhere between 26 and 30\$/MWh. Most deals were done on the lower end of that range, with the highest prices seen late, when a few shorts reportedly entered the market. Light load goods at the Southwest hub gained an average of 2.75\$/MWh to trade from 15.25 to 18.25\$/MWh. In unit news, Mohave #1 (790 MW) finally returned to the grid over the long weekend, after coming down for tube leak repairs back on December 15. "That must have been one hell of a leak," joked one marketer. The five-day outlook for the Phoenix area called for daytime highs in the mid to upper 60s, with overnight lows in the mid to low 40s. "Down here 40s seem pretty cold, and they have been giving us some pretty healthy morning and evening peaks," said one Southwest trader. The latest six-to-ten from the NWS was calling for above-normal temperatures in Arizona and normal conditions in New Mexico from January 1 through 5.

Patrick O'Neill and David Ramberg

Eastern Markets Pre-Scheduled Firm Power Prices (\$/MWh)

December 26, 2001 for December 27, 2001

Peak (Heavy) in \$/MWh

	Low	Change	High	Change
Into Cinergy	22.00	0.00	27.00	2.00
Western PJM	26.00	1.50	26.50	1.25
Into Entergy	23.50	1.50	25.50	1.50
Into TVA	24.00	2.00	25.50	3.00

With temperatures across the Eastern Interconnect firmly entrenched in below-normal territory and increasing numbers of businesses reopening for the post-Christmas pre-New Year's slack period, day-ahead prices at all major hubs strengthened over prices seen on Friday. Nevertheless, many traders were sitting out the year-end market at home or on vacation, and the traders manning the daily desks reported few trades at any hubs. Forecasts for the entire East called for increased heating demand through the New Year, though continued healthy generation managed to keep a lid on the market's high end. On NYMEX, Henry Hub natural gas contracts nudged up slightly. The January contract clung to early gains despite late profit-taking to close up 1.6 cents at 2.911\$/mmBtu, while the February piece gained 4.8 cents, settling at 2.937\$/mmBtu.

Traders at Western PJM reported very light trading their first day back at work after the Christmas holiday, with prices for Thursday goods fluctuating slightly between 26 and 26.5\$/MWh. LMPs likewise reflected the quiet atmosphere on the Eastern seaboard, with power averaging 15.58\$/MWh over the course of the day. The high of 24.2\$/MWh was reached between 09:30 and 10:30 EST, where actual load exceeded predictions by a sliver. Still, prices were around 1.25-2\$/MWh higher than they were on Friday, thanks in large part to the cooling that has gripped the region. Temperatures were hovering near freezing through much of Western PJM, with the five-day forecast calling for temperatures to remain below normal plus a chance of snow through Sunday December 30. The latest six-to-ten echoed the prediction, extending below-normal temperatures through January 5. There were no reported unit outages in PJM on Wednesday.

Temperatures were the leading impulse in ECAR markets on Wednesday, with highs in the region failing to reach even freezing, and the latest five-day forecast calling for more of the same plus a chance of snow or snow flurries from Wednesday through Sunday. As a result, Into Cinergy pieces traded as high as 27\$/MWh, a two-dollar increase on the high end, but flat on the low at 22\$/MWh. "With so few businesses opening over the holiday slack-time, there just wasn't enough demand to push up prices, despite the colder weather," remarked one trader. "But," he added, "more businesses will be opening as the week drags on, and if this kind of weather continues into the New Year, we could see some real strength in the market." The latest six-to-ten proved encouraging for such an outcome, calling for temperatures to remain below normal through January 5. There were no new unit outages reported on Wednesday in ECAR.

SERC was no exception to the general condition of the Eastern markets on Wednesday: temperatures were well below normal, in many cases below freezing at night, and demand was light due to the small number of businesses open between the two big December holidays. Prices at Into Entergy showed modest gains, trading between 23.5 and 25.5\$/MWh. "There wasn't much going on in Entergy today," commented one off-task trader, "Prices started out at the high end and came down over the course of the day as some sellers realized they were stuck and had to unload." Into TVA prices likewise strengthened, trading from 24 to 25.5\$/MWh on Wednesday. The five-day forecast predicted temperatures significantly below normal

through Sunday, with snow possible on Thursday and Friday. The latest six-to-ten likewise mirrored the rest of the East and called for the below-normal regime to last through January 5. There were no new units reported off-line in SERC on Wednesday.

RE:=09=09Commission Meeting -- October 24, 2001

At today's lengthy Commission meeting, the Commissioners approved the consent agenda and then discussed the items detailed below.=20

ELECTRIC MATTERS

State Participation in RTO Development Process

In light of comments voiced during last week's RTO workshops, Commissioner = Brownell

suggested that avenues for participation by the State Commissions in the RT= O development process need to be explored. She suggested that one option m= ight be to establish regional panels made up of state commission representa= tives. Commissioner Brownell further suggested that state commissions, per= haps through such regional panels, could explore issues related to RTO set= up, adequacy of revenue requirements, demand-side management programs, mark= et monitoring and mitigation, and distributed generation.

The other Commissioners generally echoed Commissioner Brownell's sentiment,= although Commissioner Massey cautioned that the pace of RTO development sh= ould not be slowed by excessive or redundant administrative procedures and = costs. The Commissioners unanimously voted to instruct Staff to develop pr= oposals for greater state commission involvement, and to present their prop= osals to the Commissioners at an upcoming agenda meeting. At this point, t= he initiative appears to be designed to explore alternatives. More concret= e proposals, however, could be included in the broader RTO strategy the Com= mission is expected to announce in the near future.

Discussion of RTO Development Process in Southeast, Docket No. EX02-1

Staff began the discussion with a power point presentation on the Southeast= RTO mediation process, noting that participants had reached a consensus on= most issues, including market monitoring, operational authority, short-ter= m reliability, and planning. Staff explained that consensus could not be r= eached on issues of governance and independence and provided an overview of= the two competing RTO Models outlined in the Judge McCartney=3Ds mediation= report. After briefly describing the Collaborative Governance (CG) model = and Independent System Administrator (ISA) model, Staff identified positive= s and negatives for both. Staff did not take a position on which model sho= uld be approved by FERC; rather, it concluded that either model satisfies t= he requirements of Order No. 2000. Staff also noted that in the Southeast,= participation by public power is essential to the formation of a functioni= ng RTO in the region.

After Staff=3Ds presentation, Judge McCartney and Herbert Tate (former New = Jersey Chairman) discussed the proceeding with the Commissioners. Specific= issues discussed included: public power participation, concern over indepe= ndence in the ISA model, whether the ISA was analogous to current ISOs, and= the allocation of functions in the CG model. Overall, Judge McCartney exp= ressed support for CG model, citing concerns over independence in the ISA m= odel as well as, what she viewed as, the experimental nature of the ISA pro= posal. As a former state commissioner, Mr. Tate outlined the concerns expr= essed by the state commissions during the mediation period. In their final= recommendations, both Judge McCartney and Mr. Tate encouraged the Commissi= on to provide additional guidance as to the essential elements or principle= s to structure RTOs.

Discussion of RTO Developments in the Northeast, Docket No. EX02-2

Staff began this discussion item with a presentation on the Northeast RTO m= ediation process. Staff explained that a Business Plan was issued to imple= ment the Northeast RTO. The Business Plan consists of eight sections: post=

-mediation process, governance, market design, operations, technology assessment, transmission tariff-related issues, regional transmission planning, and interregional coordination. Staff did not detail the content of the Business Plan, but noted that in the two areas where there was disagreement between governance and market design options the plan included three alternatives for each.

Staff's presentation was followed by a discussion with Judge Young and Joe Garcia (former Florida Commissioner). Judge Young explained that the Business Plan provides a viable blueprint for the formation of the Northeast RTO. He noted that several issues must still be resolved, including: governance, market design, and shareholder process. Judge Young reiterated his recommendation that an independent, non-vendor expert should analyze the technology of the three ISOs to assess whether entirely new software will be necessary to implement the Northeast RTO. In response to Commissioner Breathitt, Staff explained that software is one of the biggest hurdles in the Northeast RTO. Mr. Garcia expressed some concern that the ALJ and participants could waste too much time attempting to achieve the perfect RTO.

Chairman Wood noted that the Commission's intention is to leave the region better, not worse off, than pre-RTO. He also explained that the Northeast is in a better position to form a viable RTO than the other regions because of the maturity of its markets. Commissioner Brownell noted that inconsistencies between the existing ISOs are working against retail competition programs in the Northeast region. She cautioned against proceeding too slowly with regard to RTO formation. Commissioner Wood noted that there are some issues that can be resolved relatively quickly, for example, regional transmission planning, real-time imbalance market software.

In response to Chairman Wood, the Judge Young and Mr. Garcia provided recommendations. Mr. Garcia explained that the Business Plan provided participants with a basic plan and asked the Commission to provide guidance in the areas where there was divergence. He also encouraged the Commission to issue a decision in the near future, noting that the Commission should let parties litigate jurisdictional issues so that RTO issues could be resolved sooner rather than later. Judge Young encouraged the Commission to take the time to assess market design in order to prevent a further waste of time and money in the likelihood that the chosen market design proves unworkable. Judge Young also requested that the Commission provide additional guidance on the parameters of best practices, governance structure, market design, and stakeholder process.

Discussion of RTO Developments in the Midwest, Docket No. EX02-3
Staff provided an update of recent developments in the Midwest. A settlement agreement between Alliance and MISO, approved by the Commission earlier this year, provides the basis for developing a seamless market in the region that will be served by the two groups. Under the terms of the Illinois power settlement, the financial viability of MISO is guaranteed, the Alliance business model is preserved, and seams issues between MISO and Alliance are addressed. Staff explained that the seams agreement provides for one-stop shopping, congestion information on a joint bulletin board, an imbalance market, transmission planning, and market monitoring. =20

Staff explained that both MISO and Alliance recently filed status reports with the Commission addressing their ability to be functional and the seams agreement included in the settlement previously approved by the Commission. Alliance noted that a proposal by National Grid USA (EL01-80-01) to manage the Alliance RTO, along with Alliance's proposed Business Plan, are critical to the RTO's start-up. Alliance reports that it would take up to 120 days to initiate operations once it has received final Commission approval. =20

In response to Commissioner Brownell, Staff maintained that both MISO and A=

lliance have made progress in addressing seams issues. Staff expressed satisfaction with both the substance and timing of the entities filings.

There was some discussion over the division of functions between MISO and Alliance. Chairman Wood noted that, if there is going to be one regional entity with not for-profit and for-profit entities, the Commission will have to address how the functions should be split. Chairman Wood also expressed concern that a viable wholesale market may not result if all the functions were delegated to the for-profit entity.

Discussion of Western Infrastructure Adequacy Conference, Docket No. AD01-2 First in a series of regional meetings on infrastructure, the Western Infrastructure Adequacy Conference will be held in Seattle on November 2, 2001. Staff identified three main questions to be addressed at the meeting: (i) whether the current infrastructure is adequate; (ii) the infrastructure needs of the region, and (iii) the factors that are inhibiting adequate investment in infrastructure. Such questions will be addressed within the context of the outlook for growth and population increases in the region as well as the outlook for future energy needs. The Commission hopes to determine what the states and the federal government can do to encourage infrastructure investment. =20

Next, Staff gave a power point presentation on the infrastructure throughout the United States. This presentation, which breaks down energy infrastructure by fuel use and price-responsive demand, can be accessed by the public on the Commission's website under AFERC Discussion Papers. Staff noted that gas is the primary fuel in West and that use of gas continues to rise within the region. In a separate presentation, Staff then presented its findings on its western infrastructure assessment which began in August. Staff has collected data and analyzed information on Western infrastructure, with a final assessment available Friday, October 26, 2001. =20

The western infrastructure assessment was broken into three sections: demand, supply, markets, and transmission. With regard to demand, Staff traced the population and consumption differences over past few years in the West. Staff noted that the Southwest started to consume larger amounts of gas and electricity because of population and economic growth. Staff traced gas uses, growth, total capacity, and peak loads within Western region, as well as projections for demand, capacity, use, and infrastructure. Next, Staff provided an overview of the supply of electricity, hydropower and gas in the United States. Staff asserted that proven and potential gas reserves in United States could provide supply for next 50 years. In the portion of the presentation on markets, Staff identified the primary trading hubs in the West and the average monthly spot market prices and monthly trading volumes in the region. Staff also noted that recently, there has been a downward shift in the gas futures market for the West which it attributed to lower temperatures, more capacity, lower gas prices and the Commission's price mitigation plan. Finally, Staff provided an overview of transmission projects in the Western region.

New York Independent System Operator, Inc., Docket No. ER01-2967
Cinergy Services, Inc., Docket Nos. ER01-2984 and ER01-3022
Commonwealth Edison Company, Docket ER01-2985
American Electric Power Service Corp., ER01-2163

In a July 2001 order in Docket No. ER01-2163, the Commission denied a transmission provider's request to receive interest on system upgrade payments. In this draft order, the Commission issued an interim order which granting rehearing on this issue. =20

The Commission will address the issue of interest on system upgrade payments in the generic proceeding addressing transmission interconnection. Commissioner Breathitt dissented in part, maintaining that the Commission should

not issue an interim order, but, instead should address the issue in the transmission interconnection proceeding where the ramifications can be more fully explored. Commissioner Massey and Wood voiced their support for the order, noting that if generators are treated as banks, they should receive interest. However, Commissioner Massey explained that as a long-term issue, he has an open mind as to how the generation costs should be allocated.

Kern River Gas Transmission Company, Docket Nos. CP01-70 and CP01-31
There was no Staff presentation on these two items which were placed on the discussion agenda by Commissioner Breathitt. Although she concurred with the decision, Commissioner Breathitt expressed concern over intervenors allegations that the pipeline expansion would negatively impact the availability of take-away capacity on the Kern River system. Commissioner Breathitt noted that in determining whether pipeline expansions are in the public convenience and necessity, the Commission must address concerns that there will be a degradation of existing shippers firm rights.

Jim, how far back would you like to make adjustments? Here is a spreadsheet that compares what we booked vs. what is on Sch 6. The net of this analysis is that we have withdrawn more on our schedule vs. Sch 6. In the end, if we make all of these adjustments, it would result in 21,259 adjustment.

Dave

Going out tonight

-----Original Message-----

From: Kitchen, Louise
Sent: Wednesday, October 24, 2001 8:03 AM
To: Schoppe, Tammie
Subject: Natural Gas Origination

Our natural gas business continues to benefit from effective account management and resource allocation focused on identifying and responding to the needs of our varied customers. In order to keep our organization optimally structured and to facilitate additional growth, we are making the following changes:

Producer/Wellhead Group

The current mid-market, origination and wellhead pricing activity currently within the Central and Eastern Gas Regions will be consolidated with the Derivatives group under Fred Lagrasta. This will create a single business unit focused upon the needs of the producing industry within the Eastern U.S. The producer focus in the Western U.S. and Texas will remain unchanged reporting to Mark Whitt and Brian Redmond respectively.

Strategic Asset Development

Laura Luce will move from her role in the Central Region to lead an effort focused strictly on identifying and entering into long-term strategic arrangements within the Central and Eastern Regions. This initiative will focus on a limited number of selected markets that provide strategic opportunities for partnering in asset development, asset management and optimization. This effort will continue to work very closely with the regional leads.

Central Origination and Mid-Market

Frank Vickers will continue his current role in the Eastern Region and will assume the leadership role for Mid-Market and Origination activity in the Central Region.

There will be no changes to the West and Texas Origination groups headed respectively by Barry Tycholiz and Brian Redmond.

Please join us in congratulating Fred, Laura and Frank in their new roles.

Louise & John

Jeff was able to create a Netco file under 0:\erms\erms_adm without an erequest.
There is a file for each region out there now. I will save the new p&l to each region but could each of you please pick an p&l from your region as a back-up just in case.

these are the files I know of

Exotica
P&L
Hedgestrips
All excel queries
Weapon-X & new version
Access financial reports
Exotics file
Transport model
Curve files

Do you guys have anything else?

Kam

As you are aware, there have recently been a number of virus attacks released and spread across the Internet. Although Enron continually readdresses and updates its virus protection procedures, new viruses will continue to be released and pose a threat to Enron's computing environment. Therefore, it is very important that all Enron employees understand their responsibilities in helping Enron stay virus free.

If you receive a file via Email or any other means and you are unfamiliar with the sender or the purpose of the file, please do not automatically open/launch the file. One of the key elements of a virus attack is the innocent nature of its delivery.

Viruses can cause a significant amount of damage, including data loss and service outage. Viruses such as the Melissa, ILOVEYOU, AnnaKournikova, and the recent Nimda virus, caused organizations billions of dollars. Sometimes new viruses can breach the environment before the virus scanning software has been updated to detect & quarantine them.

Every employee in the Enron organization has a responsibility to keep our computing environment virus-free.

If you believe you have a file that looks suspicious, delete it or contact your Resolution Center to obtain their assistance.

North America Resolution Center - x31411

ETS Solution Center - x54745

European Resolution Center - x36777

EES Help Desk - x 39797

Prevention & Detection = PROTECTION!

John:

The following is a quick update on the actions that we have taken with El Paso:

Nov. 19 - I met with El Paso's commercial team giving them a full briefing on th e project. During the meeting we signed a confidentiality agreement and I deliv ered to them a full data-room disk with approximately 80 project documents.

Nov. 21 - We delivered a follow-up email with two additional documents completed in the interim. We scheduled a site visit for Nov. 28th for the date requested by El Paso.

Nov. 26 - We delivered all additional information requested by El Paso in prepar ation for their site visit.

We are currently awaiting further requests from El Paso to schedule further conf erence calls to address specific issues. These will be scheduled immediately up on their request.

Please let me know if you hear anything from Greg Bafalis.

Thanks,
Brett

PCS Nitrogen would like to assign their positions with Enron over to Bank of America. The structure of the deal would be for B of A to step in between Enron and PCS. Currently, PCS is out of the money to Enron. This trade would lower B of A's exposure to Enron. I would like to give an answer to PCS today. Could you please review and let me know how we proceed on this assignment.

Thanks,
Craig

Subject: assignment

Craig,
Attached is a sample assignment agreement sent to us by Bank of America. It was one they had used with another deal, and has not been customized for our particular situation. As I understand Bank of America's verbal intent is to have Bank of America step in between the obligations of our two companies.
(See attached file: Assignment-sample doc.doc)
Glad to discuss...Audrea

Thank you for booking your air travel with Expedia.com

For
ITINERARY NUMBER: 12271397460

We have delivered an electronic ticket to the airlines notifying them of your purchase. You will not receive a paper receipt, itinerary, or confirmation letter automatically. When you check in for your flight, give the ticket agent your name, flight number, and a government-issued photo ID to receive your boarding pass(es). For more information about traveling with e-tickets or to learn how to request a paper receipt, see our Frequently Asked Questions at <http://expedia.com/daily/help/help/etickfaq.htm>. Should you need additional information, feel free to contact us at travel@expedia.com. Thank you for choosing Expedia for your travel needs.

Expedia.com
Don't just travel. Travel right. <http://expedia.com/>

ADVICE TO INTERNATIONAL PASSENGER ON LIMITATION OF LIABILITY
Passengers on a journey involving an ultimate destination or a stop in a

country other than the country of origin are advised that the provisions of a treaty known as the Warsaw Convention may be applicable to the entire journey, including any portion entirely within the country of origin or destination. For such passengers on a journey to, from, or with an agreed stopping place in the United States of America, the Convention and special contracts of carriage embodied in applicable tariffs provide that the liability of certain carriers, parties to such special contracts, for death of or personal injury to passengers is limited in most cases to proven damages not to exceed U.S. \$75,000 per passenger, and that this liability up to such limit shall not depend on negligence on the part of the carrier. The limit of liability of U.S. \$75,000 above is inclusive of legal fees and costs except that in case of a claim brought in a state where provision is made for separate award of legal fees and costs, the limit shall be the sum of U.S. \$58,000 exclusive of legal fees and costs. For such passengers traveling by a carrier not a party to such special contracts or on a journey not to, from, or having an agreed stopping place in the United States of America, liability of the carrier for death or personal injury to passengers is limited in most cases to approximately U.S. \$10,000 or U.S. \$20,000. The names of carriers, parties to such special contracts, are available at all ticket offices of such carriers and may be examined on request. Additional protection can usually be obtained by purchasing insurance from a private company. Such insurance is not affected by any limitation of the carrier's liability under the Warsaw Convention or such special contracts of carriage. For further information please consult your airline or insurance company representative.

NOTICE OF BAGGAGE LIABILITY

Liability for loss, delay, or damage to baggage is limited unless a higher value is declared in advance and additional charges are paid. For most international travel (including domestic portions of international journeys) the liability limit is approximately \$9.07 per pound for checked baggage and \$400 per passenger for unchecked baggage. For travel wholly between U.S. points federal rules require any limit on an airline's baggage liability to be at least \$1250 per passenger. Excess valuation may be declared on certain types of articles. Some carriers assume no liability for fragile, valuable or perishable articles. Further information may be obtained from the carrier.

CARRIER RESERVES THE RIGHT TO REFUSE CARRIAGE TO ANY PERSON WHO HAS ACQUIRED A TICKET IN VIOLATION OF APPLICABLE LAW OR CARRIER'S TARIFFS, RULES OR REGULATIONS

SUBJECT TO TARIFF REGULATIONS

NOTICE OF INCORPORATED TERMS

Effective January 1, 1983, this notice forms part of the conditions of contract between the airline and the passenger. If there is any inconsistency between the incorporated terms described below and the terms and conditions in the passenger's ticket, these incorporated terms govern.

Air transportation to be provided between points in the U.S. (including its overseas territories and possessions) is subject to the individual terms of the transporting air carriers, which are herein incorporated by reference and made part of the contract of carriage. Foreign air transportation is governed by applicable tariffs on file with the U.S. and other governments. Incorporated terms may include, but are not restricted to:

1. Limits on liability for personal injury or death.
2. Limits on liability for baggage, including fragile or perishable goods, and availability of excess valuation coverage.
3. Claims restrictions, including time periods in which passengers must file a claim or bring an action against the air carrier.
4. Rights of the air carrier to change terms of the contract.
5. Rules on reconfirmation of reservations, check-in times, and refusal to

carry.

6. Rights of the air carrier and limits on liability for delay or failure to perform service, including schedule changes, substitution of alternate air carriers or aircraft and rerouting.

You can obtain additional information on items 1 and 6 above at any U.S. location where the transporting air carrier's tickets are sold.

You have the right to inspect the full text of each transporting air carrier's terms at its airport and city ticket offices. You also have the right, upon request, to receive free of charge the full text of the applicable terms incorporated by reference from each of the transporting air carriers. Information on ordering the full text of each air carrier's terms is available at any U.S. location where the air carrier's tickets are sold.

NOTICE-OVERBOOKING OF FLIGHTS

Airline flights may be overbooked, and there is a slight chance that a seat will not be available on a flight for which a person has a confirmed reservation. If the flight is overbooked, no one will be denied a seat until airline personnel first ask for volunteers willing to give up their reservation in exchange for a payment of the airline's choosing. If there are not enough volunteers the airline will deny boarding to other persons in accordance with its particular boarding priority. With few exceptions persons denied boarding involuntarily are entitled to compensation. The complete rules for the payment of compensation and each airline's boarding priorities are available at all airport ticket counters and boarding locations. Some airlines do not apply these consumer protections to travel from some foreign countries, although other consumer protections may be available. Check with the airline or your travel agent.

RECONFIRMATION NOTICE

Some international carriers require reconfirmation of your reservations. Contact the transporting air carrier for the applicable requirements.

NOTICE

If the passenger's journey involves an ultimate destination or stop in a country other than the country of departure the Warsaw Convention may be applicable and the Convention governs and in most cases limits the liability of carriers for death or personal injury and in respect of loss of or damage to baggage. See also notices headed "Advice to International Passengers on Limitation of Liability" and "Notice of Baggage Liability Limitations"

CONDITIONS OF CONTRACT

1. As used in this contract "ticket" means this passenger ticket and baggage check, of which these conditions and the notices form part, "carriage" is equivalent to "transportation", "carrier" means all air carriers that carry or undertake to carry the passenger or his baggage hereunder or perform any other service incidental to such air carriage. "WARSAW CONVENTION" means the Convention for the Unification of Certain Rules Relating to International Carriage by Air signed at Warsaw, 12th October 1929, or that Convention as amended at The Hague, 28th September 1955, whichever may be applicable.

2. Carriage hereunder is subject to the rules and limitations relating to liability established by the Warsaw Convention unless such carriage is not "international carriage" as defined by that Convention.

3. To the extent not in conflict with the foregoing carriage and other services performed by each carrier are subject to: (I) provisions contained in this ticket (II) applicable tariffs, (III) carrier's conditions of carriage and related regulations which are made part hereof (and are available on application at the offices of carrier), except in transportation between a place in the United States or Canada and any place outside thereof to which tariffs in force in those countries apply.

4. Carrier's name may be abbreviated in the ticket, the full name and its abbreviation being set forth in carrier's tariffs, conditions of carriage, regulations or timetables; carrier's address shall be the airport of

departure shown opposite the first abbreviation of carrier's name in the ticket; the agreed stopping places are those places set forth in this ticket or as shown in carrier's timetables as scheduled stopping places on the passenger's route; carriage to be performed hereunder by several successive carriers is regarded as a single operation.

5. An air carrier issuing a ticket for carriage over the lines of another air carrier does so only as its Agent.

6. Any exclusion or limitation of liability of carrier shall apply to and be for the benefit of agents, servants and representatives of carrier and any person whose aircraft is used by carrier for carriage and its agents, servants and representatives.

7. Checked baggage will be delivered to bearer of the baggage check, in case of damage to baggage moving in international transportation complaint must be made in writing to carrier forthwith after discovery of damage and, at the latest, within seven days from receipt; in case of delay, complaint must be made within 21 days from date the baggage was delivered. See tariffs or conditions of carriage regarding non-international transportation.

8. This ticket is good for carriage for one year from date of issue, except as otherwise provided in this ticket, in carrier's tariffs, conditions of carriage, or related regulations. The fare for carriage hereunder is subject to change prior to commencement of carriage. Carrier may refuse transportation is the applicable fare has not been paid.

9. Carrier undertakes to use its best efforts to carry the passenger and baggage with reasonable dispatch. Times shown in timetables or elsewhere are not guaranteed and form no part of this contract. Carrier may without notice substitute alternate carriers or aircraft and may alter or omit stopping places shown on the ticket in case of necessity. Schedules are subject to change without notice. Carrier assumes no responsibility for making connections.

10. Passenger shall comply with Government travel requirements, present exit, entry and other required documents and arrive at airport by time fixed by carrier, or, if no time is fixed, early enough to complete departure procedures.

11. No agent, servant or representative of carrier has authority to alter, modify or waive any provisions of this contract.

CARRIER RESERVES THE RIGHT TO REFUSE CARRIAGE TO ANY PERSON WHO HAS ACQUIRED A TICKET IN VIOLATION OF APPLICABLE LAW OR CARRIER'S TARIFFS, RULES OR REGULATIONS

Issued by the Carrier whose name is in the "Issued By" section on the face of the Passenger Ticket and Baggage Check

A NOTE ABOUT PRICES

Prices are subject to availability and subject to change without notice. Prices shown may not include applicable taxes, fees and fuel surcharges. The airlines' lowest published fares are the lowest roundtrip fares published by the airlines for your routes. These fares may not be available on the days you wish to travel. Our Fare Calendar shows you when these fares are available. The fares shown as found by Expedia.com customers are listed to help you determine the ideal price for your route.

QUOTE OF THE DAY

=====
"Any kind of assessment of what kind of mayor I am right now is unfair. I don't mean unfair to me; I mean unfair historically. The assessment should be made at least a couple of years from now."
-RUDOLPH W. GIULIANI.

<http://www.nytimes.com/2001/12/31/nyregion/31RUDY.html?todayshadlines>

NATIONAL

=====
In a Town Built Almost Entirely on Tourism, Business Booms

Thanks to 19 special-event weekends a year, Leavenworth, Wash., is booming while most other tourist destinations are suffering.

<http://www.nytimes.com/2001/12/31/national/31TOUR.html?todayshadlines>

Cuts in Parks Bring Home Tennessee Budget Woes

A three-year stalemate in the Tennessee General Assembly over tax policy and the proposed creation of a state income tax has led to a tightening budget crisis.

<http://www.nytimes.com/2001/12/31/national/31TENN.html?todayshadlines>

I.R.S. Help by Phone Is Slower and Often Wrong, Study Finds

People calling the Internal Revenue Service for help with their tax returns often get inaccurate information, a new government report says.

<http://www.nytimes.com/2001/12/31/national/31IRS.html?todayshadlines>

Tyrell, Attached are amendments for the letter agreements. Please distribute to the appropriate individuals. I have also included the Petro-Canada form.

Barry, Who in Calgary should work the Petro document?

Let me know if you have any questions. Thanks.

Dear Legal Edge User,

If you are using the Legal Edge portal, please read this very important message.

We wanted to inform you that changes have been made to access the Enron Legal Edge portal.

What to Expect

When accessing the legal edge portal at <http://legaledge.corp.enron.com/tibco/>, you will be prompted for a user name and password as usual. However, the user name has changed. You will no longer log into the portal with your legal edge passwords. Your access will be controlled via the standard Enron network directory.

Therefore, effective immediately, you will login using the same user name and password used to login to your local workstation, your CORP ID.

In addition to the different user name and password, there will be another change. Due to the application upgrade, any personalization you have made to the portal in the past will be lost. As those changes made are associated with your old legal edge portal user name, these personalizations will not automatically be applied to your CORP login. Therefore, do not be alarmed if you do not see all of the content you saw before. Simply, re-configure the portal for your CORP id to see the same content you saw before. Unfortunately, there is no way to get around this issue.

Benefits

- Only one user name password to remember (Use CORP network id and password)
- Not prompted for login for other applications participating in Single Signon
- Once you login once, you will never be required to login again from that workstation (unless you click the logout link)

Effective Date

The Legal Edge portal / Single Signon integration is effective Friday, November 9.

Forward Email to Administrative Staff

Please forward this email to your the administrative staff of your department, so they can access the portal site. Thank you.

Contact Us

If you would like to provide feedback for the Single Sign-On effort, send an email to sso@tcpolice.org. If you have issues or concerns regarding this change, please contact the Resolution Center at ext. 3-1411.

Regards,

The Legal Edge and Single Signon Teams
sso@tcpolice.org

Debra,

Jeff said that you would be the proper person to review NSP's comments. Please let me know what else I need to be doing to help the process continue. Thanks!

Patrick Tucker

Cc: Carter, Tim; Ishee, Jeff

Subject: ENFOLIO Master Firm Purchase/Sale Agreement with Northern States Power Company

Patrick:

At long last I have been able to get input from others within our company such that I can provide comments on your drafts of the above-referenced Agreement for Northern States Power Company ("NSP"). I apologize for the delay. Our comments are as follows:

Northern States Power Company Agreement

Disparity of Dollar Levels related to Credit Issues. We request in Section 4.1 that the \$50,000,000 dollar level be applicable to each of our companies. We further request that the collateral trigger level in Section 4.7 be increased to \$25,000,000 as to each of our companies.

2.4 Confirmations. In the second line, please change "may" to "shall". We need to have written confirmations of gas transactions in our files for regulatory purposes. We also request on the Confirmation form Exhibit that the confirms issued to reflect telephonic transactions likewise be signed and returned, in the same manner as indicated on the form for Section 2.21 Transactions.

3.5 Netting and 4.4. Offset. We cannot agree to the netting of payments in the normal course of business under these contracts. Amounts due to and from a counterparty must be tracked separately for regulatory purposes, especially with respect to any sales proceeds that we might realize when NSP acts as the Seller to Enron in a Transaction. Accordingly, we propose that the provision allowing monthly netting of amounts due between the parties be deleted from the contract and that the right of Offset be limited to be applicable only in connection with the occurrence of a Triggering Event and the calculation of any Termination Payment due under the Agreement.

4.1 Early Termination. I am concerned that the date to be established for termination of Transactions is without definition. I would prefer to see the language in subpart (i) modified to state that the Notifying Party may "establish a date, which shall be not less than two (2) nor more than ten (10) Business Days following the date of such notice."

4.2 Triggering Event. In the 8th line down, I don't understand the inclusion of the phrase "or deemed to be repeated". Unless I am missing something, it doesn't make sense with the rest of the sentence. Please delete this phrase in the Agreement.

4.1 and 4.5 References to Affiliates. In numerous places throughout the Agreements and, in particular, in Sections 4.1 and 4.5, reference is made to Affiliates. For regulatory reasons, we cannot intermingle the account status of our affiliated companies. Moreover, NSP is not authorized to contractually bind its Affiliates in the manner indicated. Please delete all references to Affiliates of NSP in the respective Agreement.

Article 5. Force Majeure. The language in this Article is not typical of most Force Majeure provisions, which allow a Party to claim Force Majeure

for the duration of a Force Majeure event and place no limitation on the ability to claim Force Majeure within a given time period. The language in your draft can be read to allow a Party to claim Force Majeure one time only, for a duration of up to 60 Days, after which time Force Majeure no longer applies to any of the obligations under the Agreement. In other words, Force Majeure could not be claimed later for an unrelated occurrence involving a separate and independent Transaction. This is not acceptable. We therefore request that you substitute your language with more standard Force Majeure provisions consistent with these comments.

Section 8.1. Notices. Prior to the language in the parenthetical, please insert "provided that receipt thereof has been confirmed electronically".

Section 8.2. Transfer. We would prefer that this language be revised to the more traditional language requiring the consent (rather than approval) of the other Party, "which consent shall not be unreasonably withheld". Please modify this provision accordingly.

Section 8.3. Limitation of Remedies. We are in general agreement with this provision, however we cannot agree to a disclaimer of implied warranties of merchantability or fitness for the ordinary use. The gas sold and purchased under the Agreement should be of merchantable quality and fit for the ordinary use to which it is intended. Please modify this Section accordingly.

Definition of Confirm Deadline in ENFOLIO General Provisions. The GISB Standard contract and all other contract forms that we use have a 2 day confirm deadline, rather than 24 hours as reflected in your definition. We request that you revise this Agreement to be consistent with this industry standard.

Definition of Material Adverse Change. This definition needs to be expanded beyond a review of the level of each company's credit rating. Please replace your definition with the following:

"Material Adverse Change" with respect to a Party means (i) any downgrading of any unsecured, long-term senior debt of such Party or any entity that has provided a guaranty or other form of credit support for the obligations of such Party (each such entity being a "Credit Support Provider" for such Party) such that such debt is rated below "BBB-" or its equivalent by Standard & Poors or below "Baa3", or its equivalent, by Moody's Investor Services, Inc.; provided, that if a Party or its Credit Support Provider does not have any unsecured, long-term, senior debt that is rate by either Standard & Poors or Moody's Investor Services, Inc., then a Material Adverse Change shall mean the occurrence of one or more events which, in the reasonable judgment of the exposed Party constitutes a material adverse effect on the creditworthiness, financial responsibility, or ability of such Party or its Credit Support Provider, as applicable, to perform its obligations in connection herewith.

Definition of Replacement Price Differential. Although we are in general agreement with your definition of Replacement Price Differential, it seems preferable that where the Minimum Monthly Quantity is applicable, cost of cover should be the difference between the contract price and a 30 or 31 day average of Spot Prices for the Month in which the deficiency occurred. Please modify your definition accordingly.

Please make changes to the Northern States Power Company Agreement consistent with our comments as set forth above. Should you have questions or wish to discuss any of our requested changes, you may contact me via return e-mail or at the phone number listed below.

Thank you for your consideration. I look forward to working with you to finalize this Agreement.

>
> Hi Jeff,

Let me know when you are coming to London, so that I can be sure to be here to show you the Knox cup and the new book by Steve Martin.

Since September 11, business has really dried up, mostly because my main outlet is to Americans who are not travelling much at the moment. So I propose to send you a cheque for ?2800 within the next few days, or give it to you when you come here, followed by a cheque for ?2500 in December and one for ?2500 in January. Total ?7800. The last thing I was expecting was you calling in your credit, and like all dealers I'm always trying to keep my balance on the tightrope. Let me know what you think.

In the meantime I have heard about the troubles at Enron, and I hope all goes well for you.

I am so happy and relieved to see that Al Sharpton and Jesse Jackson are in town
and have joined in the fight to right all the injustices and inequities brought
upon you guys by the dastardly power mongers @ Enron. I will sleep better now t
hat I KNOW your interests are being so protected.-Dad p.s.-sure hope they also
look out for the interests of those of us that "invested" in ENE.

NOTICE: Long Distance Conversion to MCI for EB PBX

Time: Fri 9/7/2001 at 5:30:00 PM CT thru Fri 9/7/2001 at 6:00:00 PM CT
Fri 9/7/2001 at 3:30:00 PM PT thru Fri 9/7/2001 at 4:00:00 PM PT
Fri 9/7/2001 at 11:30:00 PM London thru Sat 9/8/2001 at 12:00:00 AM London

Environments Impacted: All ECN Outbound Long Distance--- NO DISRUPTION OF SERVICE ANTICIPATED

This change affects Enron Building outbound long distance only. 3AC change will be completed next week. No service disruption is anticipated. This only affects outbound long distance from the Enron Building. Tie line services remain unchanged. Dialing patterns remain the same: 9+1+A/C+7-digit number for domestic calls or 9+011+10-digit number for international calls.

Purpose: MCI is replacing AT&T as Enron's primary long distance carrier.

Backout: Divert back to AT&T route pattern as first choice.

Contact(s): Cynthia Siniard 713-853-0558

NOTICE: Voice Mail 30 Day Retention Change

EFFECTIVE: Monday 9-10-01 at 6:00pm

Technical Description

Change Basic Class of Restriction for all Audixes to reflect new voice mail message retention time of 30 days.

Environments Impacted

Employees who currently have messages older than 30 days in their mailbox will lose those messages once this change has been implemented. If those messages or future messages must be saved, they will need to transcribe them or record them to a handheld recording device. Once these messages and future messages have been deleted, they will not be retrievable.

I agree that we should not move the business at this time, but we do need cross-training to occur. Eventually the business should come here to Houston. The decision was made to bring the physical trading business to the Houston office and I do not believe that that task has been completed. My feelings are for continuity that all operations involving trading and scheduling of physical gas should move here under your firm control and direction. I also think that some of our counterparties are confused as to who to call concerning these types of deals and that trading decisions are being made in Denver without our knowledge until after the fact. This is something that I have heard from you and Barry that should not be happening.

I would still like to go to Denver for the cross-training to occur and we can determine the eventual placement of these operations after things calm down.

Jay

Subject: Denver

In light of the current circumstances with the company and the concerns that our counterparties have at this time, I would like to leave the upstream business in Denver. Moving this business would lead to confusion with our customers and to our Denver based employees. Let me know if you have any issues with this.

If you would like to go up there for coordination and training, then feel free to travel to Denver.

Thanks,
Grigsby

This is not the regular email, that will come in a day or so, and it will have all of the regular info, and the tailgate information for the BIG XII CHAMPIONSHIP GAME!!!!

Tickets

Let's talk about the game for a second. I'm sure you can imagine the demand for tickets. The Big XII allots 16,500 tickets to be divided among both schools, or 8,250 each. Cut 10% out of that for the student draw, and it's down to 7,425. That's 7,425 tickets for around 70,000 people looking to be in Dallas this weekend. The 7,425 should raise some when Colorado doesn't sell all of theirs (they usually don't), so that should push it up to 11,000 or so. That's 11,000 seats for around 40,000 people. These tickets will be prioritized and dealt out as usual. You should know if you are one of those who get select tickets or if you do not. If you do, you should contact the Longhorn Foundation (ticket reservations started on at 10:00 am on Sunday, November 25 and it ends at 7:00 pm on Monday, November 26). If you are not one of these people, there are options: School message boards, ticket vendors/outlets, want ads in Norman and Lincoln, and most isp's have some sort of on-line shopping sites where people sell any and everything. Believe me, I have looked, tickets are EVERYWHERE on the Internet. Start with the Longhorn links and work your way to the OU and NU sites, the ticket outlets and on to the buy/sell sites and you will find them.

The Game

This is it folks. It may not have happened exactly like it was supposed to, but what ever does? It's right there in front of the Longhorns, and now they need to reach out and grab it. They need your help. COME TO DALLAS. From the players, the coaches, the Athletic Department- COME TO DALLAS. When CU came to town in October, the game was close until the shovel pass. After that, the crowd took over. Life was unbearable for the Buffalos after that: they couldn't audible, they had false starts, delay of games, etc... and they got blown out. That was the crowd. Dallas is our town, this our state, Texas Stadium is OUR house. The Buffs are the visitors in OUR HOUSE. Let's make it a Burnt Orange Dallas. An endless sea of Texas shirts and hook'em horns, and a thundering stream of noise to let the Buffalos know we mean business down here in Austin. Let's turn Texas Stadium into the DKR-North. A BURNT ORANGE DALLAS. Who knows, by the time the game kicks off, Florida or Miami may have lost, and you could be watching the Longhorns celebrate Mack Brown's 1st Big XII Championship as the players carry roses around and the crowd goes crazy in anticipation of the National Championship game in Pasadena. Get yourself to Dallas. It's right there.
A BURNT ORANGE DALLAS. DKR-NORTH. OUR HOUSE.

HOOK'EM
Trey McLean

Subject: Open Mouth, Insert Foot

1. CURL UP AND DIE

I walked into a hair salon with my husband and three kids in town and asked loudly, "How much do you charge for a shampoo and a blow job?"

- Melinda Lowe, 39, Seguin TX

2. PAD PLEASE

An insurance man visited me at home to talk about our mortgage insurance. He was throwing a lot of facts and figures at me, and I wanted to follow as best I could, so I told my 6-year-old son to run and get me a pad. He came back and handed me a Kotex right in front of our guest.

- Kate Newman, 46, Winston-Salem, NC

3. HO, HO, HO

I was taking a shower when my 2-year-old son came into the bathroom and wrapped himself in toilet paper. Although he made a mess, he looked adorable, so I ran for my camera and took a few shots. They came out so well that I had copies made and included one with each of our Christmas cards. Days later, a relative called about the picture, laughing hysterically, and suggesting I take a closer look. Puzzled, I stared at the photo and was shocked to discover that in addition to my son, I had captured my reflection in the mirror wearing nothing but a camera!

- Name Withheld

4. LADY GOLFER

I was at the golf store comparing different kinds of golf balls. I was unhappy with the women's type I had been using. After browsing for several minutes, I was approached by one of the good-looking gentlemen who works at the store. He asked if he could help me. Without thinking, I looked at him and said, "I think I like playing with men's balls."

- Colleen Collins, 31, Ferndale, MI

5. NUTS ABOUT YOU

My sister and I were at the mall and passed by a store that sold a variety of nuts. As we were looking at the display case, the boy behind the counter asked if we needed any help. I replied, "No, I'm just looking at your nuts."

My sister started to laugh hysterically, the boy grinned, and I turned beet-red and walked away. To this day, my sister has never let me forget.

Jeff-
I was going through my emails when I came across one from you to which I never responded. A few days after you asked if I was working with anthrax, I was whisked to DCv on a charter flight to assist with the investigation there.
It was an amazing and intense experience during which I learned a tremendous amount. It was very different being a part of a team, as opposed to directing an investigation. I unfortunately did not have much time to explore DC, although we were staying in a very nice part of Dupont Circle. I am happy to be back in Atlanta (where I have been for only 3 weeks since July). I still have quite a bit of work to complete related to the investigation before letting the rest of the team make their advice, suggestions, and contributions.
How have you been? I read briefly that Enron was having some tough times. Did this affect you directly, or were the happenings in another division?
Are you going back to Louisville for Thanksgiving or will you be traveling? I will be here in Atlanta, working, and hopefully taking a couple of hours off to enjoy a little turkey nwith friends.
The PennAtlanta alumni club will be holding an holiday party in 2 weeks which I hope to attend if I am in town. I know 2 other other Penn-Atlanta couples, so perhaps it will be a good way to reconnect

with some people. Does Houston have any similar events?
I hope that things are going well for you. I will be an aunt by the
time that I will next speak to you!!!!

Best,
andi

Steve & Christian,

After talking with the Southwest desk here is what is happening with Azusa.

Deal #831407.1 Paloverde Heavy Load 10mw Purchase from Azusa at \$32.50 1/1/02
thru 3/31/02

Deal #537901.1 Paloverde Heavy Load 10mw Sale to Azusa at \$139.00 1/1/02
thru 12/31/02

These two deals are the only ones active for January and are being performed on. They are booked out financially. All other deals I found are for Q3 '02 and beyond.

I hope this clarifies some things.

PP

BUSINESS HIGHLIGHTS

eSource

eSource, Enron's research group, has experienced an overwhelmingly positive response to the research training which it has hosted. Participation and interest by Enron employees has exceeded expectations and many classes were quickly filled. As a result, repeat classes have been offered and new sessions have been added to the program. In addition to the Lexis-Nexis and Dow Jones classes, eSource has now begun hosting sessions on Piranha (financials and pricing information), Investext (analyst reports and market analysis), Global Access (financials and corporate activity), and Securities Data Corp. (M&A, debt). eSource has also arranged long distance sessions using interactive web tools for Enron employees around the world. Watch for e-mails announcing new training sessions, either in Houston or in a virtual desktop mode.

Since our launch in December, the eSearch website has received over 230,000 hits. The site today offers Enron employees access to 34 electronic databases. These databases offer the latest financial and business on-line research capabilities in a cost-effective manner. In this era of information explosion, databases

are constantly being reviewed to ensure that Enron's research needs are being met. If you know of a professionally relevant database that might be added to eSearch, let us know. Meanwhile, to further fulfill Enron's research needs, eSource is arranging for desktop access to good-old-fashioned libraries too. Books from public and local university libraries can be located, borrowed and delivered to employees' desks. This should be particularly helpful for those with more specialized or technical research needs.

We are also proud to report that at a recent local research conference, Enron's eSource was featured as an industry trailblazer for having invented itself into a combined virtual library and intranet-based research center capable of delivering a broad range of research products and services via the user's desktop. Attendees from Reliant, Shell, Halliburton and ExxonMobil and others were duly impressed.

As for the future, watch for Version 2.0 of the eSearch website, <http://esource.enron.com>, scheduled to launch soon. It will feature greater functionality and additional content. Look for new features like "Industry Overviews" and links to information providers like Frost & Sullivan, Country Watch, and World Energy Markets.

IN THE NEWS

Chicago And Its Suburbs Pick Enron, ComEd For Power Deals
06/06/2001 Dow Jones Energy Service (Copyright (c) 2001, Dow Jones & Company, Inc.)

CHICAGO -(Dow Jones)-The City of Chicago and 47 suburban communities have decided to divide new deals for 400 megawatts of power between Enron Corp. (ENE) and local utility Commonwealth Edison Co., Chicago officials said Wednesday.

In the largest power purchase agreement in Illinois since the state chose to deregulate the industry in 1997, the local government groups will get 60% of their power from Enron and 40% from Exelon Corp.'s (EXC) ComEd. The municipalities use the power for public buildings and public transportation.

Chicago announced Monday that the group has picked ComEd to meet the renewable target by providing 80 megawatts of power created with landfill gas, wind and other sources. ComEd will also provide the coalition with another 80 megawatts of power generated with fossil fuel and nuclear plants, and Enron will provide the other 240 megawatts. The new contracts are expected to go into effect this year.

"We used our purchasing power as local governments to get the best price we could and at the same time to promote competition in Illinois. Enron gave us the most competitive price," Chicago Mayor Richard M. Daley said at a press conference.

WELCOME

New Hires

EGM - Jennifer Morris, Mike Reen, Daniel Fuller, Jason Paterniti

ENA - Craig Hawkins, Carol Langston, Mark Morrow, Harlan Murphy, Bruce Petitt, Emily Schwarzbach, Alice Wright, Allyson Zykorie

Transfers (to or within)

ENA - Thomas Kalb, Debra Brannen, Juan Camarillo, Richard Orellana

EGM - Joana Bekerman, Eric Tipp, Kellie Metcalf, Ricardo Charvel, Jason Andrade

EIM - Jaime Araoz, Gabriel Chavez, Enrique Cadena, Rosalinda Castillo, Kimberly Chick, Ana Morena, William Brown, Grisela Escamilla, Paul Burkhart, Jodi Coulter, Douglas McDowell, Catherine Pernot

NUGGETS & NOTES

Enron is hosting the Chicago Energy Risk Management Seminar at The Drake Hotel in

n Chicago on June 14, 2001. Topics include: Power Outlook, Natural Gas Outlook, Hedging Strategies, Weather Risk Management and Pulp and Paper Risk Management. The RSVP deadline is June 8th so please contact Laura Pena as soon as possible at x 3-5376. This is a great event for "new" as well as established customers. There will be a cocktail reception immediately after the presentations. Enron will also be hosting seminars in Atlanta, Houston, Denver and San Francisco. Dates to be announced soon.

Congratulations to Kathy and Craig Taylor, manager in East Origination. They are the proud parents of a baby girl, Katherine Montgomery, born on May 25.

Travel tip of the week:

When booking through TAP or ClickTrip, use preferred domestic airline carriers to recognize special Enron discounts.

American	28%	American West	15%
Continental	17%	Delta	10-28%
Northwest	20%	TWA	19-25%
United	20%	US Airways	30%

Please note: discounts are confidential and should not be disclosed to anyone other than Enron employees.

EnronOnline Statistics

Below are the latest figures for EnronOnline as of June 5, 2001.

- * Total Life to Date Transactions > 1,045,000
- * Life to Date Notional Value of Transactions > \$630 billion

experience Enron

Announcing enhancements to experience Enron:

? To begin your customer's Enron experience, we will send out customized invitations with a Guest Check-In Card that contains detailed instructions about check in.

? experience ENRON has partnered with the Plaza Reception Desk Staff to create a less stressful check in process for your customers. Once they present their card, the Plaza Reception Desk Staff will welcome them and present them with a prepared experience ENRON name badge.

? experience ENRON has also created a new look for your meetings. Our new table tents, welcome folders, name badges, agendas and presentation templates all have the same look to maintain a consistent feel throughout the visit.

? All of this is to ensure that your guest has a unique and customized experience that will exceed their expectations and help you reach your business goals faster.

For more information on experience ENRON, visit our website at experience.Enron.com.

The New York City Marathon will take place as scheduled on Sunday, November 4, 2001. The following are items of special interest:

HOTELS

Prices have been reduced at selected New York City Hotels. Please check www.nycmarathon.org for complete hotel and airline information.

FINISH LINE BANQUET

The 2001 New York City Marathon Finish Line Banquet will be held at Tavern on the Green, West 67th Street and Central Park West, from 10:15 a.m. to 3:00 p.m. on Marathon Sunday, November 4. It includes champagne brunch, gourmet cuisine, open bar, VIP seats at the Finish Line, and large-screen broadcast of the entire race live on WNBC. RSVP by October 19 to Amanda Landers at 212-423-2284 or amandal@nyrrc.org. Click here [www.nyrrc.org/nyrrc/mar01/info/flbanquet.html] for the Internet registration, download our printable form, or call 212-423-2284.

EXPO

The New York City Marathon Expo is moving from its previously announced location at Pier 94 because the City of New York is using this space in connection with the World Trade Center disaster recovery effort. The new Expo location has yet to be determined. Please stay tuned to www.nycmarathon.org for an announcement of the new location.

PONTIAC COMEBACK RUNNER OF THE YEAR

This year Pontiac and New York Road Runners present the Comeback Runner of the Year Award. This annual award honors two runners, one elite and one recreational, who have come back from adversity to compete in the 2001 New York City Marathon.

In addition to presenting the winner a beautiful trophy produced by Tiffany & Co., Pontiac will donate \$1,000 in the winners' names to the Twin Towers Fund.

Your entry should explain, in 100 words or less, the challenge you overcame. Please include your daytime phone number with your entry.

All entries must be received by October 9, 2001.

Entries can be submitted via the New York City Marathon web site at www.nycmarathon.org, or via mail to Comeback Runner of the Year, c/o NYRR - Michelle Doti, 9 East 89th Street, New York, NY 10128.

AND ONE FINAL MESSAGE

As always, the safety of the participants, spectators, staff, and volunteers in the New York City Marathon is of paramount concern to both the City of New York and New York Road Runners. We cannot publicize the details of the security effort, which is provided by local, state, and federal agencies. In light of the recent terrorist attacks, it will be even more encompassing than usual.

ECS to ECN Network Interconnection, June 9th 2001 POSTPONED
This is a notification that the Enron Corp. I/T Networks team will be connecting
the new building network infrastructure located in Enron Center South (ECS) to
the existing Enron Center North (ECN) backbone network. While this activity is
not expected to produce a disruption to network services, this notice is designe
d to alert the organization to our activities. No network hardware or systems a
re anticipated to be shutdown. The actual physical interconnection of the netwo
rks will be performed in the EB 34th floor Data Center.

Interconnection activities are scheduled to occur the evening of June 9th 2001 s
tarting from 7:00 p.m.(CT) and completing around 11:00 p.m. (CT). Application te
sting activities will begin at 11:00 p.m. (CT) once all network testing has comp
leted.

If you have any further questions, please contact Pete Castrejana at 713-410-064
2 for more information.

Due to current business circumstances, on November 28, 2001, Enron's Board of Directors adopted an amendment to the Enron Corp. Savings Plan. The amendment includes the following changes, which became effective on November 29:

? Savings Plan contributions that are deducted from your November 30 paycheck will be matched by Enron in cash rather than Enron stock. The cash match will be placed into the Fidelity Freedom 2000 fund, the default fund for the Plan.

? After November 30, Enron will no longer match your savings plan contributions. As an exception, the company will continue the union matching contributions to the Plan.

? The Savings Plan has always permitted employees to place their contributions in Enron stock or one or more alternative investment options. Effective immediately, diversification within the Plan will ALSO be allowed, regardless of your age, from COMPANY contribution accounts. This removes the restriction for all employees under the age of 50 to diversify the company contributions held in their account. These accounts include all prior company contributions, QNEC, and company match accounts.

To move funds:

On the Web, choose "Savings Plan--Restricted Employer Acct Transfer/Reallocation" from the drop down menu.

On Voice Response, choose "request for fund transfer/reallocation of your restricted employer accounts."

This will allow you to move money from the four formerly restricted accounts: Company Matching, Union Matching, Prior Matching, and QNEC.

To avoid phone delays, we recommend that you access your account through the web at <http://resources.hewitt.com/enron> or through benefits.enron.com.

we are scheduling execution of NNG 1st wave and some TW 2nd wave mortgages on su nday afternoon starting at 1:00. planes are scheduled to depart 6:00 am monday morning.

i know we have some questions on the minnesota and kansas tax issues. these que stons would have to be resolved before the mortgages are executed. signing shou ld take at least 2 hours - 300 instruments to sign.

i can move the signing ceremony til later in the day if that helps...i'll be exe cuting for NNG.

Jen - i would like you there and a notary from your shop. thx

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.

We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560

November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928.

The cost is \$100.00 per person.

No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

As we continue to address a number of issues facing Enron, it is critical that the company remain focused on attracting, motivating and retaining a diverse and talented workforce. We strongly believe that our workforce is world-class -- the best in any industry, so we will continue to develop and reward this tremendous talent base.

Because the lasting strength of our company is determined by the strength of our workforce, we are elevating the role employee-focused functions play within Enron. We are pleased to announce that effective immediately Human Resources, Employee Responsibility, and Executive and Corporate Compensation will report directly to the Office of the Chairman.

David Oxley, Vice President, will continue to oversee Enron's Global HR function. The lead HR representatives for the individual business units will report to David in addition to their respective Office of the Chairman. Besides managing Recruiting, Staffing, Training, Compensation and the Performance Evaluation Process, David will also add Payroll and Labor Relations to his list of responsibilities.

Cindy Olson, Executive Vice President, will have responsibility for Employee Relations and Corporate Responsibility, which includes Social Responsibility, Community Relations, Diversity, Employee Relations, Redeployment, Alumni Relations, Employee Events and Programs, Benefits, Wellness, and Worklife.

Mary Joyce, Vice President, will continue to have responsibility for Executive and Corporate Compensation in addition to Global Employee Information Management and Reporting and Analysis.

David, Cindy and Mary will each report to the Office of the Chairman. A detailed organizational chart is attached. Please join me in congratulating David, Cindy and Mary on their new responsibilities.

Hi Sara,

There were two options terminated on the same date. I faxed you one of the two.
The content was my concern.

Thanks for your feedback.

Enjoy your weekend!

Jorge

Subject: Your request for authorization to sign J.Aron & Company Currency
Option Transaction termination ("Termination")

Jorge:

Please read paragraph 2 of the Termination confirmation.

It refers to the terminated transaction having "Reference number 1980816".

The confirmation that you sent to me (for the terminated transaction) has a Reference number 1980815. The termination confirmation is referenced as 1980816.

You need to correct paragraph 2 of the Termination confirmation. Then the document can be executed.

Please let me know if you have further questions.

From: frazier.king@tcpolice.org
To: teb.lokey@tcpolice.org
Subject: Order 637 ROFR Pricing Policy
Mime-Version: 1.0
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit
X-From: King Jr., Frazier </O=ENRON/OU=NA/CN=RECIPIENTS/CN=FKING>
X-To: Lokey, Teb </O=ENRON/OU=NA/CN=RECIPIENTS/CN=Tlokey>
X-cc:
X-bcc:
X-Folder: \Teb_Lokey_Mar2002\Lokey, Teb\Inbox
X-Origin: Lokey-T
X-FileName: tlokey (Non-Privileged).pst

The policy spelled out in Order No. 637 (and affirmed on rehearing in Order No. 637-A) for pricing under ROFR at the expiration of a lower-rate service agreement (where rates are "vintaged"). In both Order No 637 and Order No. 637-A the Commission notes that this policy is consistent with the Certificate Policy Statement issued in 1999. Order No. 637 states as follows:

[A] shipper exercising its ROFR could be required to match a bid up to a maximum rate higher than the historic maximum rate applicable to its capacity in certain limited circumstances: when a pipeline expansion has been completed and an incremental rate exists on the system; the pipeline is fully subscribed; and there is a competing bid above the maximum pre-expansion rate applicable to existing shippers.

* * *

As the Commission explains in the Certificate Policy Statement, to adjust the maximum rate applicable to shippers exercising their ROFR in these circumstances, the pipeline would have to establish a mechanism for reallocating costs between the historic and incremental rates so all rates remain within the pipeline's cost-of-service. The mechanism can be established either through a general section 4 rate case or through the filing of pro forma tariff sheets which would provide the Commission and the parties with an opportunity to review the proposal prior to implementation.

Order No. 637 references one instance where a pipeline had filed such a mechanism as follows:

Cf. Viking Gas Transmission Company, 89 FERC Para. 61,204 (1999) (rejecting tariff filing to raise matching rates under a ROFR where, among other things, the filing did not readjust existing and expansion rates.

Jan and I are doing a search right now to determine where there have been any other filings. I'll let you know what we find.

Let me know if you have any follow-up questions.

Darren,

I received another invoice for September production for Blue Dolphin. Are we responsible for transportation fees for September and future production months? Also, do the dehydration fees (MEI) apply to AEP as well? Currently, the August invoices have not been paid. If ENA Upstream is not responsible, let me know who/where I should forward the invoices.

Tori,

I just wanted to let you know that we haven't forgotten about you. Kim Alexander who has really been the authority on the pricing information was involved in an auto accident this previous Sunday. He'll be returning to work next Wednesday and would be able to complete this much faster than anyone else trying to pick it up.

I'll keep you informed next week as to how it goes.

Thanks for your patience,

Dave

I sent this message to colin originally and, since he's out, I am forwarding it to you. I'm not really sure who the appropriate person is. I also just realized that I forgot to include the attachment on the original message - oops. Anyway, could you take a look at this sheet and let me know what you could come up with? I'd like to build something that looks like the "price sheet" tab. Thanks.

This is a spreadsheet that we used to have in our fundies packet a while back. It is no longer being maintained, but I was wondering if you could cook something up that looks similar to it -- linking to the fundies price database. Let me know. Thanks.

Greg,

How do you want me to proceed on this? Basically, recommendation is as follows:

Current contract expires 12/31/01
Propose new 2 year deal thru 12/31/03

Base salary	\$300,000	(Currently \$250,000)
Sign-on Cash	\$100,000	
Sign-on Options	\$300,000	
Sign-on R.Stock	\$300,000	

(ie bump on base, \$100 in cash and \$600 in equity)
No targets.

This is consistent broadly with what we offered Chris Calger (0/750), Rob Milnthorp (0/650), Dave Duran(0/650) and Kevin Presto(100/850).

Attached are also his ENW comparisons and Ray Bowen.

David

Subject: Greg Piper Compensation

Attached is information on Greg Piper's compensation for your review. Based on the information provided, I made a recommendation of increasing his base to \$275 k, including a cash payment of \$100k for signing and providing another \$100k (1/2 restricted, 1/2 options) in equity.

Let me know when you would like to discuss.

Subject: Additional Move Related Information

A few more important reminders...

Chairs: Must be labeled for the move---use the wire tags included in your move packets.

Keyboards, mice: ONLY label non-standard types (i.e. wireless mice/keyboards, special ergonomic keyboards); otherwise, do not label.

Phones: Do not label these. New phones will be at your workstations at Enron Center South.

Laptops, cell phones, palm pilots, etc.: Be sure to remind your groups to take these home. The move team will not be responsible for moving these over. However, docking station, cradles, etc. should be labeled. The move team will move these over and set them up for you.

Thanks again for all your hard work,
Christa

Subject: Move Related Issues

As you all know, our move is scheduled for this weekend. Hopefully, you and your groups are all progressing well in your preparations for the move this Friday. Please take the time to read the information contained in this message because most of the information contains reminders or FYI items and will be important to you and your group. Please forward this to those in your group that may need this information.

? Voicemail instructions - Please have everyone in your group clear all new voicemail messages by 5:00 PM, Friday, 11/16. All saved messages, greetings and recorded names will be saved. If a message is left before cutover the message will be saved, but the message light will not be displayed when you arrive. As a precautionary measure please check voice mail upon your arrival Monday morning even if the message light isn't on.

? Building access - ECS will not be available for general access until Monday morning at 5:00 AM. Due to the gas and power moves being combined, it is unlikely that the move team will be prepared for the POC's to come in on Sunday to unpack. (Separate instructions will be generated for those who are needed to test trading applications.) NOTE: Only those whose names have been approved and submitted to security will be allowed access on Sunday.

o Monday - 5:00 AM for all employees

? Security & badges - All POC team members should be familiar with the routes into ECS as we discussed at our recent move meeting. Please be sure to share this information with all of the people in your group. If you need additional copies of the floor plans that have the access routes highlighted, please contact Carli Smith (5-3473). Please stress to everyone to have their badges with them at all times. No one will be allowed access without their badge. If anyone tries to access the building from the garage via the skyring and they do not have

e their badge, they will be sent back through the garage to the street level to walk across the street to the round kiosk in the Enron building lobby to get a guest pass and then proceed back to ECS via the 2nd floor and the skyring.

? Move team colors - As mentioned at the move meeting, the following is a list of the color designations (vests) for the various teams that will be on the floor when we move in.

- o Red - Move Team
- o Orange - Desktop Support/IT
- o Green - Telephony

? Newspaper subscriptions - The delivery location for all newspaper subscriptions need to be changed to ECS 05/06. It is our intention to have all daily newspapers delivered to the mail desk located in the ECS 2nd floor corridor. It will be the responsibility of the assistants to either pick up the papers for their group or designate someone in their group to pick up the papers. If your papers continue to be delivered to your old floor of ECN, contact Sunny Rodgers (3-6116).

? Move boxes - Please encourage your group to pack and bring no more than about 6 boxes per person. You may call Facilities (3-6300) if you need to request additional boxes.

? Move labels - If you run out of labels or if you are missing any labels, please call Carli Smith (5-3473) to have additional or missing labels printed.

? Laptops - Important - Please ensure that all cable locks have been removed from all laptop computers by 5:00 PM on Friday. If any cable locks are left on the computers they will be destroyed by the move team in order to move the computers as scheduled.

. Bottled water - Every kitchen has an ice machine that also dispenses filtered water. The large bottles of water (5 gallon) will not be allowed on the floor. We would also like to discourage the use of small bottles of water due to limited storage space and the availability of filtered water at several locations.

? Phone sets - Although most of you are aware of this, we just wanted to remind you that there will be only one phone on each desk - either a turret or an Avaya, but not both. Do not tag your phones, a new phone will be waiting for each person on their desk in the new building

I hope I have covered some of the outstanding questions or issues you might have, but if I have missed something, please let me know. Thanks so much for all your help and hard work.

Andy,

This will update you on this matter. You may recall that it is a collection matter for about \$1,800,000 for breach of spot gas purchase contracts by Triad. We tried to arbitrate, but Triad wouldn't answer the arbitration (even though I got calls from Purnell afterward, who asked if there was some way we could settle the arbitration). We then filed suit in the 125th Judicial District Court of Harris County, Texas, against both Triad and Purnell, to see if that would smoke them out.

As you know, after filing our original petition, we found an inadvertant technical error in it that required correction, and at no charge to you refiled a first amended petition that corrected the error. Since then, we served the first amended petition and citations on the Secretary of State of the State of Texas, as is allowed by law under such circumstances. The Secretary of State then forwarded the first amended petition and citations to the addresses we gave them, by certified mail, r.r.r. At this time, which is long after the expiration of the answer date, no certified mail receipt has reportedly been received by the Secretary of State from Purnell or Triad. No answer or other pleading has been filed by Triad or Purnell.

This is not unexpected, given that Triad dodged us during the attempted arbitration. The caselaw supports the position that we have made effective service on both Triad and Purnell, although there is some room to argue that the Secretary of State has to receive a green card back, even if it is marked "refused". If we wanted to try to nail this point down by going to the additional expense of personal service on Triad and Purnell, we could, but if Purnell is not going to respond to registered mail, he will likely attempt to dodge personal service as well. I am not recommending it.

We will shortly receive from the Secretary of State the so-called "Whitney Certificate" and file-stamped copies of the citations, which we will file with the court, along with a motion for entry of default judgment. I will make sure you see a draft before it is filed.

We will need to set a hearing on our motion, and produce evidence of our damages. I would not expect the hearing to take more than an hour. We previously filed an affidavit signed by Bryce, as well as a matrix for computing our prejudgment interest (given that there were many spot gas sales, and prejudgment interest as to each would start at different times) prepared by Shielah Castro. I will follow up with them to see if they would be willing and available to come with me to testify at the hearing, and will of course fully prepare them beforehand. Also, I will need to testify regarding our attorneys' fees in this matter.

r.

Parenthetically, given the length of time this matter has been on file, it has been routinely set on the dismissal for want of prosecution docket. As you know, it is merely a formality and I will file the appropriate motion to get this taken care of. I will send you a draft of that if you wish. A hearing is set on this docket for October 23, at which time I presently have a conflict, and Bonnie has kindly agreed to attend in my place if necessary. No one else need be at that hearing.

Please let me know if there is anyone else who needs to be in the loop on this.

I will keep you advised.

Britt

Dear Vince:

I hope you have liked the short paper on decision making I sent you a week ago. It emphasizes the human nature of the process of decision making. I personally believe that this line of reasoning is systematically neglected by the investment and trading communities. I think that many of the great traders and investors are very well aware of these limitations of human mind and are making efforts to utilize them. For example you may encounter similar ideas in the George Soros' book "The Alchemy of Finance". I am certain that developing and expertise in this area bears a tremendous potential for improving Enron's trading operations and will give us an edge with respect to other trading powerhouses.

Do you think there are desks at Enron that may be interested in developing a system of procedures that leads to improving our trading performance? I will be extremely interested in working in this field. By the way I have already gathered many of the basic pieces of information needed for such an undertaking.

As a beginning I may make an overview of the literature available on decision biases and list as many of them as possible. Indeed, the mind traps mentioned in the paper are not the only ones. Later we may discuss with our clients possibilities for quantifying the influence of a selected group of these biases on the performance of our traders. Still later, a set of questionnaires, a system for keeping trader's perceptions prior to every act of decision making, and the result of the decision will be created, etc.

I envision the final product to be a self-educating trading system learning from every single experience, both positive and negative and utilizing the history of the decision maker to her best benefit. After some transition period, the result should be a more enlightened process of decision making of our traders, stri

David

Thanks for the information. It looks like I have a sizable additional tax bill. Am I missing something? Do I have Enron stock I can sell to offset these gains (e.g. in my savings plan matching? Other ideas?

I have attached below a copy of the new Notice and Agenda for the ServiceCo Board meeting to be held tomorrow (Friday) at noon Houston time. The Notice contains the new call-in number for the meeting, which is as follows:

Call toll-free 1-888-566-5914, and mention the passcode "ServiceCo". If asked, the arranger for the call was David Roland.

I also faxed the Notice and Agenda to Shael and Tracy (I attempted to fax to Brad but was not successful).

Thanks,
David

What if we purchase the switch from a 3rd party, i.e. CES? How would that affect your 1st 2 bullets?

-----Original Message-----

From: Rimmer, Todd

To: Mann, Kay; Raab, Eric
Subject: USTeleNet Transaction

Just to follow-up on our discussion yesterday regarding the accounting treatment assuming that USTeleNet owns the switch and that we purchase the switch and lease it back to them under a "capital" lease, the following would occur:

The asset would stay on their books (however it would be "marked-up" to FMV as evidenced by the purchase price)
They would defer the gain, if any, over the asset's life.
They would record a payable on their balance sheet and recognize interest expense in their P&L as payments are made
We would record the payment of cash to them and book a receivable and deferred interest income (to be recognized over the lease term)

Essentially we are lending them money equal to the FMV of their asset and receiving interest payments in return (i.e. direct financing lease)

I would be happy to go into more detail at your request. Please let me know as issues develop and I will assist as necessary.

I think we should also put the position report file in there that Jad/Couch created as a backup to the CEPoS/East Positions. Couch can you put the query file you set up for the price desk?
PL

Subject: NetCo.

Jeff was able to create a Netco file under 0:\erms\erms_adm without an erequest. There is a file for each region out there now. I will save the new p&l to each region but could each of you please pick an p&l from your region as a back-up just in case.

these are the files I know of

Exotica
P&L
Hedgestrips
All excel queries
Weapon-X & new version
Access financial reports
Exotics file
Transport model
Curve files

Do you guys have anything else?

Kam

Subject: =09Sunday Weather Update 06/03

Hi Everyone...

1) The forecast pattern seems very similar to what we've been talking about over the past several days. 6-10 features below normal in the Midwest and the East with a brief normalization possible toward the Great Lakes next weekend (days 8 and 9) before more cool air arrives. 11-15 indicates yet another trough digging into the East (temperatures normal to below normal) with the primary ridge remaining in the Southwest (above to much above).

2) 1-5 Day forecast also looks similar still quite cool for the East and Midwest - though not quite as hot for the immediate West Coast. Above to much above normal temperatures will be common across interior California for most of the week with a 1 to 2 day spike of warm temperatures near the coast mid-week. No prolonged period of heat will affect the Northwest. =20

3) EarthSat will issue an "official" 6-10 and 11-15 forecast around 2pm today. You can get this map by going to: <http://www.earthsat.com/misc/enron/> and then follow the "Sunday Update" link (near the bottom). Login is "enron", Password is "enron".

Maps are attached - this is the way we feel things will look to start the day tomorrow. *If there are any changes to this picture - it may be to warm the Midwest/ East closer to normal. Right now this solution appears unlikely - but if there are any surprises tomorrow - it may be a SLIGHTLY warmer picture for the East.* =20

=20

Enjoy the rest of your weekend...

Research Weather Team =20

We are bringing in Associate Candidates for Super Saturday this upcoming weekend
and we are looking for associates to help host our Saturday evening dinner at T
eala's, 3210 West Dallas. The dinner will be from 6:00 p.m. - 8:30 p.m. If you
are available to help out please email Dolores Muzzy. We will also have anothe
r Associate Super Saturday on the weekend of November 30th - December 2nd. We w
ill be in need again of dinner host for the Saturday evening dinner. It will be

at the same time and also at Teala's. If you are not available this weekend but would like to participate on the next Associate Super Saturday please email Dolores Muzzy as well.

Thanks for your participation.

Dolores

Hi Jim,

The shipping quote to your door is 269.00/game. There was know price break on two or more because they had to be but on individual pallets. Here are some pictures of what I have available in the classic games. I almost forgot to tell you. We have a brand new gauntlet Legends 4 player in a dedicated Cabinet available for only 2,195.00 this game was 3995 new a year ago. It is brand new and never been used. It's a great buy if you like action adventures games. I think your kids will like it. Also 4 players can play at the same time. It a great game with lots of hidden treasures and secret doors. We only have two units left and I think the skating rink in League City, TX is going to get one. Also would you want us to set them on free play for you or do you want to use quarters to make them work. It's your choice. It's the last picture title Gauntletebay.jpg

Let me know if you have made any decisions

Thanks,

Lutz

Subject: Dave Baumbach

Bob,

I talked to Chris about the change of plans. I am sorry that it did not work out but Dave has more knowledge of the Texas grid and he runs our Waha physical trading activities. He works well with Mike and he is willing to do whatever we need him to do. He is spending the rest of the week to suck as much out of Daren as he can. If there is any training for the logistics systems that he can go to, he should do that as well. If you have any other recommendations to get him up to speed on the Logistics side I sure would appreciate it.

Tom

Dear Colleagues,

We know you have many questions about your new benefits plan, payroll issues and other changes that will occur over the next few weeks. Human Resources and Communications are preparing a thorough Q&A, which we will send to you tomorrow and will regularly update as more information is available.

Meanwhile, please read the announcement below from Security about how you can obtain a new UBS Warburg access card that will allow you to enter our new office space after Friday.

I am confident that you share my enthusiasm about our new opportunity. We look forward to working along side each of you in the coming days.

David Oxley
Head, Human Resources

Access Cards

There will be a two-day transition for the new UBS Warburg access cards. Beginning Monday, February 11, access to the 5th and 6th floors of Enron Center South will require these new cards. UBS Warburg access cards can be picked up from 7 a.m. to 7 p.m. at the reception area on the 5th floor of Enron Center South on Thursday, February 7th ; Friday, February 8th ; and Monday, February 11. Enron Security will produce new access cards with existing photographs, then simultaneously issue the new and collect the old cards. Employees without UBS Warburg cards will be allowed into the Enron Center South building on Monday but will have to collect their new cards as soon as possible to gain access to the 5th and 6th floors.

Employees who fail to collect their new cards by 7 p.m. Monday will be required to contact Enron Security's general information number at 713-853-5360 to arrange to pick them up.

There will be security staff available at the pick up point on ECS 5 to help with any problems you might have.

It is suggested employees wear their access cards at all times while on the premise.

Accessible Areas - The new cards will allow UBS-W employees to enter: 5th & 6th floors and Plaza area of Enron Center South , The Sky Ring Body Shop, Enron Center North Plaza and therefore access the Credit Union and Cafeteria from either building.

Restricted Areas - Employees must submit to Enron Security a Restricted Access Request form (available by calling 713 8535360) and signed by Bob McAuliffe (713 -853-7468) to enter:
Enron Center South, 8th and 9th floors
Enron Center North, 22nd and 34th floor
Ardmore Data Center.

Employees staying with the Enron estate while visa and other issues are completed - Employees in this group who are on assignment arrangements to UBS-W will be issued a regular access card - available in the same way as other new UBS-W employees.

Estate employees who are working with UBS-W on transition issues - If they will be based in UBS-W office space they should talk to their UBS-W counterpart for approval and then UBSW HR for the issue of a UBS-W contractor card (in addition to their regular Enron badge).

In order for UBS Warburg to timely process your paycheck, I am requesting that a
ll employee's accepting offers return any outstanding forms to my new desk locat
ion at 05852 on the 5th floor of ECS (Look for the Hamburg Flag) by noon this F
riday 2/01/02. This will prevent any benefit deductions from having to be "Dou
ble Deducted" on future checks. Please attach a deposit slip or voided check st
ub to your direct deposit form. Attached below are the forms needed for payroll
/benefits, in case you did not turn these in at Orientation. Lastly, please ver
ify that your EHRonline home address is showing your current home address becaus
e all live checks will be mailed to your home residence.

Thanks, Tony Jarrett

Please respond to Bestfares.com Hot Deals Today's Hottest Travel Deals from Bestfares.com!

EUROPE ON SALE FROM \$254 RT THROUGH JUNE 30, '01

We have just received new lower fares to Europe. Can you believe that you can fly to Europe for as little as \$254 roundtrip through June 30, 2001? Simply depart prior to June 14 and the savings are unbelievable compared to July and August airfares. Why not take off early and save big? New York City or Philadelphia to Amsterdam is just \$254 roundtrip. Boston, Philadelphia, New York City, Washington (DC), Baltimore or Pittsburgh to Brussels is only \$254 roundtrip; Dallas, Chicago, Los Angeles, San Francisco, San Diego or Phoenix to Amsterdam is \$308 roundtrip. We have super sale specials to many European cities including Brussels, Paris, London, Manchester, Madrid, Rome, Milan, Frankfurt, Dusseldorf, Munich and more. You could save over \$600 per person. Check out our June specials to Europe at

<http://www.bestfares.com/travel/desks/story.asp?id=58>

OVER 200 U.S. CITIES ON SALE FOR \$162 OR LESS THROUGH SEPT. 10, '01

Where in the U.S. can you fly for under \$162 roundtrip? Here at Bestfares.com, we have over 200 U.S. city pairs on sale to save you big bucks. How cheap? How about San Diego to Austin or San Antonio for \$141 roundtrip with no fuel surcharge? Kansas City to Las Vegas, \$125 roundtrip; Nashville or Columbus (OH) to Las Vegas, \$161; Los Angeles to Oklahoma City, Columbus (OH), Little Rock, Omaha or Kansas City, \$143 or less; New Orleans to Tulsa, San Antonio, Indianapolis, Raleigh or Providence, \$143 roundtrip. Now, for the really cheap fares: New Orleans to Kansas City or Hartford, \$99 roundtrip or Columbus (OH) to New York City, Boston, Philadelphia or Washington (DC), \$89. Remember, these are only a few of the cities that are on sale this week. Check out

We will also have San Jose, Costa Rica, San Salvador, Belize, Mexico City, Guadalajara, Monterrey and other cities south of the border on sale. Check out our News Desk at

<http://www.bestfares.com/travel/desks/desk.asp?desk=news>

BESTFARES.COM IS NOMINATED FOR THE 2001 WEBBY AWARD

We are most honored by our nomination by The International Academy of Digital Arts and Sciences for a 2001 Webby Award. Hailed as the "Oscars of the Internet," The Webby Awards are an eminent honor for Internet sites. The 5th annual Webby Awards will take place on Wednesday, July 18 in San Francisco. Two honors are presented in each category: The Webby Award and The People's Voice Award. Judges from The International Academy of Digital Arts and Sciences select the nominees for both awards, and the winners of The Webby Awards. The online community determines the winners of The People's Voice Awards. You can place your vote by visiting

<http://www.webbyawards.com>

People's Voice Awards voting opens April 30 and runs through July 4.

36&key=1871&">Todd Bouman, QB MIN - Free Agent Updated 1
2/29/01
Bouman will miss Su
nday's game against Green Bay due to a thumb injury. Spergon Wynn will start in
his place.

<A HREF="http://football299.fantasy.sportsline.
com/mp/elink?script=players&league=bige01&owner=78977.7&random=136&key=187690&">
Spergon Wynn, QB MIN - Free Agent Updated 12/29/01</FONT
>

Wynn will start Sunday's game against the Green Bay Packers in place of the inju

red Todd Bouman. Wynn, who played in most of last week's loss to Jacksonville, is far too inexperienced to start this deep into the Fantasy season.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1041&> Drew Bledsoe

QB NE - Free Agent Updated 12/29/01

According to published reports, the Chicago Bears are interested in acquiring Bledsoe. With Tom Brady seemingly entrenched as New England's quarterback, it seems that Bledsoe has become expendable to the Patriots. The move would certainly improve the Bears' passing game, but no deals would likely be made until sometime in the spring.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=133297&> Martin Gramatica

K TB - Free Agent Updated 12/28/01

Gramatica has still not been ruled out for Saturday's game, although the Buccaneers have signed veteran kicker Doug Brien as insurance. Even if Gramatica can play, he will be a very risky Fantasy starter.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1171&> Warrick Dunn

RB TB - Martin Updated 12/28/01

Dunn's status is day to day with a toe injury. He is expected to play this week, but Mike Alstott has been the most productive back on the team in recent weeks.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1310&> Michael Westbrook

WR WA S - Free Agent Updated 12/28/01

Westbrook's status is day to day with a knee injury. He is expected to play this week.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=133322&> MarTay Jenkins

WR ARI - Martin Updated 12/28/01

Jenkins may miss his second consecutive game with an ankle injury this week. Arnold Jackson would replace him as Arizona's third receiver.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=12366&> Brian Finneran

WR ATL - Free Agent Updated 12/28/01

Finneran is listed as probable with a knee injury. He is expected to play this week.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1499&> Tyrone Davis

TE GB - Free Agent Updated 12/28/01

Davis has been elevated to the No. 2 tight end slot over rookie David Martin. He will see a considerable amount of playing time now that he is healthy, because Green Bay employs many double tight end sets in the red zone.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1612&> Oronde Gadsden

WR MIA - Matty Updated 12/28/01

Gadsden has been practicing this week and may be able to play. But his hamstring injury may limit his productivity.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1069&> Steve McNair

QB TEN - Free Agent Updated 12/28/01

McNair was limited in practice on Thursday. He is still expected to play this week, but he is a risky Fantasy starter because he will be less than 100 percent healthy.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1236&> Jimmy Smith

WR JAC - Frank Updated 12/28/01

Smith (flu) has missed practice time this week. He is still expected to play.

<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=78977.7&random=136&key=1511&> Joe Horn

WR NO - Matty Updated 12/28/01

=2>Horn suffered a minor shoulder injury in practice on Thursday. He is expected to start this week.

Aaron Shea, TE CLE - Free Agent Updated 12/28/01
Shea (shoulder) has been placed on injured reserve. O.J. Santiago will continue to be Cleveland's No. 1 tight end while he is out.

Jason Brookins, RB BAL - Tori Updated 12/28/01

Brookins has returned to practice and is listed as probable. But he still may not see any game action until Week 17.

Emmitt Smith, RB DAL - Bass/Hull Updated 12/28/01
Micahel Wiley may miss this week's game with a hip injury. Smith is expected to appear on third downs this week as well as assuming his normal workload.

James Thrash, WR PHI - Frank Updated 12/28/01
Thrash (ankle) returned to practice on Thursday. he is expected to play this week.

Wesley Walls, TE CAR - Free Agent Updated 12/28/01
Walls missed practice on Thursday with a knee injury. He may be a gametime decision this week.

Maurice Smith, RB ATL - Frank Updated 12/28/01
A banged-up Smith (knee) will continue to start for the Falcons. But Dan Reeves has indicated Rodney Thomas will continue to get some work at halfback.

Bob Christian, RB ATL - Free Agent Updated 12/28/01
Christian is day to day with a calf injury. He is expected to play this week.

Stephen Davis, RB WAS - Bass/Hull Updated 12/28/01
Davis (knee) has returned to practice. He is expected to start this week.

Todd Bouman, QB MIN - Free Agent Updated 12/28/01

Bouman took a few snaps Thursday but didn't appear to meet coach Dennis Green's "full strength" criteria for starting against Green Bay. Spurgeon Wynn is likely to start Sunday, though coaches didn't discuss the issue after Thursday's practice. Bouman didn't participate in the team's morning walk-through, when players work on plays without fully suiting up. And during the portion of the regular practice that reporters were allowed to watch, Wynn took more snaps than Bouman. A trainer said Wynn continued to take more snaps later in the closed portion of practice.

Jerome Bettis, RB PIT - Giggles Updated 12/28/01

Bettis, sidelined by a groin injury, returned to the practice field Thursday for the first time in a month. "Still questionable," coach Bill Cowher said. "He did more today. We'll see how he feels (Friday) and go from there. We'll take it day to day."

B>Doug Brien, K TB - Free Agent Updated 12/28/01

Brien signed a one-year contract Thur
sday night with the Tampa Bay Buccaneers, who will use him against Baltimore if
Martin Gramatica can't kick this week. Gramatica strained his right hamstring du
ring a 48-21 victory over the Saints last week. Coach Tony Dungy hasn't ruled hi
m out for Saturday night's game against Baltimore, however the club wanted to ha
ve a backup plan in case the Pro Bowl kicker isn't ready.

George W. Bush and Bill Clinton somehow ended up at the same barbershop. As they sat there, each being worked on by a different barber, not a word was spoken. The barbers were both afraid to start a conversation, for fear it would turn to politics.

As the barbers finished their shaves, the one who had Clinton in his chair reached for the aftershave. Clinton was quick to stop him saying, "No thanks, my wife Hillary will smell that and think I've been in a whorehouse."

The second barber turned to Bush and said, "How about you?" Bush replied, "Go ahead. My wife Laura doesn't know what the inside of a whorehouse smells like."

I am totally remiss! I am only now sending you the email you asked for with the breakdowns, etc. The total sale was \$50,000, and I devised net prices as such:

KPM set: \$25,000
Royal Copenhagen vase: \$3,000
Mars Vallet bronze: \$11,000
Rozenburg vase: \$11,000

I've attached the original invoice for you as well.

My Dear Jeff, I hope you are holding up through all this shit that your company is putting you through and I am truly sorry that it's happening to you. You deserve a whole lot better than this.

Love,
Ben

Just wanted to drop you a note and congratulate you on your recent appointment (or should I say "anoointment").

Also wanted to (on the QT) have a discussion about our two company's and float an idea. I've been at Harvard for the past two months at the AMP program and have had a chance to really look at the direction, gait and opportunities for Cinergy and during that same time frame Enron has also gone through some dramatic change. As is said "a little bit of knowledge is a dangerous thing". It would be a good to see you at the very least and grab a good bourbon and cigar.

I'll be out of the program in the middle of November and back in Cincinnati. Send me your number and I'll give you a call sometime and we can see if there is a reason to do anything but have the bourbon and cigar. Congratulations again on the obvious wisdom of the Enron empire. I'm sure they're braced for ignition.....

Regards,

Michael Cyrus

Subject: RE: NMPRC Proposed Renewable Energy Rule

if heat exhaust is counted in the "renewable" category, this would be another opportunity to take waste heat at TW compressor stations and convert it to electricity at above market rates. We are looking at one of these opportunities at TW station 1.

Subject: NMPRC Proposed Renewable Energy Rule

Kevin,

FYI--The New Mexico PRC has issued a proposed Renewable Energy Rule which would require providers of electricity to increase the percentage of their portfolio of energy supply from renewable sources. Please review and let me know if this is something you feel we need to comment on. My opinion would be that even if it impacted our business, it would be hard to argue against renewable sources of energy. Below is the link to the proposed rule. Let me know what you think. Thanks.

Glen

On September 25, 2001, the New York Independent System Operator, Inc. (NYISO) filed with the Federal Energy Regulatory Commission (Commission), revisions to its Market Administration and Control Area Services Tariff (Service s Tariff) and its Open-Access Transmission Tariff (OATT) to make permanent two temporary market rules pertaining to External Transactions that were initially implemented as Extraordinary Corrective Actions, and to introduce several new enhancements to its external transaction scheduling processes: 1) provisions to ensure that Exports are evaluated consistently for purposes of scheduling and curtailment by incorporating the concept of "Sink Price Cap Bids" into

o, and by eliminating the concept of "default" Decremental Bids, and 2) revising the time period within which it will perform the Balancing Market Evaluation (BME). Currently NYISO runs BME 90 minutes ahead of each dispatch hour. The revisions would allow NYISO to use BME at any time no later than 90 minutes before the hour. The NYISO has requested a waiver of the usual sixty day notice period so that this filing can become effective on October 30, 2001.

From: =09Garcia, Clarissa =20
Sent:=09Thursday, December 13, 2001 11:26 AM
To:=09Boyt, Eric; Dicarlo, Louis; Diamond, Russell; Neal, Scott; Versen, Vi-
ctoria; Lamadrid, Victor
Subject:=09Reliant Entex-Tennessee Pipeline

Received a phone call on Thursday, December 13th approx. 9:15am from Royal =
Edmondson, Gas Control Manager for Reliant Entex. He was trying to locate =
Victoria Versen and was eventually transferred to me. He wanted to make s=
ure Enron was delivering gas to the Entex's city gates. He asked if Enron=
was currently nominating gas to Entex city gates? What about storage? I =
told him currently we were not nominating all the gas however; the city gat=
es were kept whole with the no notice storage K#2210. He was told by Tenne=
ssee the storage was not being nominated & there was a good possibility tha=
t the city gates were not receiving their gas. I reassured him the city ga=
tes were receiving their gas. ENA does not nominate storage, it was autom=
atically done at the pipeline level due to the 2 day allocation lag. As =
per his previous conversation with Vicki Versen, he has an estimate what th=
e storage levels were & wanted to make sure there was enough gas in the st=
orage to cover December. I told him he would need to speak with Vicki on t=
hat matter. I asked him if there was a problem that needed to be resolved=
& his response: Reliant is going to wait it through to see the outcome wit=
h Enron, but wanted to make sure the gas was being delivered. =20

After the conversation, I run the storage report for December & the gas is =
automatically being withdrawn. I called Royal back and confirmed gas was =
being withdrawn from storage. He asked for a copy of the storage report. I=
did not discuss volume or what Enron's intention were at this time. I have=
not fax him a copy of the storage report as per his request. =20

I did not want to alienate Royal, but at same time I did not want to provid=
e too much information without knowing his full intentions.

Thanks,

Clarissa Hanks
Sr Specialist Logistics-East Desk Lead

Celebrate the Topping Out of Enron Center South on Monday, April 23rd in Antioch Park. At 4pm, the last beam will be hoisted to the 40th floor of the new building. The Building Guy will present a clear explanation of the Topping Out Tradition celebrated by construction crews everywhere. In celebration of Arbor Day, tree saplings will be handed out to all participants.

The last beam can be viewed this week in The Plaza near Starbucks. Sign your name on the beam and be a part of Enron history.

Mind's Eye Madness - A Celebration of Innovation!
Introducing an on-site "Celebration of Innovation" in true Enron-style from April 24th to April 27th!!! "Mind's Eye Madness" is a week-long celebration brought to you by Employee Involvement & Events and supported by Vince Kaminski. With a view to highlight advancements in technology, new businesses at Enron and the importance of being yourself, check out the lobby each day during lunch - more details will follow!

Tuesday, April 24th	Imagine the Future
Wednesday, April 25th	Laser-Focused Business
Thursday, April 26th	The Power of Perspicuity
Friday, April 27th	Freaky Friday & Big E Cafe

Mind's Eye Madness Afternoon Workshops
"Images of Enron in 2020" on April 24th
Join Amy Oberg with EES and Dr. Peter Bishop, Chair & Professor of the University of Houston's Future Program, on Tuesday, April 24th, from 1:30pm to 3:30pm to imagine Enron in the year 2020!! "Futures tools" will be utilized in this two-hour participatory session where participants will develop alternate scenarios of what Enron might be like in 2020. This will include developing a snapshot, including Enron's characteristics, culture, businesses and the current business and

world environment, looking at the past and present and moving on to the exploring how the future might play out and what Enron might be like at that time. Space is limited to 40 participants for this afternoon workshop - please contact Jessica at x31918 to reserve your seat. The results of the session will be shared with Mr. Skilling's office. Location TBD.

"The Painting Experience" on April 26th

What is it? An opportunity to break down barriers and rules that limit your creativity on Thursday, April 26th. This afternoon workshop from 3:30pm to 5:30pm is an experiential creativity program designed especially for the workplace. The expressive arts offer exciting possibilities for taking creative risks professionally as well as providing valuable insights about how we can come from a place of greater possibility at work. Space is limited! Please contact Jessica at x31918 to reserve your seat. Location TBD.

Swing out with the Sparacino & Company Dancers' rousing performance of SWING KIDS! at the Miller Outdoor Theatre in Hermann Park. Enron Night will be Friday, April 20 at 8:30pm and the performance is free of charge to the public. Although reservations are not required, you may secure a VIP seat by calling 713.520.9070 or e-mailing dancer@neosoft.com. The evening is compliments of Sparacino & Company Dancers.

We know there are plenty of aspiring (and frustrated) nature photographers out there, so come join us for a Brown Bag! Kathy Adams Clark, a local professional photographer and teacher of photography will be giving loads of suggestions on how to improve your nature photos. Her photos have appeared in Texas Parks and Wildlife, Texas Highways, Bird Watcher's Digest, Birds & Bloom, Birder's World, Ducks Unlimited, and many more magazines and books. Her photos appear every Friday in the Chronicle's "Wonders of Nature" column written by her husband, Gary Clark.

Bring your camera!!

When: Tuesday, April 24th, 11:30 AM to 12:30 PM
Where: EB 5C2

The official count is in and Team Enron finished on top in the corporate race to field the largest team for the upcoming BP MS 150. Team Enron has 475 riders, which is up from last year's top number of 380 and we will have the honor of heading out first on April 21 when the MS 150 gets underway at 7 a.m. at Tully Stadium. Putting the pressure on Enron was MS 150 sponsor BP, with a close second of 460 riders - up from 130 last year. In third and fourth places are Anadarko with 375 and Halliburton with 275.

The MS150 benefits the National Multiple Sclerosis Society and Team Enron will focus on beating last year's phenomenal fundraising efforts of over \$537,000!!! Please pledge your favorite rider or contact Heather Choate at x33278 if you would like to volunteer for the ride. Go Team Enron!!!

If you didn't make it to Opening Day at Enron Field but would like to get some of those great-looking hats that were handed out, we have them on sale for \$10 through the company store. To order, go to enronsigshop.com and click on the Enron Field category.

The Enron Volleyball Association will be sponsoring its annual Spring Fever Volleyball Tournament to be held at Third Coast Volleyball Club. For the first time, we will have a separate bracket for teams of four. Food and drinks will be provided and cash prizes will be awarded to the top three teams from each bracket. For more information, contact Traci Nguyen (713.853.9032).

Recycle Your Cell Phone!!!

Did you forget to bring in your discarded cell phones last week? If so, please send them to Gavin Dillingham at 3AC1526b by April 30th. By bringing your old phones, bag phones, batteries, adapters, charging units and other cell phone related items, you will support Enron's effort to benefit the Houston Chapter of CARE.

CARE is on the world's largest international relief and development organizations with funds going directly to develop sustainable agricultural and economic systems including medical and educational programs in Latin America, Asia, Africa, Europe and the Caribbean. All collected cell phones will be recycled back into use or disposed of in an environmentally responsible manner and you will receive an acknowledgement letter from CARE for this donation.

WalkAmerica, taking place April 29, is the March of Dimes biggest fund-raiser. Money raised from the WalkAmerica supports pioneering research and innovative programs that save babies born prematurely or with birth defects. Since its beginning in 1970, WalkAmerica has raised more than \$1 billion to help give babies a fighting chance.

Every dollar raised will be matched by Enron.

You can read more about the March of Dimes at www.modimes.org.

For more information, please contact Kimberly Nelson (ext. 33580) or Gina Taylor (ext. 37681).

Enron Mind's Eye Motorcade Needs Volunteers on Friday, April 27th

In conjunction with Mind's Eye Madness, the Enron Mind's Eye Motorcade will take place in the community on Friday, April 27th from 9:00am until Noon. This art car convoy is sponsored by Enron and is the pre-parade associated with the official Art Car Parade to be held on Saturday, April 28th. Enron volunteers are needed to accompany the convoy which will be visiting our adopted schools, non-profits where we have executives on boards and medical center facilities dedicated to treating children. Volunteers will interact with children about the importance of being innovative and pass out keepsake coloring books. Contact Jessica at x31918 to sign up!!!!

The 9th annual Summer Stroll will be held Saturday, May 19th at Terry Hershey Park in west Houston. Join Debra Duncan from Channel 13 and Dan Riley of the Houston Texans to run, walk, ride, and roll along a 2 mile tree-shaded, paved course. Plan to bring your family and friends as we will have clowns, caricature artists, and face painting.

To sign-up or learn more about the Epilepsy Foundation, stop by the registration table located in the Enron Plaza on Wednesday, April 18th and Thursday, April 19th from 11:00 am to 1:00 pm. Team leaders and walkers are needed. Prizes will be awarded to the team with the highest amount raised and largest teams. There will be a drawing for two (2) Continental Airline tickets to anywhere Continental flies. Team leaders will also be treated to lunch on Wednesday, April 25.

For more information about the Stroll, please call Clare Regalado at 713-853-7776.

Support TEAM ENRON and Jeff Skilling by participating in the MS150 from Houston to Austin on April 21st and April 22nd. All-purpose volunteers are needed to handle various logistical duties including serving meals to the Team, playing music.

c, directing riders to the Enron Tent, setting-up and tearing-down, making massage appointments... to name just a few!

Can't commit to the whole weekend? Participate where you can! Main sites include Bellville (Saturday lunch), LaGrange (overnight stop), Bastrop (Sunday lunch) and Austin (the FINISH LINE!). While everyone will be responsible for their own transportation & lodging, our volunteers are welcome to camp out with the Team in the Enron Tent in LaGrange. You may also investigate the possibility of staying at lodging establishments in the area.

All volunteers will receive a free Enron Cycling Club tee-shirt, free meals and a priceless experience. Feel free to bring along your friends and family to volunteer, too! Take this opportunity to be a hero for our riders who take on this cycling adventure to benefit the National Multiple Sclerosis Society supporting the Houston, Dallas, San Antonio, Austin, and Corpus Christi areas. Please contact Heather Choate via e-mail or at x33278 for more information!

VOLUNTEERS NEEDED FOR 15TH ANNUAL HOUSTON HOOP-IT-UP MAY 5-6!

The best way to get yourself jump-started for a full year of Hoops. Become a part of this jammin'hoops scene with over 1,200 teams & 4,800 players. Join us at Greenspoint Mall for a basketball-crazed atmosphere. Games and special events being played simultaneously on 110 courts so the basketballs will be flying HOOP-IT-UP is where you play for FUN. EVENT BENEFITS THE "ESCAPE FAMILY RESOURCE CENTER"

SATURDAY - MAY 5TH 8:00 - 6:00 PM
SUNDAY - MAY 6TH 8:00 - 5:00 PM

For more information please call "Hoop-It-Up Hotline": 713-521-4535 or E-Mail: Hoopitup@Texas.Net

Join the Integrated Solutions Team & PSI Homesavers on April 21 & April 28! Enron is proud to support PSI Homesavers with three crews for their annual spring volunteer project. More crews can be added so sign up to participate or include your team! Responsibilities include being part of a work crew to complete needed exterior home repairs for low income, predominately elderly homeowners in Houston neighborhoods. Contact Donnis Traylor at. ext. 55667 for more information!

M.D. Anderson will be at Enron April 23-25 and April 27 to administer mammograms. Call 713-745-4000 to schedule an appointment. Cost is \$25 for employees, spouses, retirees and EDS; \$85 for contractors. Please consider donating an extra \$1 to The Rose (an organization that provides free mammograms to low-income women).

Double click on the icon below to learn more about the new Enron Kids' Center.

Have News to Share?

To post news or events in Enron In Action, please e-mail your information to EIA@tcpolice.org no later than 12:00 noon the Thursday prior to the next Monday's mailing.

=09 =09 Dear Randy, Members of Congress return from their Thanksgiving break on Tuesday as debate resumes in Washington. A bill that would renew the Price Anderson Act is being brought to the floor of the House of Representatives. The bill limits the liability for the nuclear industry in the event of a major accident. Significant revisions were made to the legislation in the wake of the September 11 attacks, with the addition of amendments that would strengthen the security of America's nuclear power plants. The Washington bureau will also have more reaction to the FERC's new policy for determining whether a company has market power in the electricity industry. Join us for these reports from the Washington bureau on Tuesday. From Houston on Tuesday, we'll bring you an update on Enron's continuing financial situation. UBS PaineWebber's Robert Young is stopping by the Houston bureau to discuss his perspective on the negotiations between Enron and Dynegy. He'll join us during the 10:00 a.m. ET newscast tomorrow. The Former Energy Advisor to the Prime Minister of Iran is speaking in Houston on Tuesday. Dr. Fereidun Fesharaki will be talking to the Asia Society about the Middle East, oil and economics. The Houston bureau will bring us a preview. Climate Solutions Co-Director Rhys Roth will be live from Olympia, Washington during the 3:00 p.m. ET newscast on Tuesday. West Coast Bureau Correspondent Kym McNicholas talks with Roth about the future of clean energy in the Northwest and how renewables will play a major role as a future energy source in the region. We'll also have an update on the California Department of Water Resources' efforts to pay generators for market transactions between January and July of this year. Join us for reports from the West Coast bureau. ENL is hitting the road later this week. Houston Correspondent Kim Benestante will report live from Anchorage, Alaska. Kim is attending a conference titled: Alaska Resources 2002: Can Alaska Compete? We'll have live coverage from the conference starting on Thursday. ENL's Gale Smith will attend the Arctic Gas Symposium in Houston on Thursday. The symposium will address supplying the North American market and the latest pipeline route update, among other topics. We'll have coverage of the symposium on Thursday. Closing Prices for Monday, Nov. 26, 2001 Crude: \$18.69 -\$0.27 Unleaded: \$0.5217 -\$0.0056 Heating Oil: \$0.05217 -\$0.0125 Natural Gas: \$2.696 -\$0.117 Keep in mind things are subject to change at a moment's notice. Occasionally guests have to cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09=09=09=09

As you know, Enron has signed a merger agreement by which Dynegy will acquire Enron. We expect the transaction to close following shareholder and regulatory approvals and various conditions to closing.

Even though Enron has entered into this agreement, U.S. and foreign antitrust laws require that Enron and Dynegy continue to operate independently of each other. In particular, to the extent that Enron and Dynegy are competitors in various businesses or markets, their respective activities must be undertaken at arm's length until the transaction has closed. Therefore, for antitrust purposes you should treat Dynegy as you would any other unaffiliated company notwithstanding the merger agreement.

In addition, all information, documents and communications related to the merger between Enron and Dynegy should be coordinated through and approved by Mark Muller, Lance Schuler, Robert Eickenroht, Mark Haedicke, Rob Walls or Greg Whalley of Enron. It is absolutely critical that this procedure be maintained. To the extent that information is required to be disclosed to Dynegy under the merger agreement, then such disclosure should be approved by one of the foregoing individuals.

If you have any questions concerning this notice, please contact Lance Schuler (713/853-5419), Robert Eickenroht (713/853-3155), Mark Haedicke (713/853-6544) or Rob Walls (713/646-6017). Thank you for your help in this matter.

Title: Iran: Conservatives Fighting Hard Against the Tide

URL(s):

<http://www.cera.com/eprofile?u=35&m=2952;>

IRAN'S POLITICAL MAP AND IMPLICATIONS FOR INVESTORS

Reading Iran's political map--always complex--is more so now because of the contradictory nature of the short-term and long-term trends. The short term offers tension and setbacks to the pro-reform elements. The long term offers the potential for genuine change in the Iranian political scene.

- * Political tension is the result of Iran's peculiar and essentially unstable power structure.

- * Despite the setbacks dealt to the reformist agenda defended by the Iranian

president, the conservatives are fighting against the tide.

* In the short term the political tensions might delay the signing of some contracts in the oil and gas sector and postpone foreign investment.

To discuss this outline and our issues list, can people attend a 2pm Houston Time call. The meet and confer may be on-going, but maybe either Jeff or Sue can jump off.

Linda Noske will be sending out a call-in number.

Thanks,

Jim

Subject: Proposed SCE Negotiation Strategy

Following last week's meeting, here is my recommendation on how to proceed with SCE.

1. Form Enron Negotiation Team

My recommendation is to use the same team we used with PG&E + Jeff Dasovich. My understanding was that Lisa M. was the lead negotiator - I would not change this. Jeff should only be there to make introductions.

2. Meet & Confer (10/29)

Sue Mara and Jeff Dasovich will listen and report back to everyone on what happens.

3. Reformed Stipulation

I would propose that we take a wait and see approach to this document. Based on Dasovich's idea to get together with SCE on Thursday, maybe let this ride.

4. Meeting

My understanding is that (Jeff D. please correct) SCE can meet with us this Thursday. Can everyone make it that needs to be there? Probably meet in California. We should put the laundry list on the table.

Please let me know what else we need to discuss or if anyone disagrees.

Thanks,

Jim

As you know, Enron has signed a merger agreement by which Dynegy will acquire Enron. We expect the transaction to close following shareholder and regulatory approvals and various conditions to closing.

Even though Enron has entered into this agreement, U.S. and foreign antitrust laws require that Enron and Dynegy continue to operate independently of each other. In particular, to the extent that Enron and Dynegy are competitors in various businesses or markets, their respective activities must be undertaken at arm's length until the transaction has closed. Therefore, for antitrust purposes you should treat Dynegy as you would any other unaffiliated company notwithstanding the merger agreement.

In addition, all information, documents and communications related to the merger between Enron and Dynegy should be coordinated through and approved by Mark Muller, Lance Schuler, Robert Eickenroht, Mark Haedicke, Rob Walls or Greg Whalley of Enron. It is absolutely critical that this procedure be maintained. To the extent that information is required to be disclosed to Dynegy under the merger agreement, then such disclosure should be approved by one of the foregoing individuals.

If you have any questions concerning this notice, please contact Lance Schuler (713/853-5419), Robert Eickenroht (713/853-3155), Mark Haedicke (713/853-6544) or Rob Walls (713/646-6017). Thank you for your help in this matter.

Title: One Tight Winter Peak Remains
URL(s):

<http://www20.cera.com/eprofile?u=35&m=2760;>

WESTERN ENERGY--WINTER DEMAND PEAKS NOT EXPECTED TO RESULT IN PRICE SPIKES OR RELIABILITY PROBLEMS

Building natural gas and power supplies are providing a cushion for the western energy markets for this winter. Although seasonal gas and power demand spikes will again push prices higher, this winter will not look like the winter of 2000/01. Unlike during the record high gas and power prices and blackouts last year winter, reduced demand, increased gas storage levels, and new gas and power supplies will significantly temper prices and significantly reduce the risk of supply disruptions.

- * A supply build of 300 million cubic feet (MMcf) per day in the Rockies and 900 MMcf in western Canada is meeting with declining demand in the West

- * Fourth quarter power demand is expected to be 13 percent below levels last year, while over 5,000 megawatts of new supply has been added this year

- * Only severe cold weather, prolonged drought, or a supply disruption could produce a reliability problem this winter

In addition to the follow-up e-mail from the offsite, I want to explore the possibility that when you click the auction tab on EnronOnline you get DealBench functionality. I know this was explored once before but I want to explore the possibility that we have a single backbone with EnronOnline and customers have a single login to Enron's services, including auctions, data rooms, and deal rooms.

Your thoughts?

GP

Deal # 271273 (ENA - IM ME New England) had been flagged as the primary desk but has a stop date of 9/30/01.

Does this deal number need to be extended or has the primary desk changed for the PALS contract on IROQ starting with October?
Deal # 835134 is the TP1 deal # for this contract.

Thanks,
Brenda

Brad,

I really don't know where to begin other than just to say it. Enron is having some extremely difficult times now. I have been trying to focus on helping Enron stay together. This is not a good time for you or anyone else to try and seek employment here. I am sorry if I am letting you down. I was only wanting to help. I will always keep you in mind, and hopefully when things turn around here I will be able to address you coming here.

All ETS Daily Market Summary Users,

If you are not aware, we have been working to convert the ETS pipelines Daily Ma
rket Summary (DMS) Report to a new Business Object format and are finalizing the
testing phase of this project. The DMS conversion will be in production beginn
ing October 2, 2001.

If you received this e-mail, you currently have access to the ETS Daily Market S
ummary (DMS). You may still access the current ETS DMS report and continue to u
se your current ID and password until 10/2/01. Beginning on 10/2/01, your ID fo
r the current ETS Daily Market Summary will no longer be valid and all ETS DMS u
sers and administrators will be required to use your corporate ID and password t
o access the new ETS DMS report. (Your corporate ID and password is what you use
to login to the Enron network)

The ETS DMS will continue to be in the same location after 10/2/01, on the ETS I
ntranet at <<http://www.ets.enron.com/>> under the dropdown "Applications" / "Dail
y Market Summary". Any new users that need access to the DMS will be required t
oo sign up for access through <<http://itcapps.corp.enron.com/srrs/entry/srrs.a>
sp>.

If you have any questions or comments on this conversion, please call me at 3152
7 or email toby.kuehl@tcpolice.org <<mailto:toby.kuehl@tcpolice.org>>

Enron in Action can be accessed through the new Community Relations web site at <http://cr.enron.com/eia.html> . In this week's issue you will find out information regarding:

Enron Happenings
Sponsor a Child - Win a Ticket to Cirque du Soleil
Winners of the BEAR Raffle
Enron Kids Holiday Program

Enron Volunteer Opportunities

Camp Noah - Daycamp for Children Recovering from Disaster

Enron Wellness
4th Quarter Blood Drive
Holiday Fashion Show & Luncheon
Weight Watchers

In addition, Enron in Action is available through a channel on my.home.enron.com. To add this channel to your set-up click on the channels link at the top of the screen and under announcements check the Enron in Action box.

If you wish to add an announcement to Enron in Action, please fill out the attached form below and submit it to <mailto:eia@tcpolice.org> no later than 12 PM Thursday each week.

California Develops Plan=20
to Renegotiate Long-Term=20
Power Contracts as State=20
Faces Energy Surplus=20

By Will McNamara
Director, Electric Industry Analysis

[News item from the Los Angeles Times] After months of defending the \$43 billion worth of long-term electricity contracts he helped negotiate on behalf of the state, S. David Freeman suggested for the first time this week that the contracts be renegotiated, perhaps through the California Power and Conservation Financing Authority, a new public power agency he now chairs. "There seems to be pretty general agreement that these contracts need to be renegotiated," said Freeman, noting that critics of the contracts include Gov. Gray Davis, the president of the California Public Utilities Commission and the leader of the State Senate. Freeman said he is still proud of his work negotiating the contracts with companies Davis labeled at the time as gougers and pirates, but California's energy picture has vastly changed since January.=20

Analysis: Oh, yeah, the California energy crisis ? remember that? For some, it may seem like ancient history that California suffered through an ill-fated experiment with electric deregulation that led to some devastating consequences, especially considering the Enron saga that now occupies headlines in the energy industry. Nevertheless, it should not be forgotten that, even though rolling blackouts in the state are no longer an imminent threat, some fundamental problems that defined the California energy crisis continue to plague the state. As one of the main resolution steps that were taken to repair the dysfunctional market, the state of California stepped into a very involved role as power purchaser on behalf of the state's three IOUs (Pacific Gas & Electric Co., Southern California Edison and San Diego Gas & Electric Co.), which due to credit problems were unable to secure power on their own. In an ironic twist indicating that California's problems are far from over, the stabilization of the state's markets are now in essence causing a new set of challenges and casting light on what appear to be questionable choices made by the state at the height of the crisis.=20

At issue presently are some 54 long-term contracts that the state of California, through its Department of Water Resources, signed with power generators such as Calpine (NYSE: CPN), Duke (NYSE: DUK), Mirant (NYSE: MIR), and Williams (NYSE: WMB) to name a few back in early 2001, a time at which wholesale power prices were still running at very high levels. One of the primary benefits of the contracts was that they reduced the state's reliance on t=

he volatile spot market, where prices had soared as high as \$500/MWh. As a whole the contracts are worth about \$43 billion and have a lifespan of 10 years or more. Some might argue that Gov. Davis, who led the effort for the state to assume the role of power purchaser, felt pressure to sign the contracts at that time, due to the uncertainty surrounding the financial solvency of Pacific Gas & Electric and SCE in particular. However, critics argue that the contracts locked the state into wholesale power costs when prices were the highest.=20

Much of the details of the contracts signed by the state are proprietary, but there are some interesting details that can be gleaned. First, a good number of the contracts lock the state in to buying power at various times, including those of low demand (such as the morning). This leaves the state with a surplus of power that it does not need, which it in turn has been forced to sell at a loss. We also know that, as a general observation, the state bought power under the long-term contracts at an average price of \$75/MWh. That same power reportedly will sell for only \$16/MWh in 2002.=20

As noted, Freeman, who previously managed the municipal utility known as the Los Angeles Department of Water and Power, recently assumed the management post of the new California Power and Conservation Financing Authority at the request of Gov. Davis. The agency was charged with quelling the extreme situation that California faced over the last year, including soaring power prices and blackouts. Looking beyond the immediate problems that have subsided, Freeman's new plan calls for a way to renegotiate the existing contracts and increase generation supply in the state at the same time.=20

Let me try to put Freeman's plan into a nutshell. As a state agency, the Power Authority could sell up to \$4 billion in revenue bonds, which would be guaranteed by energy sales, to lease, build or buy power plants. Consequently, the state, which can borrow money at below-market rates, is in a position to build new plants more cheaply than private companies could. As a carrot to entice the renegotiation of the long-term contracts, the state could offer generating companies a financial incentive to build new power plants in the state. In other words, the state would carry the investment for the costs of the new plants, alleviating pressure on the private companies to provide a 20-percent return to their shareholders. Note that most of the generating companies involved in long-term contracts with California are committed to building new power plants anyway. Some reports I've seen indicate that 70 percent of the 54 contracts that the state has signed include clauses that require the generating companies to build new power plants in the state. However, under normal circumstances, the expense of building the new plants would be financed by the generating companies and could cost hundreds of millions of dollars. Thus, in return for the financial incentive, the same generating companies would agree to renegotiate the terms of their long-term contracts with the state of California, presumably based on current market conditions. Note that the renegotiation could include cutting the prices in the contracts, or providing the state with more flexibility on the timing and quantity of electricity that must be purchased.=20

The word from California is that most state officials think this plan has some legs. Nevertheless, word of the plan comes on the heels of claims that California is presently suffering from an energy glut (unused electricity) that may end up costing ratepayers as much as \$3.9 billion over the next decade. The reason for the surplus power is that Californians have increased conservation efforts, which brought demand down, a condition that was maintained by comparatively moderate weather trends. The end result is that the state apparently bought far more power than it needed to meet the needs of the customers served by the three IOUs, and the state unfortunately cannot sell the excess power elsewhere and gain a profit. For instance, according to a report by the Department of Water Resources, in one three-month, low-usage period expected in the spring of 2002, 57 percent of the power for whi=

ch the state has contracted will have to be sold at a loss of close to 80 cents on the dollar, ultimately costing utility customers as much as \$193 million. The same report indicates that the power surplus in the state will reach its peak in 2004 and then gradually decline through 2010.

Consequently, despite the financial advantages of Freeman's plan, the logistics of getting new power plants approved in the state in light of the apparent energy glut may be an impediment to the renegotiation strategy. In addition, some of the companies involved in the contracts with the state already own a large amount of generation capacity in California and may not be easily convinced to build new plants right away. For instance, Calpine Corp., which is one of the companies that has signed a long-term deal with the state of California, responded to the plan as saying that it "wouldn't be anything that Calpine would use." The company reportedly has finished three new power plants since June 2001 and would not be enticed by the financing incentive that the state is orchestrating. Further, the state's desire to renegotiate terms of the contracts is not a new concept. Ever since wholesale prices began to drop earlier this year, the renegotiation debate has been a fixture of state legislative and regulatory proceedings. However, since the onset of the talks, a good number of the generating companies have maintained that re-negotiation would not be possible as they had already locked themselves into deals with natural-gas suppliers.

Thus, one concern is that the apparent energy glut in California will discourage further development of new generation and renewable energy sources, at least in the near term, which could set the state up for another dangerous boom-and-bust cycle down the road. In addition, those companies that already have long-term contracts with the state (such as Calpine) may not be enticed by the financing incentive, and those companies that don't have long-term contracts with the state will have no incentive at all to build new plants in California. All of this could create a situation in which California has too much power over the next few years and then will find itself in another shortage situation 10 or more years down the line.

Freeman is apparently also pushing the state to once again make an attempt to take over some of Pacific Gas & Electric Co.'s physical assets. Instead of its transmission lines, however, the state now is examining its opportunity to buy the hydroelectric generation network (including dams and powerhouses) owned by the state's largest electric utility. Note that under its restructuring plan that has been submitted for regulatory approval, Pacific Gas & Electric Co. would split from its parent, PG&E Corp., and transfer generating and electric and gas transmission assets to form three new companies, which would fall under the jurisdiction of the Federal Energy Regulatory Commission (FERC). State regulators do not like this plan, and thus are seeking a way to retain control over the generating and transmission assets of Pacific Gas & Electric Co. Putting the hydroelectric assets under the State Power Authority would keep the assets under state control.

Moreover, even though California is rethinking certain choices it made almost a year ago that directly entrenched the state government in the energy market, state officials still seem to want to gain control over fundamental parts of the state's energy infrastructure. Remember that Gov. Davis spent much of the last year attempting unsuccessfully to negotiate deals with SCE and SDG&E for the purchase of the utilities' transmission networks. Pacific Gas & Electric Co. never was interested in selling its transmission assets, which it believed the state's offer grossly undervalued. One of the main reasons that these attempts by the governor were unsuccessful was concern by state legislators who argued that the state was ill equipped to assume operation of the complex transmission networks. Nevertheless, in addition to renegotiating the long-term contracts, the state is still pursuing at least the hydroelectric generation assets of Pacific Gas & Electric.

California Develops Plan to Renegotiate Long-Term Power Contracts as State Faces Energy Surplus

By Will McNamara
Director, Electric Industry Analysis

[News item from the Los Angeles Times] After months of defending the \$43 billion worth of long-term electricity contracts he helped negotiate on behalf of the state, S. David Freeman suggested for the first time this week that the contracts be renegotiated, perhaps through the California Power and Conservation Financing Authority, a new public power agency he now chairs. "There seems to be pretty general agreement that these contracts need to be renegotiated," said Freeman, noting that critics of the contracts include Gov. Gray Davis, the president of the California Public Utilities Commission and the leader of the State Senate. Freeman said he is still proud of his work negotiating the contracts with companies Davis labeled at the time as gougers and pirates, but California's energy picture has vastly changed since January. 20

Analysis: Oh, yeah, the California energy crisis ... remember that? For some, it may seem like ancient history that California suffered through an ill-fated experiment with electric deregulation that led to some devastating consequences, especially considering the Enron saga that now occupies headlines in the energy industry. Nevertheless, it should not be forgotten that, even though rolling blackouts in the state are no longer an imminent threat, some fundamental problems that defined the California energy crisis continue to plague the state. As one of the main resolution steps that were taken to repair the dysfunctional market, the state of California stepped into a very involved role as power purchaser on behalf of the state's three IOUs (Pacific Gas & Electric Co., Southern California Edison and San Diego Gas & Electric Co.), which due to credit problems were unable to secure power on their own. In an ironic twist indicating that California's problems are far from over, the stabilization of the state's markets are now in essence causing a new set of challenges and casting light on what appear to be questionable choices made by the state at the height of the crisis. 20

At issue presently are some 54 long-term contracts that the state of California, through its Department of Water Resources, signed with power generators such as Calpine (NYSE: CPN), Duke (NYSE: DUK), Mirant (NYSE: MIR), and Williams (NYSE: WMB) back in early 2001, at a time at which wholesale power prices were still running at very high levels. One of the primary benefits of the contracts was that it reduced the state's reliance on the volatile spot market, where prices had soared as high as \$500/MWh. As a whole the contracts are worth about \$43 billion and have a lifespan of 10 years or more. Some might argue that Gov. Davis, who led the effort for the state to assume the role of power purchaser, felt pressure to sign the contracts at that time, due to the uncertainty surrounding the financial solvency of Pacific Gas & Electric and SCE in particular. However, critics argue that the contracts locked the state into wholesale power costs when prices were the highest. 20

Much of the details of the contracts signed by the state are proprietary, but there are some interesting details that can be gleaned. First, a good number of the contracts lock the state in to buying power at various times, including those of low demand (such as the morning). This leaves the state with a surplus of power that it does not need, which it in turn has been forced to sell at a loss. We also know that, as a general observation, the state bought power under the long-term contracts at an average price of \$75/MW

h. That same power reportedly will sell for only \$16/MWh in 2002.=20

As noted, Freeman, who previously managed the municipal utility known as the Los Angeles Department of Water and Power, recently assumed the management post of the new California Power and Conservation Financing Authority at the request of Gov. Davis. The agency was charged with quelling the extreme situation that California faced over the last year, including soaring power prices and blackouts. Looking beyond the immediate problems that have subsided, Freeman's new plan calls for a way to renegotiate the existing contracts and increase generation supply in the state at the same time.=20

Let me try to put Freeman's plan into a nutshell. As a state agency, the Power Authority could sell up to \$4 billion in revenue bonds, which would be guaranteed by energy sales, to lease, build or buy power plants. Consequently, the state, which can borrow money at below-market rates, is in a position to build new plants more cheaply than private companies could. As a carrot to entice the renegotiation of the long-term contracts, the state could offer generating companies a financial incentive to build new power plants in the state. In other words, the state would carry the investment for the costs of the new plants, alleviating pressure on the private companies to provide a 20-percent return to their shareholders. Note that most of the generating companies involved in long-term contracts with California are committed to building new power plants anyway. Some reports I've seen indicate that 70 percent of the 54 contracts that the state has signed include clauses that require the generating companies to build new power plants in the state. However, under normal circumstances, the expense of building the new plants would be financed by the generating companies and could cost hundreds of millions of dollars. Thus, in return for the financial incentive, the same generating companies would agree to renegotiate the terms of their long-term contracts with the state of California, presumably based on current market conditions. Note that the renegotiation could include cutting the prices in the contracts, or providing the state with more flexibility on the timing and quantity of electricity that must be purchased.=20

The word from California is that most state officials think this plan has some legs. Nevertheless, word of the plan comes on the heels of claims that California is presently suffering from an energy glut (unused electricity) that may end up costing ratepayers as much as \$3.9 billion over the next decade. The reason for the surplus power is that Californians have increased conservation efforts, which brought demand down, a condition that was maintained by comparatively moderate weather trends. The end result is that the state apparently bought far more power than it needed to meet the needs of the customers served by the three IOUs, and the state unfortunately cannot sell the excess power elsewhere and gain a profit. For instance, according to a report by the Department of Water Resources, in one three-month, low-usage period expected in the spring of 2002, 57 percent of the power for which the state has contracted will have to be sold at a loss of close to 80 cents on the dollar, ultimately costing utility customers as much as \$193 million. The same report indicates that the power surplus in the state will reach its peak in 2004 and then gradually decline through 2010.=20

Consequently, despite the financial advantages of Freeman's plan, the logistics of getting new power plants approved in the state in light of the apparent energy glut may be an impediment to the renegotiation strategy. In addition, some of the companies involved in the contracts with the state already own a large amount of generation capacity in the state and may not be easily convinced to build new plants right away. For instance, Calpine Corp., which is one of the companies that has signed a long-term deal with the state of California, responded to the plan as saying that it "wouldn't be anything that Calpine would use." The company reportedly has finished three new power plants since June 2001 and would not be enticed by the financing incentive that the state is orchestrating. Further, the state's desire to ren-

egotiate terms of the contracts is not a new concept. As you know, Enron Net Works (ENW) and Enron Global Strategic Sourcing (GSS) recently executed a two-year agreement, whereby MCI WorldCom would serve as Enron's primary telecommunications provider. In our previous communication, we indicated that we would provide you with more detailed information as it became available.

Beginning Friday, October 26, 2001 at 9 a.m. C.S.T, the procedure for calling Enron's Houston offices from international locations, excluding Canada, using the 800-97-Enron phone number will change. The new procedure is as follows:

1. Please dial the WorldPhone International Access number for the country where you are located (country access code), which is available on the attached wallet card, accessible through the following link: <http://home.enron.com:84/messaging/mciannouncement.doc>.
2. You will then be prompted for your PIN number. Since calling cards and pin numbers are not required to use this service, all users should respond by dialing 1-800-97-ENRON or 1-800-973-6766.
3. You will then be asked to enter your destination. Please dial 0-800-97-Enron (800-973-6766) to reach Enron's corporate offices in Houston.

This procedure can only be used to call 800-97-Enron from WorldPhone International locations. If you are calling from the U. S. or Canada, please continue to dial 1-800-97-ENRON.

If you have questions regarding commercial aspects of this agreement, please feel free to contact Tom Moore, GSS senior contract manager at 713-345-5552. For technical issues, please contact Hasan Imam, ENW IT manager at 713-345-8525.

Does this need to exclude intercompany deals also?

Here is an updated version of the template, it should be easier to use as you have all split out your books into 3 (terminated by the counterparty, not being fulfilled, and active). Again, this should be as of positions held today. Based on my discussions with you so far, it looks like this is doable by the end of next week.

Please call me if you have questions.

Best regards

Subject: terminated vs non-terminated - request

Now that we have almost all of the Form A information, E&Y needs form B filled out for all commodities. We would like to have this as of the deals on 1/31/02.

Please let me know when you will be able prepare the schedule (including a reconciliation to your rolls).

<< File: E&Y request.xls >>

Thanks

Jeff,

Please plan to dial into our conference call at 8:00 AM Pacific time on Tuesday, January 8th. The conference call instructions are as follows:

- * Dial-In phone number: 1-866-280-6429
- * Enter Participant Code: 287211 and then press #
- * All callers will be asked to record their name after the tone

Jeff, please give me a call if you have any questions.

Sincerely,

Allen DeBrum
Pacific Gas and Electric Company
CGT Trading Representative

Dear Power Outage Database Customer,
Attached you will find an excel document. The outages contained within are forced or rescheduled outages. Your daily delivery will still contain these outages. In addition to the two excel documents, there is a dbf file that is formatted like your daily deliveries you receive nightly. This will enable you to load the data into your regular database. Any questions please let me know. Thanks.

Greg Elliott

Subject: RE: A resume

I would love to talk to him. Does he live in France. Is it easier for him to work in London. If not I would be happy to do a phone interview.

Please advise

John,

I am not sure if I have already sent you this resume.
Please, take a look at it. I met Claude a few years ago
and was greatly impressed by him. He may be a good candidate to
work with Andy Zipper.

Vince

John, Rob and I are Directors of Enron Canada Corp. and Enron Canada Power Corp., and as such have independent duties to ensure that decisions are taken in the best interests of Enron Canada, considering all the circumstances. This may include the interests of its shareholder and the cross-default consequences for Enron Canada if Enron Corp. defaults. But in the circumstances it may also include preserving value within Enron Canada for Enron Canada's creditors. To discharg

e this duty (and to avoid personal liability), we need to be consulted and agree that taking funds out of Enron Canada is the proper decision for Enron Canada in all the circumstances.

Peter.

B U L L E T I N - IMMEDIATE BROADCAST REQUESTED.
FLASH FLOOD WARNING FOR VALDEZ GLACIER STREAM
NATIONAL WEATHER SERVICE, ANCHORAGE AK
4 AM ADT WED AUG 15 1901

THE NATIONAL WEATHER SERVICE IN ANCHORAGE HAS ISSUED A
FLASH FLOOD WARNING EFFECTIVE UNTIL NOON WEDNESDAY FOR PEOPLE
IN THE FOLLOWING LOCATION...

...RESIDENTS ALONG THE VALDEZ GLACIER STREAM...

VERY WARM CONDITIONS AND HIGH FREEZING LEVELS MAY HAVE RESULTED IN A

GLACIER DAMNED LAKE ON THE VALDEZ GLACIER RELEASING. REPORTS THIS MORNING INDICATE WATER LEVELS RISING IN EXCESS OF TWO FEET ALONG THE GLACIER STREAM BETWEEN MIDNIGHT AND 4 AM.

REMEMBER...SAFETY FIRST...
PERSONS IN THE FLOOD WARNING AREAS SHOULD BE ALERT FOR
RISING FLOOD WATERS AND BE PREPARED TO TAKE ACTION IF
LIFE OR PROPERTY IS THREATENED.

THE NEXT STATEMENT WILL BE ISSUED AT 10 AM ADT WEDNESDAY OR OR
SOONER.

NNNN

Geoff,

To confirm the deal we did today, you bought the physical x1h2 Dawn Parkway spre
ad at \$0.065 US/MMBtu from Lambie. We used NX1+0.20 for Dawn and NX1+0.265 for
Parkway. To clarify, you bought Parkway at +0.265 and sold Dawn at +0.20. Calg
ary is entering the trade. Thanks.

Steve Burnham

The method for distribution of the weekly reports has changed. Hard copies will now be distributed through your administrative assistant.

To receive a paper copy of the report, please send me an e-mail request includin

g you location and admin.

The information in these reports is for internal use only and should not be the basis for investment decisions.

Please let me know if you have any questions or comments,

James Bruce
Enron North America (503) 464-8122

Doug,

We just need your authorization to set him up in the system. Please disregard previous message regarding products.

Thanks,

Melba

Doug,

In order for us to set up Seung-Taek to trade online, we need a list of products which he will be managing.

Thank you,

Melba

Everyone,

Once again, there are a number of new viruses that have been released on the internet that are causing us to do frequent updates to our virus protection software.

We have an automated process to update our workstations with the latest virus protection updates. However, there may be some machines that didn't get the update. In order to prevent these viruses from infecting your machine, please assist by doing one of the following tasks.

1. Logout of the network and log back in or
2. Click on START>PROGRAMS>ACCESSORIES>Norton AntiVirus Corporate Edition and then click the Live Update button. This will pop up a screen where you will have to click the "Next" button and then a "Finish" button. (If you are an EES user, you will only be able to use option #1 as you use a different virus protection product.)

The proper version of the update pattern you need is: (9/24/2001, version 30924p)

If you have questions or concerns, please direct them to your Resolution Center.

Enron Global Technology

Another wrinkle in the El Paso/CPUC Complaint case. I've also attached a copy of the El Paso Merchant answer to the FERC enforcement staff motion in case you're interested.

NGI's Daily Gas Price Index

published : November 2, 2001

El Paso Seeks to Derail Further Market Power Investigation

The motion by the enforcement staff of the Federal Energy Regulatory Commission for a "more complete investigation" of unused capacity on the system of El Paso Natural Gas is "an abuse of process," the pipeline and its merchant energy affiliate claimed Thursday, since it comes after the case has been fully litigated. In filing a motion to strike the enforcement staff's request for the investigation, El Paso Natural Gas and El Paso Merchant Energy said the staff motion is a violation of their due process rights, since an initial decision in the case was issued three weeks ago (see Daily GPI, Oct. 10 <<http://intelligencepress.com/subscribers/daily/news/d20011010c.html>>). At that time Chief Administrative Law Judge Curtis Wagner Jr. recommended the dismissal of charges that El Paso and its affiliate exercised market power to drive up prices for gas transported to the border beginning in mid-2000 [RP00-241]. The judge had concluded that the complainants in the case failed to carry their burden of proof that the El Paso companies exercised market power by withholding capacity from the market.

After the parties file briefs on the ALJ's decision, all that remains is a vote by the commissioners, the El Paso companies pointed out. The investigation sought by the Market Oversight and Enforcement Section (MOE) of the Office of General Counsel "seeks to improperly shift the burden of proof by requiring El Paso and Merchant Energy to prove that they did not withhold capacity. This argument turns the Commission's adjudicatory procedures -- and its procedural safeguards -- on their head," the companies said. "MOE is attempting to inappropriately influence the decision-making process in this already high profile case," putting the integrity of FERC's adjudicatory process in jeopardy. "The rules under which the complaint is to be judged have become a moving target, El Paso's and Merchant Energy's due process rights and reputation have been harmed, and they have been put in the untenable position of now trying to prove a negative. MOE's improper comments should be disregarded and stricken from the record in this proceeding," the companies said. MOE said the issue it was raising -- whether El Paso made its unused capacity available to shippers on an IT basis, as required by FERC's open-access rule -- was neither the focus of the hearing last summer nor Wagner's initial decision (see Daily GPI, Nov. 1) <<http://intelligencepress.com/subscribers/daily/news/d20011101d.html>>.. MOE said its review of the public portion of the hearing record suggests that El Paso may have committed "potential violations" of FERC's Part 284 open-access regulations by withholding IT capacity in an attempt to keep prices up at the California border, but it said there may be "other potential explanations" for the existence of unused capacity on the pipeline. "We recommend a more complete investigation of the reasons why capacity went unused on the pipeline at times during the period [of] November 2000 through March 2001." MOE conceded its motion was an "unusual" move. It suggested that the Commission either direct MOE to conduct a further probe, remand the decision to Judge Wagner for consideration or use other procedures. Although "this step is unusual, it is not unprecedented for the Commission's enforcement staff to inform the Commission of its views regarding potential violations concerning a pending proceeding," MOE said. El Paso pointed to a statement by the judge to back up its claim that parties in the proceeding had agreed that the pipeline was full from November through March.

Here is a copy of the El Paso Merchant Energy response summarized above. They used some pretty strong language!!

Marie,
Below are the account numbers that Convertible will be assigned back to
at Goldman Sachs:

002-06450-9
002-25736-8
033-66885-6

If you need anything else you can reach me at ext. 34139.

Thanks,
Theresa

Subject: Convertible Arbitrage Books - GS and MSDW

Hi, Sheila!

Can you verify for us the account numbers at both Goldman Sachs and Morgan Stanley that we need to assign back into?

Thanks!

Marie

DEAR SIR,

WE ARE SENDING YOU THIS JOINT VENTURE PROPOSAL, TO SEEK
YOUR ASSISTANCE IN LIQUIDATING AND TRANSFERRING OUR
TRAPPED INVESTMENTS IN VARIOUS PLACES. I AM MAKING YOU

THIS OFFER ON BEHALF OF HRH MOBUTU SESE SEKO (EX
PRESIDENT OF REPUBLIC OF ZAIRE) AND MYSELF HIS LOYAL
AIDE. PRESENTLY ASSYLUM SEEKERS IN LONDON UK.

THE INVESTMENTS WERE MADE FROM PROCEEDS OF FUNDS
ACQUIRED BY US DURING THE LAST DAYS OF OUR
ADMINISTRATATION BEFORE THE PRESENT PRESIDENT AND HIS
TEAM THREW US OUT AND ALMOST HAD OUR HEADS.

BECAUSE THE FUNDS WERE EMBEZZLED PUBLIC FUNDS, OUR
LATE CHINESE ASSOCIATE HAD TO ROUTE IT OUT OF THE
COUNTRY IN HIS NAME ,THROUGH HIS CONTACTS IN THE OIL
AND GAS SECTOR IN NIGERIA. SPECIFICALLY {OML 32BRASS}.
THE INVESTMENTS IS WORTH US \$21.5M (TWENTY-ONE
MILLION
FIVE HUNDRED THOUSAND U.S DOLLARS ONLY).

HOWEVER, BEFORE OUR LATE FRIEND DIED HE WAS ABLE TO
SEND US A COPY OF HIS WILL OUTLINING ALL THE
INVESTMENTS HE MADE ON OUR BEHALF AND NOMINATING US AS
THE BENEFICIARIES. BUT DUE TO OUR INABILITY TO LEAVE
THE UK, COUPLED WITH THE FACT THAT WE ARE UNDER
CONSTANT SURVEILANCE, WE WOULD LIKE TO NOMINATE YOU AS
THE BENEFICIARY, SO YOU CAN CLAIM OUR
INVESTMENTS,TRANSFER TO YOUR ACCOUNT AND SEND US OUR
SHARE TO ENABLE US PROSECUTE OUR CASE AS WE ARE
COMPLETELY OUT OF FUNDS.

WE ARE OFFERING YOU 30% OF THE PROCEEDS FOR YOUR
EFFORTS. 10% IS SET ASIDE FOR EXPENDITURES INCURRED.
60% IS SET ASIDE FOR US, AT OUR DISCRETION.

SHOULD YOU BE INTERESTED IN THIS OFFER YOU CAN REACH
ME ON MY MAIL BOX
mbadakad@yahoo.com,mbadakad@lycos.com WERE I SHALL
BRIEF YOU MORE.

THIS TRANSACTION IS COMPLETELY SAFE AND SECURED AND WE
CRAVE YOUR UTMOST CONFIDENTIALITY

BEST REGARDS,
DAVID MBADAKA

Gerald, I spoke with our lawyer Robert Clark and the following is his additions to your language. Please let me know if it is acceptable. If so, please prepare executables and forward for signatures.

Thanks Art Avalos

"Notwithstanding anything to the contrary contained herein, this Section 4.4 shall only allow for offset, set off, or recoupment between Company and Customer, but not between Company and Customer's PNM Gas Services division."

Subject: 401K Requests & Information

Just in case you all are getting bombarded with Enron 401K questions. Employees can request forms, withdrawals etc. through the Hewitt Website. They also have an on-line manual for Enron's Savings plans available. Heres the link:

<http://resources.hewitt.com/enron/>

Thanks, Tony

RBowers@nyiso.com writes to the NYISO_Tech_EXCHANGE Discussion List:

Billing for October 28, 2001 settlements was started at 17:24 this evening. With an estimated bill run time of 5 hours, advisory billing statements should post by midnight.

Regards,
Randy Bowers

Manager - Customer Settlements

RBowers@nyiso.com writes to the NYISO_TECH_EXCHANGE Discussion List:

The NYISO anticipates that the billing for October 28th should run later today. Staff are in the process of verifying interval data for the hours affected by the DST to EST time shifts.

Regards,
Randy Bowers
Manager - Customer Settlements

As you know, Enron Net Works (ENW) and Enron Global Strategic Sourcing (GSS) recently executed a two-year agreement, whereby MCI WorldCom would serve as Enron's primary telecommunications provider. In our previous communication, we indicated that we would provide you with more detailed information as it became available.

Beginning Friday, October 26, 2001 at 9 a.m. C.S.T, the procedure for calling Enron's Houston offices from international locations, excluding Canada, using the 800-97-Enron phone number will change. The new procedure is as follows:

1. Please dial the WorldPhone International Access number for the country where you are located (country access code), which is available on the attached wallet card, accessible through the following link: <http://home.enron.com:84/messaging/mciannouncement.doc>.
2. You will then be prompted for your PIN number. Since calling cards and pin numbers are not required to use this service, all users should respond by dialing 1-800-97-ENRON or 1-800-973-6766.
3. You will then be asked to enter your destination. Please dial 0-800-97-Enron (800-973-6766) to reach Enron's corporate offices in Houston.

This procedure can only be used to call 800-97-Enron from WorldPhone International locations. If you are calling from the U. S. or Canada, please continue to dial 1-800-97-ENRON.

If you have questions regarding commercial aspects of this agreement, please feel free to contact Tom Moore, GSS senior contract manager at 713-345-5552. For technical issues, please contact Hasan Imam, ENW IT manager at 713-345-8525.

I spoke w/ Johnny Nor at Navajo today. I told him that ENA could not wait any longer for Navajo's decision. They have until 4PM Houston time TODAY, 3/20/02 to get a termination to ENA (via Stephanie Panus' fax: 713-646-4818). He understands that if they do not terminate today ENA will terminate Navajo TODAY. He gave me his fax number, 505-748-6742 (note that this is different from the fax number used for the demand letter).

Susan: Notes for the DDL.

Stephanie: Please watch the fax for a document from Navajo.

Sara: Based on the conversation w/ Nor I think we should be prepared to send a termination. (Don't think Navajo will terminate.) Call if you have questions.

Subject: Gas Prices Continue Downward Drift - CERA Monthly Briefing

Title: Searching for the Bottom

URL(s):

<http://www.cera.com/eprofile?u=35&m=2929>;

GAS PRICES CONTINUE DOWNWARD DRIFT--HIGH STORAGE, LOW DEMAND

While warm weather keeps heating loads low, the key driver in natural gas markets continues to be the looming storage surplus. Weather may provide some short-lived price spikes in February, but until real evidence of the anticipated decline in US supply appears, prices will feel continued downward pressure from record-high storage inventories. The projected February average price is \$2.10 per MMBtu at the Henry Hub.

- * March storage inventories will end at record high levels. Ample gas remains to keep prices low until a rebounding economy and declining supplies can provide a lift.

- * With return to a normal weather, strong industrial loads will boost overall gas demand slightly over last year's levels.

- * Diminishing weather-related support and high western storage inventories will drive widening discounts to the Henry Hub in the western producing areas, while weak demand and high storage will limit premiums in the East.

end

Concur Expense (XMS) Upgrade!

On July 2, 2001, Enron's Corporate Expense Management Solution will undergo an upgrade to version 6.0.2.

The Integrated Solution Center (ISC) has developed a transition plan containing several important deadlines affecting all XMS users.

Transition Schedule

Important Date #1 - Monday, June 18th

? American Express transactions will no longer be loaded into the current XMS system starting June 18th. Beginning June 18th, all AMEX transactions will be loaded into the new Concur Expense (XMS) system.

? Beginning June 18th, the ISC will be solely responsible for adding new users to the current XMS system. On July 2nd, new users created in SAP HR will be automatically loaded into the new Concur Expense (XMS) system.

Important Date #2 - Wednesday, June 27th

? This marks the deadline for entering new expense reports into the current XMS system. All open expense reports in XMS must be submitted and approved by June 27th. All users will be locked out of XMS after this date!!

Important Date #3 - Monday, July 2nd

? The new version of Concur Expense (XMS ver. 6.0.2) goes LIVE!!!

For a list of frequently asked questions (FAQ), please click on the following link: <http://isc.enron.com/site/xmsfaqs.htm>

If you have any other questions on any of the above items, please contact the IS C Call Center at 713-345-4727.

This is to inform you that on January 25, 2002 the Honorable Arthur Gonzalez, United States Bankruptcy Judge for the Southern District of New York, entered an order as follows:

It is hereby Ordered that until further Order of this Court, Enron Corp., its affiliated debtors-in-possession in these jointly administered chapter 11 proceedings (collectively "Enron"), and Enron's employees shall preserve, and refrain from destroying or disposing of, any of Enron's records, either in electronic or paper form.

Obviously, any violation of this order will carry serious consequences. We know that we can depend on you to comply with it fully.

Thank you.

Fan Fares for March 9 - 12, 2002

<<http://www.delta.com/images/emailprograms/spacer.gif>>

Hello Mr. Motley,

Fan Fares offer Delta customers the opportunity to reconnect with family and friends at events and activities across the country. Join us this weekend to take advantage of huge savings and the opportunity to earn miles with the Delta SkyMiles program.

Before and during your trip, there are new federally mandated baggage and security procedures. Check [delta.com](http://e-mailprograms.delta.com/AC/Clickthru?q=74-VAT8IZZvNazYEyUXYbARnz-ZppeU) <<http://e-mailprograms.delta.com/AC/Clickthru?q=74-VAT8IZZvNazYEyUXYbARnz-ZppeU>> for the latest information.

Arts & Entertain

ment

Great restaurants, shopping, historical attractions, and more. Take a Fan Fare trip from delta.com and explore a city you might not otherwise visit. Whether you're interested in immersing yourself in nature on the slopes, the arts, or history, Salt Lake City is the perfect destination this weekend. Here are a couple of ideas to get you started.

Ballet West

Ballet West ranks among the premier professional ballet companies in the United States. The company strives to bring new levels of excellence to ballet through innovative choreography, and to present balanced programs representing a broad range of ballet styles. This weekend you can experience two company premieres, Christopher Bruce's Ghost Dances and Hans van Manen's Black Cake. Concluding the program is George Balanchine's tribute to the great composer Igor Stravinsky, Stravinsky Violin Concerto. Located at Capitol Theatre, 50 West 200 South, Salt Lake City.

Temple Square

No trip to Salt Lake City is complete without a long visit to the square that forms the heart of Salt Lake City. You'll find the Family History Library, the Tabernacle, home of the world-famous Mormon Tabernacle Choir, as well as the Temple that gives the square its name. Free tours begin every 5 or 10 minutes at the 100-foot flagpole in the center of this 10-acre block.

<<http://www.delta.com/images/emailprograms/spacer.gif>> Restrictions: Ti
ckets are non-transferable. Seats are limited and fares may not be available on
all days or all flights.

Purchase Requirements: Fares must be purchased via Delta's Web site (delta.com) only. Fares are round-trip and require a round-trip purchase. Tickets must be purchased at the time of reservation using a credit card/check card only.

Ticketing Period: Tickets must be purchased by 03/09/02.

Travel Period: Outbound travel is permitted on Saturday 03/09/02 only. Inbound travel is permitted on Monday 03/11/02 or Tuesday 03/12/02 only.

Blackout Dates: None.

Minimum/Maximum Stay: Minimum/Maximum Stay: Minimum stay: First Monday after departure: Maximum Stay: First Tuesday after departure.

Fare Validity: Fares are valid in the Economy (Coach) cabin on Delta/Delta Connection/Delta Express.

Taxes/Fees: Fares do not include a federal excise tax of \$3.00 which will be imposed on each flight segment of your itinerary. A flight segment is defined as a takeoff and a landing. Fares do not include Passenger Facility Charge(s) of up to \$18. Fares do not include a September 11th Security Fee of up to \$10.00 round-trip. These fees are the responsibility of the passenger and must be paid at the time of ticketing.

Changes/Standby: All fares are nonrefundable. Wholly unused tickets: Although fares are nonrefundable, customer may apply value of fare to any applicable published fare less \$100 (\$50 for Delta Express) plus any applicable fare difference. Partially used tickets: Changes not allowed. All changes must be made prior to the original date/time of departure. The value of the unused ticket/coupon or any credit vouchers may not be used as credit towards another ticket purchased on delta.com. Fares offered at delta.com do not apply for reissue/downgrade of previously purchased tickets. Same day standby is allowed.

Miscellaneous: Fares and rules are subject to change without notice. Third party purchases of tickets are not permitted on delta.com. The credit card/check card holder making the purchase must be a traveling passenger or have the same last name of at least one passenger. Special offers issued on delta.com may not be applied to other Web fares. These special offers are not combinable with other Delta fares. Other restrictions may apply. ?2002 American Express.

Diana and Sean:

Just wondering if you happen to know how the scheduling volume in these two deals work? I believe when we liquidate at the beginning of this month (for example, 8/2), the volume was zero instead of 50MW/hr in scheduling. Would you advise how the "timing" of entering the volume in scheduling was determined? I am asking because it looks like for the first few days of this month we didn't liquidate anything because at the time the volume in scheduling was zero. If somebody added the volume later, we will need to know in order to correct total liquidations before the "incomplete liquidations" get to Settlements at month-end.

Please advise, thanks!!!

-Fran

\$23 a day in: Greenville, Spartanburg, SC (GSP)
\$21 a day in: Houston, TX (IAH)
\$29 a day in: Lafayette, LA (LFT)
\$21 a day in: Mobile, AL (MOB)
\$29 a day in: Newark, NJ (EWR)
\$23 a day in: Richmond, VA (RIC)

To receive continental.com Specials discounted rates, simply make your reservations in advance and be sure to request Product Code COOLUS. To make your reservation, contact National at 1-800-CAR-RENT (1-800-227-7368), or book your reservation online at:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*qmohsmQLgkhgEJht*z*CA
Please enter COOLUS in the Product Rate Code field, and 5037126 in the Contract ID field to ensure you get these rates on these dates.

* If you are traveling to a city or a different date that is not listed, National offers great rates when you book online at:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*qmohsmQLgkhgEJht*z*DA
For complete details on these offers, please refer to National's terms and conditions below.

CONTINENTAL.COM SPECIALS RULES:

Fares include a \$37.20 fuel surcharge. Passenger Facility Charges, up to \$18 depending on routing, are not included. Up to \$2.75 per segment federal excise tax, as applicable, is not included. Applicable International and or Canadian taxes and fees up to \$108, varying by destination, are not included and may vary slightly depending on currency exchange rate at the time of purchase. For a complete listing of rules please visit:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*qmohsmQLgkhgEJht*z*VUA

ALAMO RENT A CAR'S TERMS AND CONDITIONS:

Taxes (including VLF taxes up to US\$1.89 per day in California and GST), other governmentally-authorized or imposed surcharges, license recoupment fees, fuel, additional driver fee, drop charges and optional items (such as CDW Waiver Savers (R) up to US\$18.99 a day,) are extra. Renter must meet standard age, driver and credit requirements. Rates higher for drivers under age 25. Concession recoupment fees may add up to 14% to the rental rate at some on-airport locations. Up to 10.75% may be added to the rental rate if you rent at an off-airport location and exit on our shuttle bus. Weekly rates require a 5-day minimum rental or daily rates apply. For weekend rates, the vehicle must be picked up after 9 a.m. on Thursday and returned before midnight on Monday or higher daily rates apply. 24-hour advance reservation required. May not be combined with other discounts. Availability is limited. All vehicles must be returned to the country of origin. Offer not valid in San Jose, CA.

NATIONAL CAR RENTAL TERMS AND CONDITIONS:

Customer must provide Contract ID# at the time of reservation to be eligible for discounts. Offer valid at participating National locations in the US and Canada. Minimum rental age is 25. This offer is not valid with any other special discount or promotion. Standard rental qualifications apply. Subject to availability and blackout dates. Advance reservations required. Geographic driving restrictions may apply.

Patrice,
Please see the below comments from my attorney. Let me know if we can work with this.
Thanks

I suggest revising that sentence as follows to avoid any potential conflict within the terms of the Guaranty itself and to accommodate Enron's reasonable request for a specific number of days:

" . . . and shall be deemed sufficient notice that, subject to Paragraph 9 of this Guaranty, Guarantor agrees to pay the Obligations within 7 business days after receiving the Payment Demand."

fications for Parental Guarantee	Subject: RE: Enron's Proposed Modifications for Parental Guarantee

Hey Rob,

We have one more comment for you to consider:

We must have a definitive number of days in case, "Enron makes a demand on

this guaranty". We cannot leave the contract silent on that issue. How about making it 7 days instead of 5 days. Our lawyers say that we must have a definitive number of days.

Your turn!

Proposed Modifications for Parental Guarantee	(Document link: Rob Smith)

Rob,

I have made a few changes and one correction. I deleted the reference to "must pay within 5 business days" added to paragraph 3. If Enron does make a demand under this guaranty, there is no way we can make payment within those 5 days (especially since we will need to rely on an outside party to provide data to us). As you know, however, when we receive a demand under a guaranty, we move quickly to verify the request and make payments where appropriate.

I completed the information in paragraph 4(a).

I deleted the second copy of the reps and warranties of corporate authority.

Finally, I reinserted "excluding choice of law provisions . . . " language to try to keep the case under Texas law, assuming a dispute ever arises.

All told, most of the changes look fine.

Thanks.

Ernie

Brian,
Hi. Hope things are well with you. I wanted to drop a line and say hello as well as to thank you for your extreme generosity with respect to our wedding. I am humbled by what you are doing for us and know Kate feels the same. I am looking forward to September and know that all will have a great time!

Kate and I are going to CT and NY next week to find a place to live (hopefully). We are planning on renting initially then look to buy later. Real estate is crazy there. I guess it is not much better where you are though. Take care.
Regards,
Matt

The eThink Team

Do you know what's included in Enron's Code of Ethics? Do you know what policies affect corporate conduct? Ask Sharon Butcher, Assistant General Counsel of Corporate Legal, all your questions about our corporate policies today (June 5) on

eSpeak at 10 a.m. Houston time.
Can't make the live event? No worries. Go to eSpeak (<http://ethink.enron.com/eSpeak/exec/default.asp>) now and submit your question. Sharon will try to answer it during her event and you can read the transcript later.

Stop what you're doing! Go to the Thinkbank (<http://nahou-lnapp01.corp.enron.com/eThink/Thinkbank.nsf/HomePage?OpenPage>) now! Notice anything different?

Shark--

I see you referenced Fort Union below, therefore these e-mails to Chris are concerning a well in the Powder River?

-----Original Message-----

To: Whitt, Mark
Cc: Bump, Dan J.; Lucci, Paul T.; Bart Brookman
Subject: Re: FW: Patina Oil & Gas Docs.

Thanks..

We should know something about the well we are currently reentering next week. Timing on the gathering line is still uncertain.

>>> "Whitt, Mark" <Mark.Whitt@ENRON.com> 10/23 8:33 AM >>>

These are draft versions of the interruptible purchase agreement and confirm for your gas into Fort Union. Think about what you want to do for term, volume etc. We will then add in the gathering charges. We are pretty flexible, so let me know what works for Patina.

Thanks,

Mark

Michelle,

We have a reconciling item between SAP Account 0530-10220019 Outflow Clearing and the actual bank balance with Citibank New York 40781075 in the amount of \$5,346.46.

On 10-26-01 your forwarded to Treasury Wire Transfer Requests as follows:

Payee	Amount	Curr	US Amount
Denton Wilde Sapte Tokyo	\$492,120	JPY	\$4,024.20
Rajah and Tann	\$2,425.65	SGD	\$1,332.26

It appears that these two (2) Wire Transfer Requests have not been forwarded to A/P to record the expense.

Please arrange to forward the appropriate documentation to A/P during November 2

001.

Stacey Lee Burnett

NYISO has made several new FERC filings, which are described below:

ER02-194-000: Proposed tariff amendments to implement Interregional Transmission Pilot Program for generation redispatch in emergency conditions between the NYISO and the PJM Interconnection, L.L.C. (Interventions/protests due November 16, 2001).

ER02-195-000: Revisions to NYISO's Market Administration and Control Area Services Tariff to revise the tariff's definition of Load Shedding. The NYISO has requested a December 28, 2001 effective date. (Interventions/protests due November 19, 2001).

ER02-209-000 Filing to continue the effectiveness of provisions in NYISO's Market Administration and Control Area Services Tariff regarding certain market power mitigation penalties. The NYISO has requested a November 1, 2001 effective date. (Interventions/protests due November 14, 2001).

Please contact me if you need any further information.

The following is a level "A" cost estimate to make TW/ Lonestar existing interconnects bi-directional.

TW/ Lonestar at Ward County (50 to 60 mmcf/d)

According to Operations this is already bi-directional . The only things are required on this one is to take the flapper out of the check-valve and blow down the gas in 5.33 miles of 12".

Cost of gas loss& labor = \$8,000

TW/ Lonestar at Pecos County (100 mmcf/d)

A): TW/ Lonestar interconnect

Scope: On this one we need a bi-directional valve skid using the existing meter run.

Cost of material& labor= \$ 195,000

B): Pecos Compressor Station

In order to make this interconnect bi-directional we also need to make the station (two-compressor units) bi-directional.

Scope: Install outlet from Lonestar I/C to inlet filter with 12" piping& valves.

Unit discharge would be modified to tie in to West Texas-20"

Cost for material& labor= \$ 330,000.

If you need more accurate costs (B -release) please let me know .

Total cost estimate for this project = \$ 533,000.

hi everone!

I'm trying to get a feel for who may be interested in a south lake tahoe ski shindig. I looked into the place we rented 2 (?) years ago (when cooper flew down from portland via reno on the snowiest day of the year) and it is available as soon as March 8. Yeah, not that soon (maybe this will give the sky a chance to bear snow). Between 12 people, 2 nights, a hottub, fireplace, heavenly company, etc. it would cost about \$40/person for the

weekend. Let me know what weekends on/after March 8 would work for you and how many people including yourself may like to come.

let it snow let it snow let it snow!

-G

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.

We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560

November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928 .

The cost is \$100.00 per person.

No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

Jag,

well done!

please, could you schedule a couple of seminars for our people to help them to become accustomed to the Live Link.
Please, could we ensure that by the beginning of June everybody is using Live Link easily.

many thanks,
Slava

Subject: LiveLink up and running for London Research!

Hi

There is now a London Research Group area on live-link which contains the Project Library and other documentation.

The following (very long!) URL will place you at the top of the live-link tree from which the Research Area is clearly visible.

<http://livelinkeu.corp.enron.com/LiveLink/LiveLink.exe?func=ll&objtype=141&objaction=browse>

Alternatively one can access livelink from a link on the bottom left-hand corner of the Enron Europe Intra-net homepage.

Regards
Jag

Boys,
Brother Skilling is at it yet again. This time from the heartland at old 3058 Yale. As you can see, our chapter has decided to overlook Rocky's many, many trips to the roof in the early 70's and bestow a Distinguished Beta Award on his ass. I would think that any compromising pictures one might have of Brother Skilling would be extremely appropo for this occasion. I, for one, will be unable to attend due to the Redhead's and my 30th H.S. reunion in Corpus on that day, but if you have anything young Adrew M Carty could use, I'm certain he would appreciate. He's also obviously the contact arrange your presence there, should you be so inclined.

Yours in -kai-,

Drow

Brother Berry,

Hopefully by now you've received my letter regarding the Distinguished Gamma Omega Alumni Award. If you haven't, the Gamma Omega Chapter is giving a distinguished alumni award to Brother Jeff Skilling. The event will take place at the Melrose Hotel in Dallas on October 6th. I got your email address from one of Mr. Skilling's secretaries. I'd like to make sure that every '75 Beta knows about this event and has the first chance to attend, as the space we have is limited. In addition, we are looking for any pictures of SMU life in 1975, with a focus on Beta life and of course, Mr. Skilling.

If you can be of any help, that would be great.

You can reach me at this email address(acarty@mail.smu.edu), or at my home telephone number: 214-369-6346.

Thanks,

___kai___

Andrew Carty

Subject: a married man left work

A married man left work early on Friday afternoon. in stead of going home, however, he squandered the weekend and his paycheck partying with the boys. When he finally returned home on Sunday night, he ran into a furious wife.

After a couple of hours of nagging and berating, his wife asked, how would you like it if you didn't see me for a couple days?!!!!

"That would suit me just fine!!!"

So Monday went by, and the man didn't see his wife. Tuesday and Wednesday came and went with the same result. Come Thursday, the swelling went down a bit and he could see her a little, just out of the corner of his left eye....

Ben and Fletcher -- I would be interested in knowing your comments on the portions of this dealing with TVA. The proposed legislation would eliminate the "fence" restricting wholesale competition. It also provides that TVA may only conduct retail sales to certain customers inside the TVA area, and that TVA can construct generation only to meet the demands of certain wholesale customers inside the TVA area. It would bring the TVA transmission system under FERC jurisdiction and authorized it to participate in an RTO. TVA would also be made subject to certain Federal antitrust laws. If you open the second document, the relevant portions are summarized beginning on page 9.

-----Original Message-----

From: Shelk, John
Sent: Wednesday, September 26, 2001 12:37 PM
To: Nicolay, Christi L.; Lindberg, Susan
Subject: Chairman Barton's Draft

Attached are: (1) highlights summary; (2) section-by-section summary; and (3) almost 150 pages of leg text (PDF doc) on Chairman Barton's draft electricity rest

ructuring bill. The RTO and bundled/unbundled sections will be provided "soon" (they day) (I am meeting with Mr. Barton's staff in a half hour), but there are "voluntary RTO" provisions in the incentive pricing section since they lifted that language from Burr-Sawyer legislation. Mr. Barton has publicly said his addendum will mandate RTO participation at some point; I should know more after the meeting. The draft below addresses a variety of issues, including TVA, BPA, etc., among others, that we also care about. There is a retail consumer aggregation feature toward the end. If you could look at the summary and section-by-section and let me know particular areas of interest/concern for further review that would be helpful. Barton is taking comments through this week and next week.

Stacey and Jeff, I sent the attached message to obtain Mr. Lavorato's signature on the attached authorized trader lists. I have not received one back and would greatly appreciate any help you can provide in updating the list and identifying those individuals authorized to trade with brokers and the firm's name. Can you please help me, we have received requests from broker's for our updated list. Please call me at ext. 31939 with any questions. Thanks so much for your help. Donna Lowry

Subject: Authorized Trader Update
Importance: High

Frank, for the first submission of the authorized trader list from me and my group, we would greatly appreciate it if you would take the attached list to Mr. Lavorato for his signature. Attached is the Cross Commodity and East Power groups. Do we need to have him sign any others? We are sending Tim Belden the list for West Power. Please advise. The message below is one that we will in the normal course of this process send to the heads to sign. Any suggestions or improvements? Donna

Enclosed for your review and approval (with necessary modifications) is the most recent authorized trader list. RAC Compliance will forward all future requests for this information to you on a quarterly basis. If any changes occur to this list during the interim period, please follow the requirements in the Risk Management Policy and forward a new list to my attention at EB 2407.

Additionally, we will be compiling appropriate trader list for brokers by produc

t. Please indicate either on the attached list or provide a separate list indicating those individuals authorized to trade with a broker along with the firm name.

If you have any questions regarding this process or the attached, please contact me at extension 3-1939.

Donna Lowry
Sr. Director

Subject: Enron North America Corp. NYMEX Hedge Exemption Applications

We are in the process of preparing applications for position limit exemptions for ENA's NYMEX energy commodities futures trading. These applications require that ENA represent whether its officers, employees, owners, or agents have a power of attorney, control or have a financial interest in any related commodity futures account either individually or acting with another person pursuant to express or implied agreement.

Please direct any responses to my paralegal, Tana Jones, via intercompany email or call her at (713) 853-3399 by the end of business on June 15, 2001 if you have any power of attorney, control or have a financial interest in any commodity futures account (other than an ENA or other trading affiliate account).

IF YOU DO NOT HAVE A COMMODITY FUTURES ACCOUNT, YOU DO NOT NEED TO RESPOND TO THIS REQUEST.

FYI - this is out there as a possible reason why Americas VaR did not come down to within limits as we expected.
In the absence of a fix it looks as though we have another VaR violation.

Kathy,
It looks like the Canadian positions didn't hit VAR last night. Can you re-check?
Also, I understand Zufferli bot a ton of NG and I thought he was short? (Why is system showing he is long?)

Frank

Mark

I have an e-mail with an attachment that I cannot forward to you because it is coded in Lotus notes as Personal and Confidential. It is from Kim Humbarger and the Subject line is: Electronic Signatures on Enron Direct Mass Market Agreements.

I presume you just want me to delete the memo and you will get an original from Kim.

Mark

Go West on US Airways
Hurry! Purchase Tickets by Friday, November 30, 2001

Go west on US Airways with fares as low as \$198 roundtrip for travel between most cities in the eastern U.S. and Las Vegas, Los Angeles, Orange County, Phoenix, San Diego, San Francisco or Seattle.

To take advantage of these great sale fares, book online at http://www.usairways.com/promotions/specials/east_west_sale.htm no later than November 30, 2001.

Sale Details:

- Tickets must be purchased online at usairways.com no later than November 30, 2001
- All travel must be completed by March 14, 2002
- Travel is not permitted December 22, 2001
- Travel Monday-Thursday for lowest sale fares
- See Sale Fare Requirements below for complete details

Plus, earn double Dividend Miles on flights between now and December 15, 2001. Be sure to register for this offer before departure at <http://www.usairways.com/dividendmiles/7437.htm> or call 1-800-872-4738 and enter Bonus Request Number 7437.

This is just a sample of the sale fares offered. Fares are good for travel in either direction. For reservations and fares from your city go to http://www.usairways.com/promotions/specials/east_west_sale.htm

Sample Markets -----	Roundtrip Sale Fares -----
Pittsburgh - Las Vegas	\$298
Raleigh/Durham - Las Vegas	\$198
Boston - Los Angeles	\$298
Greensboro - Los Angeles	\$298
Albany - Orange County	\$298
Richmond - Orange County	\$298
Buffalo - Phoenix	\$198
Charlotte - Phoenix	\$298
Norfolk - San Diego	\$198
Washington, DC - San Diego	\$298
Philadelphia - San Francisco	\$298
Tampa/St. Petersburg - San Francisco	\$298
Hartford/Springfield - Seattle	\$198
New York La Guardia - Seattle	\$258

Depending upon your travel needs, alternative routings may be available at the same fares, with part of the service on regional aircraft operated by US Airways Express carriers Allegheny, Air Midwest, CCAIR, Chautauqua, Colgan, Mesa, Piedmont, PSA, Shuttle America or Trans States.

Sale Fare Requirements:

Fares are based on Coach travel. Roundtrip purchase required. Tickets must be purchased at least 7 days in advance of travel and within 24 hours of making reservation and no later than 11/30/01. All travel must be completed by 3/14/02. Travel valid Mondays-Thursdays. Fares higher for travel on other days. Travel is not permitted 12/22/01. Minimum Saturday night stay applies. Maximum 30 day stay allowed. Tickets become nonrefundable 24 hours after making initial reservation, but under certain conditions may be changed for a minimum \$100 fee. Fares do not include federal excise tax of up to \$3, which will be imposed on each flight segment of the itinerary. A flight segment is defined as a takeoff and a landing. Fares do not include up to \$18 in airport passenger facility charges, imposed at time of departure, where applicable. Seats are limited or may be sold out during very busy travel times.

Lower fares may be available in these markets. Sale fares may not be available in all markets. Other conditions may apply. These fares are not available when purchasing by telephone through our Reservations Department.

It looks like there are quite a few gas books on this list. Please let me know what the status of these are.

Thanks

Jeff,

My sister is a Vice President for JPMorgan Chase Bank, and she supervises construction and management of new buildings in Texas. She sent me the following note regarding Enron Energy Services' handling of their utility bills:

"On another note: Enron handles the utility bills for JPMorganChase Bank on a national basis, including Texas. We are building a call center in San Antonio, and the City of San Antonio (municipal electric) wants to charge us a \$50,000 deposit for new power because 11 out of the last 12 payments made by Enron have been late, and late fees have been paid. I am now going to do an analysis on all of my regions. I would like a local Enron contact, if one exists. Any ideas?"

Whom in Enron should I tell her to contact?

Thanks,

Steve Bailey

For those of you that do not know, we are planning greg's bachelor party for the weekend of May 19th.

We've rented a beach house in Surfside. The beach house is front row on the portion of the beach that allows open fires and automobiles on the beach...both very cool things.

We have the house Friday night, Saturday, and Sunday. Jeff, Greg, and I will probably arrive Friday night, however the main shindig will get kicked off on Saturday night. I don't exactly know what the main shindig is, but we realize that most people won't be able to pull themselves away from their miserable lives for an entire weekend. Jeff, Greg, and I however, will make sure that the keg is working properly friday evening.

So what I need from you is a confirmation that you will:

A - Be there Friday and Saturday

B - Be there Sometime Saturday, Leave sometime

Saturday

C - Be there Saturday, Leave Sunday

D - Can't make it. Dallas is too far from Surfside.

Cost will be \$625 for the house for the entire weekend. So depending on how many people we get the price should be between \$60-\$100 per person. Each person will be responsible for their own food, and a sleeping bag/pillow, etc. No linens are provided, (I'm assuming this means no towels either) but I think they have a grill so that's the important thing. Greg will confirm.

Cards, Dominoes', booze, beach shit, etc. are other good items to bring.

We will send specific directions at a later time.

Let me know your status so we can get a better handle

on costs. I will pass on more info (costs/directions)
as we get it.

Later.

jk

CUIABA

Furnas: Nothing particularly new to report since last week, other than it appears we are likely to get the consent documents signed Tuesday or Wednesday. These documents reflect a resolution to the consent issue and the Resolution 49 regulatory issues that changed some of the risks under the PPA. As reported last week, one of the reasons Furnas/Electrobras have agreed to sign is because the two difficult issues regarding (i) the validity of the Electrobras guaranty following privatization; and (ii) political force majeure allowing a "put" option for Brazilian governmental acts, were deleted from the Furnas consent documents and will be negotiated separately with the Brazilian government over the next two weeks. These issues must also be resolved for financing.

GT11/12: Repairs still on schedule to meet requirements under the PPA for the changeover to gas by year end. Siemens and our engineers will meet with the underwriters in London tomorrow to discuss the root cause of the failures. Still no written confirmation of coverage, but we currently do not anticipate a problem.

Shell: Preparing for mediation to be held in Toronto November 5-7.

ANNEX V

After reporting last week that the cost pass through suits had been filed, I learned that Orlando Gonzales made the commercial decision to hold off on those suits because of significant progress he made in negotiations with the Brazilian government for resolution of these issues and Annex V.

Elektro received some of the information from ASMAE for calculating its numbers; however, as of Friday it had not received the information for the rationing period, the relevant period for calculating the set off. I talked with Vasco this

morning and he believed this information was received today and will confirm. If the information is not forthcoming, we are prepared to file a suit to compel it.

I will stay in touch with Orlando this week to determine if and when we can file these suits without interfering with his negotiations.

Regards,
Michelle

X-Origin: King-J
X-FileName: J KING6 (Non-Privileged).pst

Once again this year, I am leading the BEAR (BE A Resource for CPS Kids) Holiday Fundraiser. BEAR offers help and hope for abused and neglected children. This program is more commonly known during the holidays as the "BEARing Gifts" Program, and it assists an average of 800 children a month. Last year was the first year we called on Enron's Community Relations and our fellow employees to raise money for new bikes, in-line skates and scooters (each child also gets a helmet) for thousands of children under the care of Children's Protective Services. BEARing Gifts provides holiday gifts to CPS kids who otherwise would have no holiday at all.

Please visit the Enron Lobby on November 5, 6, 7 or 8 between 11:00 a.m. and 1:00 p.m., make a donation, and participate in our raffle to win free airline tickets and many other fabulous prizes. For more information, contact Margaret Doucette at (713) 345-7892 or Janette Elbertson at (713) 853-7906.

Thank you very much for your support.

Mark Haedicke

Subject: Financial Operations Audit Notification

The Financial Operations Audit is scheduled to begin May 11, 2001 and is expected to take approximately one month to complete. The audit will be executed by Arthur Andersen and led by Kate Agnew.

We will schedule an opening meeting with you the week of May 7, 2001 to discuss audit scope and any concerns or suggestions you may have.

The objective of the audit will be to determine whether procedures and controls exercised over activities are adequate and operating effectively.

Results of the audit will be discussed with you and other appropriate personnel both during the audit and at the audit closing meeting.

We will endeavor to conduct this audit in a manner that will minimize interruption of your normal business activities and we look forward to working with you and your personnel. Please call me at x5-4554 if have any questions.

Mechelle Atwood
Director, Enron Assurance Services
Enron Wholesale Services
713.345.4554; Location: EB2383

NEAL, SCOTT M,

The PEP system closes on Friday, May 25, 2001

Our records indicate that you have been requested to provide feedback on one or more Enron employees. The deadline for completing feedback is Friday, May 25th.

Below is a list of feedback requests with a status of "OPEN". Please complete o

r decline these requests as soon as possible by logging into PEP at <http://pep.enron.com> and selecting Complete Feedback from the Main Menu.

If you have any questions, please contact the PEP Help Desk at:
Houston: 713-853-4777, Option 4 or email: perfmgmt@tcpolice.org
London: 44 207 783 4040, Option 4 or email: pep.enquiries@tcpolice.org

Thank you for your participation in this important process.

Harassment Avoidance Training

To contribute our personal best at Enron, our conduct must promote respectful and co-operative work relationships. Workplace harassment conflicts with Enron's vision and values and violates Company policy. Harassment also can violate federal and state laws. By understanding what harassment is and its potential harm, we can prevent it in our workplace.

During this training you will:
Be able to recognize harassment
Learn to take precautions against being harassed
Learn to avoid being considered a harasser
Know how to address a situation involving harassment
Learn how harassment prevention is consistent with Enron Values

Go to <<http://elm.enron.com>> to sign up for the session of your choice. Harassment Avoidance is listed in the Compliance Category. If you have problems registering or have any questions, please call 713-853-0357.

The date and times available for sessions are:

Day	Date	Session I	Session II	Session III
Wednesday	Sept 19	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Wednesday	Sept 26	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Tuesday	Oct 2	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Wednesday	Oct 3	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Thursday	Oct 4	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45

All training sessions will be held in the LaSalle Room at the Double Tree hotel.
There is a \$50 charge for each enrollee/attendee in the training session.

This training is mandatory for all Enron employees. However, those who have already attended the Enron harassment avoidance training will be offered a refresher course at a later date.

Hi Tana,

A couple of weeks ago I sent up to you (I think it was you) the letter I received regarding an assignment between Transcanada and Mirant.

Joyce Reed from Mirant is looking for an update on the status. Can you give her a ring when you have a free second (ha!) - 403 218 1031.

Thanks,
Diane

PS - Go Levittown!

Joe,

As discussed, please repath January 2001 for contract 101559. I have input the rates on the invoice that Jeff Nielsen said he agreed to. However, there are certain paths for the same period of time that Oneok indicated different rates for each. They should be consistent so I input one rate for all paths on a Mid to Mid basis. Therefore, after you repath the invoice, we will still have a difference. I want to write-off whatever balance still exists after repathing. Please prepare the write-off documentation and I will sign. We need to be sure to do this before we go into next year. Also, this is the only invoice you have provided me that had issues on this contract which I find hard to believe. Can you double-check to see that there are no other A/R issues for this IT contract and let me know ASAP.

Thanks!
Vernon

Mike,

Attached is the updated summary regarding expansions in the west. There is only one change - PGT 2003 expansion. The expansion has now dropped from 230,000 MM/d to 160,000 MM/d due to PPL dropping out.

Let me know if you need anything else.

Phil

Hi,
Hope you are doing something productive these days. Are you guys ready for Sant a yet? I'm sure the boys are.

Looks like the "Cornboys" had a good weekend what with the Heisman and a trip t o the Rose Bowl. We Huskers are becoming so spoiled. Another chance at a Nation al Championship ----- God, I love it.

Did I here the Aggies were to play in the Mattress Bowl. That's really an odd n ame for a bowl game.

Let me know what's happening when you get a minute. You know how I love gossip. By the way, how is Nick in all of this? I sure hope the HPL people got rid of their Enron stock when they moved.

Must get back to my package wrapping duties. Got to get this stuff shipped off to Omaha and Colorado. I really should by UPS stock.

Ken

Rogers,

Enron Energy Services, Inc. ("EESI") submitted application to become a NEPOOL member, to be effective January 1, 2000. EESI was approved by the NEPOOL Participants Membership Subcommittee at its January 24, 2000 meeting. One requirement of NEPOOL membership is to satisfy the Financial Assurance Policy for NEPOOL Members. EESI, Enron Energy Marketing Corp, and Enron Power Marketing, Inc. are all members of NEPOOL and have chosen to satisfy the Financial Assurance Policy by issuance of Performance Bond(s), rather than corporate guaranty, due to Enron's disagreement with the Form of Corporate Guaranty required by NEPOOL.

EESI, via Fireman's Fund Insurance Company, issued a Performance Bond in the amount of \$8,000,000 in June 2000; the Performance Bond was reissued in June 2001 in the amount of \$8,000,000. EESI received a letter from ISO New England dated October 10, 2001, addressed to Becky Pitre (EESI Settlements) and received by Becky probably October 12, 2001, indicating that EESI's current Performance Bond was insufficient and that EESI needed to increase the amount to \$11,703,018.75 to cover EESI's current activity level. Becky delivered the October 10th letter to my attention whereby I took the letter to EESI Legal Department (Karen Cordova) and informed Karen that EESI needed to increase the Performance Bond to \$20,000,000. Karen requested Credit Department (Nichole Gunter) initiate an increase in the Performance Bond to the \$20,000,000 level; to the best of my knowledge the initial conversation with Credit Department was October 12, 2001. In telephone conversations with ISO-NE, Enron's Credit Department personnel were informed by ISO-NE that in order to avoid Financial Assurance Default the matter needed to be resolved within ten (10) days of the date of the October 10, 2001 letter (October 19, 2001), however the letter did not indicate such.=20

I was notified by Credit Department on October 16, 2001 that the bond company Enron utilizes for performance bond(s) would not process our Performance Bond request for increase until Enron paid the bond company for outstanding invoices for "other" performance bonds (bond renewals), approximately \$150,000. The "other" performance bond invoices had been bounced around EESI, since June 2001, to various individuals (i.e. Greg Sharp, Mark Mueller, Jeff Golden, Scott Mills) and had still remained unpaid. Payments for the "other" performance bonds were made and the bond company processed our request for increase in the EESI NEPOOL Performance Bond to \$20,000,000, which was issued by the bond company on October 23, 2001, executed by EESI on October 23, 2001 and forwarded via FAX and Overnight Mail to ISO-NE on October 23, 2001. EESI was unable to comply with the October 19, 2001 deadline to resolve the Financial Assurance Default due to complications with the bond company as mentioned above. Credit Department personnel informed ISO-NE personnel that EESI would not meet the October 19, 2001 deadline, but was working diligently to resolve the matter; Credit Department personnel sent via FAX, a copy of the request to the bond company for revisions to the Performance Bond to ISO-NE personnel on October 19, 2001. =20

I notified Dan Allegretti, (Enron Government Affairs & Chairman, NEPOOL Participants Committee) of the entire situation prior to October 19, 2001. Dan indicated that he did not think there would be any problems, but to get the matter resolved as quickly as possible. Dan advised me that the implicat=

ions of the Financial Assurance Default would result in communications to the Membership Subcommittee and that when the next letter was published, the following month, EESI would no longer be listed as being in default. On October 19, 2001 another letter was sent to Becky Pitre (EESI Settlements) from Edward McKenna, Vice President & Chief Financial Officer informing EESI that "Enron Energy Services, Inc. has not maintained the required level of financial assurance for 10 days or more, and has had a total combination of 3 financial assurance and/or payment defaults in the last 12 months, which qualifies them as having 2 (two) Level 1 defaults. The ISO has been in contact with Enron Energy Services, Inc. through multiple telephone communications, and to date the financial assurance default has not been cured. Therefore, per the established procedure, we are forwarding this information to the NEPOOL Membership Subcommittee for action by them." According to Dan Allegretti the Membership Subcommittee reports to him, as Chairman of the Members Subcommittee, and he would discuss the issue with them. The previous two Financial Assurance Defaults mentioned the October 19, 2001 letter occurred (i) December 2000, when payment was received 1-2 days late and was automatically resolved when payment was received and (ii) September 2001, when Financial Assurance Default occurred and was resolved through market activity. To the best of my knowledge, EESI was unaware of either the December 2000 Payment Default or the September 2001 Financial Assurance Default, and no information was received by EESI from ISO-NE relative to either incidence.

According to (i) Protocol for the Initiation of Membership Termination Proceedings and (ii) conversations with Dan Allegretti, the issue should be resolved with the receipt on October 24, 2001 of the Performance Bond by ISO-NE. I have also advised the ISO-NE, in the future, to send communications to EESI's Credit Department and not EESI's Settlements. Also, Dan Allegretti is investigating the facts leading to the October 19, 2001 letter with representatives from ISO-NE.

I left message for Molly Harris as you requested. I was able to speak to Denise Furey and Nichole Gunter, who both indicated that they would speak with Molly as they all work together. =20

Let me know if you need any additional information.

Richard =20

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.
We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560
November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928 .

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

I now better understand the NJ product and what is included in the basis. Thanks for clarifying and I agree with your analysis of how excess should work given this product description. I understand that there are some MTM issues with a "cost only" fixed adder that does not represent a position against market. I will hold off on further drafting until I hear back from you. MDS

Jevaughn Sterling
10/25/2001 06:47 PM

cc: Berney C Aucoin/Enron@EnronXGate, Phil Layton/HOU/EES@EES, Ligu Pan/HOU/EES@EES, Richard Ring/HOU/EES@EES, Michele Raque/ENRON@enronXgate, Jim Brown/HOU/EES@EES, Nina Nguyen/HOU/EES@EES, Christopher Riley/HOU/EES@EES, James M Wood/HOU/EES@EES, Bob Hansen/HOU/EES@EES, Gillian Johnson/HOU/EES@EES, Sean A Holmes/HOU/EES@EES
Subject: Re: NJ Index plus

While it is highly desirable to standardize products across regions, it is not often possible to maintain the same value proposition in all regions. For example, NJ does not have a post transition default service as is the case for Maryland. New York may be able to offer ICAP and Ancillaries in the fixed basis. At this point, it appears that New Jersey's fixed basis will only include deal costs (consumption, credit, billing, scheduling fees and incentive repayment). Therefore, NJ fixed basis will differ from that of New York's.

We should await the final outcome of the Mark to Market issue before settling on the language for the NJ fixed basis.

On the subject of Excess Usage during the index period, any excess usage on the part of the customer will mean more revenue for EES in the form of fixed basis times actual usage. We should not impose an upper limit on an index product where actual volumes are passed through to the customer. I agree, however, that there should be deficiency language to protect the fixed basis that is marked.

Thanks

Enron Energy Services From: Mike D Smith

cc: Berney C Aucoin/Enron@EnronXGate, Phil Layton/HOU/EES@EES, Ligu Pan/HOU/EES@EES, Richard Ring/HOU/EES@EES, Michele Raque/ENRON@enronXgate, Jim Brown/HOU/EES@EES, Nina Nguyen/HOU/EES@EES, Christopher Riley/HOU/EES@EES, James M Wood/HOU/EES@EES, Bob Hansen/HOU/EES@EES, Gillian Johnson/HOU/EES@EES, Sean A Holmes/HOU/EES@EES
Subject: Re: NJ Index plus

Please see attached. I am offering up some expanded language around the index we use so that it is more clear. If we settle on that language, the spot energy price may need to be modified accordingly. I am trying to make this consistent with the NY offering, which is similar in terms of how the index based price will work and what the basis will include.

I am not convinced that we can't express the basis as the "Fixed Basis" rather than a plug number in the EESI Energy Price definition, so I have left it the way it was. I am also not convinced that we can do away with excess and deficiency usage calculations during the index period.

I have added in the option to fix language, but I am not sure it is necessary or desirable to have it. It is really an optic (customers always have the right to request a restructured price) and I'm not sure there is any reason to offer it in our form unless origination has as strong market-based reason to do so.

Dear Jeffrey,

David Kobierowski, your Forrester Account Manager, has asked me to extend you an invitation to our TechRankings Conference call on Enterprise Portal Servers. Listed below are more details about the call including agenda, time and date. We realize you don't currently have access to this TechRankings program, but we wanted you to have the opportunity to participate.

If you would like to register for this call, simply respond to this email and I'll get you signed up. About 2 days before the call, you will receive slides and a dial in number from our Marketing Department. Otherwise, my primary role is to help support the technology needs of our clients so please feel free to contact me at any time. I hope to hear from you soon!

Best Regards,
Jessie

Jessie Toland

Sr. TechRankings Product Specialist
phone: (617) 613-5967
email: jtoland@forrester.com

INVITE DETAILS

You are invited to participate in Forrester Research's one-hour research call on Enterprise Portal Server TechRankings - detailed vendor and market research to help you choose the best eBusiness technology products. Join the TechRankings research team as they present the latest findings on enterprise portal servers, give an update about the vendors, and answer live questions.

Topic: Enterprise portal servers
Speakers: Frank Gillett and Nate Root
Date: Tuesday, September 18th, 2001
Time: 1:00 to 2:00 PM (Eastern Time), 10:00 to 11:00 AM (PT)
Overview: Building profitable enterprise portals requires the right portal technology architecture and organizational strategies. Forrester senior analyst Frank Gillett will discuss current enterprise portal efforts, portal ROI, and portal development strategies. Also, to make it easier for employees to do their jobs, firms must build enterprise portals that integrate existing systems and automate complex business processes. Forrester analyst Nate Root will discuss recent developments in this market to help companies select the best enterprise portal server.

As we discussed yesterday, here is the list of information that we need to gather to put into the booklets. Please give us information (Chris, Keith, Susie, Susan and me) information as you get it. The first priority is the rolls supporting the DPR information. Also, please remember that all information needs to be reconciled to DPR information. Please let Chris, Keith & myself know of your time frame to get us this info. Currently, expectations are that we should have at least the rolls by the end of the week this week.

Phillip,

Thank you for meeting with us today. I want to take a few minutes to summarize the decisions that came out of our meeting.

1. Feedback Approach: We will incorporate the ideas and suggestions you gave us and move forward with this approach.
2. SME Review of Knowledge System Topics: When the time comes for Topics reviews, we will send you the name of the SME who is responsible for sign-off on each topic.
3. Conversion and Arbitrage Problems: We will brainstorm ways to incorporate more problems without going over our 4-6 hour target. We will meet with you next Tuesday at 10:00 to review the problems as we've designed them so far and arrive at a solution. (I will send an e-mail Monday with the room number.)

Have a good weekend.
Mery

Subject: Columbia Gulf order on negotiated rates

I received a copy of an order issued by the FERC on Columbia negotiated rate transaction, which includes a formula ie indexed rate. They accepted the negotiated rate deal but they are requiring them to file in their tariff within ONE DAY after the rate has been determined the contract and actual rate. (Each time the actual rate changes during the term) Just think about this for the upcoming T W_ USGT deal and NNG"- Reliant deals. Notwithstanding the time to actually make the filing, the cost to serve it each day if the negotiated rate is different by day and then the service when an order is issued each day--- I believe this is FERC's way to attempt to eliminate negotiated rate indexed based deals- they are punishing themselves as well, as each filing will require a notice etc- so every day they could need to issue an order.

I feel we need to discuss with Columbia, INGAA and join in filing for rehearing on this administrative nightmare. An alternative would be to require you to post on Internet website the day of the transaction the actual rate, so similarly situated customers would have access to the actual rate. I'm sending you guys a copy of the order.

Mark:

We figured this out...

In looking at CARP we found discrepancies for both purchases and sales on the 12th that explained the difference between the CP and Enpower. When I autoscheduled these existing deals, our numbers equal theirs.

I marked this DMS as complete.

Thanks for your help.

Jenny

We've updated the Merger Q&A document on our Enron Updates site (<<http://home.enron.com/updates/mergerQA.html>>), as a result of the many questions you've had concerning the merger between Enron and Dynegy. Questions addressed include those about Enron stock options, benefits and immigration status. Please stay tuned for additional updates.

Enron employees not participating in contract parking are eligible to receive Me
tro Bus Passes or Woodlands Express Passes. You may pick up a bus pass from the
Parking & Transportation Desk, on Level 3 of the Enron Building, from 8:30 AM t
o 4:30 PM.

All Metro passes offered through the Enron Parking & Transportation desk will be
the Metro 30 Day Zone Pass. When you use a 30-day zone pass, bus service is di
vided into four zones w/ unlimited rides. The zone pass is time activated, whic
h means that it will not become active until the first time it is used and will
not expire until 30 days after it was used for the first time. New passes will
be available to Enron employees upon expiration of the 30 day time period. Each
zone does have a different fare values based on the distance the bus travels. Th
is is important to any buser who wants to transfer to or travel in a higher-cost
zone than the zone pass they have, in this case the difference must be paid in
cash. If they are traveling in a lower cost zone, then there is no extra cost.

Parking & Transportation Desk
3-7060

Dear JASON WOLFE,

Thanks for shopping bananarepublic.com. Your order 5639809 has been
shipped and you will receive your package in the next 5 business days
if you selected standard delivery. You will receive your package in 1
business day if you selected overnight delivery.

If we may be of further assistance, please reply via e-mail at
custserv@bananarepublic.com or call us at 1-888-906-2800. We hope you enjoy
your order! Thanks again for shopping with us.

Sincerely,

Michelle Bridges
bananarepublic.com

Please note: It can take up to one business day for your order to appear in our tracking system. This means that you can start tracking the progress of your shipment approximately one business day after your package leaves our warehouse.

For those of you that will be in the office after New Year's, we will begin an informal fundies meeting each day to cover what has happened in the market since we filed for bankruptcy. We will go over pipeline flows, storage balances, weather, monthly and daily prices, etc. With a few of the Banks showing interest in showing a bid, I thought it would be good for us to begin our preparation to trade the market.

Chris Gaskill will be providing the daily packet and Patti Sullivan will provide the daily operations report.

I was thinking that we should start around 9:30 each morning.

Grigsby

Ben and Ron--

Following up on our meeting today, I need to know what my negotiation parameters are regarding the fuel charge for our Sun Devil Project. How much (if any) can I discount the fuel charges for Sun Devil shippers, based on the following assumptions,

Project cost \$911mm

Include all compression adds/mods from Doug Cebryk engineering scope dated 9/28/01

Incremental Volume MMBtu/d: 780,000 San Juan, 810,000 Mainline, 500,000 to Phoenix, 310,000 to Cal Border

Of 1,520,000 total capacity to Cal Border and 500,000 to Phoenix, assume 390,000 has to come from East of Thoreau

Assume load factors in 10% increments from 50% west flow up to 100%.

Assume fuel collection of 5% from shippers

In theory, we all agreed in the meeting that with the additional loop line installed for Sun Devil, and the new compressors at stations 1-4 are more efficient, then the actual fuel use should be less. Please verify this for the load factors above. If we can keep the same net fuel retainage, but collect less because our actual fuel use is less, then this is a win-win for both TW and the Sun Devil shippers.

Is an answer possible by Tuesday 11/12?

thanks

kh

ISAS Members and Guests,

Attached is the agenda package for the February meeting. The hotel has extended the room availability through 2/1/02.

Thanks.

<<WSCC Meeting 2-14-02.pdf>> <<ISAS February 2002 Meeting >>

----- Inline attachment follows -----

From: SCCOBB@srpexc00.srp.gov

To: ISASCOR@wscc.com

Date: Tuesday, January 8, 2002 12:22:05 AM

Subject: ISAS February 2002 Meeting

ISAS Members,

Here are the details for the next ISAS meeting:

February 14th 0800-1700
February 15th 0800-1200

Old Towne Hotel
7353 E Indian School Rd
Scottsdale, AZ
85251-3942
Phone: (480) 994-9203

The hotel does not have a shuttle. It's located approximately 8 miles from Sky Harbor Airport.

Rooms are \$109 per night. (Please mention SRP when making reservations to receive this rate)

Continental Breakfasts on the mornings of the 14th and 15th are complimentary. The breakfast is available from 0600-0800 in the hotel restaurant.

Lunch and an afternoon snack on the 14th will be provided by SRP at the hotel.

Restaurants and shopping are within walking distance of the hotel.

There is a complimentary trolley that will take guests to Fashion Square Mall which is only a mile away.

If you have any problems making your reservations, please contact Karin Masengarb at 602-236-0920.

We're still interested in any agenda items that you'd like to provide. My contact information is:

E-mail: sccobb@SRPnet.com
Phone: 602-236-3965
Fax: 602-236-3808

Thanks.

We are getting ready for the launch of "NetcoOnline" and have been preparing new documentation, a refreshed site design and cleaned products to reflect our Gas and Power focus.

The following timetable could change, but the general sequence should apply in any case:

Week of Jan 14:

Upon approval by the new buyer of the PA and ETA formats, we will contact the Master Users at our Top 50 customers and send them copies of the final PA and ETA forms with our new buyer's name filled in. During this week, we will be working hard to get as many of the PA's returned as possible. Once we have an approved PA, we can send the customer their new User ID, which will allow them to start trading on the day we launch "NetCoOnline".

A Splash page will be available within two business days of knowing our new company name, on a web page reached via an automatic redirect from www.enrononline.com. This page will tell customers about the pending launch of "NetCoOnline" and provide links to the PA and Registration screens and also to the User Admin screens, which will allow customer Master Users to start setting up their Sub users.

The Splash page will look something like the following:

A Press Release will be issued which will include the planned launch date of "NetcoOnline"

Week of Jan. 21:

If all goes well, "NetcoOnline" will be launched on Tuesday, January 22, with at least financial products (timing for gas physical and power physical to be determined according to regulatory issues).

We will send out a mass mailing to approx. 3,000 individuals at 450 companies inviting them to sign up for NetcoOnline. Included in the package will be a simple brochure, copies of the PA and ETA, key messages and a list of Frequently Asked Questions.

General Terms and Conditions (GTC's) will be available online and must be accepted online before a company can start to trade a particular commodity.

Trading/Origination Coordination

Certain individuals in the Trading and Origination groups will be contacting customers on our Top 50 list to introduce the new company and begin the process of getting signed PA's. The NetcoOnline marketing team will work with Trading and Origination groups to make sure that all Master Users that previously had EnronOnline North American Gas and Power execution rights are contacted within one week of the PA and ETA being approved by the new buyer. NetcoOnline Marketing will follow up with the Master Users to make sure PA's are signed and returned.

NetcoOnline Marketing Contacts:

For Marketing-specific questions, please use the following contacts. For other questions, please contact Bob Shults (30397) or Dave Forster (31861).

Teresa Mandola (39807) - Power
Kara Boudreau (30570) - Gas
Jennifer McQuade (53614) - Power
Dan Diamond (39673) - Gas

Definitions:

Password Application (PA) - Only document where a physical signature is required by an authorized person (Master User)

Electronic Trading Agreement (ETA) - Must be accepted online by the Master User before they can proceed into NetcoOnline

Master User - Typically the company authorized signatory that signed the Password Application. Establishes transaction rights for each trader (sub-users)

Sub-User - Trader, assigned either execute or read only status

General Terms & Conditions (GTC) - Document that governs online trades unless a Master Agreement is in place

Master Agreement - Document that governs online and offline trades and supersedes the GTC

October 26 is fast approaching!

Mark your calendar--
as the Enron Corp. Savings Plan moves to a new administrator!

As a Savings Plan Participant, Friday, October 26 at 3:00pm CST will be your last day to:

- ? Transfer Investment Fund Balances and make Contribution Allocation Changes
- ? Change your Contribution Rate for the November 15th payroll deductions
- ? Enroll if you were hired before October 1

TWO important reminders:

- ? Vanguard Lifestrategy investment options are being replaced with Fidelity Freedom funds and;
- ? Your funds will remain invested in the funds chosen as of 3:00pm CST until 8:00 am November 20.

At 8:00 am CST, November 20 the Savings Plan system re-opens with great new features.

Should you need assistance during the transition period, call ext. 3-7979 and press Option 6. This option will be available from 8:00am CST October 29 until 5:00pm CST November 19.

Enron Benefits... keeping pace with your lifestyle.

In response to the recent Nimda virus alert, it is necessary for all users to log off of their machines when leaving for the day. The Global Infrastructure team will be canvassing the workstation environment to ensure that all virus definitions are current and up to date.

Thanks for your continued cooperation,

Enron NetWorks Global Technology

Summary Risk Data as of	20Dec2001	Previous
Active Financial Deals	71	98 *
Active Physical Positions	40	40
P&L Daily (\$thousands)	0.5	(2.2)
VaR (\$thousands)	1,533.8	492.1 *
ETS Margin Account Deals	0	0

*The decrease in active deals is from the early termination of both the NNG & TW ISDA agreements with RMTC effective 12/14/2001. The increase in VaR is because the TW terminated contracts with RMTC have not yet been replaced. The VaR is currently over the ETS VaR limit of \$1,000,000.

Company	MTM by Counter Party Change	Asset	Liability	Net 20Dec01	Previous
NNG	EL Paso Energy Marketing** (2,294.5)	(2,259.2)	18,337.6 (35.3)	(20,632.1)	
NNG	Reliant Energy Services 76.5	75.2	76.5	-	
NNG	TransCanada Energy 620.3	620.2	22,687.4 0.1	(22,067.1)	
NNG	Grand Total	45,858.9	(42,699.2)	3,159.	
7	3,193.6	(33.9)			

** All of our El Paso positions are closed as of December 18, 2001 and we have a net liability with a fair value of \$2.3mm.

The terminated contracts with RMTC are now fixed receivables as of the early termination date of December 14, 2001 except for interest. NNG is owed \$4.8mm and T W is owed \$33.9mm. Amounts are past due.

Definitions:
 Physical deals modeled in the Caminus Zainet system are deals which have some form of price risk, (i.e. Index to index deals, and anticipated fuel sales) This does not include standard transport and storage agreements or unhedged natural positions.

P&L Daily: Daily change in the mark-to-market (MTM) valuation of all deals b

eing tracked in the Caminus Zainet system. This includes the origination and changes in value for both the physical and financial sides of hedges, along with any speculative trades and floating unhedged physical positions.

VaR is "Value at Risk": Enron Corp policy defines this as the maximum expected one day loss on the portfolio given a 95% statistical confidence interval. This number is currently calculated on the Caminus system using a variance covariance methodology, rather than a Monte Carlo simulation per the Enron Corp policy.

Subject: Intercontinental Staffing Group

I would like to introduce Intercontinental Staffing Group. Our offices in Houston and London are primarily focused on serving the energy trading industry, bringing together top energy trading talent with the worlds leading energy trading companies. Our search consultants have past experience in either trading or brokering energy products. This gives us a distinct advantage with respect to our knowledge of and exposure to the energy trading industry.

We are currently working on filling several trading and marketing/origination positions throughout the US. If you have an interest or know of someone who is looking for a new career opportunity, please contact me at the phone number listed below or feel free to email me at possibilities@istaffinggroup.com <mailto:possibilities@istaffinggroup.com>. We do offer a referral fee if we are successful in placing one of your recommendations.

Thank you for your time. I look forward to speaking with you.

Sincerely,

Gary Pitt
Director
Intercontinental Staffing Group Inc.

Hello. How's life? Mine is pretty good. I have a face to face interview with Merch Pharmaceuticals. I guess I did ok on the phone interview even though I didn't think they'd call me back.

Question for you. I was wondering if you could change the first sentence in my letter of recommendation because it talks about FMLA leave and the dates I worked at Enron, which I have on my resume, but I'd rather they didn't know that I have a little one because I don't want them to judge me by that.. or think I'll be a slacker because I won't, and I already have the same babysitter set up and ready to go. (if I get lucky and get the job)... :) I could come by one afternoon this week to pick it up because my interview is Tuesday. What do you think? No big deal if not, just thought I'd try.

Also, I'm taking Emily to Gymboree (a baby class) and Chris Calgar's (spelling???) wife and son are in it. I just met her Tuesday for the first time. I guess they are moving to Houston the end of March.

Hope all is well and maybe we'll see you soon. Emily is such a chunk now.

Susie Wilson

Paul,

RE: Dashboard Here is your id/password for the dashboard.

RE: Pipeline profile You will have to push Java WebStart to your PC. To do so go to windows Start, Programs, JavaWebStart, and click on the Java Logo (looks like the one below). If you do not find Java WebStart or encounter other problems please call.

thank you, RAM

You have been granted access to the ETS Marketing Dashboard.

URL: <http://dashboard.corp.enron.com>
Userid: pybarbo
Password: pybarbo

You may change your password at any time after the initial login by clicking on the 'Profile' link in the upper-right hand corner of the Dashboard and then clicking on the 'Change Password' link. You will be receiving another email shortly, once your security privileges have been established for the Pipeline Profile.

If you have any questions, please feel free to give me a call.

Thanks,
Sandy

This is not a circular and you will not get another chance. This deals with migration to new systems and you need to migrate your own information or applications in the next day. Remember do not delete anything and data to be transferred must comply (see attachments below).

The policy must be complied by Thursday. Please ensure that everyone in your group has moved everything which is in compliance with the policy. We will not be delaying close or restart for people not having completed their own migrations.

Please make sure that those people who are not in the office are contacted and comply (eg Dana - please cover Kevin's migration requirements)

Thanks

Louise

From: UBSW Energy General Announcements
Sent: Tuesday, February 05, 2002 6:12 PM
To: DL-UBSW Energy Houston
Subject: Data Migration Protocol

To: All Enron Employees Transferring to UBS Warburg Energy (or its affiliates)

Under the terms of the various agreements among certain Enron entities and UBS AG, certain Enron data and documents may be provided to UBS. To ensure compliance with those agreements, Enron's document retention policy, as well as directives of various investigative agencies, the attached protocol regarding the process for migration of any information or data to UBS has been developed.

Please review the protocol carefully. Then, complete the attached Certification and return it, with attachments, to Linda Guinn at EB 3829a no later than February 11, 2002.

Questions about this matter may be directed to Michelle Cash at (713) 853-6401 or Francisco Pinto-Leite at (713) 345-7942.

Protocol Document and Data Copy Instructions

Certification Document

Thank you for your assistance in making the transition to UBS a success.

Rita and All:

All:

The contract maximum of 4.45% (not 4.5%) is based on both Field and Mainline fuel for the particular MID (10, 11, 12 and/or 13) in which the gas is received. The attached spreadsheet is a history of the relevant MID fuels. When the contract originated in December 1995 the MID average was below 4% and the contract generated modest revenue for NNG.

The 6/1/97 tariff revision greatly increased mainline fuels, especially in MID 11 where the majority of the contract volume is received, where the fuel jumped from 1.48% to 2.90%. The 6/1/97 revision increased the volume weighted average fuel (a measure valid for comparison purposes only) from 3.81% to 4.65%, which until the 8/1/01 revision to 4.71% was the zenith.

Mainline fuel appears to be the problem: it has increased from 1.84% effective 6/1/99 to 2.25% effective 6/1/00 to 2.66% effective 8/1/01. This .82% increment makes the difference between profit and our current situation.

Rita:

Can you tell us how we got here and what areas we could focus our attention on to potentially remedy the problem? Which station have increased fuel consumption over the years? And how are prior period adjustments made? Can you send me the calculation spreadsheets for the relevant tariff revision periods?

All:

Ideas/comments/solutions?

Steve

To: Geaccone, Tracy; Weller, Steve; Stage, Michael G.; Lev, Jennifer
Cc: Cobb Jr., John; Chandler, Bob
Subject: RE: EPPI GPM Oneok agreement

NNG is billing fuel retention on out-of-balance deliveries.

We only collect the 4.5% on the receipt volumes, however NNG is charging fuel based on the receipt plus the out-of-balance delivery. This out of balance collection goes to trackers. We could lower the amounts over the 4.5% if NNG stops charging out-of-balance retention when this contract goes short. (stop charging out-of-balance retention has other problems associated with it). This contract was consistently short in 2001. This is not all of the problem but it is the controllable part. That is, we need to make these two contracts long to the system each month. Or, put an OBA at Bushton's inlet (The OBA at Bushton's inlet also has other problems associated with it).

Mike and Steve please confirm my calculations to the contract terms to see if I am correct, also can you set a meeting with Logistics, Regulatory and Tracy Geaccone to discuss.

The non-controllable factors are NNG's Field fuel rate keeps increasing making it consistently over the 4.5%, and lower gas prices increase the exposure to EPPI.

Subject: RE: EPPI GPM Oneok agreement

I still need to understand why we are at the 4.45% and what we can do in the future if anything to control it. Can someone help me with this?

Thanks

To: Weller, Steve; Stage, Michael G.; Geaccone, Tracy; Lev, Jennifer
Cc: Cobb Jr., John; Chandler, Bob
Subject: EPPI GPM Oneok agreement

I have attached a summary and schedules which indicate the following.

EPPI owes Oneok/GPM \$339,158.69
Oneok owes NNG \$ 92,774.99
Net amount due is \$246,383.70 Per Dan Fancier

Oneok invoices total \$301,383.96. Oneok has not recognized that some months they paid under the 4.45% and owe NNG.

<< File: GPM 101021 101073 Recalculation.xls >> Oneok is pushing hard for the money, so I am turning over the resolution of the differences to NNG marketing and the resolution of the cash payment to Tracy Geaccone and/or Jennifer Lev.

since there are only 4 of us that seem to check the message board
then i will try my luck here:

i've got 4 talented receivers in holt, pathon, muhammed & t. taylor. i need
to establish more than 8 points over 5 weeks from my rb position. to date
i have received offers like pinkston, price, garner, mack or allen and
flutie. is it getting this bad where i'm actually considering these guys just
to spawn some new life into my team???? i certainly need rb help but
could use a back up qb as well.

>>> "Kevin" <klyn@pdq.net> 10/16/01 08:49AM >>>
All transactions must be completed by this Thursday at 9am due to the game on Th
ursday night. After the game starts on Thursday, no transactions will be accept
ed. For players that are playing in the game on Thursday, please remember to ch
ange your lineups before the game to include or exclude them. You can still mak
e changes to your lineup after Thursday for players that do not play in the game
on Thursday.

Thanks,

Kevin

can we make any ercot discussion tomorrow as I am out friday??

The retail stuff needs to be close behind the qse registration. we are putting a timeline together for it.

Thanks,

Doug

Subject: UBS Sign-Off on ERCOT Docs

UBS Legal and UBS Credit is heading to Houston this Thursday and Friday. I have asked that ERCOT matters get 1 hour to discuss the necessary contracts that UBS will need to sign to participate in the ERCOT market.

Basically, my understanding is the following --

1. PUCT Registration Form for Power Marketer
2. ERCOT ISO Information
 - QSE
 - LSE
 - Wholesale Enabling Agreement
 - Other
3. APX Agreement?
4. Other

Given the list of issues, this assumes that UBSW Energy will not be selling electricity at retail. If we need this for Day 1, we would have to get an additional license from the PUCT.

Thanks,

Jim

Jeff,
Knowing that ENE is making market in the paper industry I thought it would be of interest to you to possibly work a deal with DOMTAR (DTC) who just announced earnings were cut in half due to energy costs. Sounds like an opportunity there.

Regards,
Charlie Farrell

Brothers,

Linda Grumbles just informed me that John is not recovering the way the Drs. want him to and that the same artery may be blocked again, or even closed. In other words, the first catheter treatment didn't pan out. He goes back in for another one, this time probably installing a stint in the artery to keep it open, next week on Sept. 14. His email address has changed and it's now jgrumbles76@hotmail.com. I'm certain he and Linda would appreciate your keeping them in your prayers.

Yours in -kai-,
Drow

Subject: March of Dimes

Hello All--

Shelley Corman has asked me to forward the attached letter to you regarding Enron's fundraising efforts on behalf of the March of Dimes.

Please take a moment to review--any contribution you can make would be greatly appreciated and will be matched 100% by Enron.

Please let me know if you have any questions or need any additional information

Thanks!

Please make checks payable to the March of Dimes and send to me at Location EB3275F.

=====

Dear ENA Team Member:

I am proud to serve as a sponsor of Enron's March of Dimes 2001 Walk Team. March of Dimes is a national nonprofit organization whose mission is to improve the health of babies preventing birth defects and infant mortality. Childhood health is a cause near and dear to my heart.

Obviously, it is a cause that is near and dear to Enron employees as well. Last year our Enron team raised over \$46,000. This year our team has set a goal to raise \$75,000. With your help, I believe we can achieve this aggressive goal.

I understand that you are called upon to donate your time and money to many worthy causes and clearly I am not a seasoned fundraiser. What I can tell you is that I am proud of our employees that have rallied a grassroots effort to support March of Dimes here at Enron. I am committed to continuing their work. I ask that you consider making a donation in any amount.

Please use the attached envelope to make your donation to the March of Dimes and forward your check back to me by Friday, April 27th. Your contribution is totally tax deductible and Enron will match your gift dollar for dollar (I will take care of the matching paperwork).

Thanks, in advance, for your donation and support of the March of Dimes. You can read more about the March of Dimes at www.modimes.org.

Sincerely,

Suzanne Calcagno
Manager--Regulatory Affairs
Gas Logistics

Due to the complications I am having with my right eye following the Lasik Enhancement, I am going to be going to the eye doctor more frequently than planned.

I have another appointment at the eye doctor tomorrow Thursday, the 13th @ 2:15 pm. Since this will basically consume most of the afternoon I went ahead and made a follow-up appointment with my primary care doctor. He has increased my diabetes Rx and needs to evaluate its effectiveness.

Randy

Thanks Dan, Each of my VP's conduct teleconference calls with their field employees every Monday starting after Stan's staff meeting. Your guys a more than welcome to join them and I'll copy my guys with your memo to let them know.

I am conducting a two day trip to the field after Thanksgiving, traveling to Oklahoma/Texas Panhandle and Central Oklahoma. I will be meeting with Beaver assets employees. If someone familiar with the status of Duke can go along that would be helpful. I have the company plane to get us around and will be spending the night in Oklahoma City. Contact Amelia and she can get you an itinerary.

Subject:

Phil,

Due to the increasing demands on Stan, I'd like to offer our help in meeting and communicating with the field (Hayes, Harris, Neubauer, Miller, Kilmer, and myself). Stan's already taken, and I'm sure that you have taken, more than your share of unwarranted heat and criticism, so we'll help tow the line. Would there be an opportunity for field visits in the near future? Let me know.

Dan

Please note that Wall 2 Wall has been delayed and will be in tomorrow instead of

today.

Sorry for any inconvenience.

Carla

With the recent shuffle of people moving to new desks, I'm sure there will be keyboard trays that need to be moved, as well as some repairs. Wall 2 Wall will be in on Wednesday afternoon to look after this.

Please let me know by Wednesday morning if you need anything done.

Thanks,

Carla

The sendout for that April 16 delivery on the "Hoegh Galleon" begins on May 1, then is ratable through January 31, 2002 on the rest (5 more) of the "Hoegh Galleon" cargoes. I would be in favor of settling up at the end of January for all 6 cargoes since we'll have overage/underage every month. Let me know what you think.

Trunkline just called me to tell me that we received 16,595 mmbtu too much from LNG in the month of March. There is another ship due to come in on April 16th. Trunkline has suggested that we take 16,595 less than what we are expecting, in order to make up for the March imbalance.

Tammy-
Following up on the email below, I show that between the two cargoes we delivered, Enron LNG Marketing will be billing Enron North America for a total of 5,759,994 MMBtu on our various contracts. CMS Trunkline delivered 5,776,300 MMBtu of gas through the pipeline, or 16,306 MMBtu excess. This 16,306 MMBtu is to be handled directly between Trunkline and Enron North America.
Please let me know if you disagree with any of these figures.
Dan

To: Tammy Gilmore/NA/Enron@ENRON
cc: ghughes@cmsenergy.com, dabradbury@cmsenergy.com
Subject: Gas at Trunkline Lake Charles

Tammy-
I never heard back from Jim O'leary at Trunkline, but just to make sure we are on the same page I wanted to confirm our quantities for this month.
From the "LNG Jamal" you should get 3,104,896 MMBtu total in March. Please have the contract for the last 51,396 MMBtu faxed to me at 713-646-6560.
From the "Matthew" you should get 2,720,000 MMBtu total in March. This number is approximate and will change to an exact number after arrival of the "Matthew" around Mar 10, however I understand the gas will be delivered starting March 1 from Trunkline.
After we get the exact figure from the discharge of the "Matthew" I will send out another email to show the total amount you will receive from us in March. Any quantities over or under this amount should be reconciled between Enron North America and Trunkline.

Thanks and regards,
Dan Masters

To correct the list I gave you as to ELFI: Jeff, you are the President and COO;
Mike, you are the Chairman & CEO.

Jeff, by the way, Enron Intelligence Exchange (a Cayman entity) was formed in 2000 by the LNG group to be a company to participate in the internet trading of LNG. Obviously, no activities to date. I still need to find out the purpose of Enron Administrative Services Corp. I will let you know tomorrow.

Regards, Alan

Subject: Assistant Trader Position Open

We have two positions open for Trading Assistants with UBSW Energy. One will work for Jeff Richter and Chris Mallory on the Cash Trading desk and one will work for me and Mike Swerzbin on the Term Trading desk.

In short, the Trading Assistant helps the traders run EOL markets, provides analytical support, prepares daily market summaries, reviews trade press for pertinent information, performs checkouts with brokers and counterparties, assists in pricing new deals.

Please send an e-mail to Amy Fitzpatrick by noon on Tuesday expressing your interest. This position is open to both Enron and UBSW employees.

Tim Belden

Hi Carmen, I am never able to open your attachments. Do you or anyone else have any ideas. What software do you use to open the attachments?

Karen

Attention UBS Warburg Energy Users:

Please be aware that IT will begin migrations to UBSW Energy this evening. Please log off of your machines tonight.

When you arrive in the morning, you will login with your Enron ID and password. You will be required to change your password immediately.

You will also have an email in your Inbox tomorrow morning explaining your "next steps".

If you have any questions, please call 3-1411.

Thanks,

UBSW Energy Global Infrastructure

Rick -- here is the offer letter for Paul. I believe it has everything noted except if we are going to allow for a house hunting trip prior to his moving. I'm told this is usually done in conjunction with a business trip, so I'm not sure if that could be worked in for Paul.

In addition, to get any questions answered he may have about the benefits in Mexico, I would suggest that he call Melizza Evanson, the HR Rep that is the liaison for our employees in Mexico. She works very closely with the HR/Payroll people in Mexico and is the most knowledgeable. Tim Callahan did say that the Benefits in the UK are greater than they are even in the US, and the benefits in the US are even greater than those in Mexico. However, he didn't elaborate on the specifics of any particular benefits. Melizza did say that the cost of living in Mexico is extremely low, so the employees there are provided with a driver, maids, etc.

Anyway, take a look at the letter and let me know if you need any revisions. And please have Paul call Melizza directly at

(713) 345-7855
with any questions.

Thanks.
Jo Ann

As you know, Enron Wholesale Services (EWS) has been reorganized under the leadership of CEO Jim Fallon. Rich DiMichele supports Jim as COO of EWS, while also continuing in his role as head of Enron Broadband Services (EBS). EWS businesses include: Enron North America, EBS, Enron Industrial Markets, Enron Global Markets, Enron Europe and Enron Canada. EWS' business focus remains on maximizing creditor value and determining which businesses and assets will be a part of Enron's reorganization plan.

In addition to Rich, reporting to Jim are:

? Don Miller - ENA
? Gary Hickerson - EGM
? Rodney Malcolm - EIM
? Eric Shaw - Enron Europe
? Kyle Kitagawa - Enron Canada
? Lance Schuler - General Counsel
? Barry Pearce - Chief of Staff
? Dave Gorte - RAC
? Kent Castleman - Accounting
? Shanna Funkhouser - Human Resources

Mat,

Do you have VB6 installed on your machine? If you have I can show you a few lines to do an experiment to see if SendKeys work with your program at all. If not, please come to my desk after 2pm.

Thanks,

Ronggen

Subject: Socal Hourly Storage Capture

Per our conversation yesterday, I'd like to test the send key process for obtaining the Socal hourly storage postings. Once I get the scheduling system opened and set, the following is the keystrokes required:

Enter
Alt-F
P
Enter
Enter

Of course, a slight pause between the keystrokes might be needed. And if we need to maintain activity to keep the system from kicking us out, we can simply use two Enter keystrokes. Please let me know when you'll be able to give this a shot.

Thanks.

Mat

Subject: USGT Negotiated Rate Filing/ Response to CPUC Protest

Attached is a draft of Transwestern's response to the protest filed by the California Public Utility Commission in Docket No. RP97-288-017. Your comments would be greatly appreciated.

I have gotten some additional information from Mark on USGT's use of westward capacity, which I haven't had the opportunity to review or incorporate in the attached draft. From what Mark has told me, it further supports the statement in our response that USGT has not made significant use of its westward capacity and that the CPUC's claim that Transwestern is being transformed into a pipeline that is dominated by shippers using negotiated rates is greatly exaggerated.

We need to file the response on Wednesday. Therefore, I would appreciate receiving any comments by noon tomorrow. Thanks.

As things begin to calm down somewhat after events of last week, we wanted to update all employees of certain organizational and personnel changes that have occurred recently.

Organizational Matters

The Creditors' Committee was formed last week by the United States Trustee. This committee is comprised of 15 individuals representing various creditor groups including: banks, bondholders, insurance companies and employees. The Creditors' Committee will be the key point of contact as we reorganize the company and emerge from Chapter 11. Initially, they will send financial advisors to our offices to monitor any asset liquidations as well as review our cash flow projections. Ultimately, they will be responsible for approving our reorganization plan as to which assets or businesses we sell and which ones we retain.

From an Enron perspective, the plans for reorganization have already begun. Overhead has been reduced dramatically, certain employee retention programs have been put in place and a wider retention program is currently being developed. We hope to share the wider retention program with you in the very near future. Furthermore, detail cash flow projections are in their final stages of preparation and will be reviewed by senior management this week. This will be the critical first step in formulating our reorganization strategy to emerge from Chapter 11 as a healthy company.

By now, you must have heard of "NETCO." This company was formed as a means to maximize the value of Enron's most valuable business, the wholesale energy business. Certain Enron North America employees have been assigned to NETCO to rebuild the North American gas and power business under different ownership. We will be filing with the bankruptcy court this week proposed auction procedures to allow bidders to bid for NETCO. It is our expectation that Enron would retain a 49 percent (or perhaps less) non-controlling interest in NETCO. The NETCO employees would become employees of the winning bidder. We anticipate this process to reach closure sometime in January.

As for the remaining businesses of Enron, they are all under review as to which ones will be proposed for sale and which ones will be proposed for retention. This review process will take time as it will require approval of the Creditors' Committee. We will update you periodically on our process.

Personnel Matters

As a result of our current situation, we have made many personnel changes over the past several months to maximize the value of the organization.

Office of the Chairman - Enron Corp

Jeff McMahon, Executive Vice President and Chief Financial Officer, has been added to the Office of the Chairman of Enron Corp along with Ken Lay and Greg Whalley. Among other things, Jeff has been working on the business plan for reorganization in Chapter 11 and is the primary contact with the newly formed Creditor's Committee.

Treasurer - Enron Corp

Ray Bowen was elected to Executive Vice President, Finance and Treasurer of Enron Corp recently. In this role, Ray is responsible for all finance activities of Enron Corp. Ray also has the lead role in managing the cash activities of the

company on a day to day basis.

Corporate Development

Mark Muller has been appointed Executive Vice President - Corporate Development. In this role, Mark will work with Enron's various business units on all asset disposals, which will be a key element in Enron's reorganization plan and value preservation.

Wholesale Services

The Wholesale Services group has been reorganized under the leadership of Jim Fallon. Included in this group are the following businesses, ENA, EBS, EIM and EGM. As part of the Chapter 11 reorganization, efforts in these businesses will be directed at maximizing value for the creditors as well as determining which businesses or assets will be part of Enron's reorganization plan.

Management Committee Departures

Unfortunately, due to the current financial condition of the company, the following members of the management committee have left the company or will be leaving the company by the end of December:

Michael Brown
Mark Frevert
Steve Kean
Mike McConnell
Jeff Shankman

Additionally, John Lavorato and Louise Kitchen have resigned from the Management Committee to arrange for the joint venture energy activities of NETCO.

We know as employees the uncertainty surrounding the future of the company is unsettling. Unfortunately, that aspect will not change in the near term. We ask for everyone's patience and continued support as we move forward through the Chapter 11 process. We are committed to reorganizing into a strong company once again and will need the help of all the employees to achieve that goal.

Jim,

We have to file a report under project 22834 - pilot reporting in Texas today.

The data will be available at 4PM. Who on your team can I coordinate with to submit the actual filing?

The procedure to submit the filing can be located on the Texas PUC website <http://www.puc.state.tx.us/> left-hand side, filings.

Thanks in advance,
Rebecca

Date: Thursday, February 7th , 2002

Location: ECS 06980

Orientation will be split into two sessions and divided by alpha-order. Sessions will run 10am-12 pm and 2pm- 4 pm.

We encourage all of you to attend your designated session as valuable information will be presented, and you will have the opportunity to get answers to your questions.

You can speed things up tomorrow by filing in the attached forms - alternatively you can complete them there

10am Session Letters A- K

2pm Session Letters L-Z

PLEASE RSVP (BY REPLYING TO THIS E-MAIL) - IF YOU HAVEN'T DONE SO ALREADY

Hey Gang,

Just a heads up, but you may need to edit your Copy Physical Macro in your P&L's that are saved in the Netco/Regions folder... The changes were simply renaming sheets in the Macro... 0

John,

EGS are asking whether Orlando is yours for PRC and bonus purposes? Presumably no doubt about Wiggs et al.

What's your view. They seem happy either way. Just want clarity.

David

All,

I have received from UBS a confidentiality form which you are required to sign. (this is a general form to be signed by all employees). Pls either come by my desk to sign or e:mail me your desk location.

I would be grateful if you could return these to me by 4 pm, Wed, 6th.

Kind regards,

Karen.

Kim:

Legal and credit have never responded on this one since there was no activity. We will have to do a comparison of the CP form. We also need credit since nothing has happened since 1999.

Can you resend the email version which Salt River sent to you?

Jay and/or Tracy: Who will prepare credit?

Thanks. Sara

Sara,

Mark Russell of Salt River Project sent me their ISDA documents last week. Can we take a look at them and make the changes we would like to incorporate? He called this morning and they are considering financial transactions with us. Please give me a call and let me know where we stand with this when you get a chance. If I should send it on to some one else. Please let me know that as well.

Thanks,

Kim

Mark,

The best person to talk to about the ISDA is me. I discussed an ISDA with Tim Roberts when I was in the Salt River offices on March 23rd. A draft ISDA was sent to Bill Abraham on November 17, 1999. I requested for a new legal review on 3/28/01. Let me know if you need a new draft and I can send you or Tim a copy. My number is 713-853-0685.

Thanks for your inquiry -

Kim Ward

Subject: Master purchase/sale agreement

Kent,

Attached is a draft copy of our Master Purchase/Sale Agreement for physical natural gas transactions. As I mentioned before, we can enter into transactions for less than one year out. However, for those outside of a year and for longer terms, we need to have a master in place. Hopefully, we can get this one in place so that we will be prepared when/if we get ready to transact.

Let me know if you have any questions. I will have our legal guys standing by to help, too.

Thanks,

Kim Ward

Subject: ****IMPORTANT**** Stack Manager Users
Importance: High

We are in the process of confirming that all traders are set up correctly and ready to trade when the system goes live.

We need to make sure that your Stack Managers are accessing the correct database. In order to do this, we need to know how you access Stack Manager:

- 1) Through Terminal Server (the one that opens up a desktop within a desktop and it actually appears that you have two Start buttons).
- or
- 2) By opening the Stack Manager directly from your "native" desktop.

Please reply to this message with either a corresponding "1" or a "2" in the subject field.

If you're not sure which one you have, please contact myself x39673, Teresa Mandola x39807 or Jennifer McQuade x53614 and we'll come by your desk to help you.

Thank you,

Dan Diamond

Open Enrollment for your 2002 Health Benefits begins Monday, October 29, 2001!

Q. WHAT DOES THIS MEAN?

A. If you plan to make changes to your existing benefit coverage, you will need to make changes during Open Enrollment which begins Monday, October 29, 2001 at 8:00 AM (Central) and ends on November 12, 2001 at 5:00 PM (Central)

To facilitate these changes, you received an Open Enrollment Benefit Packet at your home address. This packet contains a personalized worksheet and the Enron Instruction Guide to help you make your selections.

(If you have not received your Info Packet, please let us know ASAP!)

Q. WHAT DO I NEED TO DO?

1. If you are satisfied with your current elections and do not need to make changes, do nothing. Your current choices will automatically roll over to 2002.

2. If you plan to make changes to your coverage, you will need to either access the Intranet website at work: benefits.enron.com or at home at www.Enron.BenefitsNow.com or call the Phone Enrollment Line at (800) 332-7979, Option 5.

Q. I HAVE MORE QUESTIONS. I NEED MORE INFORMATION.

A. If you have more questions or need more information, you may attend our Open Enrollment "Brown Bag" Info Session being held on Friday, October 26 @ 11:30 PM in the Mt Hood Conference Room.

See you then!

Help yourself. I would not recommend using the numbers that you and David are trying to use. They are out of a table in ERMS that has no relevance to how the books are calculated. Unless of course, you and David know something that I don't and you guys want to start running p&l's. Please make sure you run by John anything that you plan on giving anyone.

Thanks

OP-ED

=====

Other People's Money

By PAUL KRUGMAN

Some politicians want to give the Social Security surplus away to campaign donors and then blame the budget shortfall on the war against terrorism.

<http://www.nytimes.com/2001/11/14/opinion/14KRUG.html?todayshheadlines>

Go Fly a Kite, Taliban

By MAUREEN DOWD

The Northern Alliance's chaotic and grisly entry into Kabul, after the United States had ordered them to stay out, illustrated how tough it's going to be to manage our murky

new deals with murky people.
<http://www.nytimes.com/2001/11/14/opinion/14DOWD.html?todayshadlines>

U.S. Troops Must Go In
By LARRY P. GOODSON
Before the Northern Alliance can become entrenched, we
must send in our own soldiers to enforce human rights
and keep the peace.

The Resolution Center will be decommissioning one of its 888 numbers (888-877-7757) as of January 7, 2002.

You can continue to contact the Resolution Center, Toll Free, by using the following steps:

To contact the ENW IT Resolution Center:

? Call 1-800-973-6766 (1-800-97-ENRON)

? Select 1 to transfer to an extension within the Enron Building

? Select 31411 and you will be transferred to the helpdesk.

The following options are also available through the toll-free number:

0: Connect to voice directory

1: Transfer to an extension in the Enron building

2: Access voicemail in the Enron building

3: Transfer to 3 Allen Center

4: Transfer to Omaha

5: Transfer modem or fax with 646 prefix

6: Speak to an Enron operator

7: Transfer to a fax machine in the message center

8: Transfer to Aviation

9: Leave a confidential message for Enron Chairman

Please contact the Resolution Center at 3-1411 for assistance

ETS customers should continue to contact the ETS Solution Center-Houston at 713-345-4745 or 888-465-4745, and the ETS Solution Center-Omaha at 402-398-7454.

Steve and Maureen,

The note below deals with the conference at Stanford Steve is scheduled to participate in. In case it doesn't 'ring a bell', we discussed it briefly at the end of August. The Conference is part of our 5 year Reasearch relationship with Stanford entitled "Globe". The conference is set for January 23rd at Stanford. There will be 2 Keynote speakers and 3 panels: "Global Ethics", "Global Brand" and "Global Growth"; Steve is part of The "Global Ethics" panel--it should be fairly easy and straight forward (as described below). Steve, if you have changed your mind about participating, please let me know as soon as possible, so I can discuss it with Stanford. If it works with your schedule, I agree with what Beth says below, and think it would be a very good opportunity for us, especially at this time. Please let me know.

Thanks!

--Christie.

Subject: GLOBE Conference schedule

Christie,

Hello! I imagine you're quite busy, given all the changes going on at Enron. I'm dropping you a line for a couple of reasons. First, and most important, I wanted to send along some good wishes during what I imagine is a difficult time. I hope you - and those around you - are coping well and that your spirit is as strong and positive as ever.

Second, I'm attaching the schedule for the January GLOBE conference. Steve Kean's panel will take place 11:15-12:30, which should allow him time to fly in and out easily on the same day. There's a lot of enthusiasm about his participation, and I think this is a great time to have someone from Enron in front of the MBAs. He will be in good, and very empathetic company, as Maria Eitel (NIKE) and Mads Ovlisen (Novo Nordisk) have both led their companies through some difficult times, facing more than their share of public scrutiny. We are working with the panel moderator, David Brady, to outline some specific questions that members of the panel might wish to consider in preparing their remarks. Our goal is to have each panelist share their own company experiences - essentially sharing the ethical challenges their company has faced as they've expanded globally across different cultures and legal regimes. How have they balanced the responsibility to make a profit with that of being a "good corporate citizen" in places where corporate "citizenship" may mean very different things? Again, each speaker will have approximately ten minutes each in which to relay their experiences, after which, the moderator will ask some questions and then ultimately open it up for audience questions.

As I hope is evident, we are quite excited that Steve is taking part in the conference. I will plan to send you the topic outline shortly after the Thanksgiving holiday. Please let me know if you'd prefer that I send it to Steve directly; otherwise I will continue to send information through you.

All the best,

Beth Benjamin

Subject: RE: Crestone Imbalance

Theresa - Can we get a list of the other counterparties with deliveries in 02/01? Our imbalance is out

because of deliveries, but Enron's looks ok, so I can't cut there, but I need to know who to cut.

Also, has Scott gone back and looked at these cumulative imbalances that they are showing?

We have a huge plug to come back to his (3,395) for prior to 2001. Let me know.

Also, can you send over 07/01? Thanks, Gloria

I'm sending the invoice/statement via e-mail. Let me know if you can't open it.

The Crestone OBA Imbalance is the summary we started on showing the discrepancies on the receipt side. A lot of it is rounding from the Crestone spreadsheets to our "whole" numbers we put into the Unify system. The other Imbalance report is on the 3rd tab of the Enron Statement report. Let me know if you have any questions.

Gloria,
Thanks for the heads up on 9/01. I'm printing the report right now and I'll get it with Amy tomorrow (she's out today). If you would like to look at August that would be fine - I would just like to stress that changing any receipts will affect our purchases and likewise with our deliveries. If you could define the differences first then maybe I can lead you to where the issues are. How does that sound?

I also think by doing this it will get you familiar with this pipeline and maybe in the future you could take this part over. It's just very confusing at first

.

Let me know ,
Theresa

There is an interconnect between WIC and FUGG for 09/01. The WIC # ties to the statement. Can you please check the FUGG # ?
Right now, I have some extra time. I would love to help you guys with this imbalance.
Could I take a look at 08/01? Please let me know. Thanks, Gloria

Last month all of your donations helped Enron raise a grand total of \$6 million for the United Way, including our corporate match. Once again Enron employees made a difference and contributed more than any other pacesetter company in Houston. Also, congratulations to Elaine Brown with Enron Global Markets who won the drawing for two round-trip airline tickets for participating in this year's campaign. Thanks to everyone at Enron for your generosity!

This week Enron and the United Way of the Texas Gulf Coast have entered into yet another exciting partnership. Beginning with the Astros vs Giants game on Tuesday, October 2, one of Enron's primary signs at Enron Field will feature the United Way logo alongside the Enron logo.

The decision to include United Way's logo on the sign marks the first time in history that a naming rights partner is sharing exposure on one of its primary in-stadium signage locations with a non-profit partner. This sign is also a free,

innovative way to demonstrate Enron's support of the United Way and promote the agency's role in our community.

The millions of fans who attend Astros games each season will see the sign. Be sure to look for this history-making sign hanging high above the outfield.

You are invited to attend the following presentation:

PSIM: A Power Simulation Tool

PSIM is a proprietary model developed by Enron Research Group.

- ? It takes Power, Gas, Weather and demand information into consideration and uses Monte-Carlo simulation to assess the expected deal value and risk distribution.
- ? It evaluates complex electricity related contracts such as Full Requirement and load following contract.
- ? It also provides a valuation tool for power assets and asset management deals.
- ? It works for both deal specific or portfolio issues.

In this presentation we will show how the model can be used to deal with various types of contracts, explain the model structure and point out further applications.

Date: October 30, 2001
Time: 4:00 pm
Location: EB5C2
Presenter: Alex Huang

Registration is required for a head count.
Please call Shirley Crenshaw at 3-5290 to register.

Pizza and soft drinks will be served.

Dear Enron Assignee,

As Enron Global Employee Services has previously indicated, arrangements have been made with PricewaterhouseCoopers to continue expat/inpat tax services for the 2000 and 2001 tax years.

As contact information may be changing over the next few months, please be sure to provide the updated information to PwC. We will be distributing 2001 tax data organizers via email and will require an active email address.

Note - This applies only to assignees who receive tax preparation assistance as part of the expat/inpat contract. If you have questions on authorization status, please contact your HR rep.

Please send you updated contact information to
enron.houston.ias@us.pwcglobal.com

Kind Regards,

The PwC Enron Team

Our apologies if this is the second time you have received this email.

To: Faculty, Students, Staff, Alumni, Advisory Board and friends
of Haas School of Business

From: Professor Mark Lemley
Chair, Haas School of Business Dean Search Committee

Date: November 7, 2001

The Dean Search Committee wants to learn from the experiences and perspectives of those who care about the Haas School of Business. Therefore, the Dean Search Committee asks for your input into the search for a new Dean.

We invite you to respond to the following questions. Your response will be most helpful if we receive them by Wednesday, November 14. Please e-mail your reply to Katherine Riordan, staff to the committee, at: kriordan@uclink.berkeley.edu

Please do not reply to "all".

Please feel free to provide us with either very brief or more extensive information.

1. What do you consider the greatest current assets and future opportunities for Haas?
2. What do you consider the largest current shortcomings and potential threats to Haas?
3. What attributes and skills do you recommend that we seek in a Dean?
4. What experiences do you regard as important in a Dean?
5. Whom would you like to nominate to be Dean--and why?

Thank you for your time and interest.

--

Subject: Wyoming Interstate Gas Company (WIC) Maintenance

On Tuesday, November 13, 2001, the Douglas Station will be out of service for approximately 8 hours. Throughput during the work will be reduced to a rate of about 360 MMcf/d with a total daily throughput estimated at 450 MMcf/d.

As this will directly effect all gas coming out of the Powder River, please contact your marketer directly as to how much gas they will be able to deliver into WIC on that day. Allocations will be based on WIC allocations methods.

ates [IMAGE] Latest NFL Player News Freddie Jones, TE SD - Free Agent Upd-
ated 11/27/01 San Diego Head Coach Mike Riley said Monday that he is optimi-
stic Jones will be able to play Sunday. He has been sidelined by an ankle i-
njury. Wade Richey, K SD - Free Agent Updated 11/27/01 Richey is likely to
lose the starting placekicking job with the Chargers if they sign Steve C-
hristie to a contract. San Diego would shift Richey to kickoffs only, after-
he missed two short field goals Sunday to drop to 21-for-30 on the ! se! a-
son. In that case, you should drop Richey from your roster. Steve Christie=
, K BUF - Hunter Shively Updated 11/27/01 The Chargers are expected to sig-
n Christie on Tuesday provided he passes a physical, according to the San D-
iego Union-Tribune. He would handle the field-goal chores for the remainder-
of the season, with Wade Richey shifting to kickoffs. If you're a Richey o-
wner and need a kicker, Christie might be worth a pickup based on past hist-
ory, but don't expect him to be one of the better kickers in the league eve-
n if he does get the starting job. Mark Brunell, QB JAC - Top Dogs Update-
d 11/27/01 Brunell is questionable for Monday's game against Green Bay, the-
third straight week his status has been in question due to continued pain =
in his quadriceps muscle. He will be limited again in practice, and it's pr-
obably a good idea to keep him on reserve for Week 12 in your league. Terr-
ell Davis, RB DEN - Eric Bass Updated 11/27/01 Davis should be able to ret-
urn from arthroscopic knee surgery in time for Sunday's game against Miami.=
He will practice this week before a final decision is made, but we're skep-
tical the Broncos won't have him split carries with Mike Anderson, limiting-
both players' Fantasy values. Keith Poole, WR DEN - Free Agent Updated 1-
1/27/01 Poole has bruised ribs that will likely keep him on the sidelines f-
or Sunday's game against Miami. If he can't play, Kevin Kaspar would start =

in his place, and the Denver passing game would further suffer. Rod Smith = , WR DEN - Baja Updated 11/27/01 Smith now has two sprained ankles, and is = questionable for Sunday's game against Miami. If he can't play, then the Br= oncos might have to start Kevin Kaspar and Chris Cole at wideout, depending= on Keith Poole's recovery from a rib injury. James Jackson , RB CLE - Fre= e Agent Updated 11/27/01 Jackson's ankle remains sore, and he will be re-ev= aluated Wednesday to determine his status for Sunday's game against Tennes= ee. Benjamin Gay and Jamel White would continue to split carries if Jackson= can't go. Neil Rackers , K CIN - Free Agent Updated 11/27/01 Bengals Head= Coach Dick LeBeau said Monday he has not yet made a decision on the status= of Rackers, who missed two field-goal chances Sunday. He is 9-for-18 in fi= eld goals this season, and Jaret Holmes has been on the practice squad sinc= e Nov. 1. Ra! ck! ers will likely retain the job for Sunday's game against = Tampa Bay, but he's a very risky Fantasy starter based on his struggles. A= kili Smith , QB CIN - Free Agent Updated 11/27/01 Bengals Head Coach Dick L= eBeau said Monday that Smith might be promoted to No. 2 quarterback, accord= ing to The Cincinnati Enquirer. "If that's what they're going to do, maybe = the Bengals need to get rid of me," Smith said, citing a desire to be trade= d if he's used in a mop-up role. He's not a recommended Fantasy choice, alt= hough it's important to note that he's now likely next in line if Jon Kitna= gets hurt. Terry Allen , RB BAL - Free Agent Updated 11/27/01 Allen, who= remains out with a broken hand, could return to the lineup on Dec. 16. Wit= h the Ravens losing Jason Brookins to an injury, don't be surprised if Alle= n takes back the starting job once healthy. Hold onto him if you have the r= oom on your reserve list or play in a deeper league. Moe Williams , RB BAL= - Free Agent Updated 11/27/01 Williams becomes the Ravens' featured back a= fter the injury to Jason Brookins. If you play in a deeper league or are de= sperate for a running back, consider picking up Williams, although you shou= ldn't expect him to post great stats unless the matchup is very favorable. = Jason Brookins , RB BAL - Free Agent Updated 11/27/01 Results of X-rays on= Brookins' foot revealed a fracture of a bone in his small toe, which will = sideline him for at least four weeks and possibly the rest of the season. M= oe Williams becomes the Ravens' starting running back, and might be worth a= dding to your roster in a deeper league. Wayne Chrebet , WR NYJ - Fear Upd= ated 11/27/01 Chrebet did not practice Monday because of a shoulder injury= . However, The New York Newsday reports that he is expected to play in Sund= ay's game. Jake Ariens , K BUF - Free Agent Updated 11/27/01 Ariens has b= een released by the Bills. Buffalo has signed Shayne Graham to replace him.= Edgerrin James , RB IND - Martin Cuilla Updated 11/27/01 Colts coach Jim= Mora said James' surgery to repair a torn ligament in his left knee was su= ccessful Saturday in Miami. Mora said he received the news from orthopedic= surgeon Dr. Arthur Rettig, a team physician. "I spoke with him Saturday an= d he told me it went very well," Mora said. James, the two-time NFL rushing= champion, injured the knee when he was tackled awkward! ly late in a gam= e at Kansas City on Oct. 25. He was placed on injured reserve last week. Ja= mes' rehabilitation is expected to take seven months. He is not expected to= take part in either of the Colts offseason minicamps. Team president Bill = Polian has not said whether James will be ready for the start of training c= amp. Terry Glenn , WR NE - Tori Kuykendall Updated 11/27/01 Glenn could= be put on injured reserve if he doesn't recover from a hamstring injury so= on. That would mean the end of his season, and perhaps the end of his Patri= ots career. "I haven't reached it yet," coach Bill Belichick said Monday wh= en asked when he would decide if the roster spot would be better spent on s= omeone other than Glenn. "But as each day goes by, it gets a little bit clo= ser! ."! Shayne Graham , K SEA - Free Agent Updated 11/27/01 The Buffalo = Bills signed Graham as their kicker Tuesday, a day after Jake Ariens was re= leased following a missed point-after against the Miami Dolphins. Graham ha= d been released by the Seattle Seahawks before the start of the season. S= tephen Alexander , TE WAS - Free Agent Updated 11/27/01 Alexander, who has = been hampered by a ankle injury, returned to action on Sunday. He didn't st= art, however, and may lose playing time to both Walter Rasby and Zeron Flem= ister for the rest of the season. Unless you! p! lay in a deeper league, dr=

opping Alexander is advisable. Az-Zahir Hakim , WR STL - FIBSABs Updated 11/27/01 Hakim, who is dealing with an ankle injury, played in Monday night's 24-17 loss to Tampa Bay. He had three catches for 29 yards in the game. =

Kevan Barlow , RB SF - Free Agent Updated 11/27/01 Barlow suffered a dislocated shoulder during Sunday's win over Indianapolis. "It's throbbing," Barlow told the Contra Costa Times . "I couldn't really sleep last night. I had to sleep sitting up. It's hurting." Barlow is listed as doubtful for Sunday's game against Buffalo, so be sure to place him on reserve. Terrell Owens , WR SF - Martin Cuilla Updated 11/27/01 Owens suffered a sprained right foot on Sunday to go along with his sprained left ankle. X-rays were negative, but Owens' foot was placed in a protective boot as a precaution. He is expected to miss some practice time this week, but he will be in the starting lineup on Sunday when the Niners face Buffalo. Jeff Thomason , TE PHI - Free Agent Updated 11/27/01 Thomason suffered a hyperextended knee during Sunday's loss to Washington. He missed practice on Monday, and is status for Week 12 is uncertain at this time. The reserve tight end has very little value as a Fantasy player. Donald Driver , WR GB - Free Agent Updated 11/27/01 Driver, who has been inactive for three straight weeks due to a thigh injury, returned to practice on Monday. His status for Week 12 remains unclear, but he's not worth starting on your Fantasy team in any event. =

Tyrone Davis , TE GB - Rocks Updated 11/27/01 Davis, who has been out all year due to a hamstring injury, will likely find out what his status with the Packers will be this week. Depending on his health, the team will either activate him, place him on injured reserve or cut him altogether. James Stewart , RB DET - Tori Kuykendall Updated 11/27/01 Stewart, who suffered a neck stinger in last Thursday's game against Green Bay, is expected to be available for Week 12. He'll have a tough time posting good Fantasy numbers against Chicago's tough run defense, but the lack of depth at running back in the league makes it tough to bench him. Charlie Batch , QB DET - Rocks Updated 11/27/01 According to the Detroit Free Press, Batch is expected to start Sunday's game against Chicago despite a groin injury. "This is Charlie's offense," coach Marty Mornhinweg said. "He practiced a little bit today...he was in all weekend getting (the injury) treated...I would expect him close to full speed Wednesday." He'll likely lose snaps to rookie QB Mike McMahon, however, so starting Batch is a risky proposition. Jackie Harris , TE DAL - Free Agent Updated 11/27/01 Harris missed last week's game against Denver due to a hamstring injury. The veteran tight end is listed as day to day. Anthony Thomas , RB CHI - Free Agent Updated 11/27/01 According to coach Dick Jaroun, Thomas' status for Week 12 is still uncertain. In fact, the Bears don't expect to know if Thomas, who is dealing with a hamstring injury, will be available until later in the week. Brad Hoover , RB CAR - Free Agent Updated 11/27/01 Hoover (neck) will likely be held out of practice this week. However, the Panthers are hopeful that he'll be available for Sunday's game against New Orleans. More Updates [IMAGE] Copyright= 2001 Commissioner.COM Inc and SportsLine.com Inc. I keep this little message around to help remind myself what a truly blessed life I have had when things aren't going the way I think they should. After reading the paper the last few days I thought you might need a Hug. Jan, Corby, Holly, Tanner, Gunner and I all love you. What more could anyone ask for? Hang in there.

> THE BEST DAY OF MY LIFE

>

> Today, when I awoke, I suddenly realized that this is the best day of my life, ever!

>

> There were times when I wondered if I would make it to today; but I did!
> And because I did I'm going to celebrate!

>

> Today, I'm going to celebrate what an unbelievable life I have had so
> far: the accomplishments, the many blessings, and, yes, even the
> hardships because they have served to make me stronger.
>
> I will go through this day with my head held high, and a happy heart.
>
> I will marvel at God's seemingly simple gifts: the morning dew, the sun,
> the clouds, the trees, the flowers, the birds. Today, none of these
> miraculous creations will escape my notice.
>
> Today, I will share my excitement for life with other people. I'll make
> someone smile. I'll go out of my way to perform an unexpected act of
> kindness for someone I don't even know.
>
> Today, I'll give a sincere compliment to someone who seems down. I'll
> tell a child how special he is, and I'll tell someone I love just how
> deeply I care for them and how much they mean to me.
>
> Today is the day I quit worrying about what I don't have and start being
> grateful for all the wonderful things God has already given me.
>
> I'll remember that to worry is just a waste of time because my faith in
> God and his Divine Plan ensures everything will be just fine.
>
> Tonight, before I go to bed, I'll go outside and raise my eyes to the
> heavens. I will stand in awe at the beauty of the stars and the moon,
> and I will praise God for these magnificent treasures.
>
> As the day ends and I lay my head down on my pillow, I will thank the
> Almighty for the best day of my life. And I will sleep the sleep of a
> contented child, excited with expectation because I know tomorrow is
> going to be

> The Best Day Of My Life!

X-cc:

X-bcc:

X-Folder: \JHODGE2 (Non-Privileged)\Inbox

X-Origin: Hodge-J

X-FileName: JHODGE2 (Non-Privileged).pst

Enron Global Technology is in the process of decommissioning the support for all non-standard Internet Email address formats. The only Internet Email address format that will be supported, once this effort is completed, is firstname.lastname

e@tcpolice.org. We will no longer support Internet Email address formats such as name@tcpolice.org, name@ect.enron.com, name@ei.enron.com (where "name" is an abbreviation, acronym or alternative to an employee's first name and/or last name). Every Enron employee has an Internet Email address of firstname.lastname@tcpolice.org and must begin making the necessary arrangements to start using this Internet address format if they are not using it already.

Any new/existing application systems or business cards that reference a non-supported Internet Email address will need to be changed to reference the only supported firstname.lastname@tcpolice.org Internet address format. It is important to remember to also notify any external contacts who are currently sending Internet email to any non-supported Internet Email addresses.

To determine what your supported Internet Email address is, take your name as it appears in Outlook or Lotus Notes and replace any "spaces" that appear in your name with periods and append @tcpolice.org. For example in Outlook, Alan Smith, Robert (firstname = Robert, Lastname = Alan Smith) will have a supported Internet Email address of robert.alan.smith@tcpolice.org.

IMPORTANT : If you need to update your business card(s) to reflect your supported Internet Email address, please ensure you test & confirm the delivery of Internet email to your supported email address prior to updating your business cards.

If you experience any issues with delivery of Internet email to your supported Internet email address, please contact the Resolution Center.

We will communicate further details, including the cut-off date, in the coming weeks. Meanwhile, it is imperative that you begin making the necessary arrangements to change over to using the firstname.lastname@tcpolice.org Internet Email address format. If you have questions regarding this email, send an Email to enron.messaging.administration@tcpolice.org.

Thank you for participation, cooperation and support.

Doug and David:

Attached please find a document summarizing all on-line ERCOT product descriptions posted on EOL or otherwise in development to date. The ERCOT products include: (1) the Firm LD physical forward product; (2) the Firm LD spread product, and the (3) financial swap product. These descriptions reflect the most current versions of all products as of November. Please let me know if there have been any developments in the ERCOT market requiring further updates. I have confirmed that the index language is up-to-date.

Also, please let me know if there are additional products not covered by this list.

Thanks,

Leslie

ChemConnect and Envera Announce Merger; Leading Online Marketplace for Chemicals and Plastics and Major Industry Consortium Join Forces, Heralds New B2B Era
06/07/2001 Business Wire

Offering the only complete e-commerce solution for buyers and sellers of chemicals and plastics worldwide, ChemConnect Inc. and Envera today announced they have merged. The agreement between ChemConnect, operator of the World Chemical Exchange, a dynamic online marketplace supported by strategic e-commerce services, and Envera, a leading global electronic network for chemical and petrochemical industry B2B supply chain transactions and services, is effective immediately. Dedicated solely to creating value for buyers and sellers of chemicals and plastics, the merged company offers increased efficiency, cost optimization, and improved collaboration with existing and new business partners across the entire supply chain, from prospecting to fulfillment and settlement.

"ChemConnect is the leading online marketplace for chemicals and plastics. Envera offers unparalleled supply chain integration. Together, we create the first online Marketplace Plus that offers a flexible, modular approach to accommodate different stages of adoption," said John Robinson, ChemConnect CEO, who will now serve as CEO of the merged entity. "Combining our complementary strengths and shared vision, we will have an unbeatable solution: A seamless connection to the entire workflow, from identifying new business partners to fulfillment. It's what our Members told us they want, and with this merger, we are making it all available."

ChemConnect and Envera will offer their Members unmatched, online global buying and selling opportunities, supported by end-to-end connectivity and collaboration--including sales, logistics, and financial services--across entire supply chains. With each company's proven B2B expertise in creating new efficiencies and improved bottom-lines for their members, the two companies together represent the first fully-integrated, full-service e-commerce solution, where buyers and sellers of chemicals and plastics can meet in an open, independent marketplace to find new business partners, negotiate purchases and sales, and complete order fulfillment through automated back-office business processes and system-to-system integration. Because both companies' solutions are "ready-now," with low entry costs, chemicals and plastics buyers and sellers can immediately, and profitably, benefit from procurement, sales, and supply chain efficiencies.

The companies will also continue their commitment to the Chemical Industry Data Exchange (CIDX) and the development of Chem eStandards(TM), the standards for the transfer of XML documents between Enterprise Resource Planning (ERP) systems, which enable global collaboration among many partners. Transactional efficiencies and cost optimization results as companies connect to trading partners through the World Chemical Exchange or through the Envera Network.

"We have the solutions, the dedication, the experience, and the expertise to help our Members--and all those who will become our Members--to increase their sales and procurement efficiencies, from the start of the online negotiating process to final product delivery," said Bob Mooney, Envera CEO and newly appointed member of ChemConnect's Board of Directors. "This is now the only virtual one-stop solution for all buyers and sellers of chemicals and plastics in companies of all sizes, around the world."

About ChemConnect

ChemConnect, Inc. (www.chemconnect.com) operates the World Chemical Exchange, offering buyers and sellers of chemicals and plastics a dynamic, independent Inter

net marketplace supported by strategic e-commerce services. World Chemical Exchange Members have a choice of sales and procurement solutions that meet specific business requirements, and also benefit from ChemConnect's unmatched industry and e-commerce expertise. ChemConnect's online trading tools include the Exchange Floor, Corporate Trading Rooms, and the Commodities Floor. Founded in 1995, Chem Connect is headquartered in San Francisco, California.

About Envera

Envera is a trusted e-business solutions provider that improves members' supply-chain communications and fosters business growth in the chemical and petroleum industries. Envera's initial equity and trading partners include: Albemarle Corporation (NYSE: ALB); Borden Chemical, Inc; Enron Global Markets group of Enron (NYSE: ENE) Equistar; Ethyl Corporation (NYSE: EY); Lubrizol (NYSE: LZ); Lyondell Chemical Co. (NYSE: LYO); Mays Chemical; Occidental Chemical Corporation; Phenol chemie; Solutia (NYSE: SOI); Peak Chemical LLC; Southern Chemical; and Vopak USA

Kay,

We found the bankruptcy proceeding for The Phone Company - it was filed in Delaware, Case no. 98-01881. For some reason, the Delaware bankruptcy docket is one of the few federal dockets that are not available on the PACER system. I'm checking with bankruptcy legal assistants as to the cost of getting a copy of the Delaware docket.

Regards,
Sherry

Subject: FW: Ces lease/USTELENET DMS

Here's what I got from Eric on the lease. The numbers don't seem to match, but we won't worry about that now.

The Nortel RTU info is supposed to be here by Wednesday.

Sherry, please make the few changes to the draft equipment lease Tammy previously prepared to incorporate the new terms. To the extent necessary, just bracket any questions you have, especially commercial questions. We won't tackle the security agreement or the license agreement yet. Just send the revised lease to me (not Eric yet).

Please see if you can find the bankruptcy proceeding. If the docs aren't available on line, please get back to me before incurring any additional expense. I don't want to spend a lot of money on this until things become a bit more clear.

Thanks,

Kay

Here it is. As mentioned, I have not seen an executed copy, and there may not be one.

TPC is a Delaware corp. HQ'd in Danbury, CT. Would that mean the Ch. 11 was filed in Delaware?

Eric

The Resolution Center will be decommissioning one of its 888 numbers (888-877-7757) as of January 7, 2002.

You can continue to contact the Resolution Center, Toll Free, by using the following steps:

To contact the ENW IT Resolution Center:

? Call 1-800-973-6766 (1-800-97-ENRON)

? Select 1 to transfer to an extension within the Enron Building

? Select 31411 and you will be transferred to the helpdesk.

The following options are also available through the toll-free number:

0: Connect to voice directory

1: Transfer to an extension in the Enron building

2: Access voicemail in the Enron building

3: Transfer to 3 Allen Center

4: Transfer to Omaha

5: Transfer modem or fax with 646 prefix

6: Speak to an Enron operator

7: Transfer to a fax machine in the message center

8: Transfer to Aviation

9: Leave a confidential message for Enron Chairman

Please contact the Resolution Center at 3-1411 for assistance

ETS customers should continue to contact the ETS Solution Center-Houston at 713-345-4745 or 888-465-4745, and the ETS Solution Center-Omaha at 402-398-7454.

THANK YOU to everyone who has participated in this year's United Way Campaign!
Together we are Building Houston's Future.

We have good news for those of you who have not yet had a chance to participate - the campaign has been extended through the week of August 27. The winner of the two airline tickets will not be drawn and announced until Friday, August 31.

As a pacesetter company, Enron always sets the standard for the rest of Houston. We are so close to making our goal of \$2.9 million. With your help, we will reach (or even exceed) that goal!

To make your pledge, please log on to <http://home.enron.com> and click on the United Way Building Houston's Future logo. You will need your GIS ID and password in order to complete the pledge process. Your GIS ID is an eight digit number that starts with a 9. If you do not know your GIS ID, or if you need help keying your pledge in to the system, please call the GIS Help Desk at ext. 3-5666.

Hi All,

Reporting has been migrated to a new (it's own) database server and

access to the old server has been disabled to ensure the currency of data.

HOW THIS MIGHT AFFECT YOU:

If you use tools that link to the Report Settings database, the 'pipeline' DSN on your PC will need to be updated to point to the new server. Specifically this applies to anyone utilizing a Access database to link to the database tables.

RESOLUTION:

We will be targeting known users (Justin's Group and Jay) tomorrow. However if you experience problems as a result of this change please contact me.

Thanks,
Kim

FLOOD WARNING FOR KENAI RIVER
NATIONAL WEATHER SERVICE ANCHORAGE AK
330 PM WED AUGUST 29 2001

THE NATIONAL WEATHER SERVICE HAS ISSUED A FLOOD WARNING FOR THE KENAI RIVER, INCLUDING THE AREAS OF KENAI LAKE, COOPER LANDING, AND KENAI KEYS.

HEAVY RAIN OVER THE UPPER PORTION OF THE KENAI BASIN ON MONDAY NIGHT THROUGH TUESDAY EVENING HAS CAUSED A MAJOR RISE IN WATER LEVELS ON THE KENAI RIVER AND ITS TRIBUTARIES. THE GAGE ON THE TRAIL RIVER AT LAWING HAS RISEN 3.4 FT IN THE PAST 30 HOURS AND THE SNOW RIVER ROSE 4.0 FEET BEFORE CRESTING TUESDAY AFTERNOON. ADDITIONAL PRECIPITATION OF UP TO 1.5 INCHES IS EXPECTED AND WILL PROLONG THE CREST. WATER LEVELS AT COOPER LANDING WILL PROBABLY CREST SOMETIME LATE FRIDAY AFTERNOON, WITH A STAGE SLIGHTLY BELOW 14 FT. PRIMROSE CAMPGROUND IS THE MAIN AREA AFFECTED BY STAGES BELOW 14 FT. THE SNOW GLACIER LAKE HAS NOT RELEASED AT THIS TIME.

MINOR FLOODING IS ALSO POSSIBLE AT KENAI KEYS. STAGES ARE EXPECTED TO CREST LATE FRIDAY DOWNSTREAM OF KENAI KEYS AT ABOUT 13 FEET ON THE USGS GAGE AND AT ABOUT 12 FEET AT KENAI KEYS.

THE HEAVIEST RAINS OVER THE KENAI PENINSULA HAVE ENDED, WITH LIGHTER AMOUNTS OF RAIN FORECAST FOR THURSDAY AND FRIDAY. SMALLER STREAMS SHOULD BEGIN FALLING TODAY, WITH THE KENAI RIVER FALLING OVER THE WEEKEND.

A FLOOD WARNING MEANS THAT FLOODING IS IMMINENT OR OCCURRING.

THIS STATEMENT WILL BE UPDATED AT 10 AM AUGUST 30 OR EARLIER IF
CONDITIONS WARRANT.

In order for UBS Warburg to timely process your paycheck, I am requesting that a
ll employee's accepting offers return any outstanding forms to my new desk locat
ion at 05852 on the 5th floor of ECS (Look for the Hamburg Flag) by noon this F
riday 2/01/02. This will prevent any benefit deductions from having to be "Dou
ble Deducted" on future checks. Please attach a deposit slip or voided check st
ub to your direct deposit form. Attached below are the forms needed for payroll
/benefits, in case you did not turn these in at Orientation. Lastly, please ver
ify that your EHRonline home address is showing your current home address becaus
e all live checks will be mailed to your home residence.

Thanks, Tony Jarrett

Joann ---

Effective 5/1/01 through 10/31/01 we have a 10,000 MMBtu/d index put at Dominion
South Point to PSEG. We can do as much as we want in any month, within the 0-1

0,000 MMBtu/d parameters, but we can do no more than 920,000 MMBtu for the whole term. We need to keep a running tally of how much we use. Starting on Monday, can we keep this tally on the morning sheet and update it daily?

Scott

Vladi,

I just wanted to let you know that I am awaiting your confirmation on counterparty name in the below instance. I will assume that no response will mean that we can proceed with our best judgement in order to settle the affected transactions. However, final say on counterparty name might require your authorization. Please advise ASAP.

Thank you,
Scott Dozier

Cc: Pimenov, Vladi; Valderrama, Lisa
Subject: RE: Deal Confirm for Coral Energy Canada

There is no counterparty set up in the system as Coral Canada US, Inc. The deals that Ann sent to me were not changed because the counterparty name was not set up and address information was not sent to me with the corrected confirmations. These were sent back to Ann. As far as I know the Trader did not give me any information on the counterparty name and address information.. If you have received this information on your end then I would suggest that you send in a GCP request so that Global Counterparty can set the counterparty up in the database. Once this is done then you would need to send Sean the deal numbers that need to be changed.

Vladi, should the counterparty name be Coral Canada US, Inc.

Sean,

Elizabeth should be familiar with what I will be referring to in this note, so please reference her if need be...

There are several ENA sales for Sep-01 production to Coral Energy Canada, Inc. which the counterparty is claiming should be billed under Coral Canada US, Inc. The counterparty will not pay on these items until corrected. In fact, the counterparty faxed back our confirmation with the requested change back in September. Ann (I don't know her last name) with ENA physical confirmations said that she was aware of these confirmations and that they had been forwarded to Elizabeth for her attention. It is my understanding that once noted that there was actually no counterparty in our systems under this new name, the traders for each company should have been in contact to straighten this out. I am unaware of that occurring or even if that is the correct procedure.

I am cc'ing Vladi Pimenov because Sitara shows him as having created at least one of the deals. Maybe he can clarify things for us. One example of such deals is 1026087. Bottom line is I need a way of receiving payment from Coral on these items.

All - please advise.

market_relations@nyiso.com writes to the NYISO_TECH_EXCHANGE Discussion List:

Dear Market Participants

*****Reminder Notice*****

Note: The following change was originally scheduled for October 17, 2001.

On October 31, 2001, the NYISO web servers will be upgraded. This will require both software and hardware changes. While these changes will be transparent to the users, these changes will require that the MIS system be unavailable for approximately 60 minutes. The outage will begin at approximately 11:35 AM. Market Participants planning on submitting HAM transactions or modifying Day Ahead bids should act accordingly.

The NYISO will minimize the duration of the outage as much as possible as we recognize the inconvenience caused by system outages. Ultimately, these changes will result in a more stable environment and provide enhanced services that the current web servers are unable to perform.

If you have any questions, please call your Customer Relations Representative or the Help Desk at (518) 356-6060.

Thank You
Customer Relations

Enron employees not participating in contract parking are eligible to receive Metro Bus Passes or Woodlands Express Passes. You may pick up a bus pass from the Parking & Transportation Desk, on Level 3 of the Enron Building, from 8:30 AM to 4:30 PM.

All Metro passes offered through the Enron Parking & Transportation desk will be the Metro 30 Day Zone Pass. When you use a 30-day zone pass, bus service is divided into four zones w/ unlimited rides. The zone pass is time activated, which means that it will not become active until the first time it is used and will not expire until 30 days after it was used for the first time. New passes will be available to Enron employees upon expiration of the 30 day time period. Each zone does have a different fare values based on the distance the bus travels. This is important to any buser who wants to transfer to or travel in a higher-cost zone than the zone pass they have, in this case the difference must be paid in cash. If they are traveling in a lower cost zone, then there is no extra cost.

Parking & Transportation Desk
3-7060

Tried to call you. I think that we need to talk or meet. We need to differentiate between "asset sales", book liquidations, and other types of transactions (i.e. contract rejections).

Ray

Subject: Revised DASH

Ray,

We are working on revising the DASH template in order that it can be readily used for asset divestitures, contract terminations, and amendments to transactions. The new DASH, the template of which should be completed early next week, would be prepared earlier in the process that was typically the case in the past, would contain a RAC recommendation, and would then be used as the approval document for the appropriate committee (Transaction Review or Bankruptcy Management) to

Your thoughts as to how the approval process should occur after a DASH is prepared would be appreciated.

Dave

NEIL ANDERSON DAILY DEVOTIONAL
from Freedom in Christ Ministries

THE SHIELD OF FAITH

Paul mentions three more pieces of armor that we must take up to protect ourselves from Satan's attack: the shield of faith, the helmet of salvation, and the sword of the spirit which is the Word of God. The first three (the belt of truth, the breastplate of righteousness, the shoes of peace) are established by our position in Christ; these last three help us continue to win the battle.

These flaming missiles from Satan are nothing more than smoldering lies, burning accusations, and fiery temptations

bombarding our minds. When a deceptive thought, accusation, or temptation enters your mind, meet it head-on with what you know to be true about God and His Word. How did Jesus deflect the missiles of Satan's temptation? By shielding Himself with statements from the Word of God. Every time you memorize a Bible verse, listen to a sermon, or participate in a Bible study, you increase your knowledge of God and enlarge your shield of faith.

We all struggle with tempting and accusing thoughts. If you are a healthy and mature Christian, they will bounce right off your shield of faith.

Lord, I raise up the shield of faith today and stand against tempting and accusing thoughts from the evil one.

Subject: RE: Hubbard (ENA)

Charlie,

I think your summary is very good. I would like to add that although Midland cannot discontinue service to ENA for failure to pay the \$88,816.33 and \$39

,881.55 invoices, Midland can shut off service if ENA fails to pay any future invoices. So, it's imperative that someone from Northern very closely monitor the situation with ENA and Midland to ensure that ENA makes the necessary payments. In addition, the bankruptcy court may require ENA to provide Midland with "adequate assurance" of future payments. If required, this will most likely take the form of a cash deposit or a letter of credit. Again, if ENA fails to provide this adequate assurance, Midland may discontinue service.

Subject: Hubbard (ENA)

After the meeting yesterday and speaking to Bill Rapp and several others today I believe I can summarize the Hubbard/ENA circumstances as they exist right now:

- 1) The Hubbard Compression Services Agreement is with Enron North America (ENA) and ENA has filed for bankruptcy.
- 2) The outstanding Oct. (\$88,816.33) and Nov. (\$39,881.55) Midland Power Cooperative electric bills to ENA have not been paid, and probably won't be until the bankruptcy proceeding unfolds (if at all).
- 3) Under bankruptcy law, a utility cannot discontinue service to a debtor for not paying invoices outstanding at the time bankruptcy is filed and Bill Rapp has asked ENA's bankruptcy attorneys to provide the attached notice to Midlands Power Cooperative.
- 4) Under supervision of the bankruptcy court, future invoices received after bankruptcy was filed (Dec 2) will be paid by ENA (if they have the cash?).
- 5) ENA's nomination of 2,010 dth/d of "Monthly Fuel Gas Payable" from NNG has been confirmed and is flowing. (This is their source of cash!?)
- 6) Gas Accounting will continue to pay the "Monthly Demand Charge" (\$64,549), and the "Monthly Peak Compression Service Charges" (ranges from \$300 to \$40,000). The next payment is not due until the end of December.
- 7) ENA's O&M payment to NNG for motor operation (\$4,072.82) will be billed on the 20th of each month. One month's payment should have been outstanding when bankruptcy was filed and therefore not paid, however, it was actually paid to NNG on Dec. 6th.
- 8) ENA's next \$320,000 "Peak Associated Payment" is not due to NNG until July 1, 2002.

There is no certainty when dealing with a bankrupt entity, however, this is where we are today. The theme I keep hearing is business as usual.

Tom,

Someone from Operations should probably follow-up with Midland Power (I suggest a boat load of empathy regarding their \$128,000 in limbo) after they get the ENA letter.

Subject: TMT -- summer spill for fish starts today.

TMT members and participants:

This is to inform you that, at the Implementation Team meeting this morning, the Action Agencies agreed to provide summer spill for fish passage at Bonneville and The Dalles Dams, beginning today, Tuesday 24 July.

At Bonneville, the Corps and BPA will make best effort to spill 45 kcfs each day for 5 hours. The spill hours will be 2000 - 0100 hours, as recommended by NMFS.

At The Dalles, spill will be provided on an hourly basis, when the hourly projection is 71 kcfs or greater, from a minimum 15 kcfs spill up to 30% of total discharge.

Spill began at 1400 hours today at The Dalles, and is expected to begin at 2000 hours tonight at Bonneville. The action agencies may change the operation if the spill operation results in unacceptable risks to power system reliability. The Action Agencies will coordinate changes with TMT.

Thank you for participating in the TMT and IT discussions over the past few days that led to this operation.

This message is to inform you that information contained on your printed pay advice for the pay period ending May 31, 2001, may be misleading.

Regardless of whether you have single or multiple direct deposits, your net pay is correct, but your pay advice will indicate that all of your pay has been deposited collectively to "Other Bank". It does not list specific bank accounts. However, if you view your pay advice in eHronline, you will be able to confirm your scheduled direct deposits and verify the accounts to which the deposits were made.

You may access eHronline and view your pay advice by taking the following steps:

- ? Click the following link to open eHronline: <https://ehronline.enron.com>
- ? Read the disclaimer
- ? Click Accept
- ? Type your SAP Logon ID (e.g. your "P" ID) in the User Id field.
- ? Enter your SAP password in the Password field.
- ? Click the Logon button.
- ? Select Paycheck Inquiry from the drop-down list
- ? Click the radio button next to Results in Period to select the default f

or the May 31, 2001 pay advice
? Click the Continue button.
? Click the link for the 05/16/2001-05/31/2001 pay period to display your pay advice.
? Scroll to the bottom of the screen to view your direct deposit details.

If you have additional questions about your pay advice or accessing eHRonline, please contact the ISC Customer Care Group at 713.345.4727 or isc.hotline@tcpolice.org.

Thank you.

Thanks! We will be in town on December 8th. We are going to try to visit some reception sites and see everybody. I don't know exactly how, but we are going to try. Diane can probably update you with more details as it gets closer.

I want to look at some places near Katy. I am going to try to look at the Equestrian Center and maybe the Cinco Ranch Country Club (if it lets non-members use their facility). I am going to try to have a all-in-one place. Ceremony and Reception. But I may have to find a church. Who knows right now?

Hopefully we will see you soon. I want to see ERIN!!! Tell Pat that I said "HI". Nicole

Subject: Our tree trimming storey.....

Bryan and I decided to start putting up the Christmas decorations this week. Sunday, we got the tree out of the closet and set that up in the living room. Our plan was to do a little bit every night. By Thanksgiving, we would have a beautifully decorated house. On Monday, Bryan put the lights on the tree. Then I started unwrapping some of the ornaments.... just to look at them. Well, after I unwrapped *all* of the ornaments, we decided to finish trimming the tree. Bryan was hanging back and letting me do most of the decorating. Though I did notice that one of the first ornaments that he put on the tree was my heart shaped Nicole ornament. After we finished, we sat in the glow of the big bulb lights and admired our tree. That was when Bryan informed me that I did not find my NEW ornament. He had put something new on one of the trees. (we have a charlie brown tree in the bedroom and the big tree in the living room.) I could not find anything new on the charlie brown tree so I moved to the big tree.

After surveying the big tree for a few moments, the little girl in me said, "Look for a ring, look for a ring". But the practical side of me said, "Find the ornament". Well, just about then I found a beautiful diamond ring hanging from the heart shaped Nicole ornament. My engagement ring had been on the tree the entire time. I was so focused on the decorating

that
I never saw it. Bryan has since been teasing me that any other woman
would
have known right away that there was a diamond ring on the tree.

I am very happy and excited to tell everyone that Bryan and I are
engaged
to be married. We do not have a date, time, place or even a city yet.
I
just couldn't wait to tell everyone. I know that I will be wearing a
big
smile for a long, long time!

Happy Holidays, Nicole

It has been Sylvia's understanding that Nicor Gas Company is a hub which is a storage facility, not the inverse. We believe there has been a misinterpretation as to what has been stated. In fact, these contracts have been setup since 1995.

Attached please find the contracts for Nicor Gas Company and Northern Illinois Gas Company.

These contracts have existed in the Global Contracts system. Per the letter dated January 23, 1998, Northern Illinois Gas Company changed its name to Nicor Gas Company. It indicated that any existing contracts did not have to change its name to Nicor Gas Company. Thus, the contracts remained under the name Northern Illinois Gas Company. Further, these existing contracts were Parking, Storage, Transportation and Pooling Service Agreement.

We suggest that you setup deal tickets and if necessary, we setup new contracts with the service of Balancing, Wheeling and Loan. These contracts will feed to Unify accordingly. Some of the contracts already have deals, which is indicated on the contract title or you can run the Sitara Report to locate the deals behind the contracts.

If you need our assistance, please do not hesitate to contact us.

Thank You.

Marlene D. Hilliard

Subject: RE: Nicor Hub contracts

That will be good going forward if all goes well, however we still need to address the outstanding issues in order to clear the Receivables and Payables. I will be giving Marlene a copy of the tariff and see if she can get contracts setup.

Let me know how the test goes.

Thanks,

Marlo

We are changing how we put in these tickets effective November 1 to be on CPR exchange tickets. When I get my reports for October we will go out and set up storage contracts for what we have right now and start using them accordingly. Part of the problem has been in the way we have to send Nicor on an EDI process. I am going to revisit and see if we can test in stage doing it thru CPR tickets and if that works then there should be no problem. Please keep me posted and anything I can do to be of assistance please let me know.

Thanks,

Cora

Subject: Nicor Hub contracts

We, Vol Mgmt and Settlements are still trying to get the Nicor/Northern Illinois Gas deals cleared through Unify. Kam had tried to help Kathy Kelly and I last year with putting in storage tickets for the deals that address the Balancing/Wheling/ and Loan volumes that ENA is charged by the Hub every month. These volumes are coming through the Supply verifications and Sales invoices but are not being paid, nor being sent out and therefore creating issues for Settlements. I remember that Sylvia Campos had stated that those tickets were not possible to put in because Nicor is a Hub not a storage facility. My Nicor rep. faxed me copies of their tariff effective July 15, 1999 stating they have the capacity for storage and transportation, so I'm a little confused what the problem is that is preventing us setting Nicor up correctly in global and Unify to handle these types of storage deals individually.

Any assistance with this would be greatly appreciated as we are showing a \$4 million receivable outstanding for settlements and a \$1.1 million payable on the service side and need to get these cleared as soon as possible. I can make a copy of the tariff that I have just let me know.

Thanks,
Marlo James

INTEROFFICE MEMO

From: John Lavorato & Dave Delainey

To: All of ENA and EES

Re: ENA and EES Industrial SIC Codes

As Enron continues to build its origination and customer business in the US, it is becoming increasingly important that both ENA and EES target the appropriate industries and customers with our respective value propositions. Double coverage and duplication waste resources and damages Enron's reputation in the market place. It is also important that the right product, solution and sales technique are utilized to ensure the maximum benefit for our customers and Enron.

Consistent with the past, EES will be focused on those SIC codes or industries that are less energy intensive and are less sophisticated in their management of energy. ENA shall continue to target and cover those industries and customers that are very energy intensive and employ significant process load. We ask that both organizations respect the boundary. In those few cases where this policy is not appropriate, please over communicate to ensure close coordination between ENA and EES before customer contact.

Effective immediately in the US and regardless of total energy consumption or number of sites, the following SIC codes have coverage responsibility in ENA. All other industrial and commercial SIC codes and activity will be managed by EES.

ENA SIC Codes:

Primary Metals Mining and Extraction

Oil and Gas Extraction
Paper and Forest Products
Chemicals - except for pharmaceutical, biotech and small specialty chemical that
will be EES customers
Refining
Petroleum and Coal Manufacturing
Plastics and Rubber Manufacturing
Fertilizer
Rail
Auto - restricted to the Big Three - Ford, GM and Daimler-Chrysler
Cement
Aerospace - restricted to Boeing, Raytheon, GE Aircraft, Allied Signal, Hamilton
-Sundstrom
Large Agricultural Processing

Interesting idea. Here are some of the issues we would need to think about.
California - since Direct Access is suspended, we would need to evaluate that the assignment would void our contract (at least one commissioner at the PUC is still trying to further limit DA). would need to check with our DASR team to see what restrictions exist on DASRing
Assignment - the contracts generally would require consent to assignment by the customer
confidentiality - may need consent of the customer to show the contract to the seller
DYNEGY - would need Dynegy consent to the sale
Other - issues may exist after we read the contracts. At least one of the customers on this list is bankrupt (Paradise Textille).

I'll wait for some business direction before we start anything.

Thanks. Vicki

Subject: FW: Contract sale idea

Guys, I think Don has a good idea here - but it needs to be managed prudently.

- a) Mark who do we talk with in Dynegy to inform them that we are selling or otherwise disposing of material contracts or assets of EES?
- b) Jeremy, it is important to have a view on the viability of getting these customers to agree to an assignment and releasing us on confidentiality issues so that we can approach dealers/producers/utilities with a tight book?
- c) Vicki, clearly legal issues on the contract (ie) confidentiality, assignability, DASRing or assignment in a post non-deregulated California, etc.

These issues need to be vetted before we approach any producers.

The idea is to raise significant cash quickly

Please respond ASAP.

Regards
Delainey

Cc: Tycholiz, Barry; Brodeur, Stephane
Subject: RE: Sumas cash trade

Chris,

My email probably was a bit out of line, sent out of frustration - my apologies. It was not wise of me to give a trader a heads up on my intent to buy in the first place, going forward I will not do that. I have no expectation of having Stephan manage anyone's price risk. I am hoping to develop Cascade into a long-term Enron customer, I make no origination on the deals I have done with them, I have encouraged them to enter into longer term DI deals and I have hooked them up with EOL - all intended to benefit of the cash desk in Calgary. Next time the market falls \$0.12 immediately following a trade I make on behalf of a customer I'll keep my mouth (email) shut.

There is no offence intended by either of these emails and I intend to continue to try and develop more spot and term business for your desk.

Dave

Subject: Sumas cash trade

Dave,

I just wanted to touch base with you on the cash trade that you intermediated between Stephane and Cascade this morning. I don't really feel that it is Stephane's responsibility to manage Cascade's price risk and I think that you are out of line for accusing him of running over your customer. If you would like we could look at doing an MSA with Cascade where by we could sell them gas at Sumas DI.

Chris

=09 =09 Dear Randy, Solar and wind power have long been used as renewable sources of energy. On Wednesday, we'll have a report on an interesting alternative to these renewables. ENL's Gale Smith will tell us about a Louisiana company that is using rice hulls to produce electricity. Catch Gale's report from Houston tomorrow. The Enron/Dynegy negotiations continue and Gale tells me the Houston bureau is keeping close tabs on all developments. Standard & Poor's Ratings Services' David Hitchcock will talk to ENL's Kym McNicholas Wednesday about California's current credit rating. The state is set to issue a proposed \$12.5 billion in revenue bonds and Hitchcock will discuss whether renegotiating California's long-term power contracts could delay the process. Kym will also speak with the Executive Director of the California Natural Gas Producers Association John Martini. He'll address the unspecified threats to U.S. pipelines. Watch for those details from the West Coast bureau on Wednesday. We'll have an interview from the Chicago Mercantile Exchange on Wednesday. Alaron Trading Vice President Phil Flynn will join us to discuss the API and DOE numbers and tell us what's going on with the brewing OPEC price war. We'll hear from Flynn during the noon ET newscast tomorrow. Closing Prices for Tuesday, Nov. 27, 2001 Crude: \$19.48 +\$0.79 Unleaded: \$0.5381 +\$0.0164 Heating Oil: \$0.5394 +\$0.0177 Natural Gas: \$2.606 -\$0.09 We'll have live coverage from Anchorage, Alaska on Thursday. Houston Correspondent Kim Benestante is covering "Alaska Resources 2002: Can Alaska Compete?" Catch reports from Anchorage on Thursday. Also on Thursday, ENL's Gale Smith will attend the Arctic Gas Symposium in Houston. The symposium will address supplying the North American market and bring us a pipeline route update, among other topics. Keep in mind things are subject to change at a moment's notice. Occasionally guests have to cancel or change time slots. We'll continue to do our best to keep you updated on future interviews and events. Be sure to watch our newscasts every business day - 9 a.m. to 5 p.m. ET, at the top of each hour. =09 =09=09=09=09

Lance,

I could not open the attachment.
I concur with Vasant. We always face a challenge with summer interns: we don't want to expose them to too much information. We typically look for a self-contained project and limit intern's access to additional information.

Vince

Subject: RE: Potential Candidate, Summer Intern

Hi Lance,

he looks very good. How would you plan on using him? My only concern about using a summer intern would be that I would not want him to learn all about Enron's operations in power trading and then go work somewhere else. But if you think we can use him in a more generic manner where you give him specialized projects and you yourself deal directly with the traders, then that may be a possibility. If you agree, let us check with Vince and then interview him.

Vasant

Vasant,

Attached is a resume for a candidate that might serve temporarily through the summer. Maybe this could be a stop gap measure until we can locate a full time person. I would anticipate him working as a summer intern.

Lance

Hi!

Thank you very much for your help.
Here is my resume.
Please let me know what should I do next as soon as possible.
Becasue I have several interview plans with other companies.
But I would like to work at Enron most.
So if I can get the job at Enron, I don't want to
hang around others.

Thank you again.

I know that it's in the IT department and that's it :o)

Everything is going okay, thanks so much for asking. It is definitely a lot
of work, one thing after another. I'm glad to know that Jordan is excited
:o).

We love going to good 'ole' Chuckie, you see I said we because I LOVE their
pizza. The children really have a good time there too plus it wears them
out!

I ain't mad at the little boys Kenneth Coles because I sure do love their
shoes..... ha! I know that moma Thurston don't play that nonsense when it
comes down to service. People are just getting besides themselves these
days. I almost went off in Olive Garden yesterday because of poor
management service but my girlfriend didn't want me too. I am so mad at for
wanting to SET IT OFF, you are too kicks (Louisiana talk o:))

My weekend was okay. I picked up some cake tasters that this one bakery we
have in mind baked for us. They gave us 4 samples, I chose Italian Creme,

Carrot Cake, Amoretto White and Mark chose a Chocolate Fudge and they were good except for I don't eat chocolate cake. I pick up another sample cake on tomorrow and then one more probably this weekend. Saturday I was with Danny most of the day and that was it.

Girl, what is PMO? I'm doing fine, I just sent Tarsha an e-mail, and I hit the send button and there you are! Is everything going as planned in all of your wedding preparations? I certainly hope so. I know planning a wedding is alot of work. Jordan is still excited about walking with Taylor.

I had a good time with my boys this weekend. They are crazy. We went to the dreaded "Chuckee Cheese" this weekend and oh boy, was I ever glad to get out of there. After that, we went to the Galleria, because when I was there before without them, I saw a shoe store that had really cute, fashionable shoes for little boys. What I didn't realize was that they were designer shoes. Who ever heard of Kenneth Cole shoes for little boys. \$65 a pair for the kind that I liked. But since I was there, I said, what the heck? After about 20 minutes, we had been waited on, but still neither one of my boys had even tried on a pair of shoes yet, let alone buying a pair (the sales folks were truly taking their sweet time). I was pissed and me and my possee (Jordan and Kendall) almost "set if off" at the Galleria. We just left after I told them that their service was unacceptable. Anyway, don't mess with Moma Thurston.

How was your weekend?

See ya!

Enron employees not participating in contract parking are eligible to receive Metro Bus Passes or Woodlands Express Passes. You may pick up a bus pass from the Parking & Transportation Desk, on Level 3 of the Enron Building, from 8:30 AM to 4:30 PM.

All Metro passes offered through the Enron Parking & Transportation desk will be the Metro 30 Day Zone Pass. When you use a 30-day zone pass, bus service is divided into four zones w/ unlimited rides. The zone pass is time activated, which means that it will not become active until the first time it is used and will not expire until 30 days after it was used for the first time. New passes will be available to Enron employees upon expiration of the 30 day time period. Each zone does have a different fare values based on the distance the bus travels. This is important to any buser who wants to transfer to or travel in a higher-cost zone than the zone pass they have, in this case the difference must be paid in cash. If they are traveling in a lower cost zone, then there is no extra cost.

Parking & Transportation Desk
3-7060

Subject: Page 1

Swerzbin & Motley agreement proposed modifications:

Page 1, first paragraph, last sentence, CHANGE: ? , for any reason, either the employee or the Company in their discretion. ?
Yes

Section 1. c., CHANGE: On or within five business days from the date ?.
d., CHANGE: On or within five business days from the date ?.
Yes

Page 2. & 3, Section 8, ADD: Except for disclosures required by law, to my attorney and C.P.A., and if the information is readily known to the public (such as customers, investors, etc.).
Yes

Page 3, section 9., ADD: If terminated without cause, the non-competition obligations will not be in effect.
No - 90 day noncompete if terminated without cause. Still receive cash payments.
Don't receive equity.

INSERT or CHANGE: Scope of the non-competition obligations cover and are limited to Western U.S. power trading.
No

Page 4, section 10., first sentence, INSERT: ? under this Agreement, provided the employee is not terminated without cause, you will not ?
No

Section 11., CHANGE first sentence to: For a period of 12 months following the commencement , providing the employee is not terminated without cause, you will not ?.

No

Section: 12.0

ADD: Company agrees to give employee 30 days written notice for termination of employment without cause.

No

Section: 16.0

REPLACE: "and you shall not be entitled to further salary or bonus compensation from such Enron entity as of that date"

WITH: "and you shall not be entitled to further salary, except accrued, or bonus compensation from such Enron entity as of that date"

No

Exhibit I:

ADD: If employee is terminated without cause, the sign-on award shall be deemed fully vested and non-forfeitable.

No

Miscellaneous:

We need a written statement from Enron releasing employee from ALL obligations under preexisting contracts including but not limited to non-competition agreements as well as any claims against retention or performance bonuses.

Sortof - Enron will not indemnify you against clawback via bankruptcy for Retention payments or Deferred Compensation. You can make your employment with UBS conditional upon Enron involuntarily terminating you. Involuntary termination does not trigger the payback of contractual payments or retention payments.

Location: ADD: Company cannot relocate the employee outside of Portland, OR during the term of this agreement without consent of employee.

Yes

ADD TO AGREEMENT:

You will receive service credit for vesting, vacation, and any other benefits contingent on length of service based on Enron in-service date. (October 1989 for Swerzbin, March 1999 for Motley) or similar wording

Yes

Subject: Credit Derivatives Issue

You should be aware that an issue is currently under extensive debate in the credit derivative area resulting from the insolvency of Railtrack in the UK. ISDA has been asked by some participants in the market to make a statement regarding a provision of its Credit Derivatives Definitions. Others are either still considering their position or would prefer that ISDA not issue a statement.

Specifically, the discussion relates to the deliverability of convertible bonds of Railtrack. There is no dispute that a Credit Event occurred. What is in dispute is whether the bonds satisfy the definition of "Not Contingent" under the Definitions, which is a characteristic typically required of deliverable obligations. This characteristic requires that the payment or repayment of principal on the bonds not be subject to a contingency. The bonds are convertible into equity of Railtrack at the option of the holder or, in certain limited circumstances, at the option of the trustee for the bondholder. The provision for the trustee to exercise the conversion (sometimes referred to as a "widows and orphans" clause) is a standard clause in bonds issued in England and is intended to protect bondholders who may have inadvertently failed to exercise their conversion right when it would be clearly beneficial economically for them to do so. In the case of Railtrack, conversion would not have been economically beneficial at any time recently, but nevertheless the right of the trustee to convert exists.

A draft statement has been prepared for consideration by the Credit Derivatives Market Practice Committee, which I have attached for your review. The statement refers to two documents that are in draft form, the User's Guide to the Definitions (which is scheduled to be published

in the
next week or two) and a Supplement currently under consideration by
the
"group of six" subgroup of the Committee. In each of these documents,
we
suggest that "plain vanilla" convertible bonds should satisfy the
"Not
Contingent" characteristic and should, therefore, be deliverable.
"Plain
vanilla" convertible bonds for this purpose include bonds where
conversion
is at the option of the holder of the trustee.

A meeting of a number of dealers based in London (not an ISDA
meeting) is
scheduled for Tuesday. It is not likely that we will publish anything
prior
to that meeting.

I would appreciate your views on whether we should issue any
statement
regarding this situation. We are continuing to poll members for their
views
on whether this type of market statement would be appropriate. We are
also
discussing with Allen & Overy and with Clifford Chance and Linklaters
how we
might achieve a legal basis for making the statement. Please share
your
views with the other addressees of this email, as they are
coordinating the
views of members.

Bob

With Ken Lay's resignation, you undoubtedly have questions about Enron's managem
ent structure and what lies ahead for the company. The purpose of this communic
ation is to begin to answer those questions and lay out the direction we plan to
follow as we regroup and rebuild.

First, the Creditors Committee has proposed that the Board of Directors retain a
n interim CEO to focus on the restructuring process. This is a positive sign th
at the Committee believes Enron will provide greater value as a viable ongoing b

usiness.

The Enron Board of Directors has approved Stephen Cooper as interim CEO and chief restructuring officer. Steve is the managing partner of Zolfo Cooper, a corporate recovery and crisis management firm with more than 30 years experience leading companies through operational and financial reorganizations.

Steve and his firm will work with members of Enron's current management to develop and implement a comprehensive plan to restructure the company and emerge from bankruptcy.

As you know, Enron has entered into an agreement with UBS Warburg for the sale of NetCo, Enron's wholesale gas and power trading organization. In preparation for the transition of NetCo to UBS, Greg Whalley has resigned as president and COO of Enron to assume a position with UBS Warburg. We want to thank Greg and the NetCo employees joining UBS for their contributions to Enron and wish them great success going forward.

In addition to engaging Steve, Enron has formed an Office of the Chief Executive. I will join Steve in that office as president and chief operating officer, and Ray Bowen will join us as executive vice president and chief financial officer.

We will provide additional information regarding the roles and responsibilities of Enron's entire management team once those become more fully defined.

Thank you for continuing to support Enron by performing your job everyday. The ongoing uncertainty about our future, coupled with the constant media scrutiny, makes this situation difficult for all of us. While no one can control the media, we can and will define our leadership and devise our strategy for moving ahead. And in doing so, we will build a more certain future for our company and our employees.

Rick:

It's been a long time and things are coming to their logical end. I thought I would briefly update you on developments here. We are all eagerly awaiting the 19th of November when in all likelihood we would be serving the Termination Notice (TN) to the state government. Thereafter the assets would be transferred to the State Utility and we would want to proceed to London for international arbitration. There may be a few hurdles in the sense that we already have some cases lined

against us in various Indian courts. Its not clear if we can proceed as smoothly as the way I have described in the initial lines.

We had an all employee meeting , a few days back, and Wade informed us of the recent developments. Post that he did indicate in no uncertain terms the future of all the employees here. Give and take I expect that our services here would be required at max till the time the TN is served, post that our contracts could be severed. Some relocations and some severances have already started and its a matter of time before my turn arrives.

I would like to explore possible future employment opportunities under you, in Houston. It would give me immense pleasure if I could in any way continue to contribute to the activities of the division.

Any advice from you would boost my morale

Warm Regards
Ban

Vince,

According to the attached schedule, we should begin allocating costs in July to the ETS Revenue Management group for Capital Project Work. In addition, no allocations have been made in 2001 to Dan McCarty's group. Have any agreements been reached as to the amount of these allocations and where they will be charged?

Also, no allocations have been made for John Goodpasture's group, pending the creation of a new cost center. Kim, can you tell me where this should be charged yet?

Thanks,
Diane Fellers

Date: Thursday, February 7th , 2002

Location: ECS 06980

Orientation will be split into two sessions and divided by alpha-order. Sessions will run 10am-12 pm and 2pm- 4 pm.

We encourage all of you to attend your designated session as valuable information will be presented, and you will have the opportunity to get answers to your questions.

You can speed things up tomorrow by filing in the attached forms - alternatively you can complete them there

10am Session Letters A- K

2pm Session Letters L-Z

PLEASE RSVP (BY REPLYING TO THIS E-MAIL) - IF YOU HAVEN'T DONE SO ALREADY

Hello Everyone,

We had a few upsets this week, with some games missed by quite a few people. No one correctly picked Georgia defeating #7 Tennessee. Oklahoma/TX game was mixed, many people missed Ohio St. beating Northwestern and the only non-top 25 game was mixed, with many people taking Southern Miss, as Memphis won 22-17. In the pros, many people picked Atlanta over the Bears incorrectly, San Diego over Cleveland was missed by most people

, Arizona upsetting the Eagles was not good for just about everyone, Seattle beating Jacksonville was not picked by most people and Tampa Bay defeating Green Bay was also missed by most. Through all that, Joe Step did only get 5 incorrect picks and has won this weeks pool already. I came close with 6 wrong, but we both have St. Louis tonight. We had 33 entries this week, the most we've ever had, even back to last season, good job!! Therefore Joe won \$66. Below is each person with the number of games they missed this week.

Andy

Joe Step	5
Andy Pace	6
Paul Broderick	7
Rick Broussard	7
Todd DeCook	7
Paul Thomas	7
Reagan Mathews	8
Kayne Coulter	8
Gautam Gupta	8
Russell Ballato	8

This is top exposure by Counterparty and an Enron entity level. This does not take into account OTM positions with affiliates. Be aware the data is a direct download from the risk systems and has not been checked for accuracy.

We are still scrubbing the data for assignment opportunities to reduce margin positions. We will brief you sometime tomorrow.

Bill

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.

We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6 1:00 - 2:00 PM EB572

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6 2:30 - 4:00 PM EB572

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.

We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560
November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928 .

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

We are still getting to enjoy sunshine, but there's a very cool wind.
Yesterday was the anniversary of when we met...6 years ago! Seems longer.
We dined at A?mann's, of course..our favorite place.

London was great! I took my Goretex jacket and it rained about every 15 mins or so most everyday, but it wasn't too cold so that was no problem. We were shocked at how expensive all the tourist stuff was...30 DM per person to go to the Aquarium! Everything was like that, but we did all that we had time for. The riots on May 1st made us detour a little bit, so that we didn't get to see the Crown Jewels, next time we will make that 1st on the list. We really enjoyed the parks, the pubs and Heather's company. But we aren't city people, we where ready to get out of the hustle and bustle and come home to our boring little lives. I loved the fish and chips that we got at The Bag of Nails Pub, other than Pubs we mostly ate italian. It was cool seeing the Windsor Castle and all the old stuff. Heather has a nice flat, with a great location, right by Buckingham palace. She's having a blast there! I would like to see the countryside next time.

Yeah, it's going to be awhile before you are more than "just ok". I am very sorry. It's good that you are keeping busy.

so what are you going to do about your job? I can honestly say I am happier in this job than I've ever been...but the boss can be a little difficult sometimes!!!

Gotta go for lunch! Write me!

Applied Finance - May 31-June 1, 2001
in EB552 Cost: \$700.00

The objective of this program is not to teach you how to do a deal, but rather, to give you a better understanding of how basic financial principals contribute to the structure of a deal. It will also provide you with insight to Enron deals in order that you can make a contribution to the work that goes into putting one together.

When you leave the program, you will have:

R An understanding of basic financial and accounting issues relevant to Enron's transactions.
R A basic understanding of how Enron structures deals - the "deal space" and how the financial principals discussed relate to Enron deals.
R The ability to take the financial principals and apply them to an Enron deal.

Please login and enroll through the InvestInMe website, <http://www.corptraining.com/index.cfm?company=enron>. If you have any questions, please call 713 853-0357.

Ken Lay announced today that he has resigned from Enron's Board of Directors. His resignation is effective immediately.

In a press release, Ken said, "I want to see Enron survive and successfully emerge from reorganization. Due to the multiple inquiries and investigations, some of which are focused on me personally, I believe that my involvement has become a distraction to achieving this goal."

He added, "My concern is for current and former Enron employees and other stakeholders, and I feel that it is in their best interest for me to step down from the Board."

Harassment Avoidance Training

To contribute our personal best at Enron, our conduct must promote respectful and co-operative work relationships. Workplace harassment conflicts with Enron's vision and values and violates Company policy. Harassment also can violate federal and state laws. By understanding what harassment is and its potential harm, we can prevent it in our workplace.

During this training you will:
Be able to recognize harassment
Learn to take precautions against being harassed
Learn to avoid being considered a harasser
Know how to address a situation involving harassment
Learn how harassment prevention is consistent with Enron Values

Go to <<http://elm.enron.com>> to sign up for the session of your choice. Harassment Avoidance is listed in the Compliance Category. If you have problems registering or have any questions, please call 713-853-0357.

The date and times available for sessions are:

Day	Date	Session I	Session II	Session III
Wednesday	Sept 19	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Wednesday	Sept 26	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Tuesday	Oct 2	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Wednesday	Oct 3	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45
Thursday	Oct 4	1:30 - 2:45	3:00 - 4:15	4:30 - 5:45

All training sessions will be held in the LaSalle Room at the Double Tree hotel.
There is a \$50 charge for each enrollee/attendee in the training session.

This training is mandatory for all Enron employees. However, those who have already attended the Enron harassment avoidance training will be offered a refresher course at a later date.

\$29 a day in: Lafayette, LA (LFT)
\$21 a day in: Mobile, AL (MOB)
\$29 a day in: Newark, NJ (EWR)
\$23 a day in: Richmond, VA (RIC)

To receive continental.com Specials discounted rates, simply make your reservations in advance and be sure to request Product Code COOLUS. To make your reservation, contact National at 1-800-CAR-RENT (1-800-227-7368), or book your reservation online at:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*rohslmQLJmELgkhgEJht*z*CA

Please enter COOLUS in the Product Rate Code field, and 5037126 in the Contract ID field to ensure you get these rates on these dates.

* If you are traveling to a city or a different date that is not listed, National offers great rates when you book online at:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*rohslmQLJmELgkhgEJht*z*DA

For complete details on these offers, please refer to National's terms and conditions below.

CONTINENTAL.COM SPECIALS RULES:

Fares include a \$37.20 fuel surcharge. Passenger Facility Charges, up to \$18 depending on routing, are not included. Up to \$2.75 per segment federal excise tax, as applicable, is not included. Applicable International and or Canadian taxes and fees up to \$108, varying by destination, are not included and may vary slightly depending on currency exchange rate at the time of purchase. For a complete listing of rules please visit:

http://continentalairlines.rsc01.net/servlet/cc4?JHEVAV*rohslmQLJmELgkhgEJht*z*VUA

ALAMO RENT A CAR'S TERMS AND CONDITIONS:

Taxes (including VLF taxes up to US\$1.89 per day in California and GST), other governmentally-authorized or imposed surcharges, license recoupment fees, fuel, additional driver fee, drop charges and optional items (such as CDW Waiver Savers (R) up to US\$18.99 a day,) are extra. Renter must meet standard age, driver and credit requirements. Rates higher for drivers under age 25. Concession recoupment fees may add up to 14% to the rental rate at some on-airport locations. Up to 10.75% may be added to the rental rate if you rent at an off-airport location and exit on our shuttle bus. Weekly rates require a 5-day minimum rental or daily rates apply. For weekend rates, the vehicle must be picked up after 9 a.m. on Thursday and returned before midnight on Monday or higher daily rates apply. 24-hour advance reservation required. May not be combined with other discounts. Availability is limited. All vehicles must be returned to the country of origin. Offer not valid in San Jose, CA.

NATIONAL CAR RENTAL TERMS AND CONDITIONS:

Customer must provide Contract ID# at the time of reservation to be eligible for discounts. Offer valid at participating National locations in the US and Canada. Minimum rental age is 25. This offer is not valid with any other special discount or promotion. Standard rental qualifications apply. Subject to availability and blackout dates. Advance reservations required. Geographic driving restrictions may apply.

Here's set of any master agreements I need ASAP.

I didn't mention it on the earlier ones, but for all of these, if any of the agreements have been amended, I will need any amendments, as well as any guarantees. Much thanks!

Tana -

We need to pull together all of the contracts with the following:

Amerada Hess Corporation
Hess Energy Services Company, LLC

Hess Energy Trading Company (UK) Limited
Hess Energy Trading Company LLC

We need to pull together a Master Netting agreement with them ASAP. Please call me (53923) with any questions.

Thanks,

JRW

FYI

While I have been periodically giving updates on the above max rate capacity release activity, I was surprised by the magnitude of the PG&E value above max. rates. For the 12 months ended 9/30/01 we had net cash payments to PG&E. (approx \$18 million revenues to Cal. + \$5.6 revenue on San Juan - \$28 million in above max rate capacity release activity = (\$4.4) million

Folks,

Here's the long awaited settlements chart.

I'm not assuming any credit risk.

As you are aware, there have recently been a number of virus attacks released and spread across the Internet. Although Enron continually readdresses and updates its virus protection procedures, new viruses will continue to be released and pose a threat to Enron's computing environment. Therefore, it is very important that all Enron employees understand their responsibilities in helping Enron stay virus free.

If you receive a file via Email or any other means and you are unfamiliar with the sender or the purpose of the file, please do not automatically open/launch the file. One of the key elements of a virus attack is the innocent nature of its delivery.

Viruses can cause a significant amount of damage, including data loss and service outage. Viruses such as the Melissa, ILOVEYOU, AnnaKournikova, and the recent Nimda virus, caused organizations billions of dollars. Sometimes new viruses can breach the environment before the virus scanning software has been updated to detect & quarantine them.

Every employee in the Enron organization has a responsibility to keep our computing environment virus-free.

If you believe you have a file that looks suspicious, delete it or contact your Resolution Center to obtain their assistance.

Attached is an announcement about The Periwinkle Foundation Board Retreat.

We will have dinner and the first meeting Friday, June 7, 2002 at 6:30 p.m. at The Houstonian Hotel. The Houstonian is at 111 N. Post Oak Lane, 77024.

We will have the second meeting Saturday, June 8, 2002 from 9 a.m. to 3:30 p.m. at the Ronald McDonald House. The Ronald McDonald House is at 1907 Holcombe Blvd, 77030.

Your attendance is very, very important as we will be planning our road map for the next several years.

Please reply to this email and let us know if you will attend one or both meetings.

Thank you for all you do!

Kelley

Today, Enron hosted a conference call to give investors a current overview = of the company. Here's an update of what we discussed during the call.

We told investors that we're doing everything we can to protect their inter= ests and to regain their confidence. Our focus remains on our credit qualiti= y, balance sheet and liquidity, which are essential for our continued succe= ss and expansion of our wholesale businesses.

It took more than a few weeks to get where we are today. Here's a snapshot = of significant events that led to our current situation:

-- In hindsight, we definitely made some very bad investments in our non-co= re businesses over the past several years. Those include investments in Azu= rix, India and Brazil. They have performed far worse than we could have eve= r imagined when we made these investments;

-- Because of these bad investments, we've become over-leveraged as a compa= ny. The negative impact of those investments was exacerbated through the ex= tensive use of debt capital both on and off our balance sheet;

-- We also entered into related party transactions that led to a loss of in= vestor confidence, which has been very damaging;

-- We've been criticized for our lack of transparency and our hard-to-under= stand financial and operating disclosures; and

-- On top of it all, we discovered errors in our financial statements, as d= iscussed in our 8-K filing last week, that required a restatement of previo= usly reported earnings.

We've taken a new look at our businesses and have separated them into three= areas: core businesses, non-core businesses, and businesses under review.

Core Businesses

Our core businesses remain strong and consistent sources of significant ear= nings and cash flows for the company. They're our competitive advantage. Th= ese include:

-- Natural gas pipeline businesses;

-- Gas and power businesses in North America and Europe;

- Retail businesses in North America and Europe; and
- Coal businesses in North America and Europe.

The events of the past few weeks have had a temporary negative impact on our projected fourth quarter profitability. It's too early to tell at this time what impact this might have on our operating results. We are considering these actions now so that we can quickly return to normal business in 2002.

I also remain optimistic that the actions we've taken over the past couple of weeks have addressed our customer and counterparty credit and liquidity concerns. According to our business unit leaders, we have definitely seen improvement in our counterparty relationships.

Non-Core Businesses

Our non-core businesses include our global assets group and our broadband division. We have invested more than \$8 billion in these businesses, and the return from them has been dismal.

We have an aggressive program in place to exit these businesses and expect that the sale of these businesses will generate billions of dollars in cash that we can use to repay debt and reinvest in our core businesses. We already have more than \$800 million in assets contracted for sale this year. They include CEG Rio, a gas LDC in Brazil; EcoElectrica, a power plant and LNG receiving terminal in Puerto Rico; and asset sales of offshore oil and gas properties in India. The approximately \$2.9 billion Portland General sale is also on target to close in late 2002 pending regulatory approvals.

Businesses Under Review

These businesses are comprised of those operations outside our power and gas wholesale businesses and include global and industrial markets. While several of these businesses have very strong future prospects, we need to determine if their capital requirements and near-term growth prospects are sufficient enough in terms of earnings and cash generation.

Reviewing our businesses this way will help determine where we need to make reductions to our work force. More information will follow as soon as it becomes available.

Credit Rating/10-Q Filing

We continue to meet regularly with credit rating agencies and believe that our liquidity enhancements and scheduled asset sales will strengthen our balance sheet and maintain our investment grade credit rating. Our current credit ratings by the three major rating agencies are as follows:

- Moody's at Baa3 "Under Review for Further Downgrade"
- Fitch at BBB- "Evolving Status"
- S&P at BBB- "CreditWatch Negative"

We also discussed our existing financial vehicles, including Osprey, Marlin and Yosemite, in further detail. We told investors that we will file our 10-Q five days late due to our current activities. It will be filed on Nov. 19.

We will continue to have updates with investors over the coming weeks as we

ll as our frequent updates with you. The full transcript of our conference = call will be filed with the Securities and Exchange Commission in the next = few days. It will also be posted on our web site at www.enron.com/corp/investors under "SEC Filings."

=20

=20

In connection with the proposed transactions, Dynegy and Enron will file a = joint proxy statement/prospectus with the Securities and Exchange Commissio= n. Investors and security holders are urged to carefully read the joint pro= xy statement/prospectus regarding the proposed transactions when it becomes= available, because it will contain important information. Investors and se= curity holders may obtain a free copy of the joint proxy statement/prospect= us (when it is available) and other documents containing information about = Dynegy and Enron, without charge, at the SEC's web site at www.sec.gov. Cop= ies of the joint proxy statement/prospectus and the SEC filings that will b= e incorporated by reference in the joint proxy statement/prospectus may als= o be obtained for free by directing a request to either: Investor Relations= , Dynegy Inc., 1000 Louisiana, Suite 5800, Houston, TX 77002, Phone: (713) = 507-6466, Fax: (713) 767-6652; or Investor Relations, Enron Corp., Enron Bu= ilding, 1400 Smith Street, Houston, TX 77002, Phone: (713) 853-3956, Fax: (= 713) 646-3302.

In addition, the identity of the persons who, under SEC rules, may be consi= dered "participants in the solicitation" of Dynegy and Enron shareholders i= n connection with the proposed transactions, and any description of their d= irect or indirect interests, by security holdings or otherwise, are availab= le in an SEC filing under Schedule 14A made by each of Dynegy and Enron.

Subject: Credit Analyst (2)

Hello,

I am applying for the credit analyst position. See my resume below

Sincerely,
Monika Causholli

Monika Causholli
2240 North Boulevard #5205
Houston, Texas 77098

(713) 807-1039

mcausholli@hotmail.com

EDUCATION

BS in Financial Services/Business Administration, Oregon State
University, Corvallis, Oregon
Overall GPA 3.91/4.00. Minor: Political Science/International Affairs.

WORK EXPERIENCE

Financial Analyst/Researcher
America/Industrial Markets Enron North

Houston, TX 6/01- Present

- * Analyzed the financial condition of pulp and paper companies by carefully reading through their financial statements and drawing the conclusion of their financial health. Based on the results of the analysis, prepared company reports for the origination team.

- * Supported the team of originators and traders by gathering data on the pulp market, preparing presentations, doing analysis on the prices and other market variables. Wrote a weekly newsletter with the most important information that included a market commentary. Built and completed the spreadsheets that contain all the market data for pulp. The spreadsheets helped the spot/financial traders to evaluate market conditions and make trading decisions.

Real Time Trader/Analyst
America Enron North

Portland, Oregon 6/00-6/01

- * Researched the variables that affect the hourly electricity market including temperatures, planned and forced outages of generating units, loads and CISO expost prices resulting in an informed opinion about that day's trading options.

- * Looked for opportunities to create value based on the research. Raised up to \$100,000 a day by following the market closely, taking advantage of the arbitrage opportunities between the different markets, and making use of transmission available to send power to various points.

- * Ran the El Paso Electric Utility during the off peak hours and weekends by matching the load (demand) with the supply and

making the necessary decisions to run the system reliably by following the WSCC requirements on spin and nonspin requirements.

Capital & Trade Summer Intern Enron
Analyst Program Portland, Oregon
6/99-9/99

* Researched and graphed the historical temperatures for the Pacific Northwest, the Desert Southwest, and Rocky mountain and tried to find the correlation between the temperatures and energy load (demand).

* Co-designed the load-forecasting model for the Pacific Northwest, Desert Southwest and Rocky Mountains in a course of three months.

* Compiled the daily information for the term and cash traders including the historical temperatures graphs for California, daily forecasted load, and gas prices.

Financial Analyst Edicom sh.p.k.
Assistant Tirana, Albania
6/98-9/98

* Calculated revenues, expenses, interest payments and cash flows for over ten investment projects including apartment buildings and a business center.

* Translated business letters including memos and proposals from Italian/Albanian to English.

COMPUTER SKILLS

Software: Proficient in MS Word, PowerPoint, and Excel

FOREIGN LANGUAGES

Albanian Native Fluency
Italian Near-Native Fluency

MAIN STRENGTHS: Good analytical skills, detail oriented, a hard-worker, ambitious, a fast-learner, good writing skills, enthusiastic.

The Pipeline Safety department would like you to visit our new website at <http://www.ets.enron.com/pipelinesafety/> and subscribe to receive email notifications of new or updated material posted on the Pipeline Safety website. When any new or updated Operating Procedures, Engineering Standards, PHD Reports, Audit information etc. are added to the Pipeline Safety homepage, an email will be sent to those persons who have registered. Simply click on the link provided in the blue box on the Pipeline Safety page, then enter your email address, full name and press submit. Any individual who registers before Nov. 1 will be eligible to win one of ten prizes, courtesy of the Pipeline Safety department. If a team email is used for a subscription that is a winner, the person's full name that is used for the registration will claim the prize.

If you have any problems accessing the Pipeline Safety website or have questions about the subscription process, please contact Jami Horton at 713-646-7386 or via email at jami.horton@tcpolice.org <<mailto:jami.horton@tcpolice.org>>.

ISAS Members and Interested Parties,

Last week, Raymond Vojdani raised some very valid concerns about the E-Tag 1.7 Specification. SRP found some time to research these issues. Our comments are attached.

Raymond,
Thanks for bringing these issues to the WSCC's attention.

-----Original Message-----

From: RAYMOND VOJDANI [mailto:AVOJDANI@wapa.gov]
Sent: Monday, January 28, 2002 5:54 PM
To: Interchange Scheduling & Accounting Subcommittee (ISAS)
Subject: Re: E-Tag 1.7 Test Procedure

Hi Steve,

As we approach the impending implementation of E-Tag 1.7, we have begun reviewing and studying the new features of the Tag Services interface as explained at the NERC Workshops and as developed by our vendor, OATI. The implementation of the E-Tag 1.7 Specifications has raised some questions.

1. On the section of the tag where the PSE creates the Physical Path for the transaction, there are required fields for the Generating Control Area, the Load Control Area, and the intermediate Transmission Providers. There is not a requirement to document the intermediate Control Areas (there is a location to include them as Scheduling Entities, but those fields are optional). This would seem to be a significant obstacle to providing all Control Areas the information they need to perform hourly schedule checks with their neighboring Control Areas. Also, in WSCC, where certain Control Areas are responsible for managing constrained paths, this would be an obstacle in determining scheduled flows across the constrained paths. It is possible (even likely) to create tags where the Control Area would not see the tag, because the transmission used is owned by Transmission Providers other than the Control Area. Was it the intent of the NERC E-Tag 1.7 Specification to remove intermediate Control Areas from visibility and approval of the tags?

2. Once an E-Tag has been approved, and has achieved the Implement state, it appears to have immortality. Even when the 'final hour' of the current version of the tag has passed, the tag does not appear to be inactive; it is available for the creating PSE to access and extend by an Adjust request. This feature could potentially bog our system down with numerous tags that are presently 'inactive' but always available for adjusting. Did the NERC specifications intend for an Implemented tag to eventually become 'inactive' and unavailable for adjustment?

3. A related concern to tag Adjustment Requests; under E-Tag 1.7, a PSE may now create a tag and accomplish ongoing scheduling through the Extension of the tag by adjusting (oh, boy, account number scheduling has returned). At the NERC E-Tag 1.7 Training Workshop, the Timing Requirement for Profile Changes, WSCC, is 15 minutes to evaluate any early notice. This could be a significant business change; the PSE can accomplish preschedule functions by requesting tag extensions (15 minutes evaluation time) rather than creating new tags (3 hour evaluation time). The clear distinction between Next Day schedules and Real Time schedules is being lost. Perhaps the evaluation time of an

any Profile Change Request could be linked directly to the impact time of that change request, similar to the timing requirements for submission and evaluation of New Tag Requests.

Considering the above shortcomings, especially item #1, it is impossible for us to move toward implementation of E-Tag 1.7, for, we will not be able to check out the net interchange with our neighboring control areas or be able to manage the constrained paths in our control area. Please give me a call should you have any question or if you want to discuss this further. Thanks.

Raymond

ISAS Members,

Attached is a draft test procedure for E-Tag 1.7. It was created and approved by a small "swat team" of ISAS members and WSCC Staff. Please review this draft procedure and provide any comments you may have by 1200 MST Tuesday, January 29, 2002.

Thanks.

Sent by: EES Distribution
To: All EES
CC:
Subject: EES Summer Series

The Brown Bags have experienced a successful Winter/Spring run and are taking a well-deserved summer vacation. While the Brown Bags are away, Janet Dietrich, EES's President, would like to present:

The Summer Series will include weekly presentations from subject matter experts within Enron designed to broaden the scope of knowledge about different Enron businesses. EES employees will have the opportunity to learn first hand about subjects such as the US Power Market, the US Gas Market, RAC, Weather Derivatives, Broadband Connectivity, Distributed Generation, DSM, Load Acquisition and Sourcing & Supply from the experts themselves.

The Summer Series premieres on June 13 with the following scheduled presentations:

June 13 - The US Power Market with Rogers Herndon
June 20 - The US Gas Market with Hunter Shively and Chris Gaskill
June 27 - Risk Assessment and Controls with Rick Buy

Presentations will be held each Wednesday in Room 5C2 from 11:30 a.m. to 1:00 p.m. Lunches will be provided. Attendance is by RSVP only. Click [here](#) to RSVP for the series premier.

All,
In the future, please refrain from parking in the area on the west side of the building when working at or visiting the Austin Facility. This area is reserved for General Motors. It is easily identified. The lot has blue striping and is marked "GM Parking Only". In most cases, there is ample parking in the front, rear and on the east side of the building. In the rare instance that parking is unavailable, please check in at the security desk and you will be directed to an overflow parking area.

Thank you for your cooperation.

Cathy, I want to recap our conversation yesterday because, after I thought about it, I still do not understand the issue with 20Q and its PRM:

A credit reserve was set up for bad debts for \$5,577,900 and credited to account 25100300 Prudency Reserve. It is my understanding that this was the only way to book this transaction. But I do not understand why this was booked in a PRM account and not booked to the Allowance for Bad Debts account. Also, when I reduce the 25100300 account balance by the \$5,577,900 that was booked there, my difference doubles to \$11,155,800 (see attached spreadsheet). So was account 25100300 originally credited or debited by the \$5,577,900? If it was originally debited and I remove that debit, then the PRM will roll. Also, will there be anyway to move this transaction out of the PRM accounts in order to effectively roll these accounts every month?

Thanks for your help.
Chad

Randy,
Brian asked me to e-mail you and let you know that he and Tracy left this morning for Russia to pick up one year old Jack, our wonderful, new grandson. He tried to call you but said he must have had the wrong number.
Jeff Frommelt

Enron Benefit Plans Summary Annual Report

The basic financial and insurance information on the back of this page, as well as the material below, provide a Summary Annual Report for the Enron Benefit Plans. The annual report for each plan has been filed with the Internal Revenue Service, as required by the Employee Retirement Income Security Act of 1974 (ERISA).

NOTE: You may receive a report for a benefit plan in which you are not a participant or under which you are not entitled. Entitlement to benefits under any of the plans is based on the provisions of each plan.

Your Rights to Additional Information

You have the right to receive, upon request, a copy of the full annual report, or any part thereof, for any plan. For insured plans, insurance information (including any sales commissions paid by insurance carriers) is shown in the annual reports.

To obtain a copy of the full annual report, or any part thereof, for any plan, write or call:

Enron Corp Shareholder Relations
1400 Smith Street
Houston, TX 77002-7311

(713) 853-6161

You also have the right to receive from the plan administrator, on request and at no charge, a statement of the assets and liabilities of the plan and accompanying notes, or a statement of income and expenses of the plan and accompanying notes, or both. If you request a copy of the full annual report from the plan administrator, these two statements and accompanying notes will be included as part of that report.

You also have the legally protected right to examine the annual report at the main office of the plan (Enron Corp., 1400 Smith Street, Houston, TX 77002-7311) and at the U.S. Department of Labor in Washington, D.C., or to obtain a copy from the U.S. Department of Labor upon payment of copying costs. Requests to the Department should be addressed to: Public Disclosure Room, N-5638, Pension and Welfare Benefits Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Jeff,

I spoke with Jay briefly about the potential of archiving all physical deals every night into a separate database instead of deleting them. We currently are capturing that information in our database, but the feed Jay has is more extensive and reliable. We'd then be able to build some historical queries and facilitate some of the requests we have for this data, I don't anticipate it would take much time to do this.

You have any objections?

Thanks,

Dave

Everyone,

As we stated earlier, this particular virus that is on the internet is causing a lot of issues for Corporations. As a result, the companies who write anti-virus software are continuously updating their software. As of this morning, another update has been made available to us. This update does a better job of protecting your PC than the update we received last night.

At this time, it is extremely important that you again go through one of the procedures listed below to get the latest update.

1. Logout of the network and log back in or
2. Click on START>PROGRAMS>ACCESSORIES>Norton AntiVirus Corporate Edition and then click the Live Update button. This will pop up a screen where you will have to click the "Next" button and then a "Finish" button. - If you are an EES user, this option is not available to you. Please use option 1.

The proper version of the update pattern you need is: (9/18/2001, version 30918BL) - You may need to restart the Norton Anti-Virus client if you want to visually insure that you have the latest update.

If you have questions or concerns, please direct them to your Resolution Center.

Dear Stacey,

The R21, R22 curves for 2/5 have been copied over. However, there is no 2/6 curves for Estate, so those are not copied. The 2/6 Alberta Post IDs were calculated using Non-Exact curves.

Will the Estate Alberta curves be marked in the future?

Thanks,

Norman.

I agree. I think we should go for it. However, expect Brulte and Cox to push us for another 75K. Apparently that is what Reliant gave to the R's. This is probably the trip to Houston we were expecting back in August.

Subject: FW: [Fwd: Oct. 29 Lunch]

It seems that since we've already contributed, we're invited. Given where Davis' numbers have gone recently, Riordan's imminent announcement and potential, and the fact that the Rs have played it about as well as could be expected under the circumstances (save for Morrow, who we may want to bring up with Brulte if the lunch is attended, this could be a useful gathering. And it doesn't require crossing the border into California, to boot.

Best,
Jeff

Hi Steve and Bob, Happy New Year!!

Steve, based on our meeting in Houston, I met with our engineering and operations folks to discuss the possibility of putting together a new firm (or limited firm) Park N Ride storage service on the pipeline project. Everyone agreed it is likely doable under certain conditions not the least of which is FERC approval. The question I have for you is: how much volume and for how long a period?

For example, on any given day, assuming there is no Copper Eagle storage available, it will likely be easier to borrow (ride) gas off the system than to park gas on it. I think this was your greater concern.

In your ideal world, how much volume would you like to be able to pull off Sun Devil say if your MDQ was 100,000? Would you want an additional 25,000/day, more or less? and for how long? Also, how much would you want to Park on the system and for how long? For purposes of evaluation, assume the cost would be significantly less than a storage option.

If you give me some parameters, we will build a service offering that meets your needs as close as possible.

I will be out of the office on Friday 1/4 but look forward to hearing from you early next week.

Best Regards,
Kevin Hyatt

Hi Andrea,

Sorry it took so long to get this to you. Things are a little hectic as we pick up other people's tasks. I have been doing east desk fundamentals for about 6 months now, so if you have anymore data or analysis questions please ask, and I might be able to help out.

If you need anything more for the presentation such as other pipe flows, pricing data, etc. just call

Adam

How Did We Get Here?

Just like almost every other profession -- medicine, law, and politics included -- affiliate marketing has a checkered past. Worse, affiliate marketing seems to have a checkered present. Where's the problem -- and the solution? In corporate organizational structures.

<http://clickz.com/article/cz.4003.html>

Going Global With Internet Marketing

Global Internet marketing -- and the electronic commerce associated with it -- is predicted to escalate dramatically in the next several years. The possibilities are ever-so pleasing. Yet some barriers are all-too real. The good news is, they're surmountable.

<http://clickz.com/article/cz.4004.html>

Founded in 1997 and headquartered in Cambridge, MA, The ClickZ Network (<http://www.clickz.com/>) is a compendium of resources and advice for helping online marketers do their jobs more effectively. The Network culls the experiences of more than 70 contributors to deliver articles each week full of practical information about online marketing and e-commerce. ClickZ reaches more than 80,000 subscribers each business day through e-mail and the Web.

Then who is my strongest person? I do not know anything about Kristen. I prefer at least one aggressive person on the desk, Monte and Ashley are kind of shy.

Scott,

I really think that Melissa would be able to handle Storey better than Kristen. I think we should keep her on Central and let you take Kristen on the East.

Are you ok with that?

Hunter/Fletch,

Danielle Marcinkowski in the market data group has been discussing a new arrangement with PIRA. I was told by the legal group that all contracts with parties such as PIRA need to be negotiated through the market data group. FYI there were outstanding issues in the bankruptcy surrounding the display of reports/data on our website to users that did not have licenses (mainly EGM).

All that said, we need the Weekly Gas Flash, US Gas Market Forecast, Western Gas Basis Report, and the Daily Electricity report. We would also like to be able

to phone PIRA reps with questions, participate in strategic briefings, and have two slots for the PIRA annual energy conference.

Let me know if you have any questions.

Chris

Fellas,

Presto has asked me to be the contact to Allan Stewart at PIRA with regard to setting up an arrangement for their consulting services. I'm currently having information-gathering discussions over services and fees for both gas and power, in both the east and west. In order to fully incorporate everyone's needs into our arrangement with PIRA, I'll be contacting you this week to gather requests. Or, if you know what you need, please just reply to me with the specific information.

Thanks,

Fletch

The timing has become critical as to finishing the due diligence necessary for us to formulate with some certainty our defenses and prepare for the meeting requested by Bid/Ask to discuss the issues. The answer is due a week from today, and we still have the plaintiff's request that we meet on Wed or Thursday of this week to discuss the merits of the case. We must get the technical detail that we requested some time ago, have an opportunity to review same, and probably discuss it with the Enron tech folks so that we can prepare properly for advising you and meeting with the other side. How can we get this accomplished?

Hi Harry,

The Chemist in Delhi (Kuber Chemist) has requested for the phone number for New Jersey address. I presume that is required by the courier service in India. He also mentions that the medicines will take about a week to arrive from the date of departure.

Regards,
Sumant

I'M SO EXCITED!!!! They are finally spreading out my land! There's a HUGE bulldozer out there and he's moving the dirt where-ever I tell him. IT'S GREAT, EARTH SCULPTING (???). There will be some low levels, some high levels and then some mounds...I have an acre of dirt to play with...it's like a great big sandbox! I ALWAYS LOVED PLAYING IN THE DIRT!

And I am getting so excited about having a yard, ALLLLLLL OUR OWN! With no tenants (Frau Sweetie) looking down at us. Our only neighbor, that will actually live on their land hasn't even started building yet. They gave us their plans for approval last week and they are building their house around an atrium like area...so they won't even have any windows this way!

I needed something uplifting..I just finished calculating how much we pay annually to the ins. company to be covered for everything....30,000 DM A YEAR! ONLY 14,000 is for the business! I keep hoping that I can find

something to cancel...but no luck yet.

So what's happening???

Good Afternoon Analysts,

Were you unable to attend the Rice MBA Info Session?

Or, would you like more information?

Please visit EB3526A for brochures, applications and other information regarding the Monday, November 5, 2001, Rice MBA Info Session.

Date: Monday, November 5, 2001

Time: 6:00 - 8:00 pm

Location: ECN 5c2

If we may offer any additional assistance, please do not hesitate to contact us @ x3-5614.

Thanks.

-Constance Charles
Human Resources

Analyst & Associate Program

Dealings with a related party have tarnished Enron's (ENE:NYSE - news - commentary) reputation and crushed its stock, but it looks like that case is far from unique. The battered energy trader has done business with at least 15 other related entities, according to documents supplied by lawyers for people suing Enron. Moreover, Enron's new CFO, who has been portrayed by bulls as opposing the related-party dealings of his predecessor, serves on 12 of these entities. And Enron board members are listed as having directorships and other roles at a Houston-based rel

ated entity called ES Power 3.

The extent of Enron's dealings with these companies, or the value of its holdings in them, couldn't be immediately determined. But the existence of these partnerships could feed investors' fears that Enron has billions of dollars of liabilities that don't show up on its balance sheet. If that's so, the company's financial strength and growth prospects could be much less than has generally been assumed on Wall Street, where the company was long treated with kid gloves.

Enron didn't immediately respond to questions seeking details about ES Power or about the role of the chief financial officer, Jeff McMahon, in the various entities. Enron's board members couldn't immediately be reached for comment.

Ten Long Days

Enron's previous CFO, Andrew Fastow, was replaced by McMahon Wednesday after investors criticized Fastow's role in a partnership called LJM, which had done complex hedging transactions with Enron. As details of this deal and two others emerged, Enron stock cratered.

The turmoil that resulted in Fastow's departure began two weeks ago, when Enron reported third-quarter earnings that met estimates. However, the company failed to disclose in its earnings press release a \$1.2 billion charge to equity related to unwinding the LJM transactions. Since then, investors and analysts have been calling with increasing vehemence for the company to divulge full details of its business dealings with other related entities. Enron stock sank 6% Friday, meaning it has lost 56% of its value in just two weeks.

Enron's End Run?

New financial chief's involvement in Enron business partners

Source: Detox

However, Enron has yet to break out a full list of related entities. The company has said nothing publicly about McMahon's participation in related entities, nor has it mentioned that its board members were directors or senior officers in ES Power 3. (Nor has it explained the extensive use of Star Wars-related names by the related-party companies.) It's not immediately clear what ES Power 3 is or does. So far, subpoenas issued by lawyers suing Enron have determined the names of senior officers of ES Power 3 and its formation date, January 1999.

Among ES Power 3's senior executives are Enron CEO Ken Lay, listed as a director, and McMahon and Fastow, listed as executive vice presidents. A raft of external directors are named as ES Power 3 directors, including Comdisco CEO Norman Blake and Ronnie Chan, chairman of the Hong Kong-based Hang Lung Group. A Comdisco spokeswoman says Blake isn't commenting on matters concerning Enron and a call to the Hang Lung group wasn't immediately returned.

Demands, Demands

Rating agencies Moody's, Fitch and S&P recently put Enron's credit rating on review for a possible downgrade after an LJM deal that led to the \$1.2 billion hit to equity. Enron still has a rating three notches above investment grade. But its bonds trade with a yield generally seen on subinvestment grade, or junk, bonds

, suggesting the market believes downgrades are likely. If Enron's rating drops below investment grade, it must find cash or issue stock to pay off at least \$3.4 billion in off-balance sheet obligations. In addition, many of its swap agreements contain provisions that demand immediate cash settlement if its rating goes below investment grade. Friday, the company drew down \$3 billion from credit lines to pay off commercial paper obligations. Raising cash in the CP market could be tough when investors are jittery about Enron's condition. This week, a number of energy market players reduced exposure to Enron. However, in a Friday press release, CEO Lay said that Enron was the "market-maker of choice in wholesale gas and power markets." He added: "It is evident that our customers view Enron as the major liquidity source of the global energy markets." McMahon reportedly objected to Fastow's role in LJM, allegedly believing it posed Fastow with a conflict of interests. But he will need to convince investors that at the 12 entities he's connected to don't do the same. Enron has said that its board fully approved of the LJM deals that Fastow was involved in. Now, board members will have to comment on their own roles in a related entity.

Under The Radar: Enron's Flickering Bulb

By Christopher Edmonds <<mailto:cedmonds@thestreet.com>>

Special to TheStreet.com

10/26/2001 05:08 PM EDT

URL: <<http://www.thestreet.com/comment/chrisedmonds/10003075.html>>

While the bulb at Enron (ENE:NYSE - news - commentary) may not have burnt out, it's clearly flickering. To date, investors aren't sure whether Chairman and CEO Ken Lay is up to the task of re-energizing the company he once built to greatness.

What's happened at the Houston energy giant-turned-dwarf could've been imagined with any number of ne'er-do-well companies during the well-chronicled bubble. But this is Enron. As one longtime Enron bull and shareholder said, "I never had to worry about Enron's ability to survive until this week. I still find it hard to believe."

Peter Eavis has done an exceptional job of chronicling Enron's adventures for some time. If you'd listened to him earlier this year, you'd have profited from his knowledge. His reporting on Enron's partnership shenanigans to the departure of Chief Financial Officer Andrew Fastow has been outstanding.

The rumors -- from a pending bankruptcy to a Justice Department investigation -- are, for now, just that. And, Enron did not single-handedly cause the California power crisis, nor is Royal Dutch/Shell (RD:NYSE - news - commentary) about to make a bid to buy the company. Sources do tell me that head-count reductions are likely through employee buyout offers and the company is set to refocus on its core energy business. And, while former CEO Jeff Skilling shares culpability for the current mess, his departure appears only indirectly related to Enron's current woes.

Now, Enron faces the daunting challenge of rebuilding both its business and, more importantly, its reputation.

The Company's Challenge

But what does Enron do now? It's very simple. Come clean, clean up the mess and refocus on its core business: wholesale energy markets, risk management and retail energy services. They support each other and create a platform that can be plenty profitable without a lot of gimmicks.

"Our gut feel is that Enron can pull it off, and long-term investors should hold firm, as eventually the stock gets valued on earnings, with upside potential to \$25 per share over the next 12-18 months," says Jeff Dietert, power analyst at Simmons & Co. and a member of the TSC Energy Roundtable. "We believe new money with high risk tolerance should wait until Enron announces its intentions for communicating a clear path to recovery."

Dietert outlines four challenges for Enron. One, management must regain the Street's confidence and persuade investors that it can resolve balance-sheet strength and generate the expected earnings and cash flow. Two, Enron must maintain its investment-grade credit rating. Three, Enron must successfully execute its dive

stature plans. Four, Enron must control the timing of the recognition of the write-down in the value of any assets where market value is less than book.

Straightforward? Yes. Easy to accomplish? No.

Although Enron says additional write-downs are unlikely -- except a \$200 million charge early next year as the result of an accounting change -- analysts aren't so sure. They're focused on the company's Global Assets portfolio, sporting \$6 billion in book value but generating an EBIT (earnings before interest and taxes) loss of \$18 million over the past 12 months.

The divestitures include \$390 million in exploration and production assets in India, \$250 million in a Puerto Rico power plant and \$250 million in a Brazilian power plant in the fourth quarter as well as the pending sale of Portland General, which is set to close in 2002. There will likely be others. However, Enron has to execute here, and given the current state of its affairs, the seller will feel the pressure.

The credit-rating issue is a fine line. The current ratings, BBB+ from Standard & Poor's and Baa1 from Moody's, are three levels above non-investment grade. However, both rating agencies now have Enron on their radar screens for possible downgrades. Dietert estimates that Enron's debt-to-market cap will be about 48% by year-end, and the company has interest coverage (EBITDA/ interest expense) of about 3.5 times. By comparison, the average S&P BBB-rated company has a debt-to-cap of 47.4% and interest coverage of about 6.1 times. The average BB company has debt-to-cap of 61.3% and interest expense of 3.8 times.

Frankly, everything falls on Enron's management team and its ability to reassure investors. "If Enron's management does not step up to calm investor fears, these fears could become a self-fulfilling prophecy," Dietert says. "In the potentially vicious cycle, investor fears could drive stocks down; the lower stock prices force the rating agencies to consider downgrades; potentially lower credit ratings force counter-parties to reduce exposure to Enron, limiting Enron's ability to generate earnings and cash flow."

It's time for Enron to grow up. Despite a lot of uncertainties and risk, I think it will. Investors with risk capital should do their homework on the stock and think about strategy. It's a tough call that requires strict, individual discipline.

There's an irony to this whole story, especially in Enron's lack of candor in reporting its financial results. In a much-lauded advertising campaign, Enron, looking to challenge conventional wisdom, asks the simple question, "Why? Ask why."

Investors are now asking. It's time for Ken Lay to answer.

First Things First

Many readers have asked about my relative quietness this week. Thank you for your concern. My father has fallen ill after fighting the effects of a brain tumor for more than a decade.

The choice was easy. I'm with him and my family.

Enjoy your weekend with family and friends.

DJ Enron Unit, New England Market Downplay Report Of Default
2001-10-26 17:14 (New York)

By Kristen McNamara
Of DOW JONES NEWSWIREs

NEW YORK (Dow Jones)--Enron Corp.'s (ENE) retail sales unit defaulted on its credit requirement in New England's wholesale power market this month, but the event was neither unique nor newsworthy, the energy company and the organization that developed the market's rules said Friday.

The operator of the region's wholesale power market informed Enron Energy Services last week that, for the third time in 12 months, it had traded a greater volume of electricity than allowed by the bond it had posted and was at risk for expulsion from New England's market.

But it was administrative mixups, rather than financial problems, that triggered the warning, which a few other companies have also received in the past, the market's rulemaker said.

"I can state with considerable confidence that there have been other participants" that have defaulted on their credit agreements, "and it's never been in the news," said David Doot, secretary and general counsel for the New England Power Pool, which developed the policies governing the region's electricity market. "My instinct is that this is blown way the hell out of proportion."

News of the Enron unit's default appeared in a trade publication and a major metropolitan newspaper this week, as Enron's dealings with partnerships headed by its former chief financial officer contributed to a plunge in the company's stock and bond prices.

Enron Energy Services never received word that it had defaulted on its bonding requirement twice before, because both times it corrected the problem within a day, spokeswoman Peggy Mahoney said.

The letter sent by ISO New England, which operates the region's power market, to notify the Enron unit of its third violation was addressed to the wrong person, delaying the company's response, Mahoney said.

"Clearly, it was an administrative error that we immediately took care of to ensure that we would never exceed the volume limit," Mahoney said.

The company resolved the problem by Oct. 19, Mahoney said. ISO New England spokeswoman Ellen Foley confirmed Friday that the company had cured its default.

It's rare for a company to default three times, but it has happened on occasion, Foley and Doot said.

"I won't say it's commonplace, but I won't say it's unusual for a participant to find itself out of compliance," Doot said. "Those things have in fact happened from time to time."

Enron Lawsuit Over Microsoft Broadband Agreement May Block MSN
2001-10-26 16:47 (New York)

Enron Lawsuit Over Microsoft Broadband Agreement May Block MSN

Houston, Oct. 26 (Bloomberg) -- Enron Corp.'s lawsuit alleging Microsoft breached a contract for broadband services could temporarily block the largest software company's high-speed Internet service in some U.S. regions.

Microsoft said the dispute temporarily blocks the company from providing the high-speed service in areas where Enron provides broadband access, leaving MSN fully operational only in the 14 states where Qwest Communications International Inc. operates, said Bob Visse, director of marketing for MSN.

Enron's lawsuit was filed yesterday. Microsoft had planned to offer fast Internet access in 45 cities beginning yesterday to give the largest software company access to potential customers in

29 million homes. Microsoft, the No. 2 U.S. Internet provider, is making a push to win customers from AOL Time Warner Inc.

``We are trying to resolve the issues with Enron as quickly as possible and at the same time we are evaluating other providers,' Visse said.

Officials at Houston-based Enron, the largest energy trader, did not immediately return calls for comment.

The Agreement

Enron in June signed an agreement with Microsoft to provide bandwidth for MSN Internet service. Under the agreement, Enron isn't required to deliver operational broadband services if Microsoft hasn't first provided a billing and ordering system, Dow Jones newswire reported.

Enron claims in its lawsuit that Microsoft failed to deliver the ordering and billing system required in the initial phase of the deal, Dow reported.

Enron's lawsuit comes after Microsoft said in an Oct. 23 letter that Enron will have breached the contract if it hasn't provided an operational bandwidth system by Oct. 25, allowing Microsoft to recover damages.

Shares of Redmond, Washington-based Microsoft fell 36 cents to \$62.20, while Enron shares fell 95 cents to \$15.40.

Enron Executives Sent Requests for Details of Affiliate Profits
2001-10-26 15:36 (New York)

Enron Executives Sent Requests for Details of Affiliate Profits

Houston, Oct. 26 (Bloomberg) -- Lawyers for a shareholder suing Enron Corp. are asking executives of the largest energy trader to disclose any income they made from their involvement with affiliated companies that bought and sold Enron assets.

Lawyers have made the requests to President Greg Whalley, Vice Chairman Mark Frevert and Chief Financial Officer Jeff McMahon and 83 other employees arrived at Enron's Houston offices this week, said Paul Paradis, a partner in the New York law firm Abbey Gardy. Requests also were sent to 17 Enron partnerships such as Whitewing Management and Marlin Water.

Paradis represents Fred Greenberg, an Enron shareholder who is suing the company's board for allowing former Chief Financial Officer Andrew Fastow to run partnerships that cost the company at least \$35 million in cash and \$1.2 billion in lost shareholder equity.

The requests are aimed at determining if Enron executives benefited financially from roles as officers and directors of partnerships that bought and sold company assets. Enron formed at least 18 such affiliated companies, listing executives and employees as officers and directors of the partnerships, according

to Texas secretary of state records.

Under Texas law, failure to respond to the document requests will result in subpoenas being issued. Subpoenas could go out next week if responses don't arrive by then, Paradis said. Enron spokeswoman Karen Denne didn't respond to requests for comment about the document requests.

The executives earned no income from the partnerships, Enron spokesman Mark Palmer has said. ``There are no financial interests in the structures themselves for any Enron employee,' ' Palmer said. He said it's common for a company to name its executives to the boards of affiliates.

Affiliates Have Debts

Texas records show Chief Executive Officer Kenneth Lay, Frevert, Whalley, McMahon and dozens of other people who list their address as Enron's corporate headquarters serving as officers and directors of limited liability companies and foreign business corporations.

The document requests ask Enron executives for information on any form of compensation or benefit received from any of the affiliates, including stock grants and options. They also ask the executives to disclose any equity or partnership interests in the affiliates.

Enron formed many of the affiliates to buy company assets such as power plants and natural-gas pipelines. That allowed Enron to move debt associated with those projects off its books.

The affiliates bought the assets with borrowed money. They plan to repay the debt by eventually selling the assets. Enron might be liable for any shortfall between the sales proceeds and the debt. That could amount to at least \$3.3 billion if the assets don't generate any money, a remote possibility, the company has said.

Few Answers

Investors and analysts pressed Enron Chief Executive Officer Kenneth Lay for details on the finances of the partnerships in a conference call Tuesday.

Today, Enron spokeswoman Karen Denne didn't respond to questions about one of them, ES Power 3 LLC.

Texas records list 78 Enron executives and employees as officers, directors and managers of ES Power 3 LLC. The entire Enron board is also listed.

Shares of Enron \$1.15 to \$15.20 in late trading.

Enron Still Target in California Amid Other Problems (Update1)
2001-10-26 16:15 (New York)

Enron Still Target in California Amid Other Problems (Update1)

(Updates with closing share price in last paragraph.)

Sacramento, California, Oct. 26 (Bloomberg) -- Enron Corp., facing an inquiry by federal securities regulators into partnerships run by the former chief financial officer, remains a target of investigations and lawsuits in California.

California lawmakers and regulators have accused power providers of manipulating the state's energy market to raise prices. Enron, the biggest energy trader, and other power sellers have denied the charges repeatedly.

Next month, a California Senate committee investigating the power market plans to hold a hearing to determine if Enron and other generators are complying with subpoenas for trading documents. Enron has been filing documents in Sacramento, California.

``They are still putting documents in their depository, and I don't think they've completed that process,'' said Alexandra Montgomery, a consultant to the committee. It ``remains to be seen'' whether Enron is complying with its subpoena, she said.

The suits and inquiries came after wholesale power prices in California soared, leaving the state's two largest utilities insolvent. Under California's plan to open its electricity market to competition, the utilities of PG&E Corp. and Edison International weren't allowed to pass rising costs to customers.

``I know that we're doing our best to comply with what the committee is asking for,'' Enron spokesman Mark Palmer. ``We are putting documents in the depository, and we're looking forward to a speedy resolution.''

Shares of Houston-based Enron have fallen by more than half since Oct. 16. The company ousted Andrew Fastow as the chief financial officer Wednesday amid a U.S. Securities and Exchange Commission inquiry into a partnership he ran that cost Enron \$35 million.

Grand Jury

Enron also is one of the companies being investigated for civil and criminal violations by California Attorney General Bill Lockyer, who convened a grand jury in June.

Lockyer has been criticized by Enron officials for telling the Wall Street Journal in May that he would like to put Enron Chairman Kenneth Lay in ``an 8 x 10 cell that he could share with a tattooed dude who says `Hi my name is Spike, honey.`'' Lockyer later apologized for the remark.

The attorney general's investigation is proceeding, Lockyer spokeswoman Sandra Michioku said. Michioku said she didn't know when civil or criminal charges against Enron or other power providers might be filed.

``Our investigation is still being pursued,'' she said. ``We had to go to court to get Enron to turn over documents, so that slowed things down a bit.''

Enron's Palmer said he didn't know the status of the attorney

general's investigation.

``I think the attorney general demonstrated his willingness to take a fair and impartial look a long time ago when he made his vulgar and unfounded remarks about our chairman,' ' Palmer said.

More Lawsuits

Enron, along with other major power providers such as Duke Energy Corp. and Dynegy Inc., face at least five lawsuits alleging they manipulated California energy prices in violation of antitrust laws.

The cases, which include separate complaints filed by the City of San Francisco, California Lieutenant Governor Cruz Bustamante and various consumers, currently are in state courts awaiting a coordination proceeding, said Michael Aguirre, a lawyer representing Bustamante. The lawsuits should be assigned to a judge by the end of next month, he said.

If the complaints succeed, the companies might be ordered to repay profits from any illegal activities and pay fines, including triple damages.

Enron's stock fell 95 cents, or 5.8 percent, to \$15.40, declining for the eighth day in a row. The shares have fallen 80 percent in the past 12 months.

--Daniel Taub in Los Angeles, (323) 801-1261 or

Enron Bonds Fall as Company Taps \$3 Bln Credit Line (Update5)
2001-10-26 16:18 (New York)

Enron Bonds Fall as Company Taps \$3 Bln Credit Line (Update5)

(Adds investor comment in fourth paragraph.)

Houston, Oct. 26 (Bloomberg) -- Enron Corp. bonds and shares fell after the largest energy trader tapped a \$3 billion credit line because it has been shut out of the leading market for low-interest, short-term loans.

The company's stock has fallen 54 percent in the past 14 days after investors questioned its transactions with affiliates run by Enron's former chief financial officer. The shares fell 95 cents, or 5.8 percent, to \$15.40 today.

Chief Executive Officer Kenneth Lay has failed to reassure investors that the company's credit rating won't be cut, investors said. Enron can no longer borrow in commercial paper markets, where short-term loans carry lower rates than banks offer.

``Do they have the financial flexibility they once had? No,' ' said John Cassady, who helps manage \$3 billion in bonds at Fifth Third Bancorp. ``People are questioning the credibility of management.' '

The company will use its credit line to pay off \$2.2 billion in commercial paper it has outstanding, Enron spokesman Mark Palmer said.

Bonds Drop

Enron's 6 3/4 percent bonds, which mature in 2009, declined 1 1/2 points to a bid of 84 cents on the dollar and an offer of 86 cents. At that price, the bonds, which carry a rating of ``BBB+,`` yield 9.53 percent.

Investors have grown concerned that the company's credit rating will be cut after \$1.01 billion in third-quarter losses from failed investments. Enron needs good credit to raise cash daily to keep trading partners from demanding collateral and to settle transactions.

Enron's decision to tap its credit line was ``a smart financial move,`` said Stephen Moore, a vice president at Moody's Investors Service who follows the company. ``It took away the hassle and time-consuming nature of rolling commercial paper and insured access to capital.``

Though Enron's bonds have investment-grade ratings, their yield at current prices is higher than those of industrial bonds that carry junk ratings. According to Bloomberg data, companies with ``BB`` ratings pay on average 9.16 percent to borrow for seven years.

A lower credit rating may also force Enron to buy back holdings in other partnerships with its stock, diluting the value of Enron investors' stock.

Partnerships called Whitewing, Marlin and Yosemite own Enron assets they bought with borrowed money. Enron sold the assets to the partnerships to keep related debt off its books. The partnerships plan to repay the borrowed money by selling the assets.

Other Liabilities

If Enron loses investment-grade rating, the borrowed money comes due earlier, leaving less time for the partnerships to find the best price for the power plants and other assets. Enron would have to make up any shortfall between what the assets would sell for and the amount of the debt.

One way would be issuing common shares to exchange for Enron preferred convertible shares held by the partnerships. That would thin out the holdings of every other investor.

Of the two main bond-rating companies, Moody's and Fitch have Enron on watch for possible downgrade, and Standard & Poor's lowered Enron's long-term credit outlook to negative. Egan-Jones Rating Co. today lowered its rating on Enron's debt to ``BB+,`` one notch below investment grade, from ``BBB-.``

Enron's liabilities associated with the partnerships amount to at least \$3.3 billion, the company has said.

Enron ousted Chief Financial Officer Andrew Fastow on Wednesday amid a Securities and Exchange Commission inquiry into a partnership he ran that cost the company \$35 million in direct losses. Enron also bought back 62 million shares from the partnership, reducing shareholder equity by \$1.2 billion.

``It looks like the guy who was supposed to do everything for the benefit of shareholders was running partnerships for the benefit of himself,' Fifth Third's Cassady said.

Jeff McMahon, head of Enron's industrial markets group, was named CFO in a bid to restore investor confidence, Lay said in a statement.

Keller Rohrback L.L.P. Investigates Potential Claims on Behalf of Enron Corp. --
ENE -- Employees and Former Employees

10/26/2001
Business Wire
(Copyright (c) 2001, Business Wire)

SEATTLE--(BUSINESS WIRE)--Oct. 26, 2001--Seattle's Keller Rohrback L.L.P. is currently investigating potential ERISA claims on behalf of participants and beneficiaries of Enron's retirement and 401(k) plans.

The investigation period covers January 2000 through October 2001. The investigation focuses on concerns that, under the law interpreting ERISA, Enron and its plan administrators may have breached their fiduciary duties of loyalty and prudence by failing to disclose and inform the Plan participants and beneficiaries with respect to the use of employer stock as a Plan investment. Rather than providing complete and accurate information to the Plans' participants, it may be alleged that Enron and the plan administrators may have withheld and concealed material information, thereby encouraging participants and beneficiaries to continue to make and to maintain substantial investments in company stock and the Plans. This investigation is being conducted in light of recent events.

On Oct. 16, 2001, Enron surprised the market when it announced that the Company was taking "non-recurring charges totaling \$1.01 billion after-tax, or (\$1.11) loss per diluted share," in the third quarter of 2001. Enron later revealed that a material portion of the charge related to the unwinding of investments with certain limited partnerships, controlled by Enron's CFO, and that the Company would be eliminating more than \$1 billion in shareholder equity as a result of its unwinding of the investments. As this news began to be assimilated by the market, the price of Enron common stock dropped significantly. In addition, several recently filed securities suits allege that Enron executives engaged in extensive insider trading, gaining millions of dollars in personal proceeds. Enron retirees have lost a substantial portion of their retirement earnings due to the drop in value of their retirement assets.

If you are a member of an Enron retirement plan, wish to discuss this announcement, or have information relevant to the investigation, you may contact paralegal Liza Catabay, or any member of our team (Britt Tinglum, Liza Catabay, or Lynn Sanko) toll free at 800/776-6044, or via e-mail at investor@kellerrohrback.com. Seattle's Keller Rohrback L.L.P. has successfully represented shareholders and consumers in class action cases for over a decade. Its trial lawyers have obtained judgments and settlements on behalf of clients in excess of seven billion dollars.

Stephanie,

I'm unable to find anything, could be because it's so recent. I don't show that we're doing any business w/ Merrill Lynch Futures, Inc., can't find any record in GCP, so I'm not sure how this would affect us. When I run out of resources, I just call them.

Cheryl

Subject: (MS-76) MEMBER FIRM PRIVILEGES

Notice No. MS-76
November 14, 2001

COMMODITY EXCHANGE, INC.

MEMBER FIRM PRIVILEGES

Please be advised that effective with the close on November 2, 2001, Merrill Lynch, Pierce, Fenner & Smith, Inc., has acquired Merrill Lynch Futures, Inc. Merrill Lynch, Pierce, Fenner & Smith, Inc. has assumed the clearing member firm privileges of Merrill Lynch Futures, Inc. As a result, Merrill Lynch Futures, Inc. has been terminated as a clearing member firm of COMEX.

Members and Member firms have (10) days from the date of this notice to advise the Corporate Secretary's Office of any claims against Merrill Lynch Futures, Inc.

Inquires regarding the above should be directed to the Member Services Department at (212) 299-2377.

It is my sincere honor to once again lead the Enron team in this year's Juvenile Diabetes Research Foundation (JDRF) Walk scheduled to take place on Sunday, October 28th, at Greenspoint Mall. I continue to serve on the board of JDRF representing Enron and will be Enron's corporate executive for this year's fundraising efforts.

As many of you may already know, I am an insulin dependent diabetic myself. Even though I know how difficult this disease can be to manage with the multiple finger pricks for blood samples and several shots each day, I cannot imagine how difficult it is for a small child with this disease. Taking insulin does not cure the disease nor prevent the development of complications; insulin is simply their life support system and without it they would die.

Enron continues to be a major corporate sponsor for JDRF again this year. JDRF is a very efficient organization in which approximately 85% of all money raised goes directly to research. Enron's goal this year is to raise \$400,000 and we need your help. Enron has been the number 1 walk team for 6 years in a row and we are not ready to give up first place! We need team leaders, walkers and volunteers to help us reach our goal. The theme for the walk this year is "Mission: Possible" and we would like to have you join us for this great event. The Walk is truly a blast and we had about 600 Enron people participate last year and everyone enjoyed it.

If you are interested in volunteering to be a walker or a team leader, or if you would like to make a pledge, you may call any of the steering committee members listed below. If you are interested in being a team leader, please contact one of the following people immediately so that you may be included in the first important and informative training session taking place this week. In addition, you may go to cr.enron.com and sign up as a volunteer online if you prefer.

Thank you very much for your support.

Mike McConnell

This is to inform you that on January 25, 2002 the Honorable Arthur Gonzalez, United States Bankruptcy Judge for the Southern District of New York, entered an order as follows:

It is hereby Ordered that until further Order of this Court, Enron Corp., its af

filiated debtors-in-possession in these jointly administered chapter 11 proceedings (collectively "Enron"), and Enron's employees shall preserve, and refrain from destroying or disposing of, any of Enron's records, either in electronic or paper form.

Obviously, any violation of this order will carry serious consequences. We know that we can depend on you to comply with it fully.

Thank you.

As you know, the SEC is conducting an informal inquiry into related party transactions Enron did with LJM. We are cooperating fully and are providing the information the SEC has requested. However, we have learned today that the SEC is extremely sensitive about us using their inquiry as a "shield" to not answer certain questions -- i.e. "I can't answer that because of a pending SEC inquiry." As a result, we have been advised that we should not make any comment about the SEC inquiry in any context. This extends beyond media and includes any interactions with customers, regulators, etc. Please forward this message on to anyone in your group who this might impact. Call me if you have any questions.

Thank you.
Karen

X-Origin: SCHOLTES-D
X-FileName:

All,
The registry for testing tomorrow is posted at the NERC site <http://server06.nerc.com/tag/>. It has been updated and SHOULD contain all correct information. If anyone has any problems, speak up ASAP.
The registry has some minor changes:
1) Data Types and lengths have been added.
2) Constraints have been added.
3) 2 new tables have been added,
 Pending_Desk_Registry and Pending_Entity_Registry
4) The field 'Pseudo_CA' has been added to the PSE and CA Registries.
5) Relationships between tables has been implemented.
6) SC Codes are mapped in the SC_Code field for CAs.

Please read notes on changes below:

- a) It only impacts the MDB. If you use the CSVs, everything will be the same (except for the new tables and the one new field).
- b) The new tables (Pending Entity, Pending Desk) do NOT need to be used. Rather, they are "value adds"

- that can be used by a vendor to aid their customers.
- c) The intent of this is so that anyone using the MDBs will not have to go parse everything into dates, integers, etc... it does not change anything else.

The data dictionary posted on the E-Tag site contained an error in the order of fields in the POR/POD table. The order should be as follows:

PORPODPointID
NERC_ID
PointName
TP_Entity
CA_Entity
PORPODRoleID
CreationDate
DeactivationDate

A new Data Dictionary will be posted with the corrections ASAP.

Thank You,
Paul Baratelli

The Enron Wellness department's 3rd quarter blood drive will be held on Thursday, September 13, 2001, from 7am-4pm. For your convenience two mobile coaches from the M. D. Anderson Blood Center will be parked outside the Enron Building on Andrews Street. Contact the Enron Health Center at Ext. 3-6100 or via email at: <mailto:health.center@tcpolice.org> for more information or to schedule an appointment. Walk-ins are welcome.

Enron employees have donated 360 units of blood in 2001. Through our partnership with M. D. Anderson Cancer Center Enron employees assist not only the Houston community but also our employees and their families. Let's continue the spirit of giving by donating blood on September 13th!

Couple of additional pieces of information:

In conjunction with the issue paying ESPs past due PX amounts, Edison has affirmed that it will be making a proposal regarding how it wants to calculate the PX credit going forward. It remains unclear whether Edison will try to fold controversial issues into negotiations on getting paid past due PX credit amounts(e.g., PX credit contributed to undercollection and therefore DA customers should help pay down the undercol

lection; DA customers must pay for stranded DWR contracts, etc.). So while Edison is making good noises about wanting to settle (which is a certainly a step in the right direction), it's still unclear whether they intend to attach terms to the deal that make the whole thing a nonstarter. Got a call into John Fielder to try to get answers to some of these questions. Will report back when (and if) we get some answers.

Best,
Jeff

Subject: RE: Proposed SCE Negotiation Strategy

With respect to past due PX credit amounts, Edison has told folks today that:

Edison will distribute a one-pager by mid-day tomorrow laying out its proposal for how to handle payment of past due PX credit amounts.

Edison is trying to meet individually with all ESPs prior to the Nov. 7th prehearing conference at the PUC to discuss and hopefully reach agreement with ESPs on its proposal.

Edison hopes to make progress with the ESPs between now and the Nov. 7th prehearing conference, and if so, intends to tell the judge that the PUC should delay action on the complaints pending settlement.

We'll distribute Edison's proposal as soon as we get it.

Best,
Jeff

Subject: Proposed SCE Negotiation Strategy

Following last week's meeting, here is my recommendation on how to proceed with SCE.

1. Form Enron Negotiation Team

My recommendation is to use the same team we used with PG&E + Jeff Dasovich. My understanding was that Lisa M. was the lead negotiator - I would not change this. Jeff should only be there to make introductions.

2. Meet & Confer (10/29)

Sue Mara and Jeff Dasovich will listen and report back to everyone on what happens.

3. Reformed Stipulation

I would propose that we take a wait and see approach to this document. Based on Dasovich's idea to get together with SCE on Thursday, maybe let this ride.

4. Meeting

My understanding is that (Jeff D. please correct) SCE can meet with us this Thursday. Can everyone make it that needs to be there? Probably meet in California. We should put the laundry list on the table.

Please let me know what else we need to discuss or if anyone disagrees.

Thanks,

Jim

I am trying to set this thing up to go in front of the Cash Committee on Monday. I assume this is your final review.....Joe is cool with what I forwarded him. After your final changes, I'll forward to Chip, Rich and Doug Sewell...and let them know Monday is the day.

Thanks. You are a big help and I really admire your skill set....seriously, I do. I want to be like you when I grow up.

chris

Please find below the GTV weekly project status update and the attached file for the updated project time lines.

GTV status meeting attendees: Zhiyong Wei, Russ Severson, Jeremy Wong, Francis Lim, Chuck Ames, Geoff Storey, Karima Husain, Jay Krish, Mike Swaim, Nayan Dattani, George Grant, Dave Nommensen, Narasim Kasaru, Dat Truong.

Accomplishments:

- ? Incorporating physical deal positions in TDS:
- o Changes for the view aggregation have been completed.
- o Expandable Total in Cash Position has been completed.
- ? Single point of deal entry for term deals:
- o Phase 1 of single point of deal entry for term deals is in user test.
- ? Gas Daily deals:
- o Revisions for changes to PortCalc application to create GDI calc in ERMS have been worked on, and are in user test.
- o Curve shift reports are under development and will be completed this week.
- ? Live feeds for Gas Daily/intra-month curves:
- o Released to production.
- ? Option Grid (phase 2):
- o Released to production.
- ? Gas Daily options (phase 2):
- o Changes to PortCalc application have been completed and in user test.
- o The Option Delta Change Forward Month report has been completed and in user test.
- ? Basis Options (phase 2):
- o Development of deal entry type for Basis Options has been completed in T AGG.
- o Development of loading correlation curves has been completed.

Plans for the week ending 6/8/01:

- ? Continue IT development of Phase I items.
- o Changes to curve shift report for GDI Calc.
- o Change CPR PortCalc to value outer month positions.
- ? Continue IT development of Phase II issues.

Issues / Open Items:

None

Notes

? PortCalc changes for Gas Daily and CPR deals have been taking longer than originally estimated due to new items and complexities uncovered during development.

? The user acceptance test for Cash Position in TDS has been held up by the PortCalc changes.

? For phase 1 Single Point of Deal Entry for Term Deals, the user acceptance test uncovered some additional work needed. The team has been working closely with Geof, Chuck, Russ and George to provide the needed functionalities.

? The user has been testing the changes for Gas Daily Options (Phase 2) for the last few weeks. IT development was completed a few weeks ago. No new changes have been requested.

Thanks

Zhiyong

In school books we study exactly your example from the bank.

But in our case, we are studying the HDD contract that pays financially in MMBtu (gas). So the tick size of the transaction would be MMBtu/DD rather than \$/DD.

Claudio

Subject: RE: Cross-commodity desk

Claudio,

I agree with you. The first bullet point will be easier to implement. Generally I have found that there is sufficient divergence of opinions amongst wholesale players that you can get positions on that you want.

My goal would be to fulfill the function of both bullet points. I think there are pockets of risk management of complex relationships around the firm, but no group dedicated to it. Clearly we will need quantitative rigor to serve those functions.

questions: I am familiar with Quantos from my banking days, where a USD interest rate option pays off in a non USD currency at a fixed exchange rate. What is the specific structure of the options you are looking at.

Regards,
Andy

PSIM: A Power Simulation Tool

PSIM is a proprietary model developed by Enron Research Group.

? It takes Power, Gas, Weather and demand information into consideration and
? uses Monte-Carlo simulation to assess the expected deal value and risk distribution.
? It evaluates complex electricity related contracts such
as Full Requirement and load following contract.
? It also provides a valuation tool for power assets and asset management deals.
? It works for both deal specific or portfolio issues.

In this presentation we will show how the model can be used to deal with various types of contracts, explain the model structure and point out further applications.

Date: October 30, 2001

Time: 4:00 pm

Location: EB5C2

Brothers in -kai-

just to let you know that I changed my email address, so if you have any questions or problems with yahoogroups and want to send me something directly and not to all the guys in the group you can send it to shackleton@austin.rr.com

Also, I'm attaching the current email member list so you can update your individual address books.

Note on this list that there are a couple of updates.
JGlass is now found jglass@northelginteleport.com
Elvis Thompson changed his email address to elvisthompson@aol.com
I'll remove the old addresses if J and Elvis give the OK.

I see lots of new message traffic lately. Mostly from Okies and southeast Texans. Must be the hot weather has them inside on their PC's. But it is a good time now to plan the autumn Beta mini-reunions.

I read the news about Rocky's resignation Tuesday. The word is out that they had to put old Skilling in the witness protection program so the California attorney general couldn't find him and throw him in a jail cell with Spike after Spike does Ken Lay. Jeez, you can't even sell gas nowadays without pissing off the California politburo. Rocky will probably surface in Turkey or something (JK S - say hey to your blood brother Mark there)

Press Release

SOURCE: Maritimes & Northeast Pipeline, L.L.C.

Maritimes Files Application for Phase IV Expansion Of Natural Gas Pipeline System

BOSTON, Feb. 4 /PRNewswire-FirstCall/ -- Maritimes & Northeast Pipeline, L.L.C. has submitted an application to the Federal Energy Regulatory Commission to further expand its natural gas pipeline system. The \$250 million expansion project, designated Phase IV, will allow Maritimes to nearly double its capacity to transport natural gas from offshore Nova Scotia to markets in the northeastern United States from approximately 415,000 dekatherms to 800,000 dekatherms per day.

Demand for natural gas, especially in New England and the Northeast, continues to increase at a rapid rate. Maritimes received substantial requests for transportation services from local natural gas distribution companies, natural gas-fired electric generators and third-party marketers during a recently completed open season nominations period, emphasizing the market's desire for more natural gas from Atlantic Canada.

"The demand for natural gas is real, and it is significant," said Tom O'Connor, president of M&N Management Co., the managing member of Maritimes. "Maritimes is able to respond to the demand by efficiently and economically expanding its system to deliver new supplies of gas from fields off Canada's east coast. Access to additional sources of this cleaner-burning fuel will ensure greater energy reliability and flexibility for the northeast region."

Earlier this year, Maritimes signed agreements with PanCanadian Energy Services Inc. to transport up to approximately 400 million cubic feet per day of natural gas from PanCanadian's Deep Panuke project, offshore Nova Scotia. The Phase IV expansion project will accommodate the increased volumes of gas.

The Phase IV expansion complements the planned extension of the Maritimes pipeline from Methuen to Beverly, Mass. The extension -- Phase III of the Maritimes project -- will interconnect the 650-mile Maritimes pipeline with Algonquin Gas Transmission Co.'s 1,000-mile system through Algonquin's proposed HubLine project.

The Maritimes Phase III and Algonquin HubLine projects recently received final

approval from FERC.

The Phase IV project proposes to construct four compressor stations in Maine each with approximately 26,800 horsepower of additional compression and approximately 31.3 miles of additional pipeline loop facilities in Maine's Washington County. The new compressor stations are proposed to be located in the municipalities of Eliot, Gorham, Brewer and Searsmont. Maritimes recently held open houses in these communities to provide information on the proposed expansion.

"We will work closely with federal, state and municipal officials as well as landowners and stakeholders throughout the FERC process to ensure the project is designed and constructed with minimal impact to communities and the environment," said Bill Penney, senior vice president and general manager of Maritimes. "As we proceed with the Phase IV expansion, Maritimes will continue its solid record of environmental, safety and operational compliance."

In addition to the FERC application, Maritimes will submit applications to other appropriate federal and state agencies, including the U.S. Army Corps of Engineers, the U.S. Environmental Protection Agency, Coastal Zone Management and Maine Department of Environmental Protection. The Phase IV expansion is expected to be in service in 2004.

Maritimes is owned by affiliates of Duke Energy (37.5 percent); Westcoast Energy, Inc. (37.5 percent); ExxonMobil (12.5 percent); and Emera Inc. (12.5 percent). For more information, contact Maritimes on the Internet at www.mnp-usa.com <<http://www.mnp-usa.com>>.

Subject: Proposed Holcomb South Flow Test

LD,

As we discussed at our 03/19/02 meeting, below is the proposed configuration for the April test flowing volumes south from Holcomb.

BACKGROUND

A background for those not at the meeting: NNG Marketing is in discussions with Oneok about re-routing Rich stream gas in order to restart the Bushton Helium plant. The proposal being pursued is to leave the higher CO₂ CIG gas in the Burdett line and shift more of the remaining gas flow from the Burdett line to the Sublette-Mullinville line. The Burdett line would then be routed to the Lean inlet at Bushton and Oneok would receive only the Mullinville volumes into the Rich inlet. The Helium plant would operate on a reduced total volume, but would avoid receiving any higher CO₂ gas.

Oneok has stated that about 260 MM/D of flow from Mullinville would allow them to operate their Helium plant. To accommodate this the block valve north of Finney 2 would be closed routing all the Finney 2 and 4, Tate and Mesa volumes south to Hugoton. At Hugoton this gas would be routed to the Oklahoma suction and compressed to Sublette.

To accomplish this, modifications would be made at the Sunflower meter/regulator station to allow operation at a lower inlet pressure. Piping would be added to the Hugoton yard to route the Holcomb gas to the OK suction. However, a temporary re-routing of gas using existing Hugoton yard piping was found. This can only be done on a short term basis during cool weather as it involves taking three dehy contactors out of service.

So the plan is to reroute this gas beginning April 2 and continue through the rest of the month. This would also be communicated to Oneok, giving them an opportunity to test run their Helium plant on the lower volume, if they chose to. If all related issues are resolved and an agreement is signed with Oneok, the piping modifications would be made in May.

PIPELINE CONFIGURATION

The schematics below utilize actual volumes from 03/19/02 in a model tuned to actual conditions. The model utilizes 03/19/02 volumes, but has the block north of Finney 2 closed and the gas routed to the Hugoton Oklahoma suction. Note the horsepower values in this schematic are not accurate.

Note that with these actual volumes and April ambient and ground temperatures, Fowler and Macksville do not run. Finney 2 and 4 discharge around 235 PSIG; Tate is predicted at 205 PSIG. BTU's from Finney 2 to Tate are at the Finney2/4 valve of about 922 BTU, but are at 963 BTU at Tate. Note also that BTU's on the Burdett line are good with 968 BTU east of Finney 3. The Burdett line BTU's are of course contingent on adequate CIG volumes.

COMPRESSION CONFIGURATION

Below are the results of detailed compression calculations that I did. I used actual suction temperatures most places and a couple of model predicted suction temperatures where I did not have actuals. There is some uncertainty about the Hugoton Kansas compression as I may not have accounted for possible re-circulation flow routing correctly. I still expect it to be workable though.

TEST DATA COLLECTION

We have compressor unit information available most places via SCADA. For Finney 2, 4 and Tate it would be helpful if the teams could send average daily values for the units on, suction and discharge pressure, RPM and step. They can be sent to me via email or FAX, 620-562-3511. If operations are smooth after the first week or so, we could discontinue the data collection.

These are engineering numbers and it is not an exact science. But looking it all over I believe there is adequate margin for error and that this is a workable configuration. If anyone sees real problems with it, please let me know.

FYI - Am working on a plan for pressure sweeping the Hugoton to Holcomb line, tentatively planned for this Wednesday.

Thanks,

John

Subject: =09 Move Information for the 6th floor

I just wanted to keep you posted on the information that I know so far about the move. Of course, it could change within the next five minutes so it's not written in stone. =20

As of now, the move for the 6 th floor is scheduled for Friday (2/8). Not exactly sure what time this is going to take place yet. Please make sure that everyone is packed and ready by early Friday morning.. If there is someone out on Friday, please make sure they pack before they leave or you have someone pack their stuff for them. Please make sure that everyone cleans out their desk completely. I know that boxes are hard to find right now. If any of you know that you will need quite a few boxes for your groups, please let me know ASAP so I can have them delivered by Thursday . I know that there are some boxes on floor 4 in the South building, so you might want to just go grab some. Labels hopefully will be here Friday morning. Once I get them I will immediately pass them out. I have attached the floor plan for the 6 th floor for those of you that want to know where your groups are going (if you don't know already) . Plus you might want to show it to your groups so they know where to report to on Monday morning. =20

If you have any other questions please let me know. I will update you as soon as I find out more or if there are any changes to this schedule. =20

Thanks,
Sonia Hennessy

Subject: Storage Charges on Allocation Error Days

Tim,

In the attached file I have calculated the following charges that I have incurred because of NNG incorrectly listing my project storage injection rates in your allocation system. By far the biggest cost to me is the way we have changed or nominations of natural gas from are suppliers as the spreadsheet will show. We made this change in the nomination for July, August & September. In calculating our nomination we look at what we could put firm into storage, plant usage on none run days and SMS if available. If this was fixed back in June when we asked what was going on with storage and over runs into storage. I would have order large volumes of the Tier I instead of purchasing the more costly Tier II. If we nominated the higher Tier I volumes we expected to see DDVC charge of \$.40 on all days trying to over run into storage. That would have been the case the way your system was

set up. Instead I have these higher cost to my suppliers.

Please call me with any question on the spreadsheet. You can verify Whitewater DDVC & SMS for September. I believe it was around the 18 or 19 when the problem was fixed.

<<Cogentrix DDVC's.xls>>

Here is UtiliCorp Calculation of Charges that I inputed for Cottage Grove.

oh im S000 glad the weather was good.

i am not disappointed that you didnt go kayaking- are you kidding? ive been here 6 months and havent done it yet!
so glad yall liked the market and "the bite"...

i think the seattle market is so neat. some of those people travel 2 hours every day to get to seattle to sell their fruits, flowers, etc. alot of them are asian immigrants just trying to "make it" in america- all the "stalls" where they sell fish, etc are great small business success stories. that's why i like supporting it...

take care

bonnie

Sorry it took me so long to respond. It's been really busy here lately. You're going to be so disappointed in us, but we never ended up kayaking.
Monique and I were so glad that you and Luke came to meet us for drinks. It was so fun getting to talk to y'all and hear all about Seattle and

Vancouver.

The weather actually turned out to be really good so we spent a lot of time outside. The Market was fantastic. We actually bought some boiled shrimp there and took in back to the hotel for a little in room picnic. We also hit "the Bite" which was really neat.

Glad you and Luke had a good time in the mountains and please let me know the next time you're in Houston. It be great to see you again.

Thanks again for everything,
Susan

Tell me about the rest of your trip/

had it was so fun seeing you again and meeting monique. luke and i both a really good time

i want to hear all about kayaking, etc as i have not yet tried it in seattle.

chilly hope the weather was nice. we were up in the mountains and it was and kind of cloudy (but really nice- we saw a black bear and a few rainbows)- just gorgeous

now back to hot and sunny down in houston, huh???

well i hope yall had fun and it was great seeing yuo

to maybe i will see you soon, if i can ever get to going down to houston see brad and lisa and my little sister

make sure you tell lisa hello for me

Take care
bonnie

Thanks Bonnie...we're staying at the Mayflower Inn. I'll give you a call on your cell phone when we get to town. It may not be until Friday though since our plane gets in late...but I'll call none the less.

Susan

Subject: more seattle advice

hey i emailed one of my friends and asked her about kayaking,etc.
when

i get a chance i will look up some internet sights that might

have
info

on that sort of thing in seattle. if you have a sec, you may want

to

try

seattleinsider.com--- i think they are supposed to be pretty good

and

helpful

i havent talked to luke yet, so i dont exactly know my plans for
the weekend unfortunately....

i am thinking that i will head to whistler on early saturday

morning,

and that way i can go to dinner with you and your friend on friday
night, or head out and have drinks, or both, or whatever yall want

to

do!

the weather is supposed to be great this weekend, but with seattle
you never know.

my MAJOR SUGGESTION is that you bring some sort of light jacket

for

sure, or a pullover or something. it gets so darn cold at night-
believe

me you will be glad. plus on the ferry ride over to san juans it
could

get kind of chilly if you are sitting outside.

ive already given you my cell phone number i think (206.851.9177)
definitely call me when you get in town on thursday night or on
friday.

the number i have given you is my cell phone and you can call me
anytime

on it. if i dont answer, i check it frequently and you can leave a
message and ill call you back.

very exciting to have visitors from texas. see you friday hopefully.

oh, where are you staying?
bonnie

Subject: Tour Guide

Hi Bonnie,

How are you doing? Lisa said you'd broken your foot recently and have been stuck on crutches...which I'm guessing is no fun when you're riding public transportation. Anyway, I was writing to see if you might have some suggestions of things to do and places to go while in Seattle. One of my co-workers and myself are flying up Thursday for a long weekend in your fair city and were hoping to get a few pointers. I hope you're still enjoying things as much as you were a few months ago. It looks like you may have changed jobs already, which I trust is a good thing for you. I'm very anxious to see the city and all it has to offer...there is a part of me that has always thought I'd like to live in the Pacific Northwest for a while (so this will be a little bit of a research trip for me). If you could start thinking of suggestions for restaurants, bars, outdoor activities, etc. that would be great, and maybe if you're in town we could get together for a meal or a drink.

Thanks a bunch,
Susan

Late on October 25th, we received information about a nonspecific threat to the Enron Center. We communicated with law enforcement officials who found the threat unsubstantiated and without merit. Nonetheless we take all threats seriously and have increased the security presence at the Enron Center still further.

Once again, if you observe suspicious behavior, please call security at 3-6200.

NFL Reports, Player Updates
<<http://ad.doubleclick.net/ad/N1549.sportsline.com/B44933.5;sz=1x1;ord=1?>>
Latest NFL Player News

Terry Glenn <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1254&>>, WR NE - Matty Updated 12/05/01
Glenn did not report to practice on Wednesday. It is unclear if and when he will play for the Patriots again.

Eddie Kennison <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1296&>>, WR KC - Free Agent Updated 12/05/01

Kennison might see some limited action against the Raiders this week. Even if he plays extensively at some point, Kennison will have minimal Fantasy value.

Doug Brien <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1393&>>, K - Free Agent Updated 12/05/01

Brien was signed by The Colts. With Mike Vanderjagt nursing a sore back, Brien will be used on kickoffs and could see some occasional field-goal work. He will be an accurate, reliable Fantasy choice if Vanderjagt misses any playing time.

Dave Moore <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1369&>>, TE TB - Free Agent Updated 12/05/01

An MRI on Moore's hip was negative, but he may still miss Sunday's game against Detroit. The Bucs activated Mike Roberg from the practice squad as a precaution. Don't use Moore this week.

Anthony Thomas <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=235124&>>, RB CHI - Martin Updated 12/05/01

Thomas will test his strained hamstring in full-speed practice Wednesday. "We want to try to get him healthy," Coach Dick Jauron told the Chicago Tribune. "Hopefully by resting him for two weeks we'll have him back healthy. And James [Allen] has done an outstanding job in the meantime. If [Thomas] is not ready to go, we're comfortable with it." Monitor Thomas' progress before you make a final decision on starting a Chicago RB this week.

Ricky Watters <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1151&>>, RB SEA - Free Agent Updated 12/04/01

Watters is close to returning from a shoulder injury, according to the Seattle Post-Intelligencer. "The plan is (for Ricky) to practice this week. Whether he can play this Sunday, that's another question," coach and general manager Mike Holmgren said. It is unclear whether Watters will take back the starting job from Shaun Alexander, although we think it's unlikely he will. However, Watters could take away carries from Alexander, hurting his Fantasy value during the most important weeks of the season.

Jon Ritchie <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=12652&>>, RB OAK - Free Agent Updated 12/04/01

Ritchie is expected to miss Sunday's game against Kansas City, and perhaps more, due to a sprained ankle. He will be replaced at fullback by Zack Crockett, who often gets goal-line chances.

Keith Poole <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1779&>>, WR DEN - Free Agent Updated 12/04/01

Poole could miss his second straight game Sunday against Seattle due to bruised ribs. He's merely a marginal Fantasy player to begin with, so don't use him if there is any question whether he will play.

Rod Smith <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1779&>>, WR DEN - Free Agent Updated 12/04/01

gue=bige01&owner=14696.2&random=368&key=1220&>, WR DEN - Matty Updated 12/04/01
Smith is questionable for Sunday's game against Seattle due to his sprained left ankle. He will test the injury at practice on Wednesday, so monitor his progress before you make a decision on using him this week.

Dominic Rhodes <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=236986&>>, RB IND - Free Agent Updated 12/04/01

Rhodes is recovering from a strained right wrist and a low back bruise. However, The Indianapolis Star reports that he is expected to play in Monday's game.

James McKnight <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1288&>>, WR MIA - Free Agent Updated 12/04/01

McKnight suffered a rib injury in Sunday's game but is expected to play Monday. The Miami Herald reports that he will resume practicing on Wednesday.

Chris Chambers <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=235203&>>, WR MIA - Free Agent Updated 12/04/01

Chambers is expected to practice Wednesday and The Miami Herald reports that he will play Monday. Chambers is recovering from a rib injury he suffered in Sunday's game.

James Jackson <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=235220&>>, RB CLE - Hunter Updated 12/04/01

Jackson, still recovering from an ankle injury, might play in Sunday's game against New England. The Akron Beacon Journal reports that he was held out of last Sunday's game in an effort to get him healthy for the last five matchups.

Randy Moss <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=12576&>>, WR MIN - Russell Updated 12/04/01

Moss suffered a bruised right elbow during Sunday's game against Pittsburgh. The injury isn't serious, however, and he is expected to start in Week 13 against Tennessee.

Cameron Cleeland <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=12277&>>, TE NO - Free Agent Updated 12/04/01

Cleeland, who has missed several weeks due to an ankle injury, is expected to return this week against Atlanta. In fact, the Times Picayune is reporting that Cleeland is probable for the contest. If you need a tight end for Week 13, Cleeland is definitely an option, barring any setbacks.

Kris Mangum <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1672&>>, TE CAR - Free Agent Updated 12/04/01

Mangum's neck injury may be more serious than what was originally thought. He continues to be hampered by the injury, and will be evaluated on a day to day basis.

Tyrone Davis <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1499&>>, TE GB - Free Agent Updated 12/04/01

Davis was activated for Monday night's game against Jacksonville. He saw limited playing time, and won't make much of an impact from a Fantasy perspective.

Tony Banks <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1062&>>, QB WAS - Free Agent Updated 12/04/01

Banks suffered an ankle injury during Sunday's 20-10 loss to Dallas. However, he is expected to practice on Wednesday and will remain Washington's starting quarterback in Week 13 vs. Arizona.

Stephen Alexander <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=12181&>>, TE WAS - Free Agent Updated 12/04/01

According to the Washington Post, Alexander (broken fibula) is likely out for the remainder of the 2001 season. He suffered the injury during Sunday's 20-10 loss to Dallas, and will be replaced by Walter Rasby and Zeron Flemister.

Dave Moore <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1369&>>, TE TB - Free Agent Updated 12/04/01

Moore underwent an MRI on his injured hip on Monday, and coach Tony Dungy said that he could miss Sunday's game against Detroit. Todd Yoder would start in Moore's absence, but neither player has much Fantasy value outside of deeper leagues.

Kevan Barlow <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=235019&>>, RB SF - Tori Updated 12/04/01

Barlow, who missed Sunday's game against Buffalo due to a shoulder injury, is expected to return to practice on Wednesday. He'll play in Week 13 barring any setbacks, but he's not worth starting on your Fantasy team.

Terrell Owens <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1290&>>, WR SF - Martin Updated 12/04/01

Owens, who is still dealing with both foot and ankle injuries, will be in the starting lineup for the Niners on Sunday against St. Louis. Owens said he's still not 100 percent healthy but that he "did better than I expected" in Sunday's 35-0 win over Buffalo.

Jeff Thomason <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=1333&>>, TE PHI - Free Agent Updated 12/04/01

Thomason is still nursing a hyperextended knee, and will likely miss practice this week. He's doubtful for Sunday's game against San Diego.

Freddie Mitchell <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=235231&>>, WR PHI - Free Agent Updated 12/04/01

According to published reports, Mitchell is close to replacing Todd Pinkston as Philadelphia's No. 2 receiver. "They both play about the equal number of plays," coach Andy Reid said. "Every week we're giving Freddie more responsibility, and he's coming along very well. He's the No. 2 wideout [behind Pinkston] at that position right now." If you're in a deeper league and need a wideout, Mitchell may be worth taking a chance on.

Mike Vanderjagt <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=12783&>>, K IND - Hunter Updated 12/04/01

Vanderjagt is expected to play this weekend, according to published reports. He suffered a pulled back muscle in Sunday's game.

Daunte Culpepper <<http://football299.fantasy.sportsline.com/mp/mlink?script=players&league=bige01&owner=14696.2&random=368&key=133263&>>, QB MIN - Giggles Updated 12/04/01

Culpepper's status for this weekend's contest against Tennessee is uncertain at this time. "If his knee is in better shape, then he'll play," Green told the Minneapolis Star Tribune. "If it's not, then he probably will not." Todd Bouman, wh

o threw two late touchdowns against Pittsburgh, would start in Culpepper's absence.

Anthony Thomas <<http://football299.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=368&key=235248&>>, RB CHI - Martin Updated 12/04/01

According to the Chicago Daily Herald, Thomas should be back in the starting lineup this weekend. He will be limited in practice all week, but barring any setbacks he should be able to play against Green Bay.

Wesley Walls <<http://football299.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=368&key=1321&>>, TE CAR - Free Agent Updated 12/04/01

Walls, who suffered a hyperextended ankle on Sunday, should be able to return to practice by Thursday. He's questionable for Sunday's game at Buffalo at this point, but he should be able to play barring any setbacks.

Jerome Bettis <<http://football299.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=368&key=1152&>>, RB PIT - Giggles Updated 12/04/01

Bettis, the NFL's rushing leader, most likely will miss Pittsburgh's game against the New York Jets on Sunday because of groin and hip injuries. Bettis was listed Tuesday as doubtful, meaning there is a 25 percent chance he could play. Coach Bill Cowher said even that might be overestimating his chances. "We'll see how he is by the end of the week but, by listing him as doubtful, you can see where I'm heading," Cowher said. If Bettis can't play, he would be replaced by Chris Fuamatu-Ma'afala and Amos Zereoue. Fuamatu-Ma'afala had 12 carries for 74 yards Sunday.

Chris Chandler <<http://football299.fantasy.sportsline.com/mp/elink?script=players&league=bige01&owner=14696.2&random=368&key=1004&>>, QB ATL - Free Agent Updated 12/04/01

According to Head Coach Dan Reeves, Chandler's injured ankle will be evaluated in practice on Wednesday. "According to the doctor, we've got a chance with Chris this week," Reeves said. "There wasn't a lot of swelling. It's going to be sore. Wednesday is going to be the key for him." Michael Vick would start against New Orleans if Chandler can't go.

More Updates <<http://football299.fantasy.sportsline.com/mp/elink?script=pro-player-updates&league=bige01&owner=14696.2&random=368&start=30&>>

Teams, Player News

<<http://ad.doubleclick.net/ad/N1549.sportsline.com/B44933.5;sz=1x1;ord=1?>>

Frank Player News

Jimmy Smith <<http://football299.fantasy.sportsline.com/mp/elink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1236&>>, Active WR Updated 11/30/01

Despite his recent troubles off the field, Smith is still one of the best receivers. Look for him to catch some passes this week and be a solid No. 2 wideout.

James Thrash <<http://football299.fantasy.sportsline.com/mp/elink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1859&>>, Reserve WR Updated 11/30/01

Thrash suffered a bruised kneecap during Thursday's game against Kansas City. "We really don't know what that is," coach Andy Reid told the Philadelphia Inquirer. "He hurt it earlier in the game and went back out. We'll check on that." Thrash had five catches for 65 yards in Philly's 23-10 victory.

Brett Favre <<http://football299.fantasy.sportsline.com/mp/elink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1028&>>, Active QB Updated 11/29/01

Favre practiced Wednesday and reported improvement in the sore back that had ham

pered him after Week 11. He is listed as probable for Monday's game against Jacksonville, and you shouldn't be afraid to start him in your Fantasy league this week.

Garrison Hearst <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1164&>>, Active RB Updated 11/29/01

Hearst had 106 yards rushing and two touchdowns against Indianapolis on Sunday. Hearst has had three consecutive solid weeks, and is proving his worth as a Fantasy player. Buffalo's defense has been pretty shaky against the run, so starting Hearst in Week 12 is advisable.

Terance Mathis <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1189&>>, Reserve WR Updated 11/29/01

Mathis has been a huge disappointment this season, catching only 30 passes for 315 yards. He'll have no better luck against CB Aeneas Williams and the Rams in Week 12, so be sure to reserve him.

Isaac Bruce <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1294&>>, Active WR Updated 11/29/01

Bruce may not be having his best statistical season, but he's still worth starting on a weekly basis. He has four touchdowns in his last three games vs. Atlanta, so be sure to get him into your starting lineup.

Bill Schroeder <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1593&>>, Active WR Updated 11/29/01

Schroeder seems to have fallen out of favor with Brett Favre in recent weeks, and his numbers have reflected it. However, his potential to post solid numbers is much too hard to ignore for most Fantasy owners, so taking a gamble that he and Favre will get back on the same page is advisable.

Maurice Smith <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=188183&>>, Reserve RB Updated 11/29/01

Smith is dealing with both neck and ankle injuries, but he was able to practice on Wednesday. He has been losing carries to Bob Christian in recent weeks, however, and playing against a tough Rams' defense doesn't bode well for his chances for Fantasy success.

Olandis Gary <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=133291&>>, Reserve RB Updated 11/26/01

The Broncos placed Gary on injured reserve Monday, and signed Karon Coleman to the active roster. This officially ends Gary's season, as he suffered a broken leg on Thursday. Drop him from your roster.

Jake Plummer <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1003&>>, Reserve QB Updated 11/25/01

Plummer had a decent outing on Sunday, posting 241 yards and a touchdown against San Diego. Plummer, who also threw two picks, is only a reserve Fantasy quarterback at best.

Corey Dillon <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1681&>>, Active RB Updated 11/21/01

Definitely get Dillon into your active lineup as he goes up against the Browns on Sunday. He has a great career record against Cleveland (678 rushing yards, five rushing TDs in five games). Dillon should remain in your active lineup week in

and week out in any league.

Titans <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=29&>>, Active DT Updated 11/06/01
Linebacker Randall Godfrey suffered torn cartilage in his left knee during Sunday's win over Jacksonville. He'll undergo arthroscopic surgery on Tuesday and will be listed as questionable for Monday's game against Baltimore.

Dorsey Levens <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1107&>>, Reserve RB Updated 10/12/01
Levens (back) is probable for Sunday's game against Baltimore. He's got no real value as a Fantasy player at this point.

David Akers <<http://football299.fantasy.sportsline.com/mp/mlink?script=/mp/player-news&league=bige01&owner=14696.2&random=368&key=1666&>>, Active K Updated 12/11/00
Akers was 5-of-5 in PATs on Sunday, but didn't get an opportunity to kick a field goal against the Browns. Akers has been a real Fantasy sleeper this season, but won't do owners much good next week as the Eagles take their bye week during some league's Fantasy championship game.

Hi.

The Market Risk Meeting has been scheduled for today at 12:30 p.m. Houston Time.

The dial in information is as follows:

Dial In Number: 203-719-0070

Freephone within the U.S.: 877-315-5218

Pin Number: 910410

Mercy, please reserve a conference room for those participants in Houston.

Thanks.

jm

12:24 28Nov2001 RSF-WRAPUP 1-Enron near collapse after Dynegy pulls out

By C. Bryson Hull

HOUSTON, Nov 28 (Reuters) - Enron Corp. <ENE.N> hovered on the brink of one of the biggest corporate collapses in U.S. history on Wednesday as its rescue by rival Dynegy Inc. <DYN.N> fell apart.

Dynegy accused Enron of breaching the representations it made when the takeover agreement was negotiated on Nov. 9, invoking an escape clause that let it pull out of the deal.

Shares of Enron, recently ranked No. 7 on the Fortune 500 list of the biggest U.S. companies, had already lost most of their value and all three major credit rating agencies had slashed their ratings on Enron's bonds to junk status by the time Dynegy made its announcement.

The loss of investment-grade credit forces some \$3.9 billion in debts to off-balance sheet partnerships to come due immediately, a major problem for a company that has spent most of the \$5.5 billion it sought in recent weeks to stay afloat.

It became increasingly clear, as Dynegy sought to renegotiate the deal, that Enron's complex and often indecipherable financial books were becoming a sticking point, sources close to the negotiations said.

"While it is regrettable to see a leading industry player in difficulties, this does not reflect a failure of the merchant energy business," Dynegy Chairman and Chief Executive Officer Chuck Watson said in a statement.

Dynegy said it would exercise its option to buy Enron's Northern Natural Gas Pipeline with the \$1.5 billion it and partner ChevronTexaco <CHV.X> put into the deal.

A bad sign came earlier on Wednesday, as energy traders said operations had stopped at Enron's once highly lucrative online trading system, EnronOnline. The unit accounted for up to 90 percent of Enron's earnings, and was considered the jewel of the trading franchise that Dynegy coveted most in its planned \$9.3 billion all-stock takeover.

Enron, which touted itself as an agile risk manager, found its credit and debt had spiraled out of control as a series of partnerships designed to hide debt off of its balance sheet caused investors to lose faith in recent weeks.

The partnerships, which included top Enron executives and are the subject of a U.S. Securities and Exchange investigation, provided financing in exchange for guarantees that Enron's stock stay above certain levels and its credit remain investment-grade.

Enron shares plunged \$2.95, or 71.3 percent, to \$1.19, before the New York Stock Exchange halted trading ahead of Dynegy's announcement. They have fallen more than 98 percent this year.

The stock peaked at \$90.56 in August 2000, riding high on the cresting wave of the technology boom after Enron took its trading outfit online and promised to bring its business model into the broadband communications arena.

"They (Enron) entrapped the sophisticates," said Robert Stovall, senior strategist at Prudential Securities, referring to what was once an almost fawning admiration for Enron by institutional investors. "I think this is going to become a classic case."

Stovall, with nearly 50 years of working on Wall Street, said he could not recall any previous corporate unravelling that matches that of Enron.

"You would have to go to pre-SEC days for that," he said, referring to the creation of the U.S. Securities and Exchange Commission in the aftermath of the stock-market crash of 1929.

My apologies if this has been done, but I'm in process of assembling list of products that UBS will be trading. If this list has been compiled, please direct it to me.

I'm interested in getting the greatest granularity possible breaking it out by VAR portfolio name, trader, trading book, commodity, instrument, location, tenor, relative liquidity for each instrument expressed in contract/day (i.e. could impact holding period for VAR) and best risk mitigator. (Regarding best risk mitigator, I'm not looking for liquidating position comments, but rather best hedge given curve location.) This will help in directing correlation efforts for VAR. See attached spreadsheet for suggested format.

Thanks,
Frank

Following last week's meeting, here is my recommendation on how to proceed with SCE.

1. Form Enron Negotiation Team

My recommendation is to use the same team we used with PG&E + Jeff Dasovich. My understanding was that Lisa M. was the lead negotiator - I would not change this. Jeff should only be there to make introductions.

2. Meet & Confer (10/29)

Sue Mara and Jeff Dasovich will listen and report back to everyone on what happens.

3. Reformed Stipulation

I would propose that we take a wait and see approach to this document. Based on Dasovich's idea to get together with SCE on Thursday, maybe let this ride.

4. Meeting

My understanding is that (Jeff D. please correct) SCE can meet with us this Thursday. Can everyone make it that needs to be there? Probably meet in California. We should put the laundry list on the table.

Please let me know what else we need to discuss or if anyone disagrees.

Thanks,

Jim

It is that time of year.... Please complete your list of accomplishments by the end of November.

Also, please complete your 2002 Objectives by December 14. Your objectives will need to outline your specific marketing plan for each customer, project and idea you may have for adding/increasing value to Transwestern in 2002. As discussed earlier, we will get together in mid-December to review account loads to see if we need to do any shifting. Your 2002 Objectives will be helpful in determining whether your load is heavy, light or just right.

I will be happy to visit with each of you individually if you have any questions or would like to discuss these items. :>)

Thanks,
Kim.

This is a notice to inform you that the server where your Outlook mailbox resides is scheduled for an outage tonight. Your mailbox will be temporarily unavailable starting anytime after 11pm and may continue to be unavailable until 1 a.m., when all server maintenance work have been completed. Outlook Web Access (OWA) will also be unavailable during this time.

Blackberry users: Message delivery may be delayed for a few minutes.

If you have any questions, please call the Resolution Center at x31411.

June 8, 2001 5:00pm through June 11, 2001 12:00am

ECS to ECN Network Interconnection, June 9th 2001 POSTPONED
This is a notification that the Enron Corp. I/T Networks team will be connecting the new building network infrastructure located in Enron Center South (ECS) to the existing Enron Center North (ECN) backbone network. While this activity is not expected to produce a disruption to network services, this notice is designed to alert the organization to our activities. No network hardware or systems are anticipated to be shutdown. The actual physical interconnection of the networks will be performed in the EB 34th floor Data Center.

Interconnection activities are scheduled to occur the evening of June 9th 2001 starting from 7:00 p.m.(CT) and completing around 11:00 p.m. (CT). Application testing activities will begin at 11:00 p.m. (CT) once all network testing has completed.

If you have any further questions, please contact Pete Castrejano at 713-410-0642 for more information.

Subject: Available Job Opportunities - May 30, 2001

Position	Department	Hiring Manager
Information Session		
Analyst/Associate	Origination	JonAlan Page
Monday, June 4 in Mt Hood at 11:00 am		

If you would like to be considered for either of these positions, please let Amy FitzPatrick know by close of business on Tuesday, June 5, 2001.

ANALYST/ASSOCIATE - TRANSACTION GROUP, WEST POWER ORIGINATION

Candidate will be part of the West Power Origination group, focused on creating and monetizing structured energy transactions in the western U.S., including power plant development, acquisitions and divestitures. Candidates will become an integral part of the deal teams involved in all aspects of marketing, structuring, negotiation and execution of large transactions.

Role and Essential Skills

- ? Primary responsibility will be to accurately model economic and technical aspects of transactions.
- ? Candidates will interact with many of Enron's functional areas, including Tax, Legal, Accounting, RAC, Finance, Technical Services and Structuring.
- ? Extensive opportunities for commercial exposure and customer interaction will be available.
- ? Work environment is fast-paced and unstructured. Successful candidates have initiative, are team-oriented, flexible and highly motivated.
- ? Excellent quantitative skills a must. Will be required to conduct due diligence and provide economic analysis for transactions.
- ? Extensive background in modeling assets, financial structures and commodity positions would be a benefit.
- ? Experience with ENA deal approval process would be useful.
- ? Knowledge of power generation and power markets would be helpful.

Here is the information that you guys had asked about last week when we discussed WSCC coal. I added the railroads to the map and pulled some numbers for utilization and O&M costs for each of the plants we discussed. If you have any other questions let me know.

FERC Enacts Major Constraints=20

on Wholesale Market

By Will McNamara
Director, Electric Industry Analysis

AEP, Entergy Corp. and Southern Company told by FERC to charge cost-based prices instead of market-based prices for wholesale spot transactions.=20

[News item from Reuters] The U.S. Federal Energy Regulatory Commission (FERC) voted 3-1 last week to adopt new rules to measure market power, as a condition for approving mergers and granting utilities the right to trade power in the wholesale market. FERC commissioners said the new test would improve a system that allowed a meltdown to take place in the California market last winter, when wholesale power prices soared to record highs amid tight supplies. FERC commissioners agreed to produce a new market power test based on supply margin assessments, which examines a company's importance in serving peak electricity loads. "If you're big enough to control the market at the time we look at it, you'll have mitigation put on you," said FERC Chairman Pat Wood.=20

Analysis: Many participants in the wholesale sector of the energy industry are still reeling from FERC's new ruling, which may have slipped past some radar screens considering that it was issued right before the long holiday weekend. This is a mammoth ruling on FERC's part, however, and it holds tremendous impact for those companies that increasingly find the lion's share of their profits coming from wholesale transactions. In addition, state regulators have also started gauging the impact of the ruling on retail rates, which some utilities may seek to increase as a way to compensate for shrinking profits in their wholesale operations. While FERC has presented this ruling as an attempt to circumvent on the national level problems experienced in the California market, the new limits on wholesale transactions can also be seen as another example of the "big stick" that the commission is using to force utilities into participating in regional transmission organizations (RTO). Further, the ruling is another striking indication that Chairman Wood is following through with his promise to monitor rampant wholesale markets while still attempting to support competition. The objective represents a tall order, and the new ruling from the commission is certain to prompt intense resistance among companies involved in wholesale trading.=20

Put into a nutshell, FERC has ruled that some companies can no longer charge unregulated, market-based rates for spot market wholesale transactions. Instead, companies identified as having market power and that aren't part of an approved RTO must charge cost-based prices for power that isn't committed in a long-term contract, and publicly disclose those cost-based prices. = Columbus, Ohio-based American Electric Power (NYSE: AEP), Atlanta-based Southern Company (NYSE: SO) and New Orleans-based Entergy Corp. (NYSE: ETR) have been singled out as case studies on which FERC will be immediately applying its new standards for wholesale transactions. Note that Mirant Corp., a former subsidiary of Southern Company, has also been identified as having to submit information to FERC in order to gauge its level of market power separate from its former parent. The commission has essentially determined that these three utilities hold an unacceptable level of market power in the areas in which they operate. Under FERC's new market power "test," a gener=

ator or marketer is viewed as having too much market power if its electricity is "pivotal" during peak demand, which enables the company to demand a price above competitive levels. Regional transmission constraints will also be considered now as a measurement of a company's market power. This is a dramatic departure from previous standards, by which (under one of FERC's main criteria) a company that supplied less than 20 percent of the power needed in a particular region was freed from rate regulation on the federal level. =20

There are some important exceptions to the ruling. First, FERC has not eliminated the utilities' ability to charge market-based rates in areas where the grid and markets are controlled by a FERC-approved RTO. This is significant, as I will expand upon subsequently, because it indicates that there are secondary objectives in FERC's new ruling. In addition, the current ruling only impacts short-term sales transactions in which these three utilities are involved. In other words, long-term contracts that the three companies may have previously established or will establish in the future are not impacted by the ruling. However, the three companies named in the ruling will have to post pricing information related to long-term contracts, and FERC has retained the possibility that further price mitigation for long-term contracts may be necessary. Also note that the Western market, which already is under a price mitigation policy that FERC imposed in June, was not included in the new ruling. =20

The three utilities named in the ruling now have 15 days to submit proposals to FERC outlining a transition to charging cost-based wholesale rates for all power not currently committed to a buyer. Specifically, the utilities will have to post on their open-access same-time information systems (OASIS) the incremental cost of producing the uncommitted power during each hour in a 24-hour period. Moving forward, the price that the utilities can charge for non-committed power on the spot market will be the difference between their cost of production and the bid of more expensive power in the region that their power displaces. The new cost-based rates must be administered by an independent third party. =20

The new pricing standards revert back to an older, cost-based technique known as "split the savings." The methodology for this standard can get rather complicated, but essentially under FERC's new ruling the three companies identified will have to post their cost-based, incremental costs for spot power into the OASIS system for viewing by potential purchasers. Purchasers who want to make a bid will post their decremental energy bid for not producing or buying the power on their own. The final price for the transactions will be the split between the seller's incremental cost and the buyer's decremental bid. For instance, if Southern Company bids its incremental cost at \$20/MWh and a purchaser bids its decremental cost at \$30/MWh, the transaction price would be \$25/MWh. Assuming a midnight-to-midnight trading day, sellers would have to submit their incremental bid by noon on the previous day and buyers would submit their decremental bids by 6 p.m. What this potentially creates is an "information advantage" for buyers who have six hours to evaluate and respond to the incremental bids from some sellers. Some of the drawbacks to this system are that it requires both parties to post price information that may not be readily available and it potentially allows the purchaser to game the system by having access to the seller's original incremental bid and competing around the seller's price. =20

Note also that in a separate development FERC simultaneously opened a broad investigation under Section 206 of the Federal Power Act to apply the new market-based-sales policy to all U.S. sellers nationwide. What this means is that, although only three utilities are mentioned in this initial order, it is expected that FERC will continue to take steps to constrain what it believes to be erratic wholesale markets. Reportedly, some 30 companies are awaiting similar reviews by FERC to determine if the commission believes th-

they exert market power. The 2006 investigation reportedly also requires power providers with market-based sales authority to amend their tariffs within 60 days to provide FERC with open-ended authority to order refunds if the commission determines that market manipulation has occurred.

I made a previous reference to the "big stick" that FERC is carrying related to participation in RTOs. Remember that a few months ago, Chairman Wood had threatened to deny utilities that refused to join an RTO the benefits of charging market-based wholesale rates and swift approvals for merger applications, advantages that the chairman equated with the "new world" of the deregulated energy market. With this in mind, note that only Southern Company, Entergy and AEP are included in the present ruling (although it may be subsequently expanded). Southern Company and Entergy in particular have exhibited some resistance in following FERC's consolidation mandate regarding national RTOs, so it is probably not a mere coincidence that these three utilities have been singled out. This must be particularly painful for Southern Company, which gains a good part of its profits from wholesale trading and previously expressed plans to double the size of its generation assets over the next five years.

Interestingly, Commissioner Linda Key Breathitt represented the single dissenting vote in the ruling. Breathitt's concern was that the ruling had been pulled together too quickly and not enough time had been provided to evaluate the impact on wholesale markets. This issue will undoubtedly be contested, and to a certain extent the utilities impacted by the ruling appear to have been caught off-guard. AEP, Entergy and Southern Company all issued statements to the effect that they were uncertain about the extent to which the ruling would impact them, and that they were reserving the right for possible litigation.

Moreover, to summarize the commission's rulemaking, I think there are a handful of important points that should be considered. First, the ruling illustrates the steps that FERC is taking to revoke market-price authority that was for the most part unrestricted prior to the time that Pat Wood assumed his post as chairman. Second, FERC is implementing cost-based prices on the spot market only, and in only very defined circumstances. However, this could be an indication that the commission may extend cost-based pricing to other wholesale transactions, including long-term contracts, at a later time. Third, the "split the savings" cost-based formula could become fraught with its own problems. Its requirements are rather complex and it offers the potential to give power purchasers a market advantage on the spot market over power sellers, which will now be required to post incremental costs in the bidding process. Finally, one of the inherent drivers of FERC's new ruling is its desire to have large utilities join the RTOs that the commission has approved. It is very significant that the new ruling immediately impacts AEP, Entergy and Southern Company, utilities that have not only been deemed by the commission to have market power in their regions but which have also not yet joined an approved RTO. However, even though only three companies are immediately impacted by this ruling, it should not be overlooked that the ruling holds impact for the market as a whole as other sellers now will gain important pricing information about the major suppliers in certain areas. Thus, overall this is a very significant ruling and one that could substantially change the manner in which transactions in the wholesale power market are conducted.

Thanks for your interest in the Assistant Trader positions. We have had sixteen people express interest in this role. Based on the criteria listed below, you have been selected to be interviewed for this role.

Been in a trading or scheduling position for at least one year.
Consistently received high performance ratings through the PRC process.
Has consistently pursued a trading role as a career objective.

We are hoping to hold interviews during the next two days and make our decision by the end of the week. The interviews will be conducted by members of the trading team. Please send me an e-mail to let me know when you WON'T be available during the next few days. You will be going through three separate half hour interviews with Crandall/Scholtes, Richter/Mallory, and Belden/Swerzbin. Thanks.

Regards,
Tim

Paul,

Deal # 1022414 with CMS Marketing, Services, & Trading for Sep production gas sales on FUGG has you listed as the deal maker or contact. Both CMS Marketing, Services, & Trading and CMS Field Services, Inc. Settlements groups believe this deal was actually made with CMS Field Services, Inc. Therefore, I believe this deal needs to be changed to reflect the correct counterparty name. Please advise or change as necessary.

Furthermore, deal # 1020432 for Sep production gas sales on FUGG has the same problem. I cannot determine whether you are the deal maker on this deal, but it requires a similar change to CMS Field Services, Inc. Both deals are Denver deals.

Please let me know if you have questions or when this is complete.

Sean - Please add anything where possible.

Thank you,
Scott Dozier

Late on October 25th, we received information about a nonspecific threat to the Enron Center. We communicated with law enforcement officials who found the threat unsubstantiated and without merit. Nonetheless we take all threats seriously and have increased the security presence at the Enron Center still further.

Once again, if you observe suspicious behavior, please call security at 3-6200.

As you know, Enron has signed a merger agreement by which Dynegy will acquire Enron. We expect the transaction to close following shareholder and regulatory approvals and various conditions to closing.

Even though Enron has entered into this agreement, U.S. and foreign antitrust laws require that Enron and Dynegy continue to operate independently of each other. In particular, to the extent that Enron and Dynegy are competitors in various businesses or markets, their respective activities must be undertaken at arm's length until the transaction has closed. Therefore, for antitrust purposes you should treat Dynegy as you would any other unaffiliated company notwithstanding the merger agreement.

In addition, all information, documents and communications related to the merger between Enron and Dynegy should be coordinated through and approved by Mark Muller, Lance Schuler, Robert Eickenroht, Mark Haedicke, Rob Walls or Greg Whalley of Enron. It is absolutely critical that this procedure be maintained. To the extent that information is required to be disclosed to Dynegy under the merger a

greement, then such disclosure should be approved by one of the foregoing individuals.

If you have any questions concerning this notice, please contact Lance Schuler (713/853-5419), Robert Eickenroht (713/853-3155), Mark Haedicke (713/853-6544) or Rob Walls (713/646-6017). Thank you for your help in this matter.

Strategic Synopsis

September 21, 2001

10:30 AM

? The presidential address last night confirmed that a major military mobilization is under way and that a long campaign is ahead, extending well beyond Afghanistan. Not surprisingly, the speech did not clarify the timing of the attack.

? The president warned the Taliban that unless it handed over Osama bin Laden and the leaders of his al-Qaeda terrorist network, it would face devastating military action. "They will hand over the terrorists, or they will share in the same fate," Bush told the US Congress. So far, the Taliban are refusing to comply.

? As such, U.S. military forces will strike in Afghanistan as soon as a target of opportunity presents itself. As the President himself noted in his speech last night, some of the special forces operations will not be visible to the public, while other steps such as airstrikes will be dramatic and unmistakable.

Trying to figure out the precise timing of specific types of strikes is probably impossible at this point. However, we safely state the following:

o The President set the stage for a long conflict last night, and equity markets are anticipating significant economic pessimism. Consumer confidence is likely to worsen if additional terrorist attacks are made against U.S. targets.

o Our sources indicate that Bush spoke at length with Saudi Crown Prince Abdullah this week, and Abdullah agreed to lower oil prices. No specifics were discussed. Preliminary information suggests that Saudi Arabia is carrying out extra liftings in the second half of September and moving crude cargoes closer to market.

o When the initial attack comes against Afghanistan, oil markets will likely see confirmation that no threat to crude oil supply is taking place. But speculation about further strikes against other terrorist-sponsoring states should maintain a degree of uncertainty in the market.

o The war against terrorism will eventually have to deal with Iran and Iraq; both are major OPEC producers. Persuading Iran to cooperate is more likely to involve diplomacy than force. Some Administration officials, led by Deputy Defense Secretary Paul Wolfowitz, are pushing for a move against Baghdad. So far, this group has been overruled by advocates of a more cautious approach, who realize that attacking Iraq will seriously undermine Arab support for the US.

o Washington also has to be concerned with stability in Pakistan, where much of the population (including senior military and intelligence figures) supports the Taliban.

o Terrorist retaliation to the U.S. attacks appears to be likely. Attempts to strike infrastructure targets, including energy facilities both here and overseas, are expected.

o On the ground today, heavy fighting is raging in northern Afghanistan as opposition forces attack Taliban troops. The Northern Alliance forces are taking advantage of US pressure on the Taliban to recapture key areas and avenge the recent death of their leader.

Hey Guys - Well, I had to learn some Cod Scheduling fast this afternoon, (we really do need to exchange new cell phone numbers :-)). Anyway, tag #40700 was incorrect and BPA called about 3:45. I cancelled that tag and replaced it with tag #40716

I hope what I did was okay, let me know if I should have done it differently. On the NW sheet that tag number is highlighted in yellow in case there is a problem. I assume something needs to be corrected in the preschedule workspace, but I don't know what it is, so I will leave it to Cara or Donald to explain it to me in the morning. Thanks again, Serena

Shirley,

Thanks for the update. While I am disappointed about the delay, I appreciate you and Vince staying on top of it for me and keeping me informed of what is happening. I guess I will just have to wait my turn with the others going before the court and hope that I will eventually be paid.

I hope you and Vince have a Merry Christmas and Happy New Year despite all that is going on around you at Enron.

Sincerely,

Deborah

At 11:44 AM 12/19/01 -0600, Crenshaw, Shirley wrote:

Deborah:

Just an update. I understand the check was entered into the system, but then has to go before the bankruptcy court for approval. I think you will eventually get it, but there is no time frame. They are paying the invoices to keep the company running first.

I know you wanted this for Christmas and I really apologize for this, but I think you will get it sooner than later, hopefully.

Have a very Merry Christmas and I will keep you updated as I learn things.

Regards,

Shirley Crenshaw

eSource Presents Lexis-Nexis Training

Basic

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com.
We will talk about news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Clinic:

November 6	1:00 - 2:00 PM	EB572
------------	----------------	-------

Due Diligence

This session will focus on the specific company, public records, and other sources available on Lexis-Nexis that help you find all possible aspects of a company's business and strengths or liabilities.

Attend our Lexis-Nexis Due Diligence Clinic:

November 6	2:30 - 4:00 PM	EB572
------------	----------------	-------

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

* Please bring your Lexis-Nexis login ID and password. If you don't have one, a guest ID will be provided.

* * *

eSource presents free Lexis-Nexis Online Training

Using Placeware, an interactive web learning tool, you can participate in this training session from anywhere in the world.

Basics

Lexis-Nexis Basic is geared to the novice or prospective user. You will learn the basics of getting around Nexis.com and of the news and company information available on Lexis-Nexis.

Attend our Lexis-Nexis Basics Online Clinic:

November 14 10:00 AM Central Standard Time

Please RSVP to Stephanie E. Taylor at 713-345-7928 or stephanie.e.taylor@tcpolice.org.

We will email instructions for Placeware to you.

* Note: If the time scheduled is not convenient to your time zone, please let us know so we can schedule other sessions.

* * *

eSource Presents Dow Jones Interactive Training

Introduction to Dow Jones Interactive: Personalizing/Customizing DJI and Custom Clips

You will learn how to tailor DJI to display information that is most helpful to you.

You will learn how to create your own Personal News page to view headlines from your chosen publications and your custom clip folders.

Custom clips can be set up to automatically send to you important news about any key topic or company information that affects your business decisions.

Attend one of our Dow Jones Interactive Basics Clinics:

November 14 1:00 - 2:00 PM EB560
November 14 3:00 - 4:00 PM EB560

Advanced

Learn how to be more efficient on Dow Jones Interactive. Put some power tools to work for you.

Learn how to employ codes, use search history, and customize. Hands on time is provided.

Attend our Dow Jones Interactive Advanced Clinic:

November 14 2:00 - 3:00 PM EB560

Seats fill up fast! To reserve a seat, please call Stephanie E. Taylor at 5-7928

.

The cost is \$100.00 per person.
No-shows will be charged \$200.00.

Check the eSource training page at <http://esource.enron.com/training.htm> for additional training sessions and vendor presentations.

STRONG BUY

Target Price: 54.00 (US\$)

Dynegy Inc. (DYN)

ENE Deal Shows Risk Coverage & Est & Valuation Upside

Summary

After the close on Friday, DYN confirmed that it would acquire Enron (ENE, 8.63, Strong Buy) for 0.2685 DYN shares plus assumption of debt and an equity infusion of \$2.5 billion. This values ENE at \$10.40 per share based on DYN's Friday close.

Our initial analyses show the merger to be additive to pro-forma '02 eps for DYN by 25% to \$3.25-\$3.30 vs our current estimate of \$2.55. We estimate the deal multiples as about 7x '02 eps, 3.2x '02 cash flow, 0.85x book value and 5x EV/EBITDA based on our revised '02 estimates for ENE.

We would note that DYN has projected a pro-forma '02 of \$3.40-\$3.50 per share before cost savings and synergies.

We expect the deal to close in 9-12 months pending reviews by the SEC, FTC, FERC and state PSCs. Despite the size of the combined company, we do not expect major divestitures or closing issues because of the lack of asset concentration and the inherent competitiveness of the natural gas and power marketing business.

In a report dated Nov 5, we valued ENE at \$31 per share. In our view, the deal valuation includes a differential of \$20 per share or \$17 billion to account for ENEs related party and accounting issues. Because these issues threatened ENEs core businesses, the timing and valuation of the deal for DYN is extraordinarily attractive. We consider alternate bids for ENE to be possible under these circumstances.

We expect DYN and other energy merchants to benefit from the removal of risk that ENE would be downgraded below investment grade or file for bankruptcy protection.

Pending additional information from conference calls, analyst meetings and other deal related filings; we are maintaining our reported eps ests for DYN of \$2.10 for '01 and \$2.55 for '02. Our ENE ests are \$1.80 for '01 and \$1.60 for '02. These estimates assume the deal closes in 4Q'02.

10n 11/09/01 the S&P 500 index closed at 1120.31.

2Economic profit trend.

Dynegy is a wholesale and retail energy provider with operations in natural gas, natural gas liquids, coal, and electricity throughout the U.S. and Europe.

Viewpoint Continued

We maintain our Strong Buy rating for DYN with a target price of \$54. We anticipate growth rate and valuation benefits for DYN that will result in increasing our estimates and target price as the deal moves closer to closing.

DYN will hold a conference call on Monday, November 12 at 9am EST. The call in number is 888-603-9706.

BUSINESS HIGHLIGHTS

Enron Global Markets - Coal and Emissions Trading
The first Enron Online synfuel trade occurred this past week, establishing Enron Online as the only online marketplace for synfuel. The purpose of bringing synfuel on EnronOnline is to provide market transparency between the coal/synfuel spread.

The coal cash book, which began trading only two months ago, has traded over 2 million spot tons. The fundamental purpose of this book is to capture short term market discrepancies, while also adding liquidity to the spot market to further long term trading and marketing of coal.

Enron Energy and Operational Services - ENA Solid Fuel Initiative

ENA started development of a Coal Initiative late last year to support the electricity trading desk and to provide Enron with a hedge in the event that the cost of natural gas continues to escalate above current long term projections. Because of the culture shock associated the use of the words 'Enron' and 'coal' in the same sentence, consideration was given to changing the name to DNG (Dense Natural Gas); however, we went with Solid Fuel Initiative.

This initiative is developing multiple sites throughout the country where ENA feels there is the greatest opportunity for long term corporate benefit. The primary areas are Texas, Florida, southeastern Ohio and the central Rocky Mountain Area. There are 2 principal areas currently being aggressively pursued: Brownsville, TX and Brighton FL. In Brownsville, the Team secured formal Owner approval to lease a 600 acre site near the Brownsville Ship Channel. This approval will allow the formal permitting activities to proceed without delay.

A 500 MW facility is being considered for Brownsville. As conceptualized, it will consist of two - 250 MW (net) CFB units (Circulating Fluidized Bed) Boilers. The boilers will be fired by petroleum coke (petcoke) and use a technology that will generate electricity in the most environmentally friendly way currently possible. One of the advantages of locating this facility near Brownsville is that it remains a steady growth area and there is already serious interest by others to take substantial initial base load capacity. There is further synergy with other developing projects in the area that could lock down additional base capacity. As stated the plant is initially 500 MW, but will be designed to be expanded to a 1000 MW facility.

The EEOS team is starting to grow and currently includes Hilda Akin & Cheryl Kent, Project Admin Assistants, Bill Fox as PEM, and Paula Solomon as PCM. As the project develops there will be more team members required. In addition, as the Florida opportunity develops we plan to establish a separate team.

eSource

eSource, Enron's research group, recently posted on its website a Forrester report as well as analyst reports for various industry and companies. These reports are free and available to all Enron employees on the eSource Hot Topics page at http://esource.enron.com/hot_topics.asp <http://esource.enron.com/hot_topics.asp>. To date, over 1,600 employees have downloaded "Spending Wisely on Private Hubs", a report valued at \$2,000. Over 1,100 employees to date have viewed the analyst reports, provided by Investext. The reports, which are updated continuously, are presented in folders by company and industry. New folders are being added upon request. To submit a suggestion for a new folder, please complete the suggestion form at <http://esource.enron.com/suggestion.asp> <<http://esource.enron.com/suggestion.asp>>.

Watch for the new eSource bulletin, The Source. It will feature frequently requested searches, tips on finding information, new products, services, and events.

Meanwhile, to further fulfill Enron's information needs, eSource has arranged for analysts and bureau chiefs of various organizations and publishing houses to offer seminars to Enron employees.

Enron Freight Markets

EFM signed a firm contract with Streamline Shippers Association last week to provide truckload capacity for one-year with EFM's option to extend the contract for up to an additional year. Streamline transloads international shipments that enter the U.S. through the ports of Long Beach and Los Angeles. Streamline then consolidates the shipments into full truckloads destined to the major population centers throughout the country. EFM will begin moving shipments to northeast destinations this week.

IN THE NEWS

We are pleased to announce that Sally Beck has been named Chief Operating Officer for Enron Net Works. She will join Greg Piper, President and Chief Executive Officer and Mark Pickering, Chief Technology Officer in the Enron Net Works Office of the Chair.

In her current role as Managing Director for Enron Net Works, Sally heads up Enron's Global Risk Management Operations. She brings more than 20 years professional experience to Enron, joining the Company in 1992. She graduated from the University of Texas at Austin with a B.B.A. in Marketing and an MBA with a concentration in Finance.

WELCOME

New Hires

To book this week's special rates for Hilton Family Hotels, visit and book at <http://airmail.continental.com/cgi-bin5/flo?y=eD6h0BevJT00w0jWG0AI>

Special rates apply only for the dates listed at each hotel and are subject to availability. Check hilton.com for specific dates at each Hilton Family Hotel. Or call at 1-800-774-1500 and ask for Value Rates. Restrictions apply to these rates.

CO.O.L. TRAVEL SPECIALS RULES:

Fares include a \$37.20 fuel surcharge. Passenger Facility Charges, up to \$12 depending on routing, are not included. Up to \$2.75 per segment federal excise tax, as applicable, is not included. Applicable International and or Canadian taxes and fees up to \$88, varying by destination, are not included and may vary slightly depending on currency exchange rate at the time of purchase. For a complete listing of rules please visit:

<http://airmail.continental.com/cgi-bin5/flo?y=eD6h0BevJT00w0mda0Ay>

ALAMO RENT A CAR'S TERMS AND CONDITIONS:

Taxes (including VLF taxes up to US\$1.89 per day in California and GST), other governmentally-authorized or imposed surcharges, license recoupment fees, fuel, additional driver fee, drop charges and optional items (such as CDW Waiver Savers(R) up to US\$18.99 a day,) are extra. Renter must meet standard age, driver and credit requirements. Rates higher for drivers under age 25. Concession recoupment fees may add up to 14% to the rental rate at some on-airport locations. Up to 10.75% may be added to the rental rate if you rent at an off-airport location and exit on our shuttle bus. Weekly rates require a 5-day minimum rental or daily rates apply. For weekend rates, the vehicle must be picked up after 9 a.m. on Thursday and returned before midnight on Monday or higher daily rates apply. 24-hour advance reservation required. May not be combined with other discounts. Availability is limited. All vehicles must be returned to the country of origin. Offer not valid in San Jose, CA.

NATIONAL CAR RENTAL TERMS AND CONDITIONS:

Customer must provide Contract ID# at the time of reservation to be eligible for discounts. Offer valid at participating National locations in the US and Canada. Minimum rental age is 25. This offer is not valid with any other special discount or promotion. Standard rental qualifications apply. Subject to availability and blackout dates. Advance reservations required. Geographic driving restrictions may apply.

TERMS AND CONDITIONS FOR WESTIN, SHERATON, FOUR POINTS, ST. REGIS, THE LUXURY COLLECTION, AND W HOTELS:

Offer is subject to availability. Advance Reservations required and is based on single/double occupancy. Offer not applicable to group travel. Additional Service charge and tax may apply. The discount is reflected in the rate quoted. Offer valid at participating hotel only. Offer valid for stays on Fri - Mon with a Friday or Saturday night arrival required. Rate available for this coming weekend only. Offer available only by making reservations via the internet. A limited number of rooms may be available at these rates.

X-FileName: FSTURM (Non-Privileged).pst

As you know, Enron Net Works (ENW) and Enron Global Strategic Sourcing (GSS) recently executed a two-year agreement, whereby MCI WorldCom would serve as Enron's primary telecommunications provider. In our previous communication, we indicated that we would provide you with more detailed information as it became available.

Beginning Friday, October 26, 2001 at 9 a.m. C.S.T, the procedure for calling Enron's Houston offices from international locations, excluding Canada, using the 800-97-Enron phone number will change. The new procedure is as follows:

1. Please dial the WorldPhone International Access number for the country where you are located (country access code), which is available on the attached wallet card, accessible through the following link: <http://home.enron.com:84/messaging/mciannouncement.doc>.
2. You will then be prompted for your PIN number. Since calling cards and pin numbers are not required to use this service, all users should respond by dialing 1-800-97-ENRON or 1-800-973-6766.
3. You will then be asked to enter your destination. Please dial 0-800-97-Enron (800-973-6766) to reach Enron's corporate offices in Houston.

This procedure can only be used to call 800-97-Enron from WorldPhone International locations. If you are calling from the U. S. or Canada, please continue to dial 1-800-97-ENRON.

If you have questions regarding commercial aspects of this agreement, please feel free to contact Tom Moore, GSS senior contract manager at 713-345-5552. For technical issues, please contact Hasan Imam, ENW IT manager at 713-345-8525.

Team, Please forward to Bob Superty, Mike Croucher and myself any directories yo
u currently use for everyday business. I already have identified the directory:

O:\common\logistics\gas\eastdesk\ as one that needs to move with a
ll of its subfiles. THANKS!!

Victor

Subject: Common Data Migration for Netco

To all, we are compiling a list of all common data (documents, excel spreadshe
ets, etc...) contained on our O:drive and M:drive infrastructure that will be re
quired for NetCo. The assumption is that no transactional deal type data will b
e migrated. Please forward any directory names that will be required for Netco t
o me. For example, O:\common\directoryname etc.....If there are additional peo
ple or resources that I can coordinate with please let me know. I am available
to meet and assist in anyway possible.

Thanks,

Mike Croucher

Today, Enron hosted a conference call to give investors a current overview of the company. Here's an update of what we discussed during the call.

We told investors that we're doing everything we can to protect their interests and to regain their confidence. Our focus remains on our credit quality, balance sheet and liquidity, which are essential for our continued success and expansion of our wholesale businesses.

It took more than a few weeks to get where we are today. Here's a snapshot of significant events that led to our current situation:

- In hindsight, we definitely made some very bad investments in our non-core businesses over the past several years. Those include investments in Azerbaijan, India and Brazil. They have performed far worse than we could have ever imagined when we made these investments;

- Because of these bad investments, we've become over-leveraged as a company. The negative impact of those investments was exacerbated through the extensive use of debt capital both on and off our balance sheet;

- We also entered into related party transactions that led to a loss of investor confidence, which has been very damaging;

- We've been criticized for our lack of transparency and our hard-to-understand financial and operating disclosures; and

- On top of it all, we discovered errors in our financial statements, as discussed in our 8-K filing last week, that required a restatement of previously reported earnings.

We've taken a new look at our businesses and have separated them into three areas: core businesses, non-core businesses, and businesses under review.

Core Businesses

Our core businesses remain strong and consistent sources of significant earnings and cash flows for the company. They're our competitive advantage. These include:

- Natural gas pipeline businesses;

- Gas and power businesses in North America and Europe;

- Retail businesses in North America and Europe; and

- Coal businesses in North America and Europe.

The events of the past few weeks have had a temporary negative impact on our

r projected fourth quarter profitability. It's too early to tell at this time what impact this might have on our operating results. We are considering these actions now so that we can quickly return to normal business in 2002.

I also remain optimistic that the actions we've taken over the past couple of weeks have addressed our customer and counterparty credit and liquidity concerns. According to our business unit leaders, we have definitely seen improvement in our counterparty relationships.

Non-Core Businesses

Our non-core businesses include our global assets group and our broadband division. We have invested more than \$8 billion in these businesses, and the return from them has been dismal.

We have an aggressive program in place to exit these businesses and expect that the sale of these businesses will generate billions of dollars in cash that we can use to repay debt and reinvest in our core businesses. We already have more than \$800 million in assets contracted for sale this year. They include CEG Rio, a gas LDC in Brazil; EcoElectrica, a power plant and LNG receiving terminal in Puerto Rico; and asset sales of offshore oil and gas properties in India. The approximately \$2.9 billion Portland General sale is also on target to close in late 2002 pending regulatory approvals.

Businesses Under Review

These businesses are comprised of those operations outside our power and gas wholesale businesses and include global and industrial markets. While several of these businesses have very strong future prospects, we need to determine if their capital requirements and near-term growth prospects are sufficient enough in terms of earnings and cash generation.

Reviewing our businesses this way will help determine where we need to make reductions to our work force. More information will follow as soon as it becomes available.

Credit Rating/10-Q Filing

We continue to meet regularly with credit rating agencies and believe that our liquidity enhancements and scheduled asset sales will strengthen our balance sheet and maintain our investment grade credit rating. Our current credit ratings by the three major rating agencies are as follows:

- Moody's at Baa3 "Under Review for Further Downgrade"
- Fitch at BBB- "Evolving Status"
- S&P at BBB- "CreditWatch Negative"

We also discussed our existing financial vehicles, including Osprey, Marlin and Yosemite, in further detail. We told investors that we will file our 10-Q five days late due to our current activities. It will be filed on Nov. 19.

We will continue to have updates with investors over the coming weeks as well as our frequent updates with you. The full transcript of our conference call will be filed with the Securities and Exchange Commission in the next few days. It will also be posted on our web site at www.enron.com/corp/investors under "SEC Filings."

=20

In connection with the proposed transactions, Dynegy and Enron will file a joint proxy statement/prospectus with the Securities and Exchange Commission. Investors and security holders are urged to carefully read the joint proxy statement/prospectus regarding the proposed transactions when it becomes available, because it will contain important information. Investors and security holders may obtain a free copy of the joint proxy statement/prospectus (when it is available) and other documents containing information about Dynegy and Enron, without charge, at the SEC's web site at www.sec.gov. Copies of the joint proxy statement/prospectus and the SEC filings that will be incorporated by reference in the joint proxy statement/prospectus may also be obtained for free by directing a request to either: Investor Relations, Dynegy Inc., 1000 Louisiana, Suite 5800, Houston, TX 77002, Phone: (713) 507-6466, Fax: (713) 767-6652; or Investor Relations, Enron Corp., Enron Building, 1400 Smith Street, Houston, TX 77002, Phone: (713) 853-3956, Fax: (713) 646-3302.

In addition, the identity of the persons who, under SEC rules, may be considered "participants in the solicitation" of Dynegy and Enron shareholders in connection with the proposed transactions, and any description of their direct or indirect interests, by security holdings or otherwise, are available in an SEC filing under Schedule 14A made by each of Dynegy and Enron.

Jim,

Well, you finally gave a speech that topped the one you gave at Linda's and my rehearsal dinner. You did an outstanding job (as did Carrin), and it was obvious you were speaking from the heart. I know you would prefer not to have all of this attention, but it comes with the territory. It sure made me proud to see you up there, and congratulations on the accomplishment.

Scotty

Dear Ms. Causholli,

TAD equals to through-air-drying, a process where hot air is blown in a drum through the paper web and drying it. It allows a higher bulk of tissue paper as the paper web is not pressed hard against iron as in the case of conventional drying. Higher bulk means softer paper and better absorbency properties, therefore it is preferred by companies aiming at very high tissue quality. I am not a technical expert but machinery manufacturers, especially Metso Paper's Honeycomb division in the USA could explain TAD in more technical terms.

AfH stands for away-from-home, i.e. uses in offices, industry, hotels, restaurants, hospitals etc. outside households.

I have not yet updated all the 2000 numbers but will do it within the next couple of months. Some data is very difficult to obtain, and thus updating takes a lot of time.

Best regards

Esko Uutela

IMPORTANT NOTICE

OASIS System
Version 2.3 Release

The OASIS system (<http://oasis.caiso.com>)
will be unavailable Thursday January 31st, 2002 at approximately 1530 due to
the deployment of the OASIS version 2.3 release.

Note: This release includes a new version of the XML Schema. If you have any
questions regarding the new schema, OASIS support will be on the TSWG
conference call on Wednesday, January 30th, at 1:30pm. Call in Number is
(877) 670-4111 Passcode 246870.

Release notes for this version are detailed below:

OASIS Version 2.3
Release Notes

Release Date: January 31, 2002

These release notes provide a summary of the new features and system
enhancements that have been implemented since the last release.

Note:
* Upon release of OASIS version 2.3, the new schema version
(oasisv002.xsd) must be used in order to validate XML files downloaded from
the site.

* Please clear all browser cache when accessing the OASIS site for the first time upon release of this version.

* If you are using a proxy server, clear proxy cache and verify that our site is added to the exception list to not cache or set cache with a minimum TTL.

New Feature Summary

Forecasts Tab:

Forecasted Line and Equipment Outages

* Added a column in this report that indicates the status of the outage record. The Status column will indicate whether the outage record has been inserted or if it has been deleted.

* Modified XML structure and Schema to accommodate the addition of the Status Field.
See details below.

Changes Effecting Customer

Automated Interface Development

Schema Update:

Included in this release is a new version of the XML Schema. This new schema is oasisv002.xsd.

The change to the schema is detailed below, including the new element "STATUS_TYPE".

```
<xsd:element name="DATA" maxOccurs="unbounded">
  <xsd:complexType>
    <xsd:sequence>
      <xsd:element name="STATUS_TYPE" type="xsd:string"
nullable="true" minOccurs="0" />
    </xsd:sequence>
  </xsd:complexType>
</xsd:element>
```

Attached is the oasisv002.xsd schema.

<<...OLE_Obj...>>

Forecasts Tab:

Forecasted Line and Equipment Outages

The XML structure includes the STATUS_TYPE tag.

"D" indicates a Deleted record

"I" indicates an Inserted record.

Marlo,

The name and number of the person to contact regarding the billing discrepancy for July 2001 is Mary Reid @ 213-244-3898. Gasselect clearly shows only one trade for 43,559 mmbtu's from account 2527 to Z99.

Mat

Thank you for making your purchase online with Expedia.com, one of the safest places to shop for travel! For your protection, our security systems review purchases for potential credit card misuse. If any misuse of your credit card is identified, we will contact you before processing the transaction and issuing tickets;

otherwise you can assume your e-ticket is confirmed.

For flight check-in and departure information, please contact your airline directly.

Your flight information appears below. It is also available online at the My Trips page at Expedia.com:
<http://expedia.com/pub/agent.dll?qscr=litn>

You can also make or review your car and hotel reservations from the same page.

If you are thinking about changing your flights, you can use our Exchange Calculator to find out what change penalties apply and what the new fare would be:
<http://expedia.com/pub/agent.dll?qscr=ewvs&itid=22713974>

If you need to get in touch with us about your flights, send an e-mail message to travel@expedia.com, or simply reply to this message. You can also reach our customer service team 24 hours a day at 1 (800) EXPEDIA (1-800-397-3342).

We're committed to providing you with the best travel service available anywhere, and we want to hear what you think. Please let us know how we're doing by filling out our online survey:
<http://expedia.com/daily/survey/survey.asp>

For information about your destination, please refer to our online guidebook, the Destination Guides:
<http://expedia.com/wg>

Depart: Denver (DEN), 7-Jul-01 at 5:00 PM

Arrive: Houston (IAH), 7-Jul-01 at 8:15 PM

Flight: United Airlines 1642

Aircraft: Airbus A319

Meal Service: Snack

Duration: 2hr 15mn

Distance: 876 mi

Economy/Coach Class

Your E-ticket is confirmed.

You will not receive a paper receipt, itinerary, or confirmation letter automatically.

We suggest you keep a copy of this e-mail or print a copy of your itinerary for your records; it may also be useful when you check in at the airport.

When you arrive at the airport on the day of your flight(s), give the ticket agent your last name, flight number and a government-issued photo identification to receive your boarding pass(es).

Airlines require government-issued photo identification upon check-in, such as a driver's license or passport. For questions concerning this requirement, please contact the airline.

A valid passport is required for international travel. Some countries also have visa and/or health requirements. Please check with the embassy of the country to which you are traveling or consult Expedia.com's Destination Guide:

<http://expedia.com/wg>

Have a great trip!

Expedia.com Travel Team

Don't just travel. Travel Right.

<http://www.expedia.com/>

When you use the American Express Card, you will not be held responsible for unauthorized charges online.

John, we just received an invoice from the above company for an electronic tagging service agreement that Bill Greenizan had executed last year. It is to renew

the ETS agreement for an additional one year commencing March 10, 2002 and is in an amount of US\$3,000. I am unsure what the purpose is of the agreement and whether ECC or UBSW need to continue it. Can you let me know what we should do with the invoice and agreement?

Thanks
Greg

Susan -
I just tested the schedule pull again and found one more deal type we need to exclude - ANNUITIES. The download pulls in purchase and sale annuities as regular forward purchases and sales, recognizing the average price as the total annuity price, which is, obviously, wrong. Anyway, when you get a chance could you exclude these deals from the query as well?

Thanks,
Kate

Thanks. Perfect timing, Kate. Check the on and off peak. Working on the archive schedule version - it's far too slow right now.

Susan -

This looks great. Now we've just got to tweak the on-peak and off-peak averages, and I think we'll be set. (Hopefully someone will get to use this someday!)

Thanks for your help,
Kate

HI Kate!

I changed the query for a couple of things. It was averaging per deal rather than per MW. The way a transmission schedule was excluded.

I also excluded 0 price and 0 volume schedules (let me know if this is correct).

Note: still testing the code for the on peak and off peak average - so just review the hourly ones.

Susan -

This is the last thing Susmitha sent me. If you look two e-mails down, you'll see the parameters I sent to her. The spreadsheet is still coming up with some weird numbers - all are much, much lower than actual average prices for these days. Would you mind taking a look at the query to see if all the appropriate deals are being excluded? Also, the spreadsheet doesn't pull in anything for the first half of November (i.e. when I try to download av. prices for 11/1/01, nothing comes up.)

Let me know when you get a chance to look at this. Thanks a lot!

Kate

Subject: FW: Spreadsheet.

Susmitha -

Bill sent me this spreadsheet to look over, and the prices it pulls look much too low to be an accurate average of our forward purchases and sales. My thought is that certain deals are being pulled into the query that should not be included. The deals in Enpower that need to be excluded from this query are:

1. Transmission
 - All deals under this heading in Enpower must be excluded
2. Forward
 - All purchases and sales to counterparty "California Imbalance" must be excluded
3. Buy-Resale
 - All deals with counterparty "EPMI California Pool" must be excluded

Please let me know if you have any questions about this, or if you'd like me to show you specific deals in Enpower to illustrate this.

Thanks,
Kate Symes

Susan,
Thank you. This looks good. To answer some of your questions, price is per mw, not per deal. Transmission deals, EpmiCalPool deals, and sales or purchases from the counterparty California Imbalance in Enpower need to be excluded.
Thanks,
Bill

Subject: spreadsheets

Bill,

Here's an outline of what we talked about for the average price spreadsheet:

Pull deals for WHourly at Mid-Columbia, WSCC_N, NP15, SP15, and (Palo Verde +) WSCC_S

In a tabular format display: Average price from the schedules for buys and sells for each hour in each region (i.e. Mid-Columbia, WSCC_N, etc.)

Underneath the table display:

On Peak average
Off Peak average

for later: (i.e. next version)
sort by groups: 24inc, EOL, EPEC

For clarification:
Average price is per MW not per deal?

I've asked Susmitha Nalluri to work on this for you. She sits 2 desks down from me and works on the VMS team. She has experience with spreadsheets, however she is not yet familiar with the EnPower view of the database. I have given her a query to give her a jumpstart on pulling the data you need from EnPower. She and I have also met to go over where the data is being pulled from. In my absence she can go to Lei, Pete, Matt or David about questions regarding the EnPower Data. I told her to feel free to ask you or Kate any questions. I brought her down to meet you and Kate but did not realize you both (as well as most people) had left around lunchtime.

Kate,

I told her you would be bringing her more information on the Dow Jones sheet. I forwarded Susmitha our earlier emails about it.

[IMAGE] [IMAGE] [IMAGE] November 12, 2001 Dynegey and Enron Announce Mer=
ger By Will McNamara Director, Electric Industry Analysis [News item fro=
m Reuters] Dynegey Inc. (NYSE: DYN) agreed on Nov. 9 to acquire rival Enron=
Corp. (NYSE: ENE) for some \$9 billion in stock, underlining the dramatic r=
eversal of fortunes for the Houston-based energy trading giant that was val=
ued last year at nearly \$80 billion. Enron's stock fell sharply in the past=
month due to investors' concerns about murky transactions that sparked an =
investigation by U.S. regulators and damaging downgrades by credit rating a=
gencies. The merged company will retain the Dynegey name. It will have annua=
l revenues of more than \$200 billion and assets worth \$90 billion, includin=
g more than 22,000 megawatts of electricity generating capacity and 25,000 =
miles of natural-gas pipelines. It will be North America's biggest marketer=
and trader of natural gas and electricity, positions previously held by En=
ron. Analysis: Well, it's now official. The announcement of what presumabl=
y will be the final chapter in the Enron saga came with much fanfare at the=
end of last week. It is indeed a dramatic end. Enron, the maverick and inn=
ovative company that has often been credited for literally creating deregul=
ated markets in the energy industry, will no longer exist after what has be=
en a very quick and unbelievable fall from grace over the last several mont=
hs. Dynegey, the slow and methodical company that took a more traditional ap=
proach toward success, is making a stunning acquisition of its formal rival=
and locking in much of the industry market share of Enron. Can there be an=
y doubt that this is the energy industry's manifestation of the tortoise an=
d the hare parable? Enron has clearly lost the race to Dynegey, but is makin=
g a smart choice to be bought, considering its desperate circumstances and =
the unlikelihood of its regaining financial strength on its own. For Dynegey=
, this acquisition is a major win, as the combination will create the bigg=
est and strongest energy merchant in the world. There are so many interes=
ting dimensions to this mammoth deal. Before addressing some issues related=
to the approval of the deal, let's establish some of the key points of the=
merger agreement. There have been some mixed reports, but it is generally =
believed that Dynegey is buying Enron for about \$10 a share, quite a steal c=
onsidering that just over a year ago Enron was trading at close to \$90 a sh=
are and had a market value of nearly \$70 billion. Under terms of the agreem=
ent, Enron shareholders will receive 0.2685 Dynegey shares per share of Enro=
n common stock. Dynegey's current stockholders (including ChevronTexaco Corp=
. , which currently owns 27 percent of Dynegey) will own approximately 64 per=
cent of the combined company, while Enron's stockholders will own approxima=
tely 36 percent of the combined company's stock at closing. In addition, =
Dynegey will provide an immediate \$1.5-billion asset-backed equity infusion =
into Enron to help the company with its current financial woes, followed by=
an additional infusion of \$2.5 billion into the combined company by Chevro=
nTexaco. Chuck Watson, chairman and CEO of Dynegey, will retain his position=

at the new company. Steve Bergstrom, president of Dynegy, and Rob Doty, chief financial officer, will retain their positions at the new company. It is not presently known what role, if any, Ken Lay, current CEO of Enron, will hold at the new company. Of course, this acquisition could not have taken place if Enron had not fallen into a very vulnerable spot this year. Quite literally, Enron was pushed into this deal because it was running out of cash, its stock had tanked and its credit ratings were slashed to junk levels, all within the last several weeks. Enron's decline over the course of 2001 has been the result of losses in its telecom sector, losses from its involvement in India, the departure of its former CEO Jeffrey Skilling, a Securities and Exchange Commission (SEC) investigation into some of its business practices, and lack of investor confidence about Enron's honesty in its financial reporting. This last point gained validity last week when Enron announced that it had overstated earnings by 20 percent over the last four years and investors should disregard the company's financial statements from 1997 through the first half of 2001. The restating of its earnings for the last five years sliced \$591 million from Enron's reported profits. In addition, Enron revised its debt upward in each year from 1997 to 2000. At the end of 2000, Enron's debt was \$10.86 billion, \$628 million more than it had previously reported. By not reporting this debt earlier, Enron presumably was able to maintain a stronger credit rating than it would have had the accurate records been disclosed. The key value for Dynegy in this acquisition is Enron's successful energy trading business. In addition, Dynegy could also find synergies in Enron's retail unit, Enron Energy Services and EnronOnline, the company's electronic trading unit. Dynegy has a similar trading site known as Dynegydirect, which was launched after Enron gained the first-strike advantage in this market space. Details are still emerging, but it would make sense if Dynegy opted to not purchase other units under Enron's business structure, such as the company's water and telecom businesses, which are losing money. Dynegy has its own telecom unit, which has also lost money this year, so it may not want to expand in this slow-growing sector at this time. Vivendi Environnement, a French company that has expanded into various lines of business, has reportedly expressed interest in the remaining subsidiaries of Azurix, Enron's struggling water subsidiary. Note that Enron sold Azurix North America to American Water Works. The deal is subject to regulatory reviews and shareholder approval from Dynegy and Enron shareholders. Dynegy shareholder approval may be contingent upon any possible downgrades on its long-term debt that Dynegy could encounter with the purchase of Enron. At this juncture, it does not appear that Dynegy will be downgraded, but this is a fast-changing story and conditions could change abruptly. Financing the deal may also be an issue, even with the infusion of capital from ChevronTexaco. Dynegy reportedly has \$3 billion worth of debt and has a market capitalization of \$11.7 billion. Thus, Enron's own more substantial debt may be too significant for Dynegy to absorb, a concern that may cause Dynegy shareholders to veto the deal. This issue could be helped if Dynegy only elects to purchase some of Enron's assets and if there is some repair work done on Enron's balance sheets. The issue of regulatory approval could be difficult, as the combination of the two huge companies may cause regulators to be concerned about market power and antitrust issues. The review of this merger will be unprecedented, considering that the wholesale natural-gas and electricity trading market is still fairly young. Certainly, a deal of this magnitude has not previously occurred in the deregulating energy industry. It is not presently clear which regulatory agency will be involved in the review, although the Federal Energy Regulatory Commission (FERC), the Federal Trade Commission and the Justice Department could all be involved. FERC would most likely become involved only if the acquisition includes the transfer of a physical asset, such as a pipeline. FERC may not become involved if the deal is structured solely as an exchange of stock. Not involving FERC would be more advantageous for Dynegy and Enron as the timeline for approval would be significantly shorter. An issue that at most likely will be at the top of the list of review items for regulators would be the extent to which the combination of Enron and Dynegy would ho-

ld market power in the natural-gas trading space, which could pre-empt market entry by other competitors. The combined company would be considerably larger than its nearest competitors. Scope and scale are considered the top competitive assets in the trading sector, and the combination of Dynegy and Enron will certainly have those assets in abundance. It will fall on regulators to determine if the combined company is so large that it precludes other competitors from emerging into the same space. To say that this deal is a sweet victory for Chuck Watson is an understatement. The two rival companies followed very different paths to success. Enron, under the leadership of Jeffrey Skilling in particular, espoused an unorthodox belief that the company did not need to own physical assets in order to achieve success in the energy-trading space. Dynegy, on the other hand, approached the market from the opposite perspective, and diligently acquired diverse generation assets across the United States and internationally to support its trading operation. Up until the start of 2001, it appeared that Enron's strategy was the more successful of the two. Enron, with \$100 billion in revenues and \$1 billion in profits in 2000, ranked fifth on Fortune 500's list of largest U.S. companies. In contrast, Dynegy ranked 54 on the same list and had \$2.9 billion in revenues and \$500 million in earnings. However, 2000 turned out to be Dynegy's year and the success continued into 2001, the very year that would bring Enron's downfall. Enron's problems culminated in \$638 million in losses in the third quarter, after taking \$1.01 billion in charges associated with several of its non-core businesses. Taken with the other factors plaguing the company, Enron became exceptionally vulnerable and prone to a takeover, which has now provided Dynegy with a strong gain. The purchase of Enron will literally quadruple Dynegy's size and should immediately provide an accretive earnings contribution. Further, Dynegy claims that it expects a 15- to 20-percent annual earnings growth over the next three years following its planned acquisition of Enron. If it gains all of the necessary regulatory approvals, Dynegy will become the undisputed market leader in the energy industry, with annual revenues of \$200 billion and \$90 billion in assets. The company will have 22,000 MW of generating capacity, which moves it closer to the previously established goal of accumulating 70,000 MW by 2005. In other words, the combined company will dwarf any other competition in the trading sector and be considerably ahead of its nearest competitors such as Mirant or Duke Energy in terms of size, resources and assets. Word of the acquisition caused Enron's shares to increase some, one of the few upward bumps that the company had experienced in the last few months. Shares of Enron rose 44 cents, or 5.2 percent, to \$8.85 in mid-day trade on the New York Stock Exchange on Nov. 9. As of early morning trade on Nov. 12, Enron shares were priced at \$9.40. Shares of Dynegy gained \$2.24, or 5.8 percent, to \$41 in early trade on the New York Stock Exchange. An archive list of previous IssueAlert articles is available at www.scientech.com. Sherry and Johnny Bains have put together a great package for the 31st at the Tribute. Time will be from 8:30 until 1:30 am.

Package details:

Valet service

2 blackjack tables manned by trained Vegas dealers

Special midnight countdown with champagne toast

Open Bar!!!

Two for 1 golf coupon at the Tribute (cost normally around 100 on weekends)

Menu to include (served between 9- 11:15 pm) Shrimp and Oysters with Caviar;

Smoked Salmon, Smoked whitefish; fresh asparagus;

Spicy beef mini sandwiches; goat cheese with

crackers; chef carved NY strip lion; filet of salmon with saffron risotto;

Supreme of chicken and sun dried tomato-cream

sauce; basil mashed potatoes and more.

Midnight Buffet will include black-eyed peas, mustard greens, corn bread, & assorted French pastries.

Other items will be a DJ and his cost will be divided up later (maybe around 5 bucks)

Also available are suites if need to stay the night. Need to reserve the suite with the Tribute at 972-370-5465.

Price??? Well Sherry did a great job negotiating this one because the Tribute wanted to charge 140 and that did not include gratuity. (Over 160?)
Price is 100 which includes taxes and gratuity (but not the DJ or suite if you plan on staying)

Need to know soon by December 22nd. Call Sherry at 972-370-1881 or e-mail her at champersgal@aol.com.

Sent: Tuesday, May 29, 2001 7:44 AM

To: Masters, Dan

Subject: Fw: "H?EGH GALLEON" - DELAY AT ALGECIRAS, SPAIN.

Dan,

Good morning,

Ref our conversation yesterday, 28th, re a brief report regarding our delay in Algeciras. Please find enclosed what we have received from our technical dept.

Subject: "H?EGH GALLEON" - DELAY AT ALGECIRAS, SPAIN.

A brief recap of the feed water pump event:

- On 2001-05-22 the vessel reported that one Weir type main feed water pump was malfunctioning. Order for spares was received late same afternoon.
- On 2001-05-23 supplier of Weir pump parts confirmed only partial delivery as main parts were not in stock at factory in Scotland. Alternative pump delivery, Coffin type, was investigated through Dutch supplier Marship Engineering. Availability at factory in USA was confirmed and an order was placed accordingly as per owners instructions.
- On 2001-05-25 at 1900 hrs the new Coffin pump arrived in Paris on flt no. FX5060 from New York and was immediately loaded on to an exclusive truck for transport to Algeciras, arranged by Marship Engineering in Rotterdam. Arrival time in Algeciras scheduled for 2001-05-27 0900 hrs.
- On 2001-05-27 at 0715 hrs the vessel dropped anchor off Algeciras for scheduled crew change, embarking and disembarking service engineers and stores/provision/fresh water supplies.
At abt 0730 hrs the vessel's Master called and informed that the pump delivery was delayed. Marship Engineering was immediately contacted and at abt noon time they informed that due to strict drive -/rest restrictions for truck drivers the transport was heavily delayed. It was revealed that the transport company had supplied only one driver for the transport. All kinds of remedial action and alternatives were evaluated and the transport company put under heavy scrutiny for corrective action.
Owners decided the vessel should wait for the pump to arrive.
- On 2001-05-28 at abt 1930 hrs the pump arrived in Algeciras where it was custom cleared and transported to "H?egh Galleon".
At 2200 hrs the vessel lifted anchor and sailed for Lake Charles.

brgds/NBR

++

Best regards

Kjell
Hoegh LNG

Subject: The Future

Hey, I'm older than you, therefore my life expectancy is less. So I have much less time to spend QUALITY time with Little Wilbur. I propose that I stay home and be a house husband. You would have a hot (oatmeal) meal waiting for you when you get home. The dog would love you, the cat would love you, I would love you.....

What do you think?

You are invited to attend the following presentation:

PSIM: A Power Simulation Tool

PSIM is a proprietary model developed by Enron Research Group.

? It takes Power, Gas, Weather and demand information into consideration and
nd uses Monte-Carlo simulation to assess the expected deal value and risk d
istribution.
? It evaluates complex electricity related contracts such
as Full Requirement and load following contract.
? It also provides a valuation tool for power assets and asset management
deals.
? It works for both deal specific or portfolio issues.

In this presentation we will show how the model can be used to deal with various
types
of contracts, explain the model structure and point out further applications.

Date: October 30, 2001
Time: 4:00 pm
Location: EB5C2
Presenter: Alex Huang

Registration is required for a head count.
Please call Shirley Crenshaw at 3-5290 to register.

Pizza and soft drinks will be served.

We've updated the Merger Q&A document on our Enron Updates site (<<http://home.enron.com/updates/mergerQA.html>>), as a result of the many questions you've had concerning the merger between Enron and Dynegy. Questions addressed include those about Enron stock options, benefits and immigration status. Please stay tuned for additional updates.

Subject: Project Fireball (personnel question)

Michelle,

The Coal group has a question related to personnel they would acquire from Vulcan if they purchased the marketing rights to their coal. In this scenario, there are 4 marketing employees which would come to Enron as a part of the deal. A few things:

In this case, I'm assuming these employees would resign from Vulcan and Enron would extend the appropriate offer. Secondly, Enron's purchase of the marketing rights will be for an 18mo to 3 year trial period. At the end of the trial period, if Enron returns the marketing rights to Vulcan (or current owner), they want the right to re-call these employees. George McClellan is ok with the right to recall, but I am not sure how/where to put this in writing ie; in the deal agreement, offer letter, etc.

Thanks,
Shanna

Attached is a simple power origination case study that I have developed for use at MBA functions as an alternative to a generic one-hour presentation about Enron. It will be used for the first time at Georgetown tomorrow. I thought this tool, or a derivative thereof, could also be useful in early identification of potential "Origination Track" Associates from the Associate pool, as it covers issues related to project development, risk analysis, financial evaluation and debt financing.

I would be happy to think together with you on changes to the case that would enhance its value to the Origination Track program.

Regards,

Chip Schneider

We currently have an opening as an administrative assistant in the Government and Regulatory Affairs department reporting to Paul Kaufman and Alan Comnes. If you are interested in this position, please let Amy FitzPatrick know by close of business on Friday, September 21, 2001.

The ideal candidate will support members of the Government and Regulatory Affairs team and perform the following complex administrative duties:

Answer and screen phone calls, handle client requests, greet external clients, and build business relationships
Compose memos, reports and other correspondence from a brief outline, "sketchy" draft or verbal instruction
Code invoices, process complex expense reports, and manage employee timekeeping through SAP
Make travel/meeting arrangements based on minimal instruction and periodically make independent decisions on details such as travel schedules, mode of transportation, and accommodation.
Monitor and control filing systems ensuring accuracy and efficient retrieval of data.

The successful candidate will be detail oriented, have good organizational skills and possess the ability to work in a fast-paced environment with multiple concurrent assignments. At least 5 years of secretarial/administrative experience and above average communication and interpersonal skills is required. Excellent typing, proofreading, spelling and grammatical skills, and strong PC skills with Work, Excel, and PowerPoint are a must. The ability to identify work priorities and function with very little supervision is essential.

- Free Agent Updated 12/28/01
<FONT FACE="Arial, Helvetic
a">Finneran is listed as probable with a knee injury. He is expect

ed to play this week.

Tyrone Davis, TE GB - Free Agent Updated 12/28/01
Davis has been elevated to the No. 2 tight end slot over rookie David Martin. He will see a considerable amount of playing time now that he is healthy, because Green Bay employs many double tight end sets in the red zone.

Oronde Gadsden, WR MIA - Matty Updated 12/28/01
Gadsden has been practicing this week and may be able to play. But his hamstring injury may limit his productivity.

Steve McNair, QB TEN - Free Agent Updated 12/28/01
McNair was limited in practice on Thursday. He is still expected to play this week, but he is a risky Fantasy starter because he will be less than 100 percent healthy.

Jimmy Smith

, WR JAC - Frank Updated 12/28/01
Smith (flu) has missed practice time this week. He is still expected to play.

Joe Horn, WR NO - Matty Updated 12/28/01
Horn suffered a minor shoulder injury in practice on Thursday. He is expected to start this week.

Aaron Shea, TE CLE - Free Agent Updated 12/28/01
Shea (shoulder) has been placed on injured reserve. O.J. Santiago will continue to be Cleveland's No. 1 tight end while he is out.

Jason Brookins, RB BAL - Tori Updated 12/28/01
Brookins has returned to practice and is listed as probable. But he still may not see any game action until Week 17.

Emmitt Smith, RB DAL - Bass/Hull Updated 12/28/01
Micahel Wiley may miss this week's game with a hip injury. Smith is expected to appear on third downs this week as well as assuming his normal workload.

James Thrash

, WR PHI - Frank Updated 12/28/01
Thrash (ankle) returned to practice on Thursday. He is expected to play this week.

Wesley Walls, TE CAR - Free Agent Updated 12/28/01
Walls missed practice on Thursday with a knee injury. He may be a gametime decision this week.

Maurice Smith, RB ATL - Frank Updated 12/28/01

A banged-up Smith Toe/knee) will continue to start for the Falcons. But Dan Reeves has indicated Rodney Thomas will continue to get some work at halfback.

Bob Christian, RB ATL - Free Agent Updated 12/28/01

= "Arial, Helvetica">Christian is day to day with a calf injury. He is expected to play this week.

Stephen Davis, RB WAS - Bass/Hull Updated 12/28/01
Davis (knee) has returned to practice. He is expected to start this week.

Todd Bouman, QB MIN - Free Agent Updated 12/28/01
Bouman took a few snaps Thursday but didn't appear to meet coach Dennis Green's "full strength" criteria for starting against Green Bay. Spergon Wynn is likely to start Sunday, though coaches didn't discuss the issue after Thursday's practice. Bouman didn't participate in the team's morning walk-through, when players work on plays without fully suiting up. And during the portion of the regular practice that reporters were allowed to watch, Wynn took more snaps than Bouman. A trainer said Wynn continued to take more snaps later in the closed portion of practice.

Jerome Bettis, RB PIT - Giggles Updated 12/28/01
Bettis, sidelined by a groin injury, returned to the practice field Thursday for the first time in a month. "Still questionable," coach Bill Cowher said. "He did more today. We'll see how he feels (Friday) and go from there. We'll take it day to day."

Doug Brien, K IND - Free Agent Updated 12/28/01
Brien signed a one-year contract Thursday night with the Tampa Bay Buccaneers, who will use him against Baltimore if Martin Gramatica can't kick this week. Gramatica strained his right hamstring during a 48-21 victory over the Saints last week. Coach Tony Dungy hasn't ruled him out for Saturday night's game against Baltimore, however the club!

club wanted to have a backup plan in case the Pro Bowl kicker isn't ready.

Ahman Green, RB GB - Hunter Updated 12/28/01
According to the Pro Football News and Injury Report, Green has asthma, but he has practiced fully this week and will start against the Vikings.

James Thrash, WR PHI - Frank Updated 12/27/01
Thrash is listed as questionable with an ankle injury, but he is expected to play against the Giants.

Patrick Jeffers

, WR CAR - Free Agent Updated 12/27/01
Jeffers may see some increased playing time this week because of Muhsin Muhammad's persistent toe problems. Isaac Byrd, however, still should start in Muhammad's place.

Sebastian Janikowski, K OAK - Matty Updated 12/27/01
Janikowski (groin) has been kicking in practice. He is expected to play this week.

Terrence Wilkins, WR IND - Free Agent Updated 12/27/01

Wilkins (hamstring) has returned to practice. He may be able to play this week.

<A HREF="http://football299.fantasy.sportsline.com/mp/elink

k?script=players&league=bige01&owner=78977.7&random=4024&key=12181">Stephen Alexander, TE WAS - Free Agent Updated 12/27/01
Alexander (leg) was placed on injured reserve, officially ending his season. Walter Rasby will continue to start in his place, but Zeron Flemister has emerged as the team's best receiving tight end with Alexander out.

Matt Hasselbeck, QB SEA - Bass/Hull Updated 12/27/01
The <i>Seattle Times</i>

says Hasselbeck's season might be over. Mike Holmgren said he would only use him in an emergency this week, and the Seahawks coach may elect to have Hasselbeck use the season's final two games to rest his injured shoulder. Trent Dilfer will start at San Diego this week.

Amos Zereoue, RB PIT - Free Agent Updated 12/27/01
Zereoue missed practice on Wednesday with a shoulder injury. He is listed as probable for this week.

Todd Bouman, QB MIN - Free Agent Updated 12/27/01

Bouman practiced without pads on Wednesday. If he cannot practice fully on Thursday, Spergon Wynn will get the start this week.

Attached below are the two files for TW CMS/TMS requirements on flow direction and current process for inside/outside the path requirements.

Please review these documents and let me know if you have any questions or corrections to apply to either document by COB 8/31/01.

Linda, please keep me in the loop on both of the projects since they interface directly with TMS.

Thanks Ramona

The resume for Jeff Huff was inadvertently dropped from the message we s
ent yesterday evening. The resume is attached below for your convenience.

Below are a few points for your review:

Resume: Currently the second most productive Partner at Diamond-Cluster, a techn
ology consulting firm. He has been a consultant dedicated to Enron for the last
2+ years, first for Tom Gros in EBS and Net Works and then for Dan Reck in Freigh
ht, developing trading systems.

The Job: We are looking to bring Jeff in as VP, Commercial Support. The demands
of growing the group require a consistent focus on technology, expenses, front
and back office productivity, as well as constant re-analysis of growth strategi
es.

Justification: Jeff's capabilities in these areas make him extremely qualified.
We rely on him heavily already, but at consulting rates he costs us more than \$1
.3mm per year and his focus is limited to technology. Most importantly, the lead
commercial folks in the group are overburdened with administrative issues and s
pending too little time bringing in earnings.

Thank you.

Mike and Jeff

Attached is a new link for employees unable to attend the all-employee meeting today at 10 a.m. (CDT) at the Hyatt Regency Houston, Imperial Ballroom. If you are located in London, Calgary, Toronto, Omaha, New York, Portland (ENA) or Houston, you can access the live event at <http://home.enron.com/employeeemeeting>.

The following additions and modifications to Stack Manager will be effective as of Saturday September 8, 2001.

Stack Manager Modifications

Inactivate All Stack - In addition to the individual Activate/Inactive Stack buttons, there is now an Inactivate All Stack button. Similar to the Suspend All button, this button will inactivate the trader's stack on all active products. Any existing top of stack limit orders will continue to post to the website and remain transactable. See screen shot below: Inactivate All Stack button on far right.

Please note that we have switched the positions of the suspend and inactivate buttons in Stack Manager.

Fill Order - If a product is set up as either Restricted Top of Stack or Top of Stack the trader now has the ability to automatically fill any order that is at the top of the stack. In order to fill a limit order that is at the top of the product's stack, which will appear in pink, the trader should right click anywhere on the stack window and choose "Fill order". The volume filled on an order will be that which is offered by the trader. In order to fill the complete volume of the order, the trader will need to adjust the volume in his stack.

Floated Stack windows - If the stack is inactive on a product, the price and volume fields on the my products tab will continue to be blank. On the depth window and floated stack window of these products the trader's prices will be in gray and italics. Children of products that have inactive stacks will not be gray and italicised in the floated stack windows and will not see the calculated prices.

No Auto Inactivate Stack - It is now possible to keep a product active even if the trader is not logged into Stack Manager. If the trader wishes to enable this functionality on the upper right corner of the product properties page the trader should choose "No Auto Inactivate when Stack Manager is down".

Changes regarding Suspension of products

Stack Manager will inactivate products rather than suspend them in the following cases:

? Market Close - If a product is active at the end of its trading hours its stack will automatically become inactive rather than suspending. In order to keep a product's stack active past the set trading hours, the trader should choose "Keep Awake" next to the trading hours section of the product properties page.

? Auto Suspend now inactivates stack - On a product with the Auto Suspend function enabled to monitor the price changes on the product, the product's stack will be inactivated if the Suspend at level is reached. This feature can be used by checking the Enable box on the product properties page under the Auto Suspend section.

? Logging Out of Stack Manager- When you log out of Stack Manager without inactivating or suspending your products, the system will now inactivate your products rather than suspending them.

Dutch,

Below is a list of floor brokers that we use for options.

Clarion	(212) 590-1410	we have a direct line
Mann	(212) 590-1388	we have a direct line
CRW	(212) 590-4128	we have a direct line
SCS	(212) 590-4080	we have a direct line
Refco	(212) 590-1307	we have a direct line
Capital	(212) 738-6838	
Chicago	(212) 590-1676	
ABN	(212) 273-6808	
Energex	(212) 590-1394	
CARR	(212) 590-4932	
HQ	(212) 738-5757	
VTM	(212) 590-3911	
Paramount	(212) 590-3731	
Nova	(212) 738-6610	

I think this is a total list. Let me know if you have any questions or concerns.
. Thanks.

John

There is one correction to the mapping below. December 8, 1999 should be Version 07 (current) minus (V-06 previous +T02).

Preschedule@sce.com
Subject: EAFB PDA Additional Energy Scheduling Changes
Importance: High

Paul,

As I indicated in my follow-up call this afternoon, the following procedure should be used to make any scheduling changes to the Basic WAPA Allocation, Excess Energy, or Additional Energy during the month in which a monthly preschedule was agreed by the parties (prior to the beginning of the month).

1. Contact the SCE Day Ahead Prescheduling line at: 626-302-3320 and inform them of the Scheduling Change and that the change will be confirmed via FAX or e-mail.
2. Send a confirmation note with the Scheduling Change via FAX to: 626-302-3213, or via email at: presched@sce.com

As we have indicated in prior communications, Edwards will be assessed an Additional Scheduling and Dispatch (AS&D) charge (currently \$131.00) for each change that is made to any of the Schedules. This charge is in addition to the daily Scheduling and Dispatch charge of \$131.00 per day for each delivery point (Mead, Blythe, and SP-15) where energy is scheduled for delivery to SCE.

Please communicate this procedure to the Enron and WAPA energy scheduling folks.

Please let me know if you have any further questions.

Ray Haug, Project Manager
CSBU Technical Support

Hello, only me!

Happy New Year to you and your family! I hope you all had a lovely Christmas & New Year.

I ate too much and didn't drink enough because I wanted to be able to drive and visit people. The first drink I had was New Year's Eve, my mum and I went over to my brother & his girlfriend in Hayes (I DROVE & MY MUM SURVIVED!). We went out for a meal and stayed the night so I could have a drink. It's the first New Years my brother and I have ever spent with our mum so it was very nice.

I'd love to see some pictures of little Scott's first Christmas.

Take care & all the best for 2002

Richard:

I understand from Elliot that we want to keep the spreadsheet of EES positions separate from our Fundies site.

I started a file at O:\Portland\WestDesk\RenewablePowerDesk\Shared\Internal intelligence\EES Position based on the info. you provided to Jesse in an e-mail dated 10/8.

The spreadsheet is attached.

*Will this spreadsheet meet our needs?

*Is the location suitable?

-How limited should access to this be?

*What is the most efficient mechanism by which to update this information - i.e., will you update it directly, or coordinate with me?

Thanks,

Jenny

Here are the updated files with the total throughput for both TW and NNG as well

as the TW EOT Revenues.

Note that the Burlington contract #25025 under the SJ tab really should belong under the EOT tab. However, since you already provided the SJ spreadsheets, I went ahead and deleted from the EOT spreadsheet that Jeanette forwarded to me). Please let me know if you have any problems.

Earlier today, I stepped down as Enron's Chairman of the Board and Chief Executive Officer. This decision was reached in cooperation with Enron's Board and the Creditor Committee and is effective immediately.

To emerge from bankruptcy, Enron needs a CEO who can focus 100 percent of his or her efforts on rebuilding the company. Unfortunately, with multiple inquiries and investigations that require my immediate attention, at this time I am unable to fully concentrate on what is most important to Enron's stakeholders - preserving value for our creditors and our dedicated employees.

The Creditor Committee has begun a search for a restructuring specialist to serve as interim CEO to help the company emerge from bankruptcy. This individual will join Enron's remaining management team to direct the company's ongoing operations.

I truly believe Enron can and will survive. I will remain a Director of the Board to help see that it does.

During my time at Enron, I have witnessed tremendous change and opportunity. I have seen people rigorously grow and maintain one of the world's most efficient and safest gas pipeline networks; I have seen people dedicate themselves to a cause that became a passion - the opening of energy markets; I have observed smart people come together as a team to build creative solutions like EnronOnline; and I have watched people tirelessly give of themselves to help their fellow employees and those in the community. Regardless of what has happened, I am proud of so much of what we were able to accomplish here.

Thank you for your contributions to the company and for the inspiration you have been to me over the years.

Ken Lay

Sabra,

I have extended the current FP&L sitara #217969 to the end of the deal (2/2010). Keeping the same deal # helps us keep up with the value.

I set it up with the volumes we booked in TAGG, I know the volumes and locations will change but if you could send me and Yuan an e-mail when you have made your change during bid week we will make the changes to the hedge deal.

Thanks,

Kam

ps. Scott, you will not see any problems with this deal in the future. Sorry for the trouble.

Re: Revisions to TransCanada's Transportation Tariff
<p>TransCanada has updated the General Terms and Conditions (GT & C)
of the Mainline Transportation Tariff. This

amendment was proposed in the Fifth Report of the 2001 Tolls Task Force
(TTF Resolution 06.2001 Balancing Service

Changes) and was approved by the National Energy Board by letter dated
September 14, 2001.
<p>Accordingly, a new version of the General Terms and Conditions and Table
of Contents page are available on-line at

TransCanada's website at http://www.tr
anscanada.com/
or through NrG at http://www.nrgex
pressway.com/.
<p>If you have any questions, please contact me by e-mail at <a href="tim_
wells@transcanada.com">tim_wells@transcanada.com
or by telephone at

403-920-7150.

Mike/Jeff,

As indicated in the list of deals and interested cps that we sent you yesterday, we closed a transaction with Japanese trading company, Kobayashi Yoko, this afternoon. Kinoshita and Anai had been working this company and had already gotten basic documentation and credit approval in place. We had also gotten prior approval from Sheila Glover and Gary Hickerson to use the local metal's trader to handle FX swaps up to USD30MM. Commodity and FX risk (except for 4 days from contract settlement) have been hedged with Singapore and ENA. Not a big deal in and of itself (notional USD250k), but a start. We believe there is much more demand and plan to see more in the near future. Also expect to see first LPG deal with Marubeni with our new mid mkt "trader" very shortly. We would back to back transaction as well. Details of this transaction are as follows:

Enron Japan sells Dubai swap to Enron Singapore

Month: March 2002

Volume: 12,500bbls

Price: 20.24\$/bbl

Enron Japan sells US\$253,000 to ENA

Value date: 5 April 2002

Price: 118.92Y/\$

Enron Japan buys Dubai swap from Kobayashi Yoko

Month: March 2002

Volume: 12,500bbls (=1,987.34 kl)

Price: 15,110Y/kl

October 19, 2001 5:00pm through October 22, 2001 12:00am

SCHEDULED SYSTEM OUTAGES:

ECS power outage

A power outage will occur in Enron Center South on Saturday, October 20, 2001 to complete repairs to the electrical riser system required to correct issues resulting from Tropical Storm Allison.

IDF's and thus network resident applications and data will be off line on all ECS floors 3 through 6 from 10:00 a.m. Saturday until 8:00 a.m. Sunday.

Trading floors 3, 4, 5 and 6 desktop power will be off beginning 2:00 p.m. Saturday until 12:00 noon Sunday.

Avaya telephony phone system will be unaffected. However, the turret system will be offline starting 11:00 a.m. Saturday until 1:00 p.m. Sunday.

Additionally, during this power outage the cooling system will be upgraded. This upgrade may take up to 2 hours. Occupants in the building may experience as much as a five degree rise in temperature.

T

Sat 10/20/2001 at 5:00:00 PM London thru Sat 10/20/2001 at 6:00:00 PM

London

Outage: Telephony Apps IP Switch Replacement

Environments Impacted: All

Purpose: Replace old 2924 switch (Token Ring config) with 2 new 2948s to minimize the exposure to critical telephony applications in the event of IP switch failure. New switches can also be added to the Paging System. Critical telephony applications currently sharing 1 switch include all voice mail. Loss of network connectivity would prevent anyone from accessing their messages.

Backout: Revert to old switches.

This is a copy of your message sent to BreckBuddy@talkmatch.com -->

Hello,

I ran across you picture and was very impressed. I sent along my profile, take a look. If there is any interest, write back, I'd sure like to hear from you.

Click the following link to view the sender's profile:
<http://www.match.com/doubleblind/showprofile.asp?UserID=484948454C4B4E&trackingid=65685>

The following is my profile text:

Hello, I'm a down to earth person that likes to laugh and have a good time. I work in downtown Denver as a commodities trader for a large energy trading house. I do enjoy my career but understand life needs to be kept in prospective and be balanced. I enjoy activities over sitting and watching, but I have been known to sit in front of the TV and watch football or college basketball all day. I'm looking for someone who enjoys life and doesn't take themselves too seriously.

ADDITIONAL TIPS from Match.com:

Our anonymous re-mailer will strip away your real email address, so that it will NOT appear in the 'From:' line.

You may also contact this person from their Match.com profile by clicking 'Contact this person' and composing your message directly from the site.

However:

* Check to ensure that your email address is not in the BODY of your message as we are unable to remove these.

* Check to ensure that you REMOVE ANY AUTOMATIC SIGNATURE at the end of your email. And note that you cannot use 'Cc:' or 'Bcc:' if you want your email to remain anonymous.

Match.com does not monitor private email between members, nor are we liable for the content of these messages. All members are bound by our Match.com Service Agreement.

We have offered re-employment to Dierdre McCaffrey and she has accepted effective today. We need to reinstate her back to December 5, 2001. Robert Jones is handling all needed paperwork, etc. Dierdre was in EGM-Freights Markets prior to being terminated on 12/03/01. Prior to EGM, she spent numerous years in various positions in wholesale gas structuring, trading, and origination. She was instrumental in identifying, evaluating, and negotiating most of our gas asset management transactions. She worked with Laura Luce and team on the Peoples' Gas transactions, and she will be critical in ensuring we maintain and optimize these contracts and positions going forward. She will be working with Laura Luce in the Enron Estate.

Thank you.

Dear Medicine Bow Shipper:

Yesterday, we filed with FERC for approval of the fifth tie-in segment (to
gate #6) contracted for 115 Mdth/day. This will bring the firm capacity
of the Medicine Bow system to 495 Mdth/day. We will notify you as soon as
we have approval.

Please call me if you have any questions.

Laine Lobban

Subject: Transit on the Web Up Grade

January 9, 2002

To: All Transcontinental Gas Pipe Line Customers, Shippers,
Producer-Suppliers and Other Interested Parties

Transit on the Web is upgrading its mainframe operating system. Customers, who have not done so already, will need to upgrade their version of QWS3270 from 16-bit to 32-bit. QWS3270 is the tool used for Confirmation Ranking, ONE Contracting and Capacity Release.

We are asking that all of our Transit customers upgrade to the 32-bit version by February 7, 2002. The Transit Home Page contains a link with directions to determine your version (16-bit or 32-bit). It also contains necessary information to upgrade if needed.

If the upgrade is not completed by February 7, 2002, customers may not be able to access Confirmation Ranking, ONE Contracting and Capacity Release.

If you have any questions or if you are a customer using Windows NT, please call the Transit Help line.

Margaret E. Kleiner

Manager

Transportation Scheduling

If you are a participant in the Enron Corp. Savings Plan, please read this very important message.

We understand that you are concerned about the timing of the move to a new Savings Plan administrator and the restricted access to your investment funds during the upcoming transition period scheduled to take place beginning at 3:00PM CST on October 26 and ending at 8:00AM CST on November 20.

We have been working with Hewitt and Northern Trust since July. We understand your concerns and are committed to making this transition period as short as possible without jeopardizing the reconciliation of both the Plan in total or your account in particular.

Remember that the Enron Corp. Savings Plan is an investment vehicle for your long-term financial goals. The Enron plan will continue to offer a variety of investment opportunities with different levels of risk.

As always, we advise you to review your overall investment strategy and carefully weigh the potential earnings of each investment choice against its risk before making investment decisions that are aligned with your long-term financial plans and your risk tolerance.

For that reason, it is critical that ALL trades among your investment funds be completed by 3:00 PM CST Friday, October 26 before the transition period begins.

Jeff,

Here's the full list, 1945 - 1959. Good luck and let me know if it works.

Also, thank you for taking time to do the Intern orientation yesterday, I really appreciate your involvement.

Billy

P.S. If you see Ken, tell him he doesn't have to worry about sharing the cell with Spike. I hear guys with tattoos are afraid of the dark. Those were the most irresponsible comments I've ever heard from a public official.
